Introduction to the Manuals

The following manuals are supplied with your Epson printer. As well as the manuals, check the various types of help information available from the printer itself or from the Epson software applications.

Important Safety Instructions (paper manual)

Provides you with instructions to ensure the safe use of this printer.

Start Here (paper manual)

Provides you with information on setting up the printer and installing the software.

User's Guide (digital manual)

This manual. Available as a PDF and Web manual. Provides detailed information and instructions on using the printer and solving problems.

Information on the Latest Manuals

- Paper manual

  Visit the Epson Europe support website at http://www.epson.eu/support, or the Epson worldwide support website at http://support.epson.net/.

- Digital manual

  Visit the following website, enter the product name, and then go to **Support**.

  https://epson.sn

Searching for Information

The PDF manual allows you to search for information you are looking for by keyword, or jump directly to specific sections using the bookmarks. This section explains how to use a PDF manual that has been opened in Adobe Acrobat Reader DC on your computer.

Searching by keyword

Click **Edit** > **Advanced Search**. Enter the keyword (text) for information you want to find in the search window, and then click **Search**. Hits are displayed as a list. Click one of the displayed hits to jump to that page.

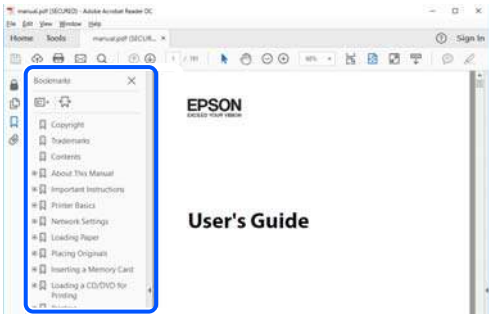

Jumping directly from bookmarks

Click a title to jump to that page. Click + or > to view the lower level titles in that section. To return to the previous page, perform the following operation on your keyboard.

❏ Windows: Hold down **Alt**. and then press ←.

❏ Mac OS: Hold down the command key, and then press ←.

Printing Only the Pages You Need

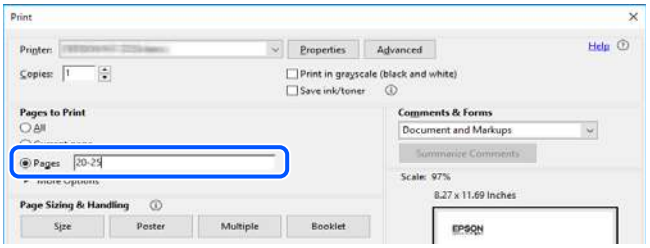

You can extract and print only the pages you need. Click **Print** in the **File** menu, and then specify the pages you want to print in **Pages** in **Pages to Print**.

❏ To specify a series of pages, enter a hyphen between the start page and the end page.

Example: 20-25

❏ To specify pages that are not in series, divide the pages with commas.

Example: 5, 10, 15

About This Manual

This section explains the meaning of marks and symbols, notes on descriptions, and operating system reference information used in this manual.

Marks and Symbols

Caution:

Instructions that must be followed carefully to avoid bodily injury.

Important:

Instructions that must be observed to avoid damage to your equipment.

Note:
Provides complementary and reference information.

Related Information

➡ Links to related sections.

Provides Web Video Manuals of the operating instructions. See the related information link.

Notes on Screenshots and Illustrations

- ❏ Screenshots of the printer driver are from Windows 10 or macOS High Sierra (10.13). The content displayed on the screens varies depending on the model and situation.
- ❏ Illustrations used in this manual are examples only. Although there may be slight differences depending on the model, the method of operation is the same.
- ❏ Some of the menu items on the LCD screen vary depending on the model and settings.
- ❏ You can read the QR code using a dedicated app.

Operating System References

Windows

In this manual, terms such as "Windows 11", "Windows 10", "Windows 8.1", "Windows 8", "Windows 7", "Windows Server 2022", "Windows Server 2019", "Windows Server 2016", "Windows Server 2012 R2", "Windows Server 2012", "Windows Server 2008 R2", and "Windows Server 2008" refer to the following operating systems. Additionally, "Windows" is used to refer to all versions.

- ❏ Microsoft® Windows® 11 operating system
- ❏ Microsoft® Windows® 10 operating system
- ❏ Microsoft® Windows® 8.1 operating system
- ❏ Microsoft® Windows® 8 operating system
- ❏ Microsoft® Windows® 7 operating system
- ❏ Microsoft® Windows Server® 2022 operating system
- ❏ Microsoft® Windows Server® 2019 operating system
- ❏ Microsoft® Windows Server® 2016 operating system
- ❏ Microsoft® Windows Server® 2012 R2 operating system
- ❏ Microsoft® Windows Server® 2012 operating system
- ❏ Microsoft® Windows Server® 2008 R2 operating system
- ❏ Microsoft® Windows Server® 2008 operating system

Mac OS

In this manual, "Mac OS" is used to refer to Mac OS X 10.9.5 or later as well as macOS 11 or later.

Trademarks

- ❏ Microsoft, Excel, Microsoft Edge, Windows and Windows Server are trademarks of the Microsoft group of companies.
- ❏ Apple, Mac, macOS, OS X, Bonjour, Safari, AirPrint, iPad, iPhone, iPod touch, and App Store are trademarks of Apple Inc., registered in the U.S. and other countries.
- ❏ Use of the Works with Apple badge means that an accessory has been designed to work specifically with the technology identified in the badge and has been certified by the developer to meet Apple performance standards.
- ❏ IOS is a trademark or registered trademark of Cisco in the U.S. and other countries and is used under license.
- ❏ Android, Chrome, ChromeOS and Google Play are trademarks of Google LLC.
- ❏ Adobe, Acrobat, and Reader are either registered trademarks or trademarks of Adobe in the United States and/or other countries.
- ❏ QR Code is a registered trademark of DENSO WAVE INCORPORATED in Japan and other countries.
- ❏ Firefox is a trademark of the Mozilla Foundation in the U.S. and other countries.
- ❏ The Mopria™ word mark and the Mopria™ Logo are registered and/or unregistered trademarks of Mopria Alliance, Inc. in the United States and other countries. Unauthorized use is strictly prohibited.
- ❏ Wi-Fi® and Wi-Fi Direct® are registered trademarks of Wi-Fi Alliance®. Wi-Fi Protected Setup™, WPA™, WPA2™, WPA3™ are trademarks of Wi-Fi Alliance®.
- ❏ The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Seiko Epson Corporation is under license.
- ❏ General Notice: All other trademarks are the property of their respective owners and used for identification purposes only.

Important Instructions

Safety Instructions. 12

Printer Advisories and Warnings. 13

Protecting Your Personal Information. 16

Safety Instructions

Read and follow these instructions to ensure safe use of this printer. Make sure you keep this manual for future reference. Also, be sure to follow all warnings and instructions marked on the printer.

- ❏ Some of the symbols used on your printer are to ensure safety and proper use of the printer. Visit the following Web site to learn the meaning of the symbols.

  http://support.epson.net/symbols/

- ❏ Use only the power cord supplied with the printer and do not use the cord with any other equipment. Use of other cords with this printer or the use of the supplied power cord with other equipment may result in fire or electric shock.
- ❏ Be sure your AC power cord meets the relevant local safety standard.
- ❏ Never disassemble, modify, or attempt to repair the power cord, plug, printer unit, scanner unit, or options by yourself, except as specifically explained in the printer's manuals.
- ❏ Unplug the printer and refer servicing to qualified service personnel under the following conditions:

  The power cord or plug is damaged; liquid has entered the printer; the printer has been dropped or the casing damaged; the printer does not operate normally or exhibits a distinct change in performance. Do not adjust controls that are not covered by the operating instructions.

- ❏ Place the printer near a wall outlet where the plug can be easily unplugged.
- ❏ Do not place or store the printer outdoors, near excessive dirt or dust, water, heat sources, or in locations subject to shocks, vibrations, high temperature or humidity.
- ❏ Take care not to spill liquid on the printer and not to handle the printer with wet hands.
- ❏ Keep the printer at least 22 cm away from cardiac pacemakers. Radio waves from this printer may adversely affect the operation of cardiac pacemakers.
- ❏ If the LCD screen is damaged, contact your dealer. If the liquid crystal solution gets on your hands, wash them thoroughly with soap and water. If the liquid crystal solution gets into your eyes, flush them immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor immediately.
- ❏ Avoid using a telephone during an electrical storm. There may be a remote risk of electric shock from lightning.
- ❏ Do not use a telephone to report a gas leak in the vicinity of the leak.

Safety Instructions for Ink

- ❏ Be careful not to touch any ink when you handle the ink tanks, ink tank caps, and opened ink bottles or ink bottle caps.
  - ❏ If ink gets on your skin, wash the area thoroughly with soap and water.
  - ❏ If ink gets into your eyes, flush them immediately with water. If discomfort or vision problems continue after a thorough flushing, see a doctor immediately.
  - ❏ If ink gets into your mouth, see a doctor right away.
- ❏ Do not disassemble the maintenance box; otherwise ink may get into your eyes or on your skin.
- ❏ Do not shake an ink bottle too vigorously or subject it to strong impacts as this can cause ink to leak.
- ❏ Keep ink bottles and maintenance box out of the reach of children. Do not allow children to drink from the ink bottles.

Printer Advisories and Warnings

Read and follow these instructions to avoid damaging the printer or your property. Make sure you keep this manual for future reference.

Advisories and Warnings for Setting Up the Printer

- ❏ Do not block or cover the vents and openings in the printer.
- ❏ Use only the type of power source indicated on the printer's label.
- ❏ Avoid using outlets on the same circuit as photocopiers or air control systems that regularly switch on and off.
- ❏ Avoid electrical outlets controlled by wall switches or automatic timers.
- ❏ Keep the entire computer system away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.
- ❏ The power-supply cords should be placed to avoid abrasions, cuts, fraying, crimping, and kinking. Do not place objects on top of the power-supply cords and do not allow the power-supply cords to be stepped on or run over. Be particularly careful to keep all the power-supply cords straight at the ends.
- ❏ If you use an extension cord with the printer, make sure that the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure that the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.
- ❏ If you plan to use the printer in Germany, the building installation must be protected by a 10 or 16 amp circuit breaker to provide adequate short-circuit protection and over-current protection for the printer.
- ❏ When connecting the printer to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.
- ❏ Place the printer on a flat, stable surface that extends beyond the base of the printer in all directions. The printer will not operate properly if it is tilted at an angle.
- ❏ Allow space above the printer so that you can fully raise the document cover.
- ❏ Leave enough space in front of the printer for the paper to be fully ejected.
- ❏ Avoid places subject to rapid changes in temperature and humidity. Also, keep the printer away from direct sunlight, strong light, or heat sources.

Advisories and Warnings for Using the Printer

- ❏ Do not insert objects through the slots in the printer.
- ❏ Do not put your hand inside the printer during printing.
- ❏ Do not touch the white flat cable and ink tubes inside the printer.
- ❏ Do not use aerosol products that contain flammable gases inside or around the printer. Doing so may cause fire.
- ❏ Do not move the print head by hand; otherwise, you may damage the printer.
- ❏ Be careful not to trap your fingers when closing the scanner unit.
- ❏ Do not press too hard on the scanner glass when placing the originals.

- ❏ Prolonged use of the printer when the ink level is below the lower line could damage the printer. Fill the ink tank to the upper line while the printer is not operating. To display the correct ink level estimates, reset the ink level after filling the tank.
- ❏ Always turn the printer off using the ⏻ button. Do not unplug the printer or turn off the power at the outlet until the ⏻ light stops flashing.
- ❏ If you are not going to use the printer for a long period, be sure to unplug the power cord from the electrical outlet.

Advisories and Warnings for Using the Touchscreen

- ❏ The LCD screen may contain a few small bright or dark spots, and because of its features it may have an uneven brightness. These are normal and do not indicate that it is damaged in any way.
- ❏ Only use a dry, soft cloth for cleaning. Do not use liquid or chemical cleaners.
- ❏ The exterior cover of the touchscreen could break if it receives a heavy impact. Contact your dealer if the panel surface chips or cracks, and do not touch or attempt to remove the broken pieces.
- ❏ Press the touchscreen gently with your finger.
- ❏ Do not use a pointy or sharp object, such as a pen or your fingernail, to operate the LCD screen.
- ❏ Condensation inside the touchscreen due to abrupt changes in temperature or humidity may cause performance to deteriorate.

Advisories and Warnings for Connecting to the Internet

Do not connect this product to the Internet directly. Connect it in a network protected by a router or firewall.

