

MK2 RGB

With its stylishly low-key front panel and a side panel made of tempered glass, the MK2 RGB is a micro-ATX case that doesn't miss out on good looks as well as being perfect for either gaming, office or multimedia PCs. And whatever the application, there is plenty of potential for performance thanks to modern compatibility, installation space for large pieces of hardware, and room for up to eleven fans.

Features

- LOW-KEY LOOK WITH HARDWARE SHOWCASE**
 With its unobtrusive design and the tempered-glass side panel, the MK2 RGB is ideal for putting the focus on the installed hardware inside.
- TWO PRE-INSTALLED FANS**
 Two 120 mm fans are already pre-installed in the MK2 RGB – one fan behind the front panel and one RGB-illuminated PWM fan on the rear panel. Up to eleven fans will find room in the case.
- DUAL-RADIATOR SUPPORT**
 Water-cooling enthusiasts will be happy with the MK2 RGB too, as two radiators can be simultaneously operated, if required.
- SUPPORT FOR BTF MAINBOARDS**
 Apart from conventional mini-ITX and micro-ATX mainboards, the MK2 RGB is also compatible with almost all BTF formats on the market.
- IDEAL CONNECTIONS**
 To connect a wide range of mobile and peripheral devices, the MK2 RGB has a modern TRRS and USB-C port on the front of the top panel. In addition, a controller provides the connection and operation of up to four LED components and four PWM fans.
- SPACIOUS DESIGN INSIDE.**
 The MK2 RGB can accommodate large graphics cards of up to 41 cm, while mounting support is provided by a rubberized graphics card holder. In addition, CPU coolers with a height of up to 17 cm can be installed, as well as power supply units with a length of up to 23.5 cm. And there is installation space for up to two 3.5" HDDs or three 2.5" SSDs.
