Part I: Physical Safety Assessment

SECTION 1 – Description	
Item/Concept Name:	52728
Detailed Description:	Kick 'N Swish 3-in-1 Multi-Use Ball Pit
Materials Used:	PVC
Age Grading:	Over 2 years

Executive Summary

SECTION 2 – Foreseeable Use	
Intended/Foreseeable Use	The item will be used as intended; The item may be used on the lawn, yard, and floor without water.

SECTION 3 – Mechanical/Physical Compliance Findings	
EN71-1	**Europe** The product is likely to comply with the requirements for children more than 2 years based on the play feature, construction and design. Non-conformity was not identified during this review, but the following requirements should be noted for the compliance. - Mold flash shall not be present - No sharp point/edge can be found - Materials used in the toy shall be clean

SECTION 4 – Product Design Evaluation	
Risk Assessment Recommendations:	
Major Concerns	**Submersion/Drowning** The padding pool may present drowning hazard as it will be filled with water and young children will play in it. The risk is slightly reduced as following warnings were found on the pool: For example: “Warning. Prevent Drowning. Children under 5, especially toddlers are at high risk of drowning. Closely watch children who are in or near this pool. Empty pool or prevent access when not in use.” “Warning! Children have drowned in portable swimming pools. Ensure active adult supervision at all times. Do not leave children unsupervised in or around the pool – keep them within arms’ reach. ” “Warning! Never leave your child unattended – drowning hazard.” *Action: this hazard can be reduced by making sure the pool not hold too much water and alerting the consumer that the padding pool should be used under adult’s supervision all times.* **Tip over** While using the item in outdoor and the water level is not so much, children playing inside the pool may tip over if there is a strong wind, or if children lean on the inflate wall as the item doesn’t has any anchor to fix it on the floor. *Action: this hazard can be reduced by always keeping adult supervision and making sure the weight of children is distributed evenly. The pool put on the lawn also can slightly reduce this hazard.*

Minor Concerns	**Airway obstruction** There may present an airway obstruction hazard if stopper and plastic film became detached. However, the hazard is slightly reduced as no small component was detached after test. *Action: this hazard can be reduced by:* - *making sure all stoppers are well attached and be capable of being pushed into the toy in order to protrude length less than 5mm from the surface of the toy when inflated.* - *Making sure over-flow rims are well treated to shorten protruding length less than 2 mm.* **Fall down** Children may slip down while playing inside the pool when the bottom surface becomes wet, there may be present fall down hazard. *Action: Always keeping adult supervision can slightly reduce this hazard.*
Critical Manufacturing Concerns	Heavy elements content and raw materials should be controlled, especially phthalates. Mould flash and process splinter should be well controlled throughout production in order to minimize the laceration hazard from sharp points on the items. Using toxicologically safe ingredients for the adhesive of repair patch. The item should be manufactured in a clean environment and this should be closely monitored throughout production to avoid external contamination.

SECTION 5 – Flammability	
EN71-2	This product is likely to comply with the requirements of EN71 Part 2.

SECTION 6 – Hygiene	
Hygiene	Toys must be designed and manufactured in such a way as to meet hygiene and cleanliness requirements in order to avoid any risk of infection, sickness or contamination (New Toy Safety Directive 2009-48-EC).

SECTION 7 – Radioactivity	
Radioactivity	This product has no characteristic related to this hazard.

SECTION 8 – Applicable European Directives, Regulations and Harmonized Standards	
Applicable Standards	**EU** Toy Safety Directive (2009/48/EC) - EN 71-1 Safety of toys - Mechanical and physical properties - EN 71-2 Safety of toys - Flammability - EN 71-3 Safety of toys - Migration of certain elements

SECTION 9 – Labelling Assessment	
CE Mark	Yes Note: For the new Toy Directive the CE mark must be visible at point of sale.
Labelling	All texts required shall be written in the official language of the country in which the toy is to be sold. **New Toys Safety Directive (2009/48/EC)** The following information can be placed on the packaging/instruction only if it is not technically or economically feasible to place it on the toy itself. - Batch/Serial/Model Number - Manufacturer name and address - Importer name and address The CE marking must be affixed visibly, legibly and indelibly to the toy, to an affixed label or to the packaging. It must be visible at the point of sale. The padding pool or its packaging shall be marked the following warning, as long as the warning is clearly visible at the time of purchase: **"Warning. Only for domestic use."** The padding pool shall bear the following warning pictograms and warning text.  **"Warning. Never leave your child unattended – drowning hazard"**

