****The 1400 W power rating is based on the appliance being connected to a 240 V power supply. Actual power rating may vary depending on the voltage.

Highlights

Sleek design, looks great

The Philips handheld steamer 5000 is ready to steam when you are. Simply set the head to steam clothes on a hanger or a flat surface, and steam away. The adjustable tilting head means it's easy to pack for travelling and can be stored away quickly and easily at home.

Ready to use in 35 seconds

Super easy to use, the Philips handheld steamer 5000 heats up in as little as 35 seconds. You can forget setting up a big old clunky ironing board - now you don't need one. Just steam and de-wrinkle clothes on hangers, or on a flat surface. Job done.

Choose from Eco and Max settings

The Philips handheld steamer 5000 will help you get rid of pesky creases on anything in your wardrobe that's ironable. Eco is your ideal energy-saving default setting. Max, with a stronger steam rate, is great for tougher wrinkles and fabrics like cotton.

Pointed tip for tricky creases

The Philips handheld steamer 5000 has a pointed tip, designed to get right into the trickiest corners and smooth out even the most complicated folds, ruffles and cuffs. That means all your most delicate and detailed pieces will be ready to wear whenever you want. No outfit is off limits.

Powerful steaming, great result

On Max level, the Philips handheld steamer 5000 gives you an impressively high steam output for a handheld steamer (Up to 1400 Watts** with an up to 24 g/min continuous steam rate). So you can easily de-wrinkle your favourite outfit at top speed and with no compromise.

Detachable water tank

The Philips handheld steamer 5000 comes with a 120 ml detachable water tank, so it's super easy to refill when you need to steam for longer, and easy to empty before storing away or packing for a trip. To keep our product style on point, the water tank features a stylish ripple pattern that beautifully depicts the graceful flow of water.

Made with recycled plastic

For every thousand Philips handheld steamer 5000 devices that we sell, we reduce the use of virgin plastic by as much as 295,000 plastic straws. So you can feel good while you're steaming, not just when you put on your outfit afterwards.

Kills 99.9% of bacteria

For maximum freshness, the Philips handheld steamer 5000 kills 99.99% of bacteria. So you can feel super confident that the outfit that you're about to put on is extra clean and fresh, whether it's been through the wash or has been already worn.

2-in-1 GlovePouch for travel

The Philips handheld steamer 5000 comes with its own 2-in-1 travel accessory, so you can keep it tidily stowed away and safe from bumps wherever you go. And whatever outfit you take with you can be safely steamed in minutes, as the travel pouch transforms into a safety glove, which additionally protects you from accidental steam burns at home or away.
