

soundcore Space One

Turn Down the Crowd

2X Stronger Voice Reduction: Stay focused during bustling journeys with our upgraded noise cancelling structure. Space One excels in blocking out mid to high-frequency sounds with 2X more* voice reduction.

Reduce Noise By Up to 98%: Adaptive noise cancelling detects external sounds and sound leakage, auto-calibrating to deliver optimal noise reduction. Escape unwanted distractions, whether you're on a noisy train, in a bustling café, or your headphones aren't sitting on your ears properly.

Journey with Hi-Res Audio: Space One's 40mm customized dynamic drivers support LDAC for Hi-Res Wireless audio, delivering 3X more detail than standard Bluetooth codecs for detail-rich listening without any tangled wires.

40 Hours of ANC Playtime: Embark on blissful journeys with 40 hours of playtime with ANC on. 55 hours of continuous music with ANC off ensures endless entertainment without battery concerns.

soundcore Space One

Turn Down the Crowd

Crafted for Comfort and Style: Elegantly designed, 8° rotating ear cups effortlessly conform to the contours of any head, and a soft integrated headband evenly distributes pressure for natural prolonged wear.

5 Levels of Transparency: Adjust your ambient sound and make conversation easier. With 5 levels to choose from, experience the world around you exactly the way you want.

Adaptive Ear Cups: A floating axis design allows the ear cups to rotate 8° either way to fit all head shapes, and the ergonomic headband sits comfortably on your head without any pressure.

Multi-Mics for Enhanced Call Clarity: Be heard clearly on calls even in the busiest of crowds. Multiple mics hone your voice and lower unwanted sounds so the other end can hear you clearly.

Smart Wearing Detection: The built-in light-sensitive infrared sensor constantly monitors the wearing status of Space One. Once you take them off, music automatically pauses and resumes once worn.

Pair with Multiple Devices: Pair Space One with multiple devices seamlessly, so you can conveniently switch between your phone, laptop, or tablet. Your headphones will automatically switch to the device with audio playback.