	The height of the pictograms shall be not less than 40 mm. The warning text of the pictograms on the *paddling pool* shall be indelible and easily legible and in a colour which contrasts with the body of the *paddling pool*. The warning text shall be placed below or to the side of the pictograms. The colours of the pictogram on the *activity toy* shall be respected including the background white colour. The warning shall be clearly visible during use of the *paddling pool.* The packaging of *paddling pools* shall carry the following information: "**Children can drown in very small amounts of water. Empty the pool when not in use**". "**Do not install the paddling pool over concrete, asphalt or any other hard surface**".
Instructions	A detailed instruction booklet shall be accompanied with the item. In which contains:- - Warnings - Product description - Maintenance - Cleaning & Storage - Repair An instruction of repair patch was found and accompanied with supervision contents. It is suggested to print warning statement to alert the parent / adult to use the patch correctly (repair the damaged pool by adult only and frequent check the used patch stuck on the item.

SECTION 10– Recalled Cases Study			
Czech Republic	**Category:** Toys **Product:** Inflatable swimming pool "Crystal swimming pool" **Brand:** Sainteve **Name:** **Type/number of model:** PT 4489 TOY 802469, SY-A1013, EAN: 6 933315 544898, CET No.: MT-SO503056 **Batch number/Barcode:** **OECD Portal Category:** **Description:** Inflatable pink swimming pool of 60 cm diameter, printed with yellow ducks, for children over three years. There is warning on the label due to the presence of small parts. 3 swimming pools are available in the same packaging (cardboard box). **Country of origin:** Unknown	Chemical The product poses a chemical risk because it contains 9.5% by weight of di(2-ethylhexyl) phthalate (DEHP). There is a risk that phthalates may come into contact with the child's mouth and/or skin. According to the REACH Regulation, phthalates DEHP, DBP and BBP are prohibited in all toys and childcare articles, while phthalates DINP, DIDP and DNOP are prohibited when the toy or childcare article can be placed in the mouth by children.	withdrawal from the market ordered by the authorities.

Part II: Chemical Safety Assessment

Summary and Recommendation
None of the materials listed in the submitted BOM is identified from the substances that are classified as CMR of categories 1A, 1B or 2 under Regulation (EC) No. 1272/2008, substances which are Persistent, Bioaccumulative and Toxic (PBT) and very Persistent and very Bioaccumulative (vPvB), restricted substances listed on Annex XVII of REACH and SVHCs on Candidate List. It is also recommended to review the manufacture process to ensure these substances are not added.
The test listed in the table "**Applicable European Directives, Regulations and Harmonized Standards**" are recommended for compliance testing, in order to reduce unintentional chemical risk such as contamination of material during production process.
Chemical management from incoming material to finish product throughout the supply chain is an important part for fulfilling complex and ever-changing chemical requirements. The "**Universal Chemical Safety Assessment**" provided additional information to assist manufacturer in reviewing the manufacturing process, it is to ensure the chemical properties of a toy manufactured through such process is consistence to the BOM stated.

Universal Chemical Safety Assessment
The following assessment was based on worst case scenario by assessing the possibility of existing of hazardous chemical in the material given in the BOM submitted.

Product classification:

A. New Toy Safety Directive (2009/48/EC)

i: The PVC and Paper parts of the **DEEP DIVE 3-RING POOL** (SAMPLE) are likely to be defined as **scraped-off toy materials**. These materials are **accessible** to children when the SAMPLE is used as intended or in a foreseeable way, when taking into accounts the behavior of children.

Component No.	Material	Accessible as defined by EN 71-1?
1-3	Poly(vinyl chloride) (PVC)	Yes
4	Paper	Yes

The CMR substances in categories 1A, 1B and 2 and the 19 elements should fulfill the chemical requirements of Part III, Annex II of 2009/48/EC unless they are **inaccessible**.
ii: The SAMPLE is likely to be defined as a **non-scented** toy. The likelihood of the occurrence of 66 allergenic fragrances will not be assessed.

iii: Referring to the explanatory guidance document[1], nitrosamines and nitrosatable substances are relevant in particular for rubber or finger paints. Since the SAMPLE does not contain these materials, assessment for nitrosamines and nitrosatable substances in the SAMPLE will not be necessary.