Advisories and Warnings for Using the Printer with a Wireless Connection

- ❏ Radio waves from this printer may negatively affect the operation of medical electronic equipment, causing it to malfunction. When using this printer inside medical facilities or near medical equipment, follow directions from the authorized personnel representing the medical facilities, and follow all posted warnings and directions on the medical equipment.
- ❏ Radio waves from this printer may negatively affect the operation of automatically controlled devices such as automatic doors or fire alarms, and could lead to accidents due to malfunction. When using this printer near automatically controlled devices, follow all posted warnings and directions on these devices.

Advisories and Warnings for Transporting or Storing the Printer

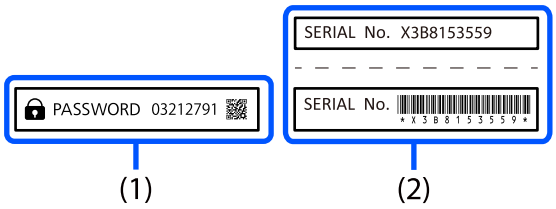

- ❏ When storing or transporting the printer, avoid tilting it, placing it vertically, or turning it upside down; otherwise ink may leak.
- ❏ Before transporting the printer, make sure that the print head is in the home (far right) position.

Notes on the Administrator Password

This printer allows you to set an administrator password to prevent unauthorized access or changes to the device settings and network settings stored in the product when connecting to a network.

Default Value of the Administrator Password

The default value of the administrator password is printed on the label on the product itself, such as the one shown.

If both labels (1) and (2) are attached, the value next to PASSWORD written on the label in (1) is the default value. In this example, the default value is 03212791.

Note:
As the label (1) may be attached in a location that is difficult to see, check the information in the link to confirm the location.

https://support.epson.net/manu/adminpw/index.html

If you cannot find the label (1), the serial number printed on the label in (2) is the default value. In this example, the default value is X3B8153559.

Changing the Administrator Password

For security reasons, we recommend changing the initial password.

It can be changed from Web Config and Epson Device Admin. When changing the password, set it with at least 8 single-byte alphanumerical characters and symbols.

Related Information

➡ "Running Web Config on a Web Browser" on page 231

Operations that Require You to Enter the Administrator Password

If you are prompted to enter the administrator password when performing the following operations, enter the administrator password set on the printer.

- ❏ When updating the firmware of the printer from a computer or smart device
- ❏ When logging on to the advanced settings of Web Config
- ❏ When adjusting settings using an application, such as Fax Utility, that can change the printer's settings.

Initializing the Administrator Password

You can return the administrator password to its default setting by initializing the network settings.

Related Information

➡ "Restore Default Settings" on page 249

Protecting Your Personal Information

When you give the printer to someone else or dispose of it, erase all the personal information stored in the printer's memory by selecting **Settings** > **Restore Default Settings** > **Clear All Data and Settings** on the control panel.

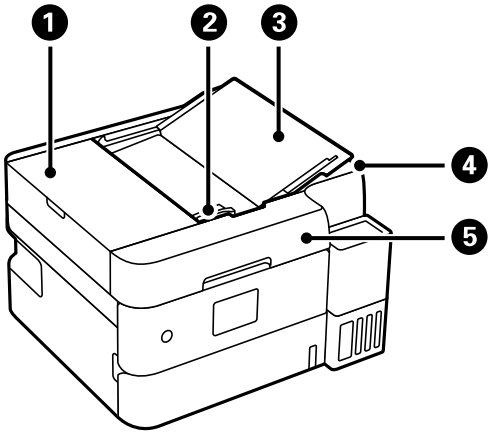

Part Names and Functions

Front. 18

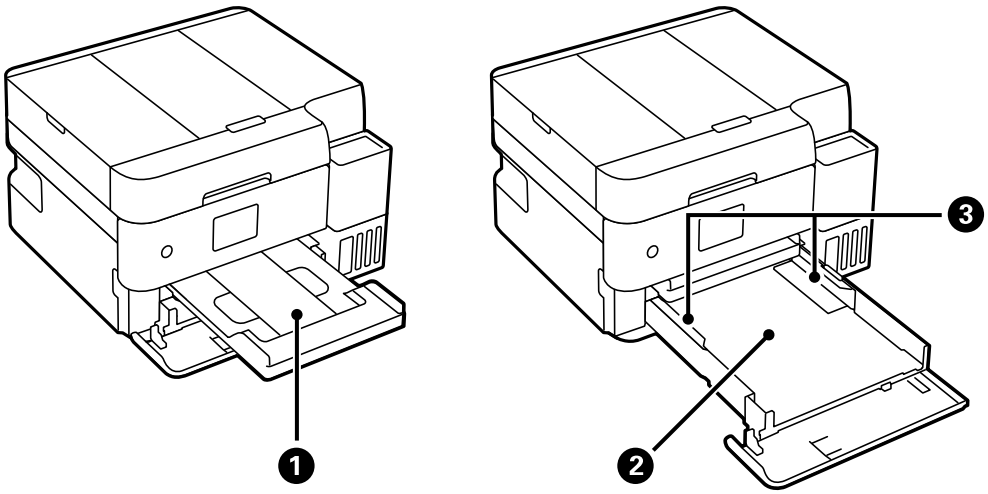

Inside. 19

Rear. 20

Front

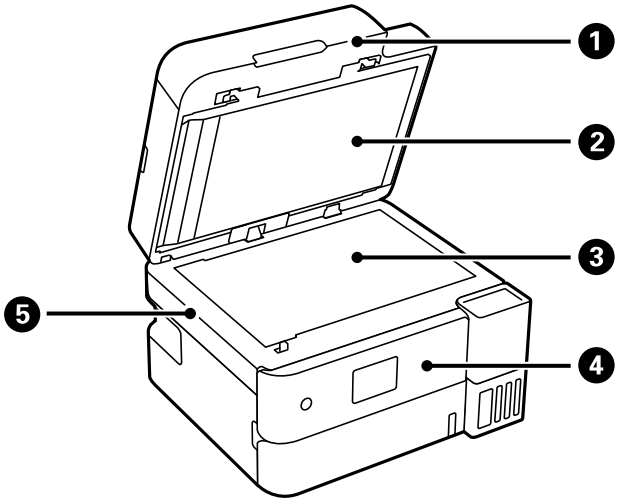

1	ADF cover (F)	Open when removing jammed originals in the ADF.
2	ADF edge guide	Feeds originals straight into the printer. Slide to the edge of the originals.
3	ADF document support	Supports originals.
4	ADF output tray	Holds originals ejected from the ADF.
5	ADF (Automatic Document Feeder)	Holds multiple originals.

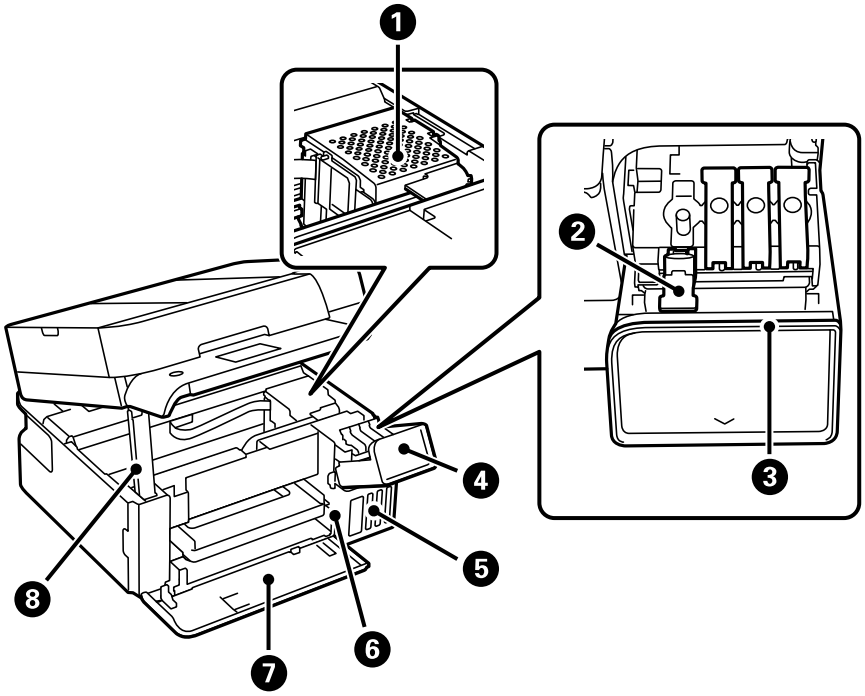

1	Output tray (G)	Holds the ejected paper.
2	Paper cassette	Loads paper.
3	Edge guide	Feeds the paper straight into the printer. Slide to the edges of the paper.

Inside

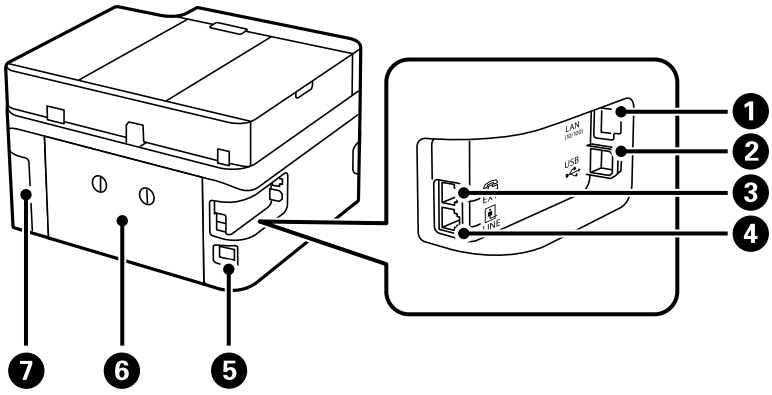

1	Document cover	Blocks external light while scanning.
2	Document mat (M)	The mat inside the document cover.
3	Scanner glass	Place the originals.
4	Control panel	Allows you to make settings and perform operations on the printer.
5	Scanner unit	Scans placed originals. Open to remove jammed paper. This unit should usually be kept closed.

1	Print head	Ink is ejected from the print head nozzles underneath.

❷	Ink tank cap	Open to refill the ink tank.
❸	Status light	A light to indicate the status of the printer. It flashes while a job is in progress. If it remains on after flashing, an error has occurred. See the following for troubleshooting instructions. "A Message is Displayed on the LCD Screen" on page 198
❹	Ink tank cover	Open to refill the ink tank.
❺	Ink reservoir tank (Ink tank)	Supplies ink to the print head.
❻	Ink tank unit	Contains the ink tanks.
❼	Front cover (C)	Opens automatically when printing starts.
❽	Scanner unit support	Supports the scanner unit when opening it.

Rear

❶	LAN port	Connects a LAN cable.
❷	USB port	Connects a USB cable to connect with a computer.
❸	EXT. port	Connects external phone devices.
❹	LINE port	Connects a phone line.
❺	AC inlet	Connects the power cord.
❻	Rear cover (D)	Remove when removing jammed paper.
❼	Maintenance box cover (L)	Remove when replacing the maintenance box. The maintenance box is a container that collects a very small amount of surplus ink during cleaning or printing.

