TRACER VOUGE-3 30000MAH
POWER BANK

- Weather reports
- IP67
- 300 mAh battery
- Dedicated DaFit application

With the 1.39" display and 360x360 resolution, it is a highly distinctive part of your look.

Sharp and clear-cut colours make all information on the screen crystal clear (time, app data).

The SMR11 HERO connects to your smartphone via Bluetooth 5.2 BLE.

When paired, it can display notifications and messages and make and pick up calls thanks to BT calling.

The high-quality microphone and speaker contribute here as well.

The watch can be used for up to 18 days before recharging, thanks to its 300 mAh battery.

Battery life, obviously, depends on how often you use the watch's functions. The charging cable has a magnetic plug.

Elegance, chic, style.

The quality of the materials makes this watch look very impressive. Adapt the watch face to any outfit or mood. The faces can be personalised via the smartphone app or directly on the watch.

That's not all. The watch has 3 elegant matching straps: black, navy blue, and army green. A different, exceptional colour scheme every day. Shine.

Health and fitness. With today's rapid pace of living, we all want to know how our bodies are getting by. With the watch's advanced functions, you can monitor your blood oxygen level (SpO2), heart rate, blood pressure, sleep quality, and hydration level. The remote control means more time for pleasure and a healthy lifestyle.

Among the additional functions of the smartwatch, you will find many sports modes for the most popular activities.

Combined with the application, the functions help you track your progress and set goals.

Classical alarm, stopwatch, timer, weather report, and music player controls are our everyday helpers.

Find your smartphone quickly with the phone finder and save time.

1 PRODUCTS

The watch comes with a special mode for women to track their menstrual cycle and register the first day and duration of the period.
