Installation Instructions

WARNING: OVER TIGHTENING OF SCREWS CAN DAMAGE PARTS AND CAN LEAD TO SERIOUS PERSONAL INJURY AND DAMAGE TO EQUIPMENT! DO NOT over tighten screws when installing interface brackets.

NOTE: Step 1 is only required when installing an SLB interface bracket. If an SLM bracket is being installed, proceed to step 2.

1. Screw thumb screws onto 10-24 x 5/8" Phillips pan head screws. DO NOT fully tighten thumb screws at this time.
2. Turn projector upside down on a flat surface.
3. Place the interface bracket onto the bottom of the projector, aligning the mounting holes in the bracket with the threaded inserts in the bottom of the projector and ensuring that triangle in bracket points towards front of projector.
4. Position M5 x 20mm mounting screws with M5 flat washers into the threaded inserts and four bracket side tabs. Tighten all fasteners at this time, securing the bracket to the projector.

NOTE: Security screws can be substituted when mounting Interface bracket to projector by using the parts and installation instructions in the All-Points Security Kit.
