# Safety Instructions

Use the following safety guidelines to protect your monitor from potential damage and to ensure your personal safety. Unless otherwise noted, each procedure included in this document assumes that you have read the safety information that shipped with your monitor.

- ① **NOTE:** Before using the monitor, read the safety information that is shipped with your monitor and printed on the product. Keep the documentation at a secure location for future reference.
- ⚠ **WARNING:** Use of controls, adjustments or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards and/or mechanical hazards.
- ⚠ **CAUTION:** The possible long-term effect of listening to audio at high volume through the headphones (on monitor that support it) may cause damage to your hearing ability.
- Place the monitor on a solid surface and handle it carefully.
  - The screen is fragile and can be damaged if dropped or hit with a sharp object.
  - Ensure that your monitor is electrically rated to operate with the AC power available in your location.
  - Keep the monitor in room temperature. Excessive cold or hot conditions can have an adverse effect on the QD-OLED of the display.
  - Connect the power cable from the monitor to a wall outlet that is near and accessible. See [Connecting the cables](#).
- Do not place and use the monitor on a wet surface or near water.
- Do not subject the monitor to severe vibration or high impact conditions. For example, do not place the monitor inside a car trunk.
- Unplug the monitor when it is going to be left unused for an extended period.
- To avoid electric shock, do not attempt to remove any cover or touch the inside of the monitor.
- Read these instructions carefully. Keep this document for future reference. Follow all warnings and instructions marked on product.
- Certain monitors can be wall mounted using the VESA mount that is sold separately. Ensure to use the correct VESA specifications as mentioned in the wall mounting section of the User's Guide.

For information on safety instructions, see the Safety, Environmental and Regulatory Information (SERI) document that is shipped with your monitor.

## Before working inside your monitor

### Steps

1. Save and close all open files and exit all open applications.
2. Turn off your monitor.
3. Disconnect your monitor and all attached devices from their electrical outlets.
4. Disconnect all attached network devices and peripherals, such as keyboard, mouse, and dock from your monitor.
  - ⚠ **CAUTION:** To disconnect a network cable, first unplug the cable from your monitor and then unplug the cable from the network device.
5. Remove any media card and optical disc from your monitor, if applicable.

## After working inside your monitor

- ⚠ **CAUTION:** Leaving stray or loose screws inside your monitor may severely damage your monitor.

### Steps

1. Replace all screws and ensure that no stray screws remain inside your monitor.
2. Connect any external devices, peripherals, or cables you removed before working inside your monitor.
3. Replace any media cards, discs, or any other parts that you removed before working inside your monitor.
4. Connect your monitor and all attached devices to the respective electrical outlets.
5. Turn on your monitor.

| 13   | Fan             |
| 14   | Stand base      |

① **NOTE:** For replacement of power cable, connectivity cable and external power supply (if applicable), contact Dell:

1. Go to [Dell Support Site](#).
2. Verify your country or region in the **Choose A Country/Region** drop-down menu at the bottom-right corner of the page.
3. Click **Contact Us** next to the country dropdown.
4. Select the appropriate service or support link based on your need.
5. Choose the method of contacting Dell that is convenient for you.

# Wiring connectivity diagram

| Item | Description         |
|------|---------------------|
| 1    | Lens-board cable    |
| 2    | Fan cable           |
| 3    | USB board cable     |
| 4    | Control-board cable |
| 5    | LED-board cable     |

# Connecting the cables

- ⚠ **WARNING:** Before you begin any of the following procedures, follow the [Safety Instructions](#).
- ⚠ **WARNING:** For your safety, ensure that the grounded power outlet you plug the power cable into is accessible to the operator and located as close to the equipment as possible. To disconnect power from the equipment, unplug the power cable from the power outlet by grasping the plug firmly. Never pull on the cord.
- ⚠ **WARNING:** A certified power supply cable has to be used with this equipment. The relevant national installation and/or equipment regulations should be considered. A certified power supply cord not lighter than ordinary polyvinyl chloride flexible cord according to IEC 60227 (designation H05VV-F 3G 0.75 mm<sup>2</sup> or H05VVH2-F2 3G 0.75 mm<sup>2</sup>) should be used.
- ① **NOTE:** Do not connect all cables to the computer simultaneously. It is recommended to route the cables through the cable-management slot before you connect them to the monitor.
- ① **NOTE:** Alienware monitors are designed to work optimally with Alienware-supplied inbox cables. Dell does not guarantee the video quality and performance if non-Alienware cables are used.

