

G10137 Dinamiko | INDUCTION HOB

► DESCRIPTION

Induction cooking works through an induced magnetic field that interacts with the pot's base heating it. This technique means significant benefits in terms of ecology and economy: the energy is directly transferred to the pot, reducing heat losses and decreasing cooking time. Dinamiko has adjustable power from 200 to 1800W and you can also set the temperature from 60 to 240°C and time from 0 to 3 hours. For your safety, it's equipped with an anti-overheat system and automatic shutdown in case of wrong, empty or absent pan. The large cooking area is ideal for pots from 12 to 26 cm and the glass surface is very easy to clean. The super-slim design gives Dinamiko an elegant and modern outlook.

► TECHNICAL FEATURES

- | | |
|--|---|
| ✓ Power: 1800W | ✓ Super slim design: thickness 50 mm |
| ✓ Regulation of plate: power 200-1800W, temperature 60-240°C | ✓ Digital display, Soft-touch control panel |
| ✓ Timer 0-3 hours | ✓ Pan diameter: min 12cm, max 26cm |
| ✓ Power supply: AC 230V ~ 50/60Hz | |
