External RAID enclosure for 2x 2.5" SATA SSD

Failure safety or performance

Double the security of your data by mirroring with RAID 1 or push the performance of your drives and data transfer rates to the limits with RAID 0. Use each installed drive separately with SINGLE mode or the entire available storage volume in LARGE mode.

Data transfer at top speed

With USB 3.2 Gen 2 you enjoy data transfer rates of up to 10 Gbit/s without waiting times or delay and can transport files from one drive to another within seconds. To suit your current equipment best, the IB-RD2253-C31 comes fully equipped with both a USB Type-C® and a Type-A cable.

Compact and resilient

The enclosure is made from aluminium and therefore very durable. Designed with passive cooling and without a fan, both professional and private workplaces benefit from this very silent setup. A status LED keeps you informed about the current state of the installed drives at all times.
