This wireless controller for PC & Switch is equipped with three connection possibilities for a wide range of use on different platforms. The focus is to provide a premium feeling in your hand, using a smooth IML injection finish of the top cover, and high quality buttons with hall effect sensors. Adjustable LT & RT triggers to customize the response time for different

This wireless controller for PC & Switch is equipped with three connection possibilities for a wide range of use on different platforms. The focus is to provide a premium feeling in your hand, using a soft IML injection finish of the top cover, and high quality buttons with hall effect sensors. Hall effect sensors ensure that every input is on point and adjustable LT & RT triggers let you customize the response time for different games. The 2x macro buttons allow for easy access to custom actions during gameplay. There is also adjustable RGB in the joysticks that you can turn off to maximize the battery time and get up to 17h of immersive game play with the big 1000 mAh rechargeable battery. Connects through Bluetooth 5.1, USB receiver, or wired USB-C.