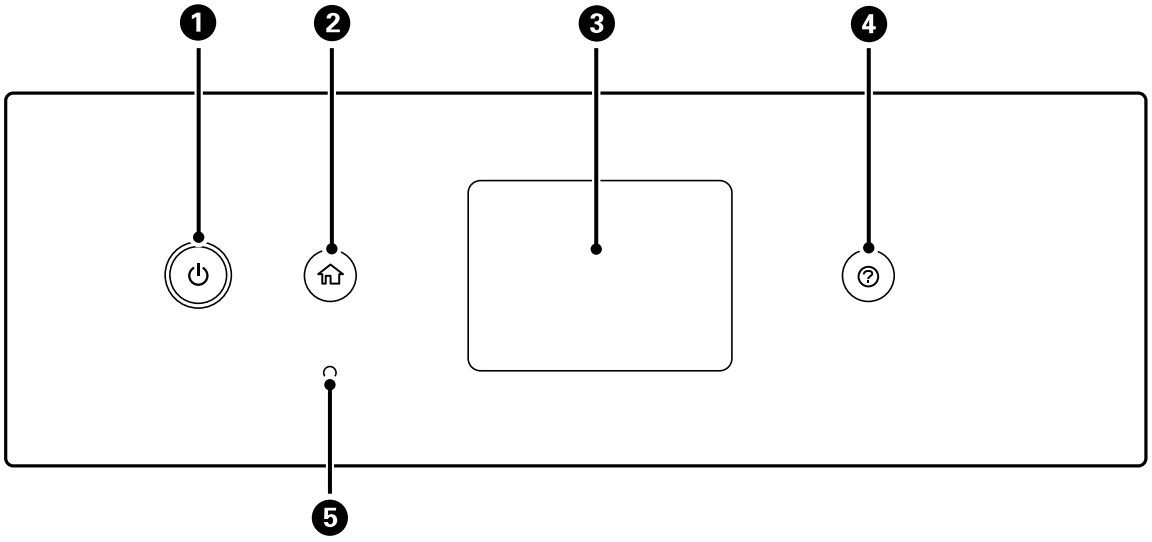

Guide to the Control Panel

Control Panel. 22

Touch Screen Operations. 22

Home Screen Configuration. 23

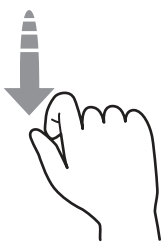

Control Panel

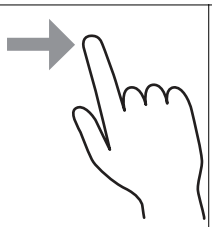

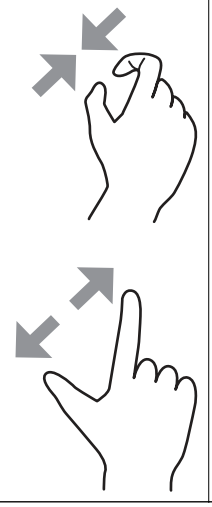

1	Turns the printer on or off. Unplug the power cord when the power light is off.
2	Displays the home screen.
3	Displays menus and messages.
4	Displays the solutions when you are in trouble.
5	Turns on when received documents that have not yet been read, printed, or saved, are stored in the printer's memory.

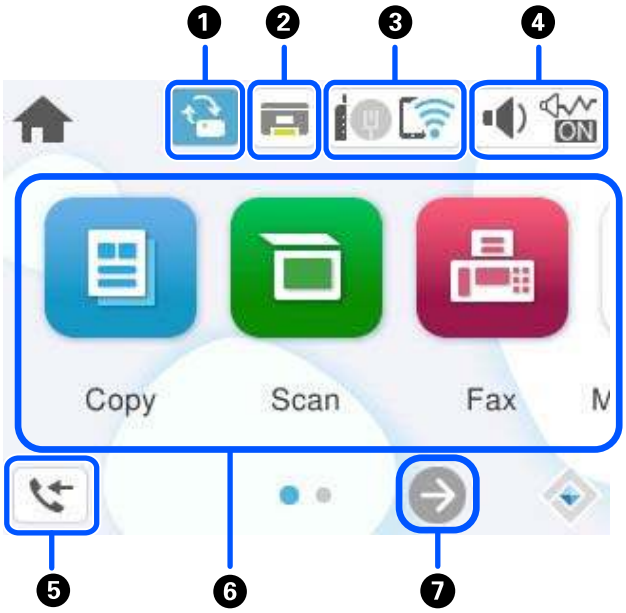

Touch Screen Operations

The touchscreen is compatible with the following operations.

Tap		Press or select the items or the icons.
Flick		Scroll the screen swiftly.

Slide		Hold and move the items around.
Pinch in Pinch out		Zoom in or zoom out of the preview image on the control panel when printing photos.

Home Screen Configuration

❶		This is displayed when a firmware update is available. Tap it to update the firmware, then the printer's feature is improved. We recommend using the latest version of the firmware.
❷		Stores the output tray.

❸		Displays the network connection status. See the following for more details. "Guide to the Network Icons" on page 24
❹		Displays the Device Sound Settings screen. You can set **Mute** and **Quiet Mode**. You can also access the **Sound** menu from this screen. You can also make this setting from the **Settings** menu. **Settings** > **General Settings** > **Basic Settings** > **Sound**
		Indicates whether or not **Quiet Mode** is set for the printer. When this feature is enabled, the noise made by printer operations is reduced, but print speed may slow down. However, noises may not be reduced depending on the selected paper type and print quality.
		Indicates that **Mute** is set for the printer.
❺		Displays the Fax Data Information screen. The number displayed indicates the number of faxes that have not yet been read, printed, or saved.
❻	Displays each menu. ❑ Copy Allows you to copy documents. ❑ Scan Allows you to scan documents and save them to a computer. ❑ Fax Allows you to send faxes. ❑ Maintenance Displays the menus recommended to improve the quality of your printouts such as unclogging nozzles by printing a nozzle check pattern and performing head cleaning, and improving blurring or banding in your printouts by aligning the print head. You can also make this setting from the **Settings** menu. **Settings** > **Maintenance** ❑ Settings Allows you to make settings related to maintenance, printer settings, and operations.	
❼		Scrolls the screen to the right.

Guide to the Network Icons

	The printer is not connected to a wired (Ethernet) network or a wireless (Wi-Fi) network.
	The printer is connected to a wired (Ethernet) network.
	The printer is searching for an SSID or unset IP address, or having a problem with a wireless (Wi-Fi) network.
	The printer is connected to a wireless (Wi-Fi) network. The number of bars indicates the signal strength of the connection. The more bars there are, the stronger the connection.
	The printer is not connected to a wireless (Wi-Fi) network in Wi-Fi Direct (Simple AP) mode.

	The printer is connected to a wireless (Wi-Fi) network in Wi-Fi Direct (Simple AP) mode.

Loading Paper

Paper Handling Precautions. 27

Paper Size and Type Settings. 28

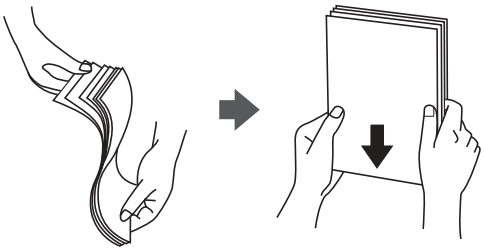

Loading Paper. 29

Paper Handling Precautions

❏ Read the instruction sheets supplied with the paper.

❏ To achieve high-quality printouts with genuine Epson paper, use the paper in the environment stated on the instruction sheets supplied with the paper.

❏ Fan and align the edges of the paper before loading. Do not fan or curl photo paper. Doing so may damage the printable side.

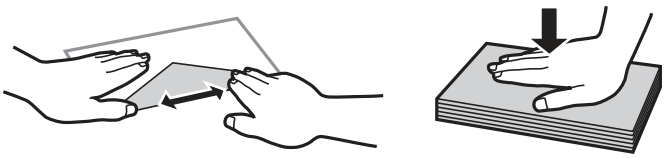

❏ If the paper is curled or folded, flatten it or curl it slightly in the opposite direction before loading. Printing on curled or folded paper may cause paper feeding problems and smears on the printouts.

❏ Paper feed problems may occur for manual 2-sided printing when printing on one side of pre-printed paper. Reduce the number of sheets to half or less, or load one sheet of paper at a time if paper jams continue.

❏ Make sure you are using long-grain paper. If you are not sure what type of paper you are using, check the paper packaging or contact the manufacturer to confirm the paper specifications.

❏ Fan and align the edges of envelopes before loading. When stacked envelopes are puffed up with air, press them down to flatten them before loading.

Related Information

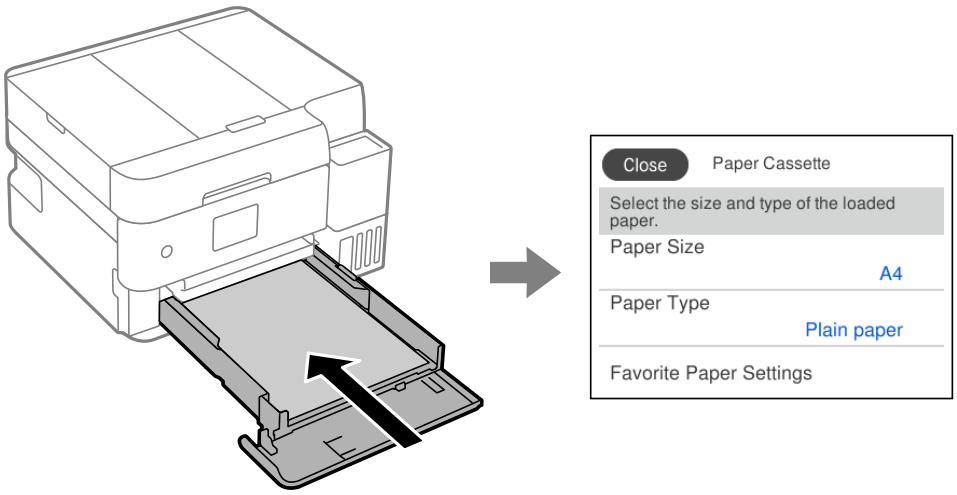

➡ "Available Paper and Capacities" on page 223

➡ "Unavailable Paper Types" on page 226

Paper Size and Type Settings

If you register the paper size and type on the screen displayed when you load paper, the printer informs you when the registered information and print settings differ. This prevents you from wasting paper and ink by making sure you are not printing on the wrong paper size or printing in the wrong color due to using settings that do not match the paper type.

This screen is not displayed if you have disabled **Paper Setup Auto Display**. If you disable this feature, you cannot print from an iPhone, iPad, or iPod touch using AirPrint.

If displayed paper size and type differ from the loaded paper, select the item to change. If the settings match the loaded paper, close the screen.

Note:
You can also display the paper size and paper type settings screen by selecting ***Settings*** *>* ***General Settings*** *>* ***Printer Settings*** *>* ***Paper Source Settings*** *>* ***Paper Setting****.*

Loading Paper

You can load paper or envelopes by referring to the animations displayed on the printer's LCD screen.

Select ⓘ, and then select **How To** > **Load paper**.

If you want to stop viewing the animation, close the screen.

Related Information

➡ "Paper Size and Type Settings" on page 28
➡ "Available Paper and Capacities" on page 223
➡ "Unavailable Paper Types" on page 226

Precautions when Loading Letterhead Paper

❏ For letterhead paper, select **Letterhead** as the paper type.

❏ For letterhead paper, if you print on paper that is smaller than the setting in the printer driver, the printer may print beyond the edges of the paper which can lead to ink smears on your printouts and excess ink building up inside the printer. Make sure you select the correct paper size setting.

❏ 2-sided printing and borderless printing are not available for letterhead paper. Also, the print speed may be slower.

Placing Originals

Placing Originals. 31

Originals that are not Supported by the ADF. 32

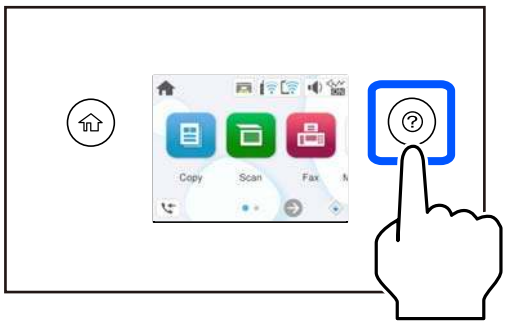

Placing Originals

Place originals on the scanner glass or the ADF.

You can place multiple originals in the ADF.

Follow the steps below to view the animations for placing originals.

Select ⓘ, and then select **How To** > **Place Originals**. Select the method of placing originals that you want to view. Select **Finish** to close the animation screen.

