MPN: MC-DESKMOUNTW

Power strip desk mount, clamp grip power strips up to 60mm, fits tables up to 50mm

With MC-DESKMOUNTW you can mount almost any power strip to the edge of your desk/table, which enables you to easily and effectively reach and access your power strip where ever it is best suited, because of it's adjustable design you have a wide variety of options for both which power strips you mount, and on which surfaces, typically this will be used on a desk at an office setup or a workstation in a production setting, as long as the surface is flat this mount will fit.

It also comes with a built in cable management system on the backside to help guide the connected cables in more permanent setups neatly down underneath the desk/table to help keep it as clean from cable clutter as possible.

Thanks to it's spring loaded grip feature combined with its silicon grip pads, your power strip will be strongly secured, so you can connect and disconnect cables without worrying about the power strip slipping out of the mount, giving you the peace of mind to just focus on what needs to be done.

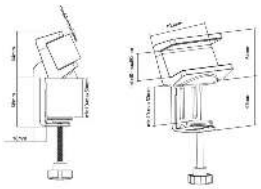

- Secures easy and fast onto flat surfaces between 10-50mm thickness, and prevents visible marks due to its foam padding.
- The spring loaded grip can hold power strips between 40mm and 60mm, which means it fits most power strips.
- Due to its versatile design, this enables you to place your power strip exactly where you need it on your workspace.
- Built in cable management enables you to easily route cables behind the mount to keep your workspace as free from cable clutter as possible.

Specifications

Features	**Product colour**	White
	Purpose	Mounting power strips to the edges of desks