## To connect your monitor to the computer:

1. Turn off your computer and disconnect the power cable.
2. Connect the DisplayPort to DisplayPort cable or HDMI cable from your monitor to the computer.
3. Connect the USB Type-B end of the upstream cable to the monitor and the USB Type-A end of the cable to the computer.
4. Connect the USB peripherals to the USB 5Gbps downstream ports on the monitor.
5. Connect the power cables of your computer and monitor into a wall outlet.
6. Turn on the monitor and the computer.
7. If your monitor displays an image, installation is complete. If it does not display an image, see [Common problems](#).

## Connecting the DisplayPort (DP to DP) cable and power cable

Figure 8. DisplayPort connection

## Connecting the HDMI cable and power cable

Figure 9. HDMI connection

# Disassembly and reassembly

△ **CAUTION:** The information in this section is intended for authorized service technicians in the EMEA region. Dell prohibits users from disassembling the monitor, and any damage caused by unauthorized servicing will not be covered under the warranty.

## Recommended tools

The procedures in this document may require the following tools:

- Phillips screwdriver #0
- Phillips screwdriver #2
- Plastic scribe

## Screw list

- ① **NOTE:** When removing screws from a component, it is recommended to note the screw type, the quantity of screws, and then place them in a screw storage box. This is to ensure that the correct number of screws and correct screw type is restored when the component is replaced.
- ① **NOTE:** Some computers have magnetic surfaces. Ensure that the screws are not left attached to such surfaces when replacing a component.
- ① **NOTE:** Screw color may vary with the configuration ordered.

**Table 6. Screw list.**

| Component       | Screw type | Quantity | Screw image                                                                         |
|-----------------|------------|----------|-------------------------------------------------------------------------------------|
| Back Cover      | M4x10      | 4        |  |
| Metal shield    | M3x3       | 4        |  |
| Fan             | M3x9       | 3        |  |
| Interface board | M3x9       | 4        |  |
| Power board     | M3x9       | 4        |  |
| DC-DC board     | M3x9       | 1        |  |

# Stand

## Removing the stand

### Prerequisites

1. Follow the procedure in [Before working inside your monitor.](#)

- △ **CAUTION:** To prevent scratches on the screen when removing the stand, ensure that the monitor is placed on a soft surface and handle it carefully.
- △ **CAUTION:** The following steps are specifically for removing the stand that is shipped with your monitor. If you are removing a stand that you purchased from any other source, follow the setup instructions that are included with the stand.
- ① **NOTE:** Before removing the stand, ensure that you have disconnected all the cables from the monitor.

### Steps

1. Set the monitor on a clean, flat surface with a soft cloth or cushion underneath.
2. Press and hold the stand release button at the back of the display.

Figure 10. Removing the stand

3. Lift the stand assembly up and away from the monitor.

Figure 11. Removing the stand

## Installing the stand

### Steps

1. Align the tabs on the stand with the grooves at the back of the monitor.
2. Slide and gently press the stand assembly until it snaps into place.

**Figure 12. Installing the stand**

### Next steps

1. Follow the procedure in [After working inside your monitor.](#)

# Back Cover

## Removing the back cover

### Prerequisites

1. Follow the procedure in [Before working inside your monitor.](#)
2. Remove the [stand.](#)

### Steps

1. Remove the four screws (M4x10) that secure the back cover to the display assembly.

4x  
M4x10

**Figure 13. Removing the back cover**

- Using a plastic scribe, pry the back cover starting from the bottom edge of the monitor.

**Figure 14. Removing the back cover**

- Lift the back cover partially from the bottom edge.
- Disconnect the control-board cable from the connector on the interface board.
- Disconnect the LED-board cable from the connector on the interface board.
- Remove the back cover from the display assembly.

**Figure 15. Removing the back cover**

## Installing the back cover

### Steps

1. Connect the LED-board cable to the connector on the interface board.
2. Connect the control-board cable to the connector on the interface board.

**Figure 16. Installing the back cover**

3. Align the screw holes on the back cover with the screw holes on the monitor, and gently press along the sides to snap the back cover into place.

**Figure 17. Installing the back cover**

4. Replace the four screws (M4x10) to secure the back cover to the display assembly.

**Figure 18. Installing the back cover**

#### **Next steps**

1. Install the [stand](#).
2. Follow the procedure in [After working inside your monitor](#).

# Metal shield

## Removing the metal shield

### Prerequisites

1. Follow the procedure in [Before working inside your monitor.](#)
2. Remove the [stand.](#)
3. Remove the [back cover.](#)

### Steps

1. Disconnect the lens-board cable from the connector on the interface board.
2. Disconnect the USB-board cable from the connector on the USB board.

