COMBO DRIVE

Diagram illustrating the installation of 2.5-inch and 2.5/3.5-inch combo drives into the front panel of the HP ProLiant Gen8 server. The top part shows the drives being inserted into the front panel. The bottom part shows the front panel being attached to the server chassis.

The diagram illustrates the PAX 1000 server chassis. The main view shows the chassis with the front door open, revealing the internal components. The front door is hinged on the left and has a latch on the right. Inside the chassis, there is a large fan at the top, a drive bay with five bays, and a power supply unit at the bottom. The chassis is labeled 'PAX' on the right side. A separate view of the front door shows the fan assembly and the latch mechanism.
