Short Description

Practical chest freezer with a capacity of 500 litres.
The box has a strong insulation that ensures efficient freezing with low operating costs and a freezing capacity of 22.5 kg/24 hours. In addition to the fact that the chest freezer provides large and flexible capacity, it is also easy to operate and easy to clean.

The chest freezer has a "two in one" function, which means that the freezer can run in a temperature range of -24°C to + 5°C, so the freezer can also be converted into a cold room.

The chest freezer can stand in dry environments down to -15°C, which is optimal if, for example, it is to be placed in a garage.

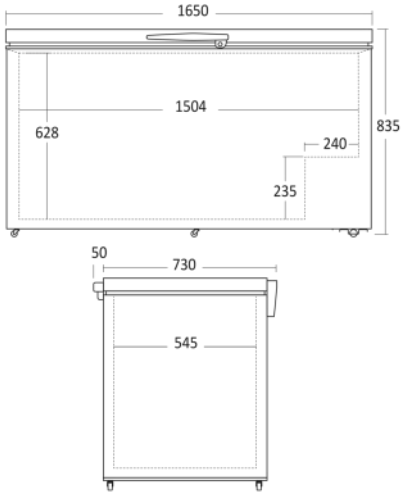

The design of the door, frees your hands, with the different angles of 45°-75° with the opening door. It is very comfortable to have both hands free.

Integrated energy-saving LED light in the lid provides a good overview in the box.