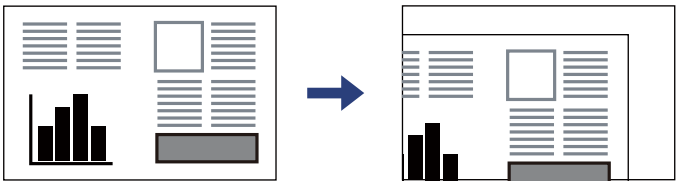

When using the scanner glass

> ⚠ ***Caution:***
>
> *Be careful not to trap your fingers when closing the document cover. Otherwise you may be injured.*

> ***Important:***
>
> ❏ *When placing bulky originals such as books, prevent exterior light from shining directly onto the scanner glass.*
>
> ❏ *Do not apply too much force to the scanner glass or the document cover. Otherwise, they may be damaged.*

Note:

❏ *If there is any trash or dirt on the scanner glass, the scanning range may expand to include it, so the image of the original may be displaced or reduced. Remove any trash and dirt on the scanner glass before scanning.*

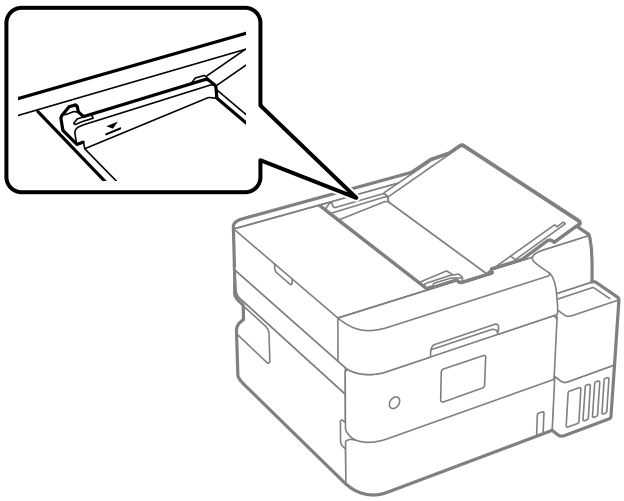

❏ *When originals are placed in the ADF and on the scanner glass, priority is given to the originals in the ADF.*

❏ *If you leave the originals on the scanner glass for a long time, they may stick to the surface of the glass.*

When using the ADF

Important:

❏ *Do not load originals above the line just under the triangle symbol inside the ADF edge guide.*

❏ *Do not add originals while scanning.*

Related Information

➡ "Scanner Specifications" on page 251

➡ "Originals that are not Supported by the ADF" on page 32

Originals that are not Supported by the ADF

Important:

Do not feed photographs or valuable original artwork into the ADF. Misfeeding may wrinkle or damage the original. Scan these documents on the scanner glass instead.

To prevent paper jams, avoid placing the following originals in the ADF. For these types, use the scanner glass.

❏ Originals that are torn, folded, wrinkled, deteriorated, or curled

❏ Originals with binder holes

❏ Originals held together with tape, staples, paper clips etc.

❏ Originals that have stickers or labels stuck to them

❏ Originals that are cut irregularly or not right angled

❏ Originals that are bound

❏ OHPs, thermal transfer paper, or carbon backs

Printing Documents

Printing from a Computer

This section explains how to print a document from your computer using Windows as an example. On Mac OS, the procedure may be different or some features may not be supported.

Printing Using Easy Settings

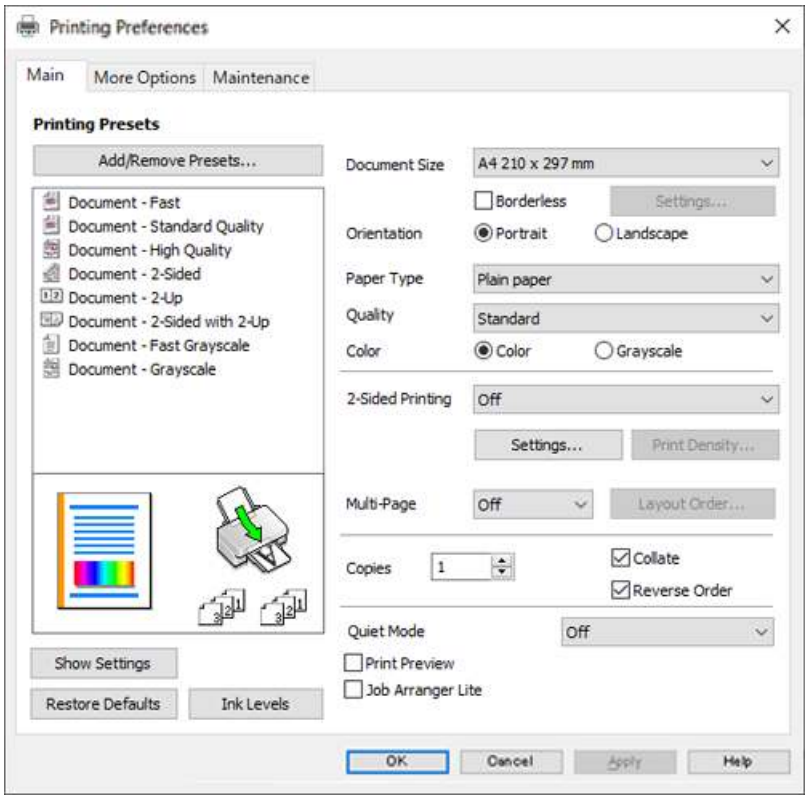

Note:
Operations may differ depending on the application. See the application's help for details.

1. Load paper in the printer.

   "Loading Paper" on page 29

2. Open the file you want to print.
3. Select **Print** or **Print Setup** from the **File** menu.
4. Select your printer.

5. Select **Preferences** or **Properties** to access the printer driver window.

6. Change the settings as necessary.

   You can see the online help for explanations of the setting items. Right-clicking an item displays **Help**.

7. Click **OK** to close the printer driver window.

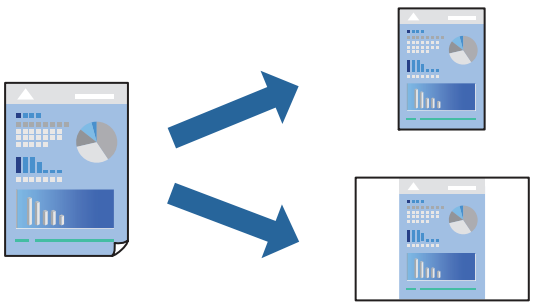

8. Click **Print**.

Related Information

➡ "List of Paper Type" on page 28
➡ "Available Paper and Capacities" on page 223

Adding Printing Presets for Easy Printing

If you create your own preset for frequently used print settings in the printer driver, you can print easily by selecting the preset from the list.

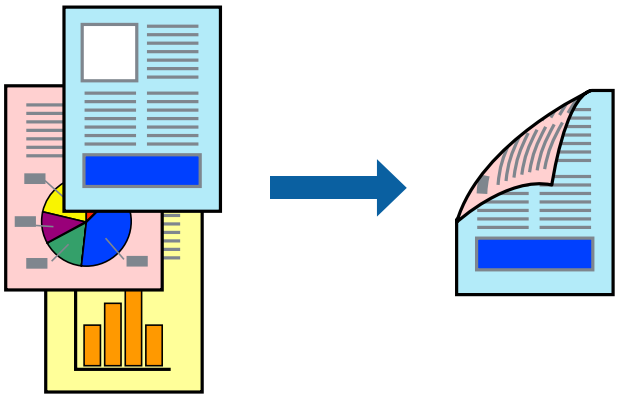

1. On the printer driver's **Main** or **More Options** tab, select the settings you want to include in the preset (such as **Document Size** and **Paper Type**).
2. Click **Add/Remove Presets** in **Printing Presets**.
3. Enter a **Name** and, if necessary, enter a comment.
4. Click **Save**.

   Note:
   *To delete an added preset, click **Add/Remove Presets**, select the preset name you want to delete from the list, and then delete it.*
5. Click **Print**.

The next time you want to print using the same settings, select the registered setting name from **Printing Presets**, and click **OK**.

Printing on 2-Sides

The printer driver will automatically print odd pages and even pages separately. When the odd pages have been printed, turn over the paper according to the instructions in the printer driver to print the even pages.

Note:
This feature is not available for borderless printing.

Access the printer driver, and then select the following settings.

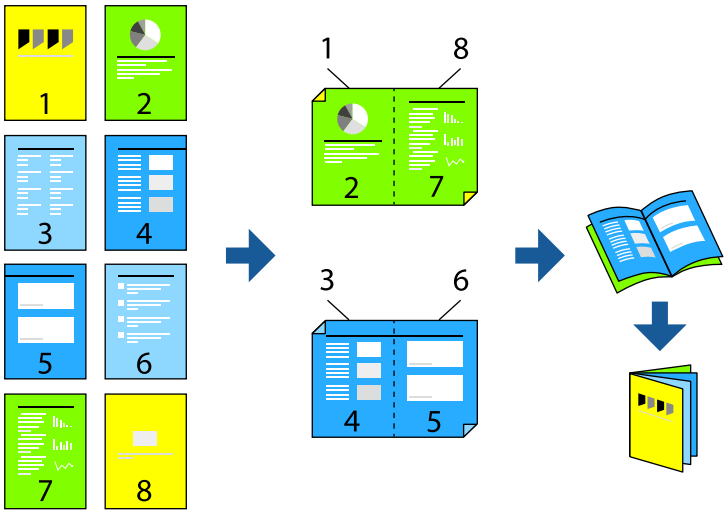

Main tab > **2-Sided Printing**

Related Information

➡ "Paper for 2-Sided Printing" on page 225
➡ "Cannot Perform Manual 2-sided Printing (Windows)" on page 218

Printing a Booklet

You can also print a booklet that can be created by re-ordering the pages and folding the printout.

Note:
This feature is not available with borderless printing.

Access the printer driver, and then select the following settings.

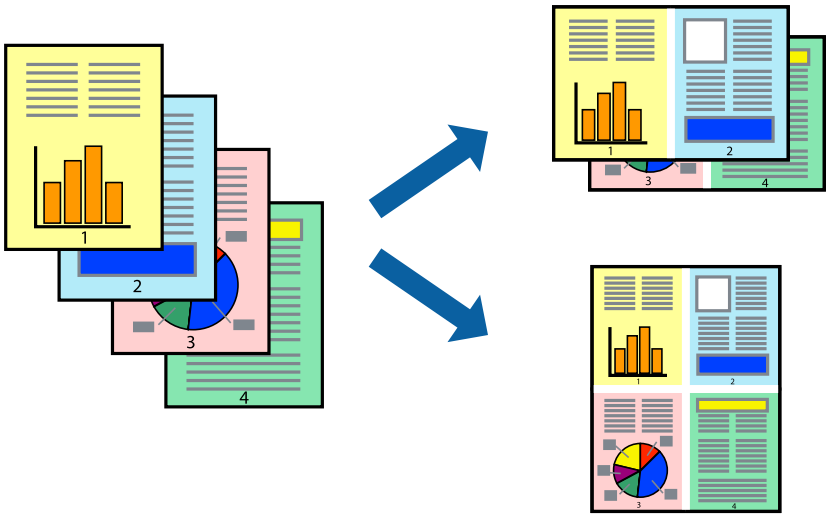

On the **Main** tab, select the 2-sided printing method from **2-Sided Printing**, and then select **Settings** > **Booklet**.

Related Information

➡ "Paper for 2-Sided Printing" on page 225
➡ "Cannot Perform Manual 2-sided Printing (Windows)" on page 218

Printing Several Pages on One Sheet

You can print several pages of data on a single sheet of paper.

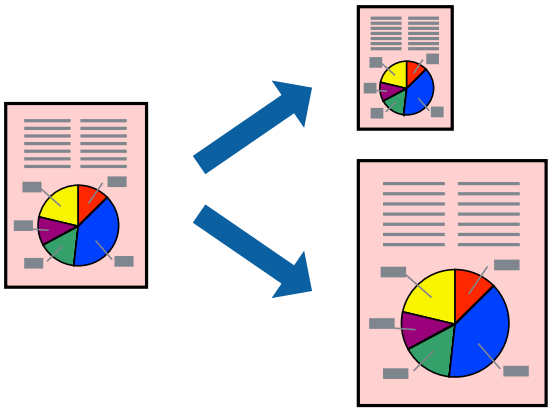

Note:
This feature is not available with borderless printing.

Access the printer driver, and then select the following settings.

Main tab > **Multi-Page** > **2-Up**, etc.

Printing to Fit the Paper Size

You can print to fit the paper size you loaded in the printer.

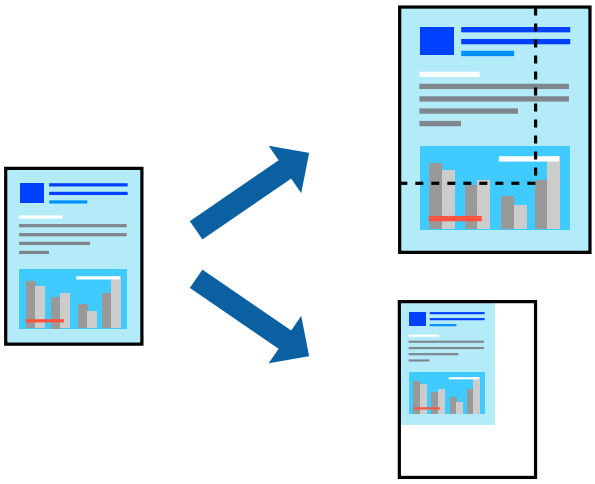

Note:
This feature is not available with borderless printing.

Access the printer driver, and then select the following settings.

On the **More Options** tab, select **Output Paper**, then select the size of the loaded paper.

Printing a Reduced or Enlarged Document at any Magnification

You can reduce or enlarge the size of a document by a specific percentage.

