## Supports baby's individual drinking rhythm

### A teat that works like a breast

This Newborn Gift Set is ideal to start feeding and soothing. With the Natural Response Teat, babies can drink at their own rhythm like on the breast, and it's easy to combine breast and bottle feeding. Finding the right teat is important. See below.

#### Easy to combine breast and bottle feeding

- Natural latch on with breast-shaped teat
- Teat releases milk when baby actively drinks

#### Other benefits

- Choose the right teat flow for your baby
- Same products, new navigation
- ultra soft soother, for your baby's sensitive skin
- No-drip teat design prevents spills and lost milk
- Compatible across the Philips Avent range
- Easy to hold even for little hands
- Simple to use, easy to clean and quick to assemble
- Natural Response Teats and Bottles are BPA free\*
- Bottle brush with curved head for easy cleaning

#### Vents air away from your baby's tummy

#### Finding the right teat is important

## Highlights

### Natural Response Teat

The Natural Response Teat works with your baby's natural feeding rhythm, making it easy to combine breast feeding and bottle feeding. The teat has a unique opening which only releases milk when the baby actively drinks. So when they pause to swallow and breathe, the milk pauses too.

### Natural latch on

The wide, soft and flexible teat is designed to mimic the shape and feel of a breast, helping the baby to latch on and feed comfortably.

### Finding the right teat is important

We all learn at our own pace. Suckling is a skill and some babies develop it quicker than others. That's why some babies might initially benefit from our "First Flow" teat (Teat 0) before progressing to the Natural Response teats. Switch to the "First Flow" teat when your baby takes longer than 20 minutes to drink 50 ml/1.7 oz using the Natural Response teats. Try a Natural

Response teat with a higher flow rate if your baby is playing with the teat instead of drinking or seems frustrated. If feeding difficulties persist, consult a healthcare professional.

### Anti-colic valve

Anti-colic valve is designed to keep air away from baby's tummy during feeding, to help reduce colic and discomfort.

### No-drip teat

The teat opening is designed to release milk only when the baby is feeding. So you can confidently avoid milk loss whether at home or on the go.

### Find the right teat flow

Every baby feeds differently and develops at their own pace. We've designed a range of flow rates so you can find the perfect one for your baby and personalise your bottle. All of the Natural Response Teats are made of soft silicone.

### Same products, new navigation

We have moved to a pace-based flow navigation system. Start with the teat that comes with the bottle. Try a lower flow if milk is leaking from your baby's mouth or your baby is gulping. Try a higher flow if your baby is playing with the teat instead of drinking or seems frustrated. As we make this change, you may receive either style of pack.

### Simple to use and clean

The wide bottle neck makes filling and cleaning easy. Only a few parts for quick and simple assembly.

### Easy to hold

The ergonomic bottle is easy to grip at any angle to give maximum comfort during feeding. Easy for your hands and tiny hands to hold.

# Highlights

### ultra soft soother

The super soft, flexible shield follows the shape of your baby's cheeks, leaving fewer marks and causing less skin irritation, for more comfortable soothing.\*

### Bottle brush

Specially curved brush head and moulded handle-tip reach the corners of all wide neck bottles, teats and feeding products for thorough cleaning.\*

### Compatible across the range

Mix and match our breast pump, bottle and cup parts and create the product that works for you, when you need it.

### BPA-free\*

The Philips Avent Natural Response bottles and teats are made of BPA free\* material. Plus, all the Natural Response teats are made out of soft silicone.

### Be patient as your baby adjusts

Our new Natural Response Baby Bottles are different from free-flow baby bottles. Just like breastfeeding, it could take a few tries to get it right. That's perfectly natural.
