

5-port and 8-port 2.5G Multi-Gigabit Ethernet Plus Switches

Expanding Wired Connectivity for SOHO Networks

NETGEAR is expanding its portfolio of next-generation 2.5G Multi-Gigabit Ethernet Plus Switches with the introduction of the new MS305E and MS308E. These switches come with 5 or 8 2.5G Multi-Gig ports in a durable metal case and are designed to seamlessly integrate into any business environment.

Featuring fundamental network capabilities such as network monitoring, traffic prioritization, VLANs, QoS, IGMP Snooping, and an intuitive web-based GUI, these switches provide an adaptable network solution with effortless management. Plus Switches are the perfect upgrade from plug-and-play Unmanaged Switches, delivering essential networking features at an affordable price.

Highlights

- Enable network configuration and management at the price point of Unmanaged Switches
- Simple, yet useful network set-up on top of plug-and-play connectivity
- Business-friendly and easy-to-use web browser-based management GUI
- VLAN support for traffic segmentation
- Quality of Service (QoS) for traffic prioritization
- Auto "denial-of-service" (DoS) prevention
- Troubleshoot connection issues via cable test
- Loop detection and broadcast storm controls
- Rate limiting for better bandwidth allocation
- Port mirroring for network monitoring
- Jumbo frame support
- Fanless, silent operation with desktop and wall-mount options