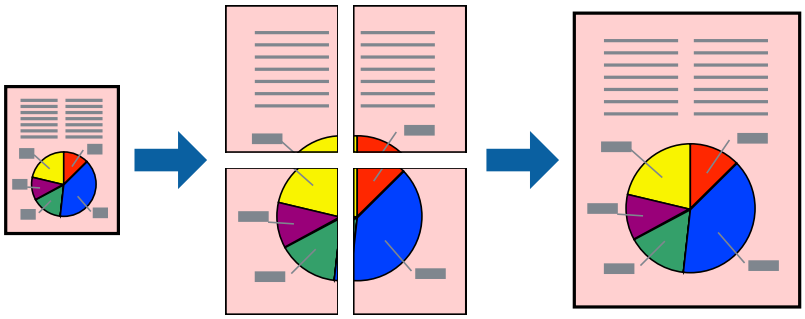

Note:
This feature is not available with borderless printing.

1. On the printer driver's **More Options** tab, select the document size from the **Document Size** setting.
2. Select the paper size you want to print on from the **Output Paper** setting.
3. Select **Reduce/Enlarge Document**, **Zoom to**, and then enter a percentage.

Printing One Image on Multiple Sheets for Enlargement (Creating a Poster)

This feature allows you to print one image on multiple sheets of paper. You can create a larger poster by taping them together.

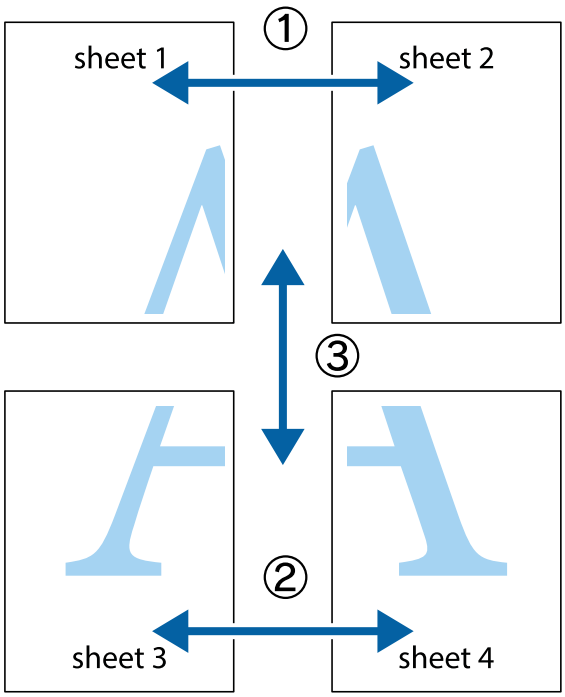

Note:
This feature is not available with 2-sided printing.

Access the printer driver, and then select the following settings.

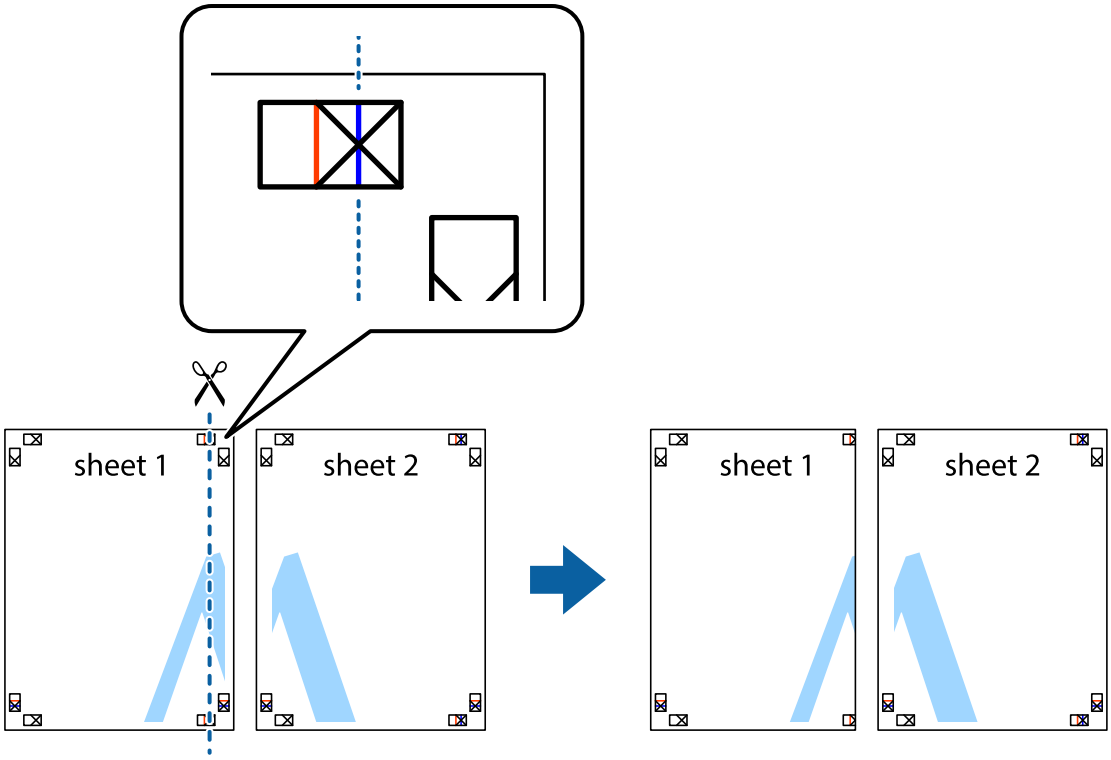

Main tab > **Multi-Page** > **2x2 Poster**, etc.

Making Posters Using Overlapping Alignment Marks

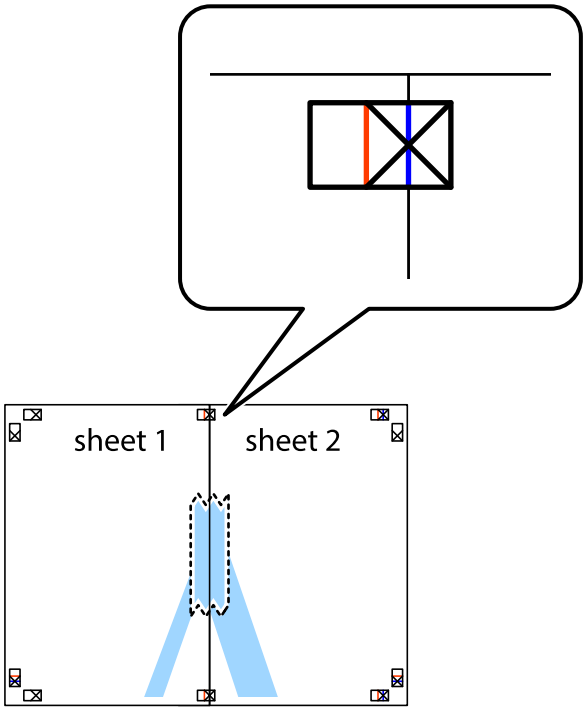

Here is an example of how to make a poster when **2x2 Poster** is selected, and **Overlapping Alignment Marks** is selected in **Print Cutting Guides**.

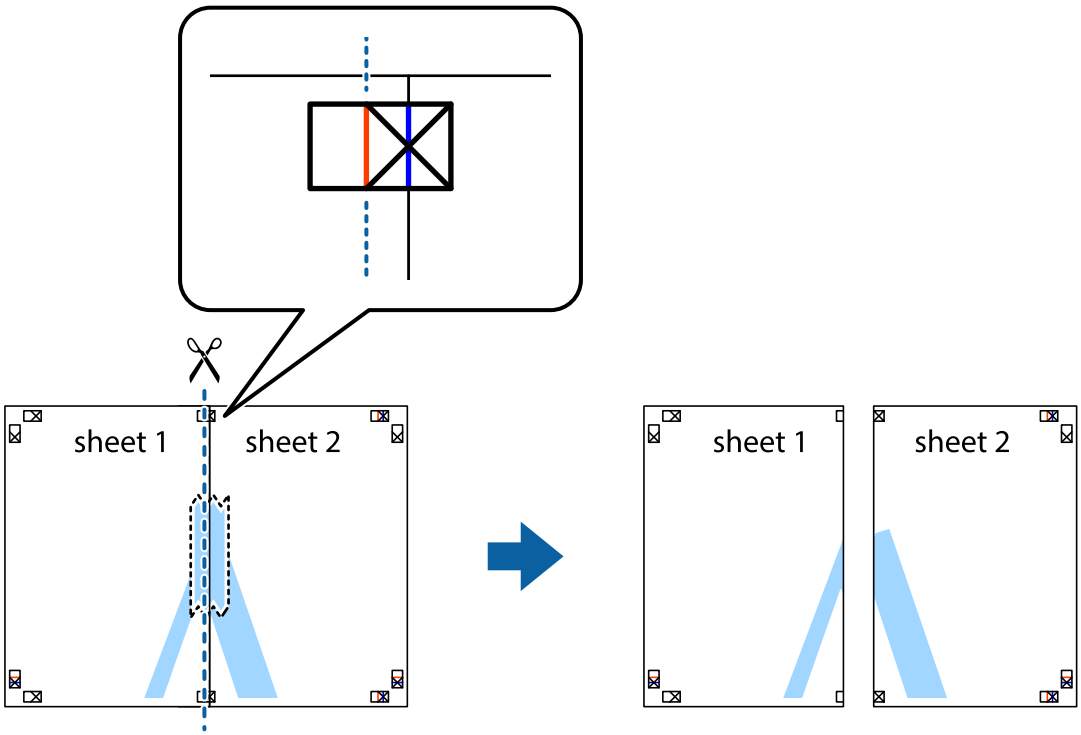

1. Prepare Sheet 1 and Sheet 2. Cut off the margins of Sheet 1 along the vertical blue line through the center of the top and bottom cross marks.

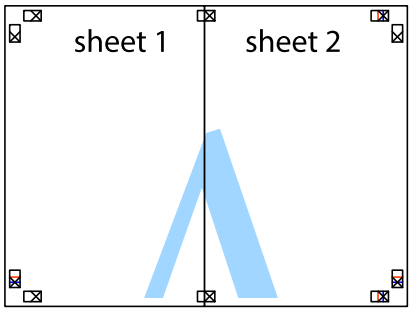

2. Place the edge of Sheet 1 on top of Sheet 2 and align the cross marks, then temporarily tape the two sheets together from the back.

3. Cut the taped sheets in two along the vertical red line through the alignment markers (this time, the line to the left of the cross marks).

