WHAT'S NEW & IMPROVED

PRODUCT UPDATE

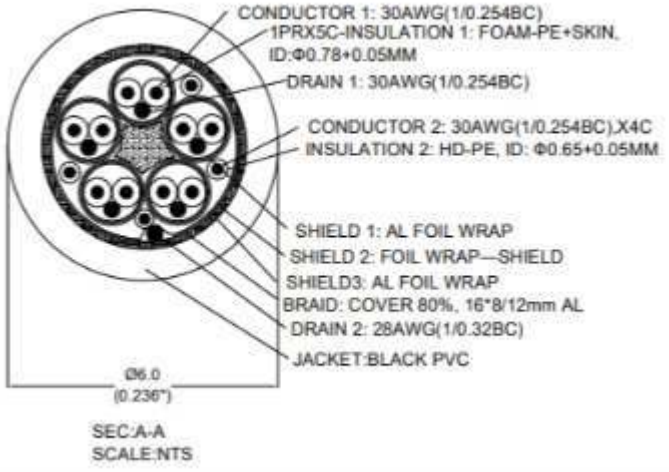

C2G
A brand of legrand

PRODUCT:

- Core Series High Speed HDMI® Cable with Ethernet

MODEL DESIGN

In our ongoing commitment to enhancing product quality and performance in line with industry standards, we have made minor updates to the raw cable conductor material and minimum bend radius.

WHAT HAS CHANGED?

1. **Raw cable conductor material** changed from **stranded copper** to **solid copper**.
2. **Minimum Bend Radius** of **1ft to 10ft cables** (CG50606-CG50610, CG56781-CG56784, C2G21000-C2G21005) changed from **R42mm** to **R48mm**.
3. **Minimum Bend Radius** of **10ft** and **12ft cables** (CG50611, CG50612) changed from **R51mm** to **R58.4mm**.

We have upgraded to solid copper conductors to deliver better performance and reliability for HDMI connections. Due to the change, the cable is now slightly stiffer than the old version. If you require a more flexible HDMI cable, please consider our Plus Series Slim Flexible (CG41361-CG41364, C2G41398) or Performance Series Ultra Flexible (C2G10373-C2G10386, C2G10399-C2G10402) product lines.

During this transition period, you may continue to receive shipments of the previous product model until existing distributor stock is depleted. Both the old and new models meet our strict quality standards.

If you have any questions or require additional information, please don't hesitate to contact us. We appreciate your continued support and look forward to providing you with our improved product.