B. REACH (Regulation (EC) No 1907/2006)
i: The SAMPLE is likely to be defined as an **article with substances not intended to be released and substance** under normal and foreseeable conditions of use.

Remark:

[1]Referring to the explanatory guidance document (**rev 1.9**) published by the European Commission of **Feb 10, 2016**, nitrosamines and nitrosatable substances are relevant in particular for rubber and finger paints.

Chemical requirements under new Toy Safety Directive and REACH:

New Toy Safety Directive (2009/48/EC)	**CMR substances**	:	Any substance that is classified as CMR categories 1A, 1B or 2 is prohibited to be used in the SAMPLE unless the substance is below the concentration limit set in Regulation (EC) No 1272/2008[2].The occurrence of CMR substances in the ABC is assessed in this report.
	19 Elements[3]	:	The manufacturer of the SAMPLE has to confirm that the migration levels of the restricted elements are under the defined maximum permitted levels in pliable and scraped-off toy materials. Safety assessment on the migration of the 19 elements is not suggested[4].
	55 Fragrances[5]	:	55 fragrances are banned (subject to concentration up to 100 mg/kg when their presence is technically unavoidable under good manufacturing practice).The SAMPLE is non-scented toy. The likelihood of the occurrence of the fragrances is very low. Therefore, safety assessment of 55 fragrances is not performed.
	11 Fragrances[5]	:	11 fragrances are permitted but must be labeled if the concentration of each exceeds 100 mg/kg. Safety assessment of 11 fragrances is also not performed on the SAMPLE as they are non-scented.
	Nitrosamines and nitrosatable substances	:	Nitrosamines and nitrosatable substances are banned in toys for children under 36 months or for toys that are intended to be placed in the mouth. As the SAMPLE does not contain rubber or finger paints, nitrosamines and nitrosatable substances are normally of real concern, thus these substances will not be assessed in this report.
REACH (Regulation (EC) No 1907/2006)	**SVHCs**	:	EU importer may obtain from the manufacturer of the SAMPLE regarding SVHC information to pass along the supply chain if the SAMPLE contains over 0.1% w/w of a SVHC on Candidate List[6]. The likelihood on the presence of SVHCs in the ABC is assessed in this report.
	Restricted substances	:	Restricted substances for which Annex XVII of REACH contains a restriction relevant to toy materials and children's products should not be used in the SAMPLE unless the restricted condition is complied. The likelihood on the presence of restricted substances in the SAMPLE is listed in this report.

Remarks:

[2]Maximum concentration of the substance regulated under the new Toy Safety Directive (2009/48/EC), CMR categories 1A, 1B and 2, that can be present in toys, components of toys or micro-structurally distinct parts of toys. Referring to Appendix B(2) of Directive 2009/48/EC, the relevant concentration

for the classification of mixtures containing the substances should be those established in accordance with Regulation (EC) No 1272/2008 (with amendment referring to Commission Regulation (EU) No 286/2011) from Jun. 1, 2015.
In case the limit for a substance is set in EN 71-9 and this limit is lower than the specific concentration and the generic limit for a CMR substance in accordance with Regulation (EC) No 1272/2008 (with amendment referring to Commission Regulation (EU) No 286/2011), the limit in EN 71-9 will be used.
[3]The list of 19 elements is available in Annex II Part III (13) of Directive 2009/48/EC.
[4]According to EN 71-3, there is no relationship between the total element content of a toy material and the soluble migration of that element under standard test conditions. Therefore, measuring the total element content and converting the result to give a soluble element figure is not an answer to this problem.
As presented by Maureen Logghe from the European Commission on the topic of European Commission Toys Standards, the timeframe for the European Committee for Standardization (CEN) to revise EN 71-3 to meet the requirements of Directive 2009/48/EC is four years from his presentation, ie. before 2013.
(http://corporate.nca.ie/eng/Business_Zone/Product_Safety_and_Recalls/Toy_Safety/toy-safety-seminar/NCA-toy-seminar-Maureen-Logghe-Standards-061010.pdf)
[5]The list of fragrances is available in Annex II Part III (11) of Directive 2009/48/EC.
[6]SVHCs on Candidate List is updated by the European Chemicals Agency (ECHA) on a periodic basis.

Conclusion:

Although the data indicates a number of injures and a number of fatalities involving inflatable pool and toy, given the exposure of these items to the population it is thought that there may be a relatively low probability of injury resulting from their use and that injuries may be unlikely to be severe.