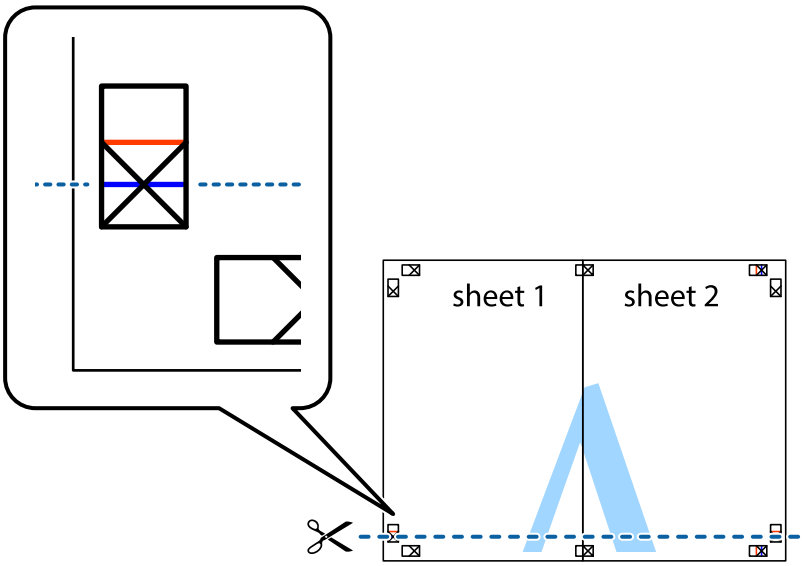

4. Tape the sheets together from the back.

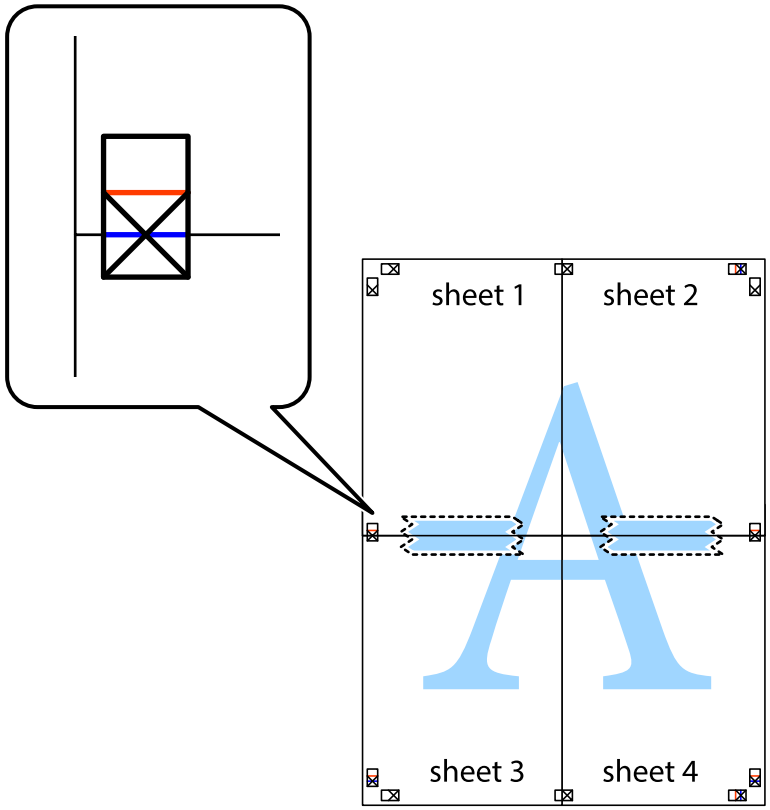

5. Repeat steps 1 to 4 to tape Sheet 3 and Sheet 4 together.

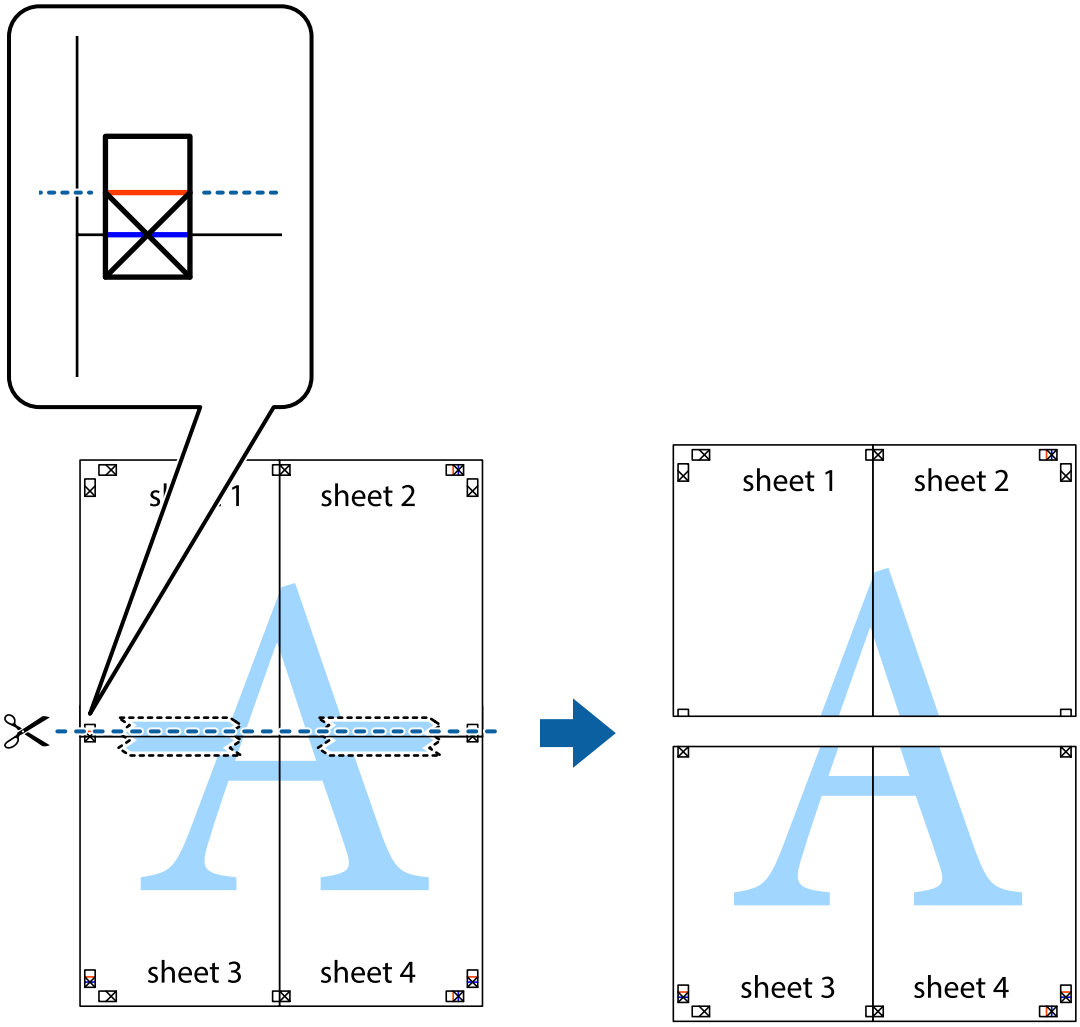

6. Cut off the margins of Sheet 1 and Sheet 2 along the horizontal blue line through the center of the left and right side cross marks.

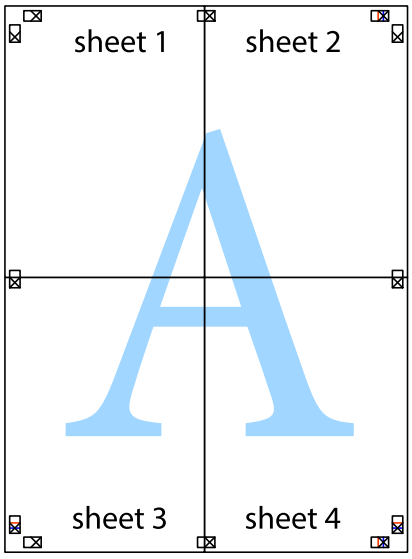

7. Place the edge of Sheet 1 and Sheet 2 on top of Sheet 3 and Sheet 4 and align the cross marks, and then temporarily tape them together from the back.

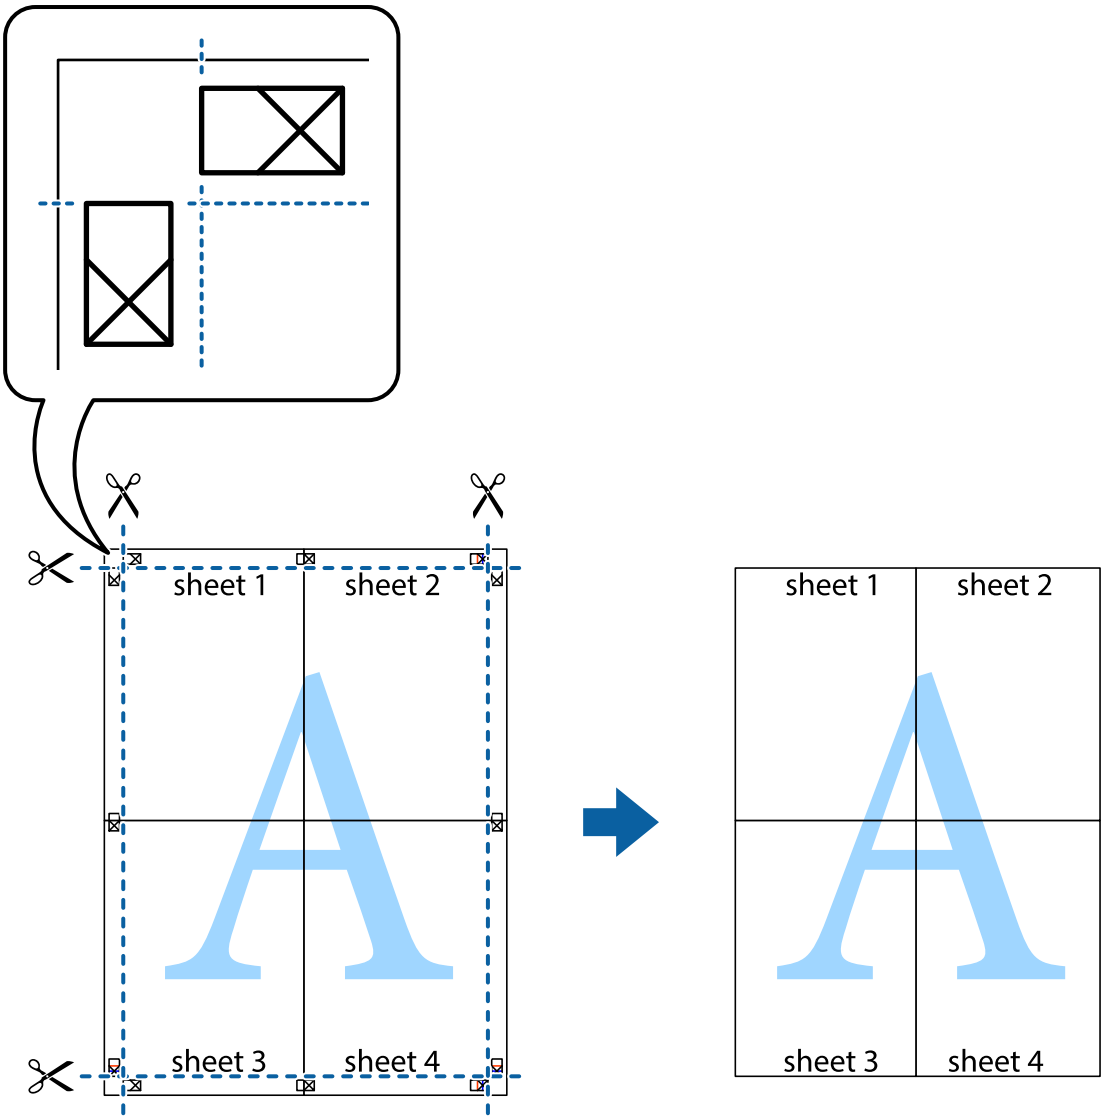

8. Cut the taped sheets in two along the horizontal red line through the alignment markers (this time, the line above the cross marks).

9. Tape the sheets together from the back.

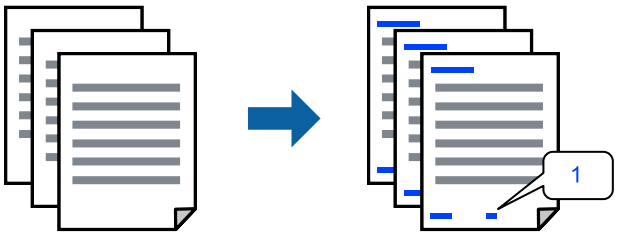

10. Cut off the remaining margins along the outer guide.

Printing with a Header and Footer

You can print information such as a user name and printing date in headers or footers.

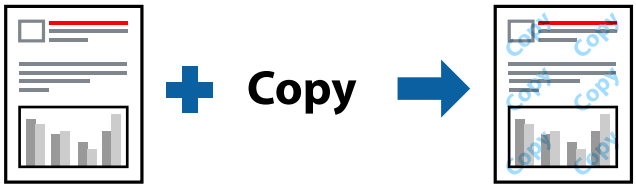

Access the printer driver, and then select the following settings.

More Options tab > **Watermark Features** > **Header/Footer**

Printing an Anti-Copy Pattern

You can print an anti-copy pattern on your printouts. When printing, the letters themselves are not printed and the entire print is screen-toned lightly. The hidden letters appear when photocopied to easily distinguish the original from the copies.

Anti-Copy Pattern is available under the following conditions:

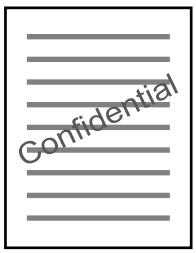

- ❏ Paper Type: Plain paper, Letterhead
- ❏ Quality: Standard
- ❏ Auto 2-Sided Printing: Off
- ❏ Borderless: Not selected
- ❏ Color Correction: Automatic

Access the printer driver, and then make the following settings.

More Options tab > **Watermark Features** > **Anti-Copy Pattern**

Printing a Watermark

You can print a watermark such as "Confidential" on your printouts. You can also add your own watermark.

