SPEED PLUS microSDXC UHS-I U3 Class 10 Card

The SPEED PLUS microSDXC memory card features a maximum transfer speed of 180MB/s and is suitable for drones, action cameras and other devices. It complies with V30, A2, and other standards, supports high-definition recording and multi-tasking, and is the best choice for adventurers.

SPEED PLUS Storage Evolved

SPEED PLUS microSDXC memory cards can be used in a variety of devices such as drones, action cameras, 360-degree photography, head-mounted devices, etc. Maximum transfer speed can reach 180MB per second, with excellent read/write performance and capacity.

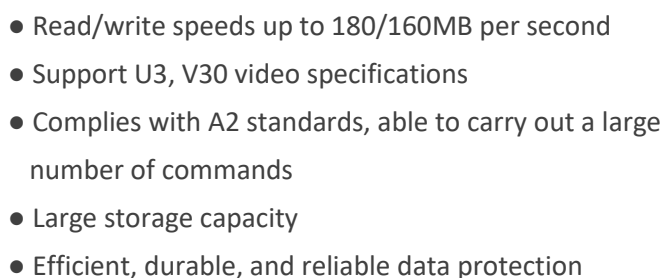

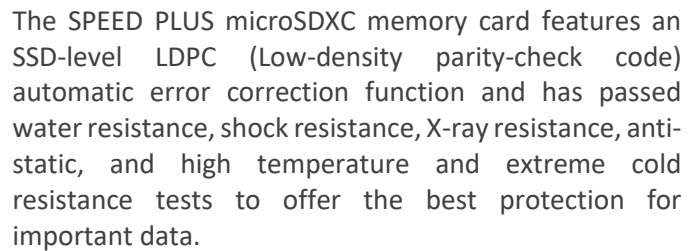

Load Seamlessly with A2 Standard

The SD Association has released a new A2 standard, allowing SPEED PLUS microSDXC memory cards to provide a minimum random read speed of 4,000 IOPS and a minimum random write speed of 2,000 IOPS. This standard also optimizes the access and loading time of system applications, handles multiple simultaneous commands, and saves power.

The SPEED PLUS microSDXC memory card supports high-definition motion image processing such as Full HD, 3D surround view, and 4K Ultra HD, and can maintain a minimum write speed of 10MB per second in a stable manner, faithfully recording every wonderful moment and making professionals more professional.
