

RollerMouse Red

The perfect choice for ergonomics and performance

RollerMouse Red is a series of centred mice that ensures you have variation and control when spending many hours working in front of your computer. RollerMouse Red comes with three different wrist support options: Red, Red Plus and Red Max. The standard wrist rest is great for those with small to medium hands. Red Plus has a deep and low wrist rest, providing a better angle if you have slightly larger hands and Red Max is an integrated arm support relieving strain on shoulders and neck. All models have an anti-bacterial wrist rest in vegan leather and memory foam. Built with up to 61% pre-consumer recycled aluminum (varies per model) and certified packaging.

Control at your fingertips

No matter if you work with one or more screens, RollerMouse Red has been optimised to facilitate screen navigation. The large and textured patented Rollerbar controls the cursor and clicks precisely, allowing you to work fluidly with your fingers and thumbs.

Combine with a Balance Keyboard with adjustable tilt to maximize the ergonomic benefits.