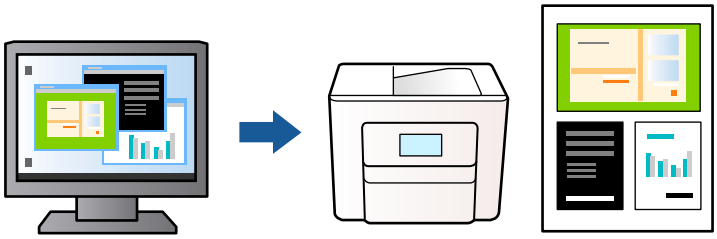

Note:
This feature is not available with borderless printing.

Access the printer driver, and then select the following settings.

More Options tab > **Watermark Features** > **Watermark**

Printing Multiple Files Together

Job Arranger Lite allows you to combine several files created by different applications and print them as a single print job. You can specify the print settings for combined files, such as multi-page layout, and 2-sided printing.

1. On the printer driver's **Main** tab, select **Job Arranger Lite**, and then click **OK**.
2. Click **Print**.

   When you start printing, the Job Arranger Lite window is displayed.
3. With the Job Arranger Lite window opened, open the file that you want to combine with the current file, and then repeat the above steps.
4. When you select a print job added to Print Project in the Job Arranger Lite window, you can edit the page layout.
5. Click **Print** from the **File** menu to start printing.

   Note:
   *If you close the Job Arranger Lite window before adding all the print data to the Print Project, the print job you are currently working on is canceled. Click **Save** from the **File** menu to save the current job. The extension of the saved files is "ecl".*

   *To open a Print Project, click **Job Arranger Lite** on the printer driver's **Maintenance** tab to open the Job Arranger Lite window. Next, select **Open** from the **File** menu to select the file.*

Printing Using the Color Universal Print Feature

You can enhance the visibility of texts and images in printouts.

Color Universal Print is only available when the following settings are selected.

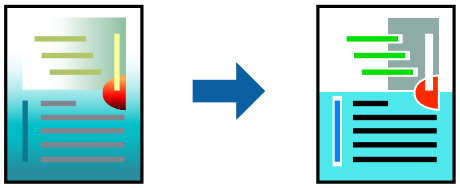

- ❏ Paper Type: Plain paper, Letterhead
- ❏ Quality: Standard or a higher quality
- ❏ Color: Color
- ❏ Applications: Microsoft® Office 2007 or later
- ❏ Text Size: 96 pts or smaller

Access the printer driver, and then make the following settings.

More Options tab > **Color Correction** > **Image Options** > **Color Universal Print**

Adjusting the Print Color

You can adjust the colors used in the print job. These adjustments are not applied to the original data.

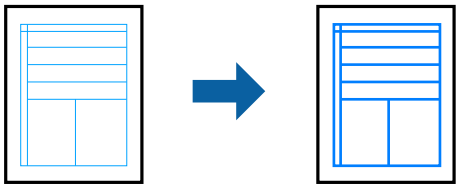

PhotoEnhance produces sharper images and more vivid colors by automatically adjusting the contrast, saturation, and brightness of the original image data.

Note:
PhotoEnhance *adjusts the color by analyzing the location of the subject. Therefore, if you have changed the location of the subject by reducing, enlarging, cropping, or rotating the image, the color may change unexpectedly. Selecting the borderless setting also changes the location of the subject resulting in changes in color. If the image is out of focus, the tone may be unnatural. If the color is changed or becomes unnatural, print in a mode other than* ***PhotoEnhance****.*

1. On the printer driver's **More Options** tab, select the method of color correction from the **Color Correction** setting.
   - ❏ Automatic: This setting automatically adjusts the tone to match the paper type and print quality settings.
   - ❏ Custom: Click **Advanced**, you can make your own settings.
2. Set the other items on the **Main** and **More Options** tabs as necessary, and then click **OK**.
3. Click **Print**.

Printing to Emphasize Thin Lines

You can thicken thin lines that are too thin to print.

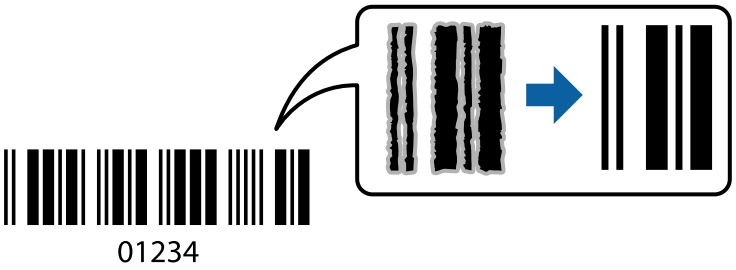

Access the printer driver, and then select the following settings.

More Options tab > **Color Correction** > **Image Options** > **Emphasize Thin Lines**

Printing Clear Bar Codes

If printed bar codes cannot be read correctly, you can print clearly using reduced ink bleeding. Only enable this feature if the bar code you printed cannot be scanned. Deblurring may not always be possible depending on the circumstances.

You can use this feature for the following paper types and print quality.

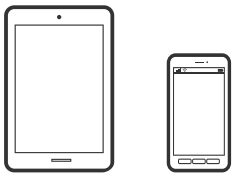

Plain paper, Envelope: Standard

Access the printer driver, and then make the following settings.

Maintenance tab > **Extended Settings** > **Barcode mode**

Printing Documents from Mobile Devices

You can print documents from a mobile device.

Printing Using Epson Smart Panel

Epson Smart Panel is an application that allows you to perform printer operations easily including printing, copying, or scanning from a mobile device. You can connect the printer and mobile device over a wireless network, check the ink levels and printer status, and check for solutions if an error occurs. You can also copy easily by registering a copy favorite.

Install Epson Smart Panel from the following URL or QR code.

https://support.epson.net/smpdl/

Start Epson Smart Panel, and then select the print menu on the home screen.

Printing Documents Using AirPrint

AirPrint enables instant wireless printing from iPhone, iPad, iPod touch, and Mac without the need to install drivers or download software.

Works with Apple AirPrint

Note:
If you disabled paper configuration messages on your printer control panel, you cannot use AirPrint. See the link below to enable the messages, if necessary.

1. Set up your printer for wireless printing. See the link below.

   https://epson.sn

2. Connect your Apple device to the same wireless network that your printer is using.

3. Print from your device to your printer.

   Note:
   For details, see the AirPrint page on the Apple website.

Related Information

➡ "Cannot Print Even Though a Connection has been Established (iOS)" on page 162

Printing Using Epson Print Enabler

You can wirelessly print your documents, emails, photos, and web pages right from your Android phone or tablet (Android v7.0 or later). With a few taps, your Android device will discover an Epson printer that is connected to the same wireless network.

Search for and install Epson Print Enabler from Google Play.

Go to **Settings** on your Android device, select **Printing**, and then enable Epson Print Enabler. From an Android application such as Chrome, tap the menu icon and print whatever is on the screen.

Note:
*If you do not see your printer, tap **All Printers** and select your printer.*

Printing Using Mopria Print Service

Mopria Print Service enables instant wireless printing from Android smartphones or tablets.

Install Mopria Print Service from Google Play.

For more details, access the Mopria Web site at https://mopria.org.

Printing on Envelopes

Printing on Envelopes from a Computer (Windows)

1. Load envelopes in the printer.
   "Loading Paper" on page 29
2. Open the file you want to print.
3. Access the printer driver window.
4. Select the envelope size from **Document Size** on the **Main** tab, and then select **Envelope** from **Paper Type**.
5. Set the other items on the **Main** and **More Options** tabs as necessary, and then click **OK**.
6. Click **Print**.

Printing on Envelopes from a Computer (Mac OS)

1. Load envelopes in the printer.
   "Loading Paper" on page 29
2. Open the file you want to print.
3. Select **Print** from the **File** menu or another command to access the print dialog.
4. Select the size as the **Paper Size** setting.
5. Select **Print Settings** from the pop-up menu.
6. Select **Envelope** as the **Media Type** setting.
7. Set the other items as necessary.
8. Click **Print**.

Printing Web Pages

Printing Web Pages from a Computer

Epson Photo+ allows you to display web pages, crop the specified area, and then edit and print them. See the application's help for details.

Printing Web Pages from Mobile Devices

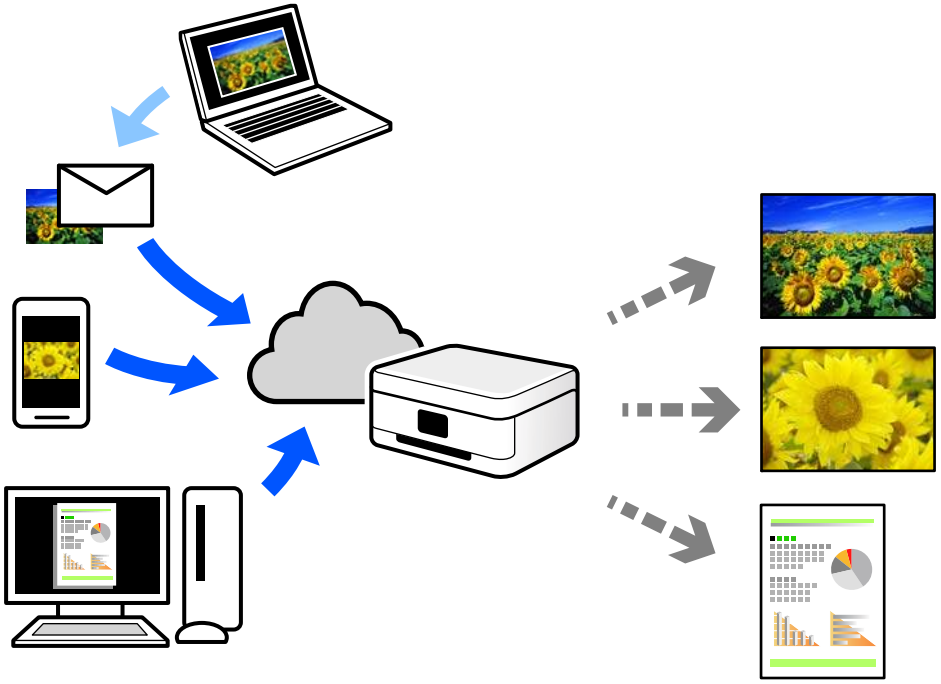

Install Epson Smart Panel from the following URL or QR code.

https://support.epson.net/smpdl/

Open the web page you want to print in your web browser app. Tap **Share** from the menu of the web browser application, select **Smart Panel**, and then start printing.

Printing Using a Cloud Service

By using Epson Connect service available on the Internet, you can print from your smartphone, tablet PC, or laptop, anytime and practically anywhere. To use this service, you need to register the user and the printer in Epson Connect.

The features available on the Internet are as follows.

❏ Email Print

When you send an email with attachments such as documents or images to an email address assigned to the printer, you can print that email and the attachments from remote locations such as your home or office printer.

❏ Epson Smart Panel

This Application is for iOS and Android, and allows you to print or scan from a smart phone or tablet. You can print documents, images, and web sites by sending them directly to a printer on the same wireless LAN.

❏ Remote Print Driver

This is a shared driver supported by Remote Print Driver. When printing using a printer in a remote location, you can print by changing the printer on the usual applications window.

See the Epson Connect web portal for details on how to setup or print.

https://www.epsonconnect.com/

http://www.epsonconnect.eu (Europe only)

Copying

Available Copying Methods. 55

Basic Menu Options for Copying. 59

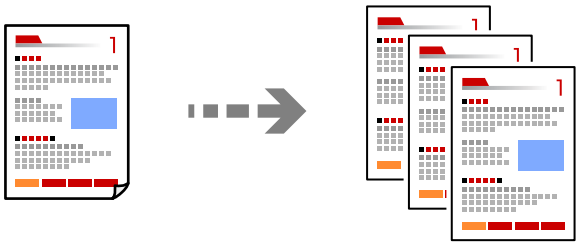

Advanced Menu Options for Copying. 60

Available Copying Methods

Place the originals on the scanner glass or the ADF, and then select the **Copy** menu on the home screen.

Copying Originals

You can copy the originals of fixed size or custom size by color or monochrome.

1. Load paper in the printer.
   "Loading Paper" on page 29
2. Place the originals.
   If you want to copy multiple originals, place all of the originals on the ADF.
   "Placing Originals" on page 31
3. Select **Copy** on the home screen.
4. Select the **Copy** tab, and then select **B&W** or **Color**.

5. Tap ◇.

Copying on 2-Sides

Copy multiple originals on both sides of the paper.

