Xerox® VersaLink® C625 Color Multifunction Printer and Xerox® VersaLink® C620 Color Printer

Is personalization, future readiness and built-in security too much to ask for? Small enough to fit where you need them and fast enough to support high print volumes, these smart Workplace Assistants are made for high performing work teams. The C625 offers multifunction agility with print, copy, scan and fax, while the C620 delivers flawlessly for print-centric needs.

COMPACT WITHOUT COMPROMISE

Make the most out of every square foot of your office space with the small footprint of the C625/C620. Outrageously capable, these workhorses take up less space but get just as much work done. They're perfectly sized for scaled-back office spaces and hybrid work environments, where space is a premium and there's no room for disruption.

AUTOMATED PRODUCTIVITY

Get up to speed in no time with a tablet-like touch screen that balances simplicity and time-saving efficiency. The familiar, intuitive user interface (UI) guides you through tasks, eliminating extra steps. And the ability to personalize the UI provides the freedom to work the way you want, allowing you to breeze through functions.

Mobility features, such WiFi Direct, take the hassle out of printing directly from your favorite mobile devices. And with VersaLink printers, more capabilities means added convenience, not more complexity. Leading-edge scanning functionality and automation of complex physical and digital workflows allow you to scan[1], digitize and route information without missing a beat, reducing errors and saving time.

DISRUPTION-READY TECHNOLOGY

Your work is always evolving, so you need technology that's always a step ahead. The Xerox® ConnectKey® Technology-enabled VersaLink adjusts quickly to the evolving needs of your organization.

Translator. Proofreader. Do-it-all digitizer. Now you can tackle whatever work throws at you. Stay ready with the Xerox App Gallery, an ever-growing portfolio of cloud-hosted apps and productivity tools. You can also tailor solutions to your specific needs through the Xerox Personalized Applications Builder.

And with access to the optional Xerox® Workflow Central Platform, a cloud-based solution that takes the guesswork out of converting physical and digital files into usable formats right from the VersaLink user interface, even complicated work processes are simple. For example, summarize a lengthy report, translate it and share with your team in just a few quick steps.

SMARTER, MORE SOPHISTICATED SECURITY

The Security Dashboard simplifies printer security management on the VersaLink C625/C620. A comprehensive range of proactive security features stop security threats where they start, preventing malicious attacks, proliferation of malware, unauthorized access or changes and breaches that lead to downtime.

To simplify security event reporting and management, VersaLink Devices can integrate with Security Information and Event Management (SIEM) Tools. Proactive features constantly monitor, detect and block threats in real time. And automated security responses provide invaluable time savings and peace of mind.

IMAGE QUALITY THAT'S A CUT ABOVE

Color is what turns basic, everyday prints into brilliant communications. High-resolution output of 1200 x 1200 dpi enhances your documents with sharp text and striking image quality.

SUSTAINABLE THROUGH AND THROUGH

Made up of more than 25% post-consumer recycled plastic, the VersaLink gives new meaning to being environmentally responsible. These devices meet the strictest globally recognized standards for product environmental performance, including EPEAT, Blue Angel and ENERGY STAR®. The Xerox® Green World Alliance® program simplifies collection, reuse and recycling of spent imaging supplies. This program is central to our commitment to waste-free products.[2]