Figure 19. Removing the metal shield

3. Remove the four screws (M3x3) that secure the metal shield to the middle frame.

**Figure 20. Removing the metal shield**

4. Partially lift the metal shield and disconnect the DC-DC board cable from the connector on the display panel.
5. Disconnect the two LVDS cables from the connectors on the display panel.

**Figure 21. Removing the metal shield**

6. Remove the metal shield from the display panel.

**Figure 22. Removing the metal shield**

## Installing the metal shield

### Steps

1. Connect the two LVDS cables to the connectors on the display panel.
2. Connect the DC-DC board cable to the connector on the display panel.

Figure 23. Installing the metal shield

3. Align and place the metal shield on the display panel.
4. Replace the four screws (M3x3) to secure the metal shield to the middle frame.

4x  
M3x3

**Figure 24. Installing the metal shield**

5. Connect the USB-board cable to the connector on the USB board.
6. Connect the lens-board cable to the connector on the interface board.

**Figure 25. Installing the metal shield**

#### Next steps

1. Install the [back cover](#).
2. Install the [stand](#).
3. Follow the procedure in [After working inside your monitor](#).

# Interface board

## Removing the interface board

### Prerequisites

1. Follow the procedure in [Before working inside your monitor.](#)
2. Remove the [stand.](#)
3. Remove the [back cover.](#)
4. Remove the [metal shield.](#)

### Steps

1. Lift the Mylar sheet from the power board.

Figure 26. Removing the interface board

2. Remove the seven screws (M3x9) that secures the fan and interface board to the metal shield.

**Figure 27. Removing the interface board**

3. Lift and turn the fan away from the metal shield.
4. Lift and turn the interface board away from the metal shield.
5. Disconnect the power cable from the connector on the interface board.
6. Disconnect the fan cable from the connector on the interface board.
7. Open the latches and disconnect the LVDS cables from the connector on the interface board.
8. Open the latch and disconnect the USB board cable from the connector on the interface board.

**Figure 28. Removing the interface board**

9. Remove the interface board from the metal shield.

**Figure 29. Removing the interface board**

## Installing the interface board

### Steps

1. Slide the USB board cable into the connector on the interface board and close the latch to secure it in place.
2. Slide the LVDS cables into the connectors on the interface board and close the latches to secure them in place.
3. Connect the fan cable to the connector on the interface board.

**Figure 30. Installing the interface board**

4. Connect the power cable to the connector on the interface board.

**Figure 31. Installing the interface board**

5. Place the interface board on the metal shield.
6. Align the screw holes on the interface board with the screw holes on the metal shield.
7. Replace the 4 screws (M3X9) that secure the interface board to the metal shield.
8. Place the fan on the metal shield.
9. Align the screw holes on the fan with the screw holes on the metal shield.
10. Replace the 3 screws (M3X9) that secure the fan to the metal shield.

7x  
M3x9

**Figure 32. Installing the interface board**

11. Align and place the Mylar sheet on the power board.

**Figure 33. Installing the interface board**

#### **Next steps**

1. Install the [metal shield](#).
2. Install the [back cover](#).
3. Install the [stand](#).
4. Follow the procedure in [After working inside your monitor](#).

# DC-DC board

## Removing the DC-DC board

### Prerequisites

1. Follow the procedure in [Before working inside your monitor.](#)
2. Remove the [stand.](#)
3. Remove the [back cover.](#)
4. Remove the [metal shield.](#)
5. Remove the [interface board.](#)

### Steps

1. Remove the screw (M3x9) that secures the DC-DC board to the metal shield.
2. Lift and turn the DC-DC board away from the metal shield.
3. Disconnect the power cable from the connector on the DC-DC board.

**Figure 34. Removing the DC-DC board**

4. Remove the DC-DC board from the metal shield.
5. Disconnect the DC-DC board cable from the connector on the DC-DC board.

**Figure 35. Removing the DC-DC board**

## Installing the DC-DC board

### Steps

1. Connect the DC-DC board cable to the connector on the DC-DC board.
2. Connect the power cable to the connector on the DC-DC board.

