Highlights

For a thorough clean
Unique cross-shaped nozzle creates four wide streams for a thorough clean interproximally and along the gingival margin.

Guides from tooth to tooth

Brief pauses in the cleaning pulsations prompt your patients to glide the nozzle to the next interproximal space to ensure a whole-mouth clean.

Whisper quiet design

Engineered for a discreet clean, so your patients get great results without disturbing others.

4 modes, 10 intensities

Your patients will enjoy a clean that's tailored to their needs. Clean mode uses a continuous flow of water for a great everyday clean; Deep Clean uses distinct pulses for a more thorough clean; Sensitive mode is extra gentle for sensitive gums; Massage mode soothes and stimulates the gumline. Your patients can adjust the intensity for their comfort using the LED light display as their guide.

F3 Quad Stream nozzle

For maximum coverage and an extra thorough clean, use the Quad Stream nozzle to concentrate water into four wide streams between teeth and along the gum line. The soft rubber guide is gentle on gums and every nozzle simply clicks on and off.

F1 Standard nozzle

Standard nozzle for power cleaning between teeth to remove plaque and debris

Easy magnetic dock

When the patient is finished, they can simply return the handle to the easy magnetic dock. The handle automatically switches from pause to off.

600ml reservoir

The 600ml resevoir with easy flip lid holds enough water for one cleaning. To refill simply lift out, fill, and click back in.

Compact nozzle case
The patients can store extra nozzles hygenically in a compact and stylish nozzle case.
