• Crusader Grandmaster	26
• Crusader Grandmaster with stand	36
 Product Specifications	46

Over two years in the making, the InFocus Quantum LED Crusader series of lifestyle projectors use the finest of materials and incorporate our custom deep purple colour with a matt finish, which is applied to selected portions of the housing and the colour-coordinated remote control. Designed in the UK, the series includes:

- Crusader Challenger
- Crusader Master
- Crusader Grandmaster
- Crusader Grandmaster with Stand

Experience Large Screen Magic Anywhere

Crusader Challenger
Crusader Master

The Crusader Challenger and Crusader Master share the same cubist industrial design with rounded corners and a silicone carry handle secured with brushed aluminium fasteners on each side of the projector, allowing portability as well as negating the need to touch the main body of the projector or any of the lens and sensing elements.

The Crusader Challenger and Crusader Master incorporate a tactile, smoothfinished keypad into the top surface of the projector with audible feedback when pressed.

High-quality optics and TOF (time of flight sensors) support innovative optical features: auto keystone correction and autofocus. With a 14.9cm by 12.7cm footprint, the Crusader Challenger and Crusader Master are just 50% larger than the most recent iPhone Pro Max.

Our engineers and designers have accomplished an astonishing design with a cubic volume of just under 2820 cm, comparable to a small tissue box. and a weight of 1.37Kg considering each projector incorporates a six-cell 5200mAh battery, which delivers up to 10 hours of music in Bluetooth mode and between 2.4 to 3.1 hours of viewing time on a single charge.
