

Secure Network Management Card System

For NMC3 used with Power Distribution Units, 3-Phase.

1-Year Secure NMC Subscription is included with all PDU devices

Remote monitoring and visibility across IT infrastructure is mission critical as without remote monitoring you risk unexpected issues and downtime.

The Schneider Electric Network Management Card (NMC) enables essential and secure remote monitoring and management of your critical power UPS and PDU devices.

Connecting your devices will improve the availability, resiliency and efficiency of your power infrastructure systems and the IT workloads they support.

Updating your NMC firmware matters

More and more cybersecurity breaches are linked to **neglected firmware**.

Proactive firmware updates help to protect your infrastructure to the highest level of cybersecurity thereby minimizing potential downtime.

Enterprises reported an attack
on firmware

Report 2021)

Our new Secure NMC System will help you:

Reduce exposure to attack – Protect your connected devices with the latest security updates.

Achieve consistent compliance – Stay compliant with changing regulations and resilient for the entirety of the card's life.

Never become out-of-date – Stay ahead and easily manage and deploy firmware updates.

Activate your included subscription

The included 1-Year Secure NMC Subscription is activated at time of installation by your Schneider Electric service expert.*

*For 3-Phase PDU with NMC3
purchased from April 2024

The NMC firmware is included with EcoStruxure™ IT Expert and Data Center Expert.

Flexible options (to extend subscriptions)

Subscription Part #	Subscription License & Term
SWNMC3PPDU-1Y-DIGI	1 Year subscription for Power Distribution Units, 3-Phase