Figure 36. Installing the DC-DC board

3. Align and place the DC-DC board in the slot inside the metal shield.
4. Replace the screw (M3x9) to secure the DC-DC board to the metal shield

**Figure 37. Installing the DC-DC board**

#### **Next steps**

1. Install the [interface board](#).
2. Install the [metal shield](#).
3. Install the [back cover](#).
4. Install the [stand](#).
5. Follow the procedure in [After working inside your monitor](#)

# Power board

## Removing the power board

### Prerequisites

1. Follow the procedure in [Before working inside your monitor.](#)
2. Remove the [stand.](#)
3. Remove the [back cover.](#)
4. Remove the [metal shield.](#)
5. Remove the [interface board.](#)
6. Remove the [DC-DC board.](#)

### Steps

1. Remove the four screws (M3x9) that secure the power board to the metal shield.

Figure 38. Removing the power board

2. Partially lift the power board from the metal shield.
3. Disconnect the AC-socket cable from the connector on the power board.

**Figure 39. Removing the power board**

4. Remove the power board from the metal shield.
5. Disconnect the power cables from the connectors on the power board.

**Figure 40. Removing the power board**

## Installing the power board

### Steps

1. Connect the power cables to the connectors on the power board.

**Figure 41. Installing the power board**

2. Turn the power board with the connectors facing down and connect the AC-socket cable to the connector on the power board.

**Figure 42. Installing the power board**

3. Align and place the power board in the slot inside the metal shield.
4. Replace the four screws (M3x9) to secure the power board to the metal shield.

4x  
M3x9

**Figure 43. Installing the power board**

#### Next steps

1. Install the [DC-DC board](#).
2. Install the [interface board](#).
3. Install the [metal shield](#).
4. Install the [back cover](#).
5. Install the [stand](#).
6. Follow the procedure in [After working inside your monitor](#).

# Troubleshooting

⚠ **WARNING:** Before you begin any of the procedures in this section, follow the [Safety Instructions](#).

## Self-test

Your monitor provides a self-test feature that allows you to check whether your monitor is functioning properly. If your monitor and computer are properly connected but the monitor screen remains dark, run the monitor self-test by performing the following steps:

1. Turn off both your computer and the monitor.
2. Unplug the video cable from your computer to ensure proper self-test operation.
3. Turn on the monitor.

A dialog box should appear on the screen, indicating that the monitor is working correctly and it is not receiving a video signal. While in self-test mode, the power LED remains blue (default color).

**Figure 44. Warning message for no signal cable**

- ① **NOTE:** The message may vary slightly depending on the connected input signal.
- ① **NOTE:** This dialog box also appears during normal operation, if the video cable is disconnected or damaged.

4. Turn off your monitor and reconnect the video cable; then turn on both your computer and the monitor.

After performing the above steps, if the monitor displays no video output, then the problem may be with the graphics card or the computer.

# Built-in diagnostics

Your monitor has a built-in diagnostic tool that helps you determine if the screen abnormality you are experiencing is an inherent problem with your monitor or with your computer and graphics card.

Figure 45. Built-in diagnostics menu

## Screen test

To run the test:

1. Move or press the joystick button to launch the Menu Launcher.
2. Move the joystick button up to select  and open the Main Menu.
3. Using the joystick button, navigate on the OSD menu and select **OTHERS > SELF-DIAGNOSTIC > SCREEN TEST**.
4. Ensure that the screen is clean (no dust particles on the surface of the screen).
5. Press the joystick button to start the diagnostics. A gray screen is displayed.
6. Observe if the screen has any defects or abnormalities.
7. Toggle the joystick button once again until a red screen is displayed.
8. Observe if the screen has any defects or abnormalities.

Repeat steps 7 and 8 until the screen displays green, blue, black, and white colors. Note any abnormalities or defects.

The test is complete when a text screen is displayed. To exit, toggle the joystick button again.

If you do not detect any screen abnormalities upon using the built-in diagnostic tool, the monitor is functioning properly. Check the graphics card and computer.

## Fan test

To run the test:

1. Move or press the joystick button to launch the Menu Launcher.
2. Move the joystick button up to select  and open the Main Menu.
3. Using the joystick button, navigate on the OSD menu and select **OTHERS > SELF-DIAGNOSTIC > FAN TEST**.
4. Select **L1** (fan speed: about 1140 RPM) or **L2** (fan speed: about 1630 RPM) to perform a 2-minute fan test. Selecting **OFF** will disable this function.

Once the test is complete, your monitor resumes normal fan operation to prevent any damage.

# Common problems

The following table contains general information about common monitor problems that you might encounter and the possible solutions:

**Table 7. Description of common problems.**

| Common symptoms           | What you experience                   | Possible solutions                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