1. Place all originals face up in the ADF.

   > ***Important:***
   > *If you want to copy originals that are not supported by the ADF, use the scanner glass.*
   > *"Originals that are not Supported by the ADF" on page 32*

   Note:
   You can also place the originals on the scanner glass.
   "Placing Originals" on page 30

2. Select **Copy** on the home screen.

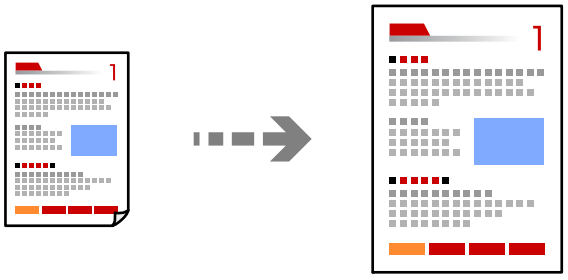

3. Select the **Copy** tab, and then select (**2-Sided**) , and then select the 2-sided menu option you want to perform.

4. Specify the original orientation and the binding position, and then select **OK**.

5. Tap ◇.

Copying by Enlarging or Reducing

You can copy originals at a specified magnification.

1. Place the originals.

   If you want to copy multiple originals, place all of the originals on the ADF.

   "Placing Originals" on page 31

2. Select **Copy** on the home screen.

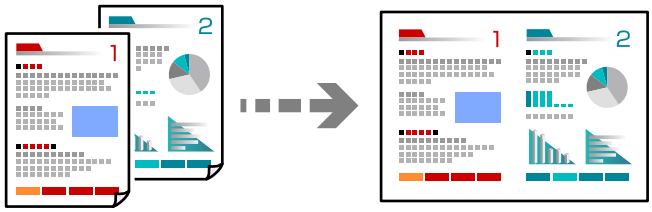

3. Select the **Advanced Settings** tab, select **Reduce/Enlarge**.
4. Specify the amount of enlargement or reduction, and then select **OK**.
5. Tap ⓘ on the **Copy** tab.

Related Information

➡ "Advanced Menu Options for Copying" on page 60

Copying Multiple Originals onto One Sheet

You can copy the multiple originals onto a single sheet.

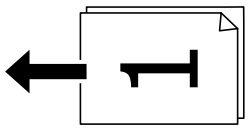

1. Place all originals face up in the ADF.

   "Placing Originals" on page 31

   Place them in the direction shown in the illustration.

   ❏ Portrait Originals

   ❏ Landscape Originals

   > ***Important:***
   > *If you want to copy originals that are not supported by the ADF, use the scanner glass.*
   > *"Originals that are not Supported by the ADF" on page 32*

   Note:
   You can also place the originals on the scanner glass.

   "Placing Originals" on page 31

2. Select **Copy** on the home screen.

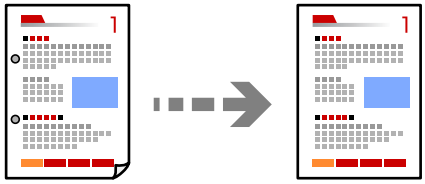

3. Select the **Advanced Settings** tab, and then select **Multi-Page** > **2-up**.
4. Specify the layout order and the original orientation, and then select **OK**.
5. Tap ⓘ on the **Copy** tab.

Related Information

➡ "Advanced Menu Options for Copying" on page 60

Copying Originals Using Good Quality

You can copy originals without shadows and punched holes.

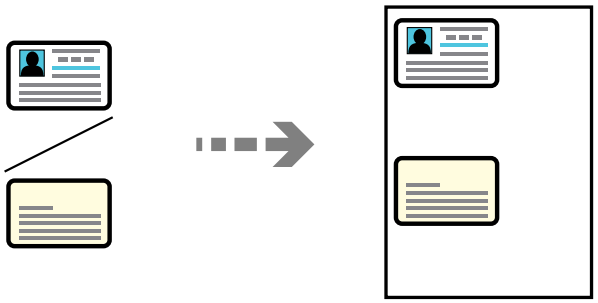

1. Place the originals.

   If you want to copy multiple originals, place all of the originals on the ADF.

   "Placing Originals" on page 31
2. Select **Copy** on the home screen.
3. Select the **Advanced Settings** tab, select **Remove Shadow** or **Remove Punch Holes**, and then enable the setting.
4. Tap ⓘ on the **Copy** tab.

Copying ID card

Scans both sides of an ID card and copies onto one side of a paper.

1. Place the original on the scanner glass.

   "Placing Originals" on page 31
2. Select **Copy** on the home screen.

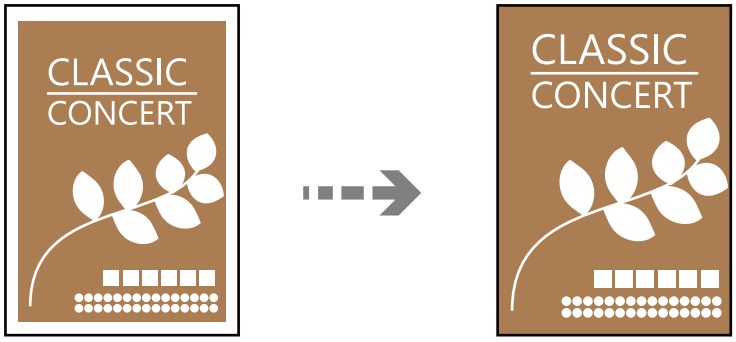

3. Select the **Advanced Settings** tab, and then enable **ID Card Copy**.
4. Specify the Orientation (Original), and then select **OK**.
5. Tap ⓘ on the **Copy** tab.

Related Information

➡ "Advanced Menu Options for Copying" on page 60

Copying Without Margins

Copies without margins around the edges. The image is enlarged a little to remove margins from the edges of the paper.

1. Place the original on the scanner glass.
   "Placing Originals" on page 31
2. Select **Copy** on the home screen.
3. Select the **Advanced Settings** tab, and then enable **Borderless Copy**.
4. Specify the **Expansion**.
5. Tap ⓘ on the **Copy** tab.

Basic Menu Options for Copying

Note:
The items may not be available depending on other settings you made.

B&W:

Copies the original in black and white (monochrome).

Color:

Copies the original in color.

(2-Sided):

Select 2-sided layout.

❏ 1→1-Sided

Copies one side of an original onto a single side of paper.

❏ 1→2-Sided

Copies two single-sided originals onto both sides of a single sheet of paper. Select the orientation of your original and the binding position of the paper.

(2-Sided):

❏ 1→1-Sided

Copies one side of an original onto a single side of paper.

❏ 2→2-Sided

Copies both sides of a double-sided original onto both sides of a single sheet of paper. Select the orientation of your original and the binding position of the original and the paper.

❏ 1→2-Sided

Copies two single-sided originals onto both sides of a single sheet of paper. Select the orientation of your original and the binding position of the paper.

❏ 2→1-Sided

Copies both sides of a double-sided original onto one side of two sheets of paper. Select the orientation and the binding position of the original.

(Density):

Increase the level of density when the copying results are faint. Decrease the level of density when ink smears.

Advanced Menu Options for Copying

Note:
The items may not be available depending on other settings you made.

Paper Setting:

Select the paper size and the paper type you loaded.

Reduce/Enlarge:

Configures the magnification ratio of the enlargement or reduction. If you want to reduce or enlarge the original by a specific percentage, select the value, and then enter a percentage within a range of 25 to 400%.

❏ Actual Size

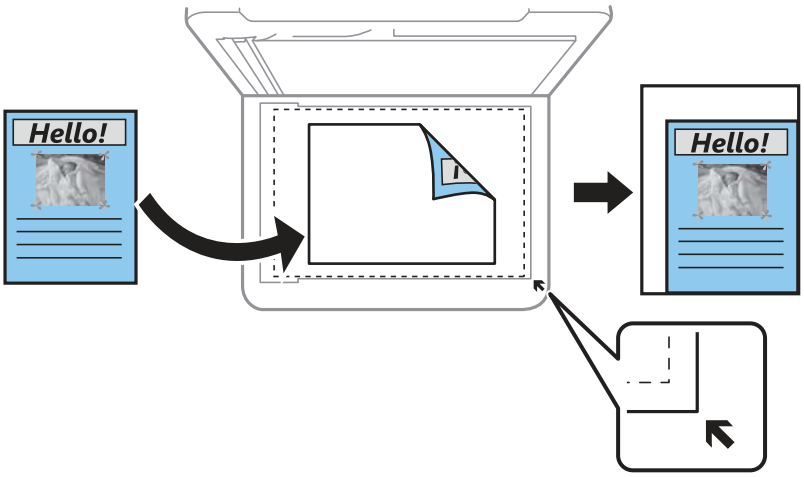

Copies at 100 % magnification.

❏ A4→A5 and others

Automatically enlarges or reduces the original to fit to a specific paper size.

❏ Auto Fit Page

Detects the scan area and automatically enlarges or reduces the original to fit to the paper size you selected. When there are white margins around the original, the white margins from the corner mark of the scanner glass are detected as the scan area, but the margins at the opposite side may be cropped.

Original Size:

Select the size of your original. When copying non-standard size originals, select the size closest to your original.

Multi-Page:

❏ Off

Copies a single-sided original onto a single sheet.

❏ 2-up

Copies two single-sided originals onto a single sheet in 2-up layout.

Quality:

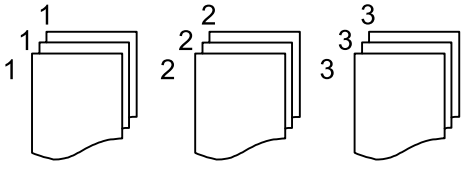

Select the quality for copying. Selecting **High** provides higher quality printing, but the printing speed may be slower.

Finishing:

Select how to eject the paper for multiple copies of multiple originals.

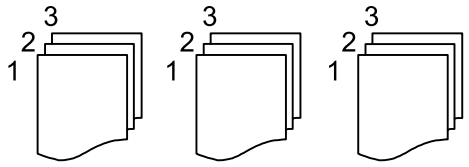

❏ Group (Same Pages)

Copies the originals by page as a group.

❏ Collate (Page Order)

Copies the originals collated in order and sorted into sets.

Original Orientation:

Select the orientation of your original.

Remove Shadow:

Removes shadows in the original that appear in the copies.

❏ Surround

Removes shadows that appear around copies when copying thick paper.

❏ Center

Removes shadows that appear in the center of copies when copying a booklet.

Remove Punch Holes:

Removes the binding holes when copying.

ID Card Copy:

Select to scan both sides of an ID card and copies onto one side of a paper.

Borderless Copy:

Select to copy without margins around the edges. The image is enlarged a little to remove margins from the edges of the paper. Select how much to enlarge in the **Expansion** setting.

Clear All Settings:

Select to reset the copy settings to their defaults.

Scanning

Basic Information on Scanning. 64

Scanning Originals to a Computer. 68

Scanning Originals to the Cloud. 70

Scanning Originals Using WSD. 72

Scanning Originals to a Smart Device. 73

Advanced Scanning. 73

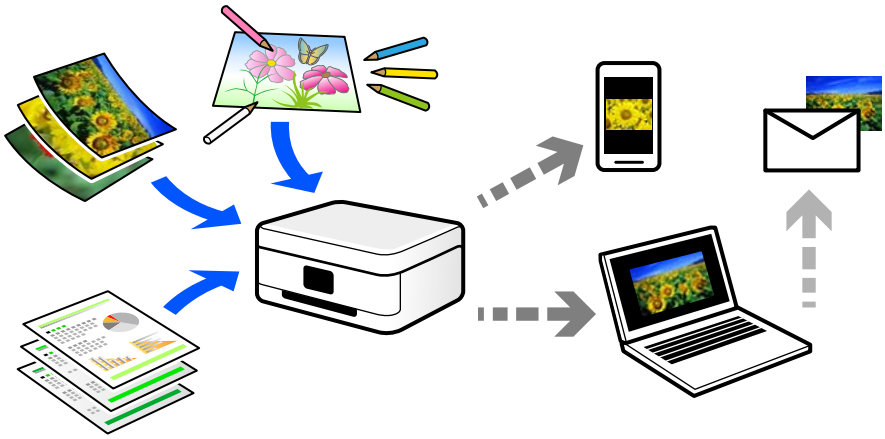

Basic Information on Scanning

What is a "Scan"?

A "scan" is the process of converting the optical information of paper data (such as documents, magazine clippings, photos, and handwritten illustrations) into digital image data.

You can save scanned data as a digital image such as a JPEG or PDF.

You can then print the image, send it by email, or share the image in other ways.

Scanning Uses

You can use scanning in a variety of ways to make your life more convenient.

- ❏ By scanning a paper document and turning it into digital data, you can read it on a computer or a mobile device.
- ❏ By scanning tickets or flyers into digital data, you can dispose of the originals and reduce clutter.
- ❏ By scanning important documents, you can back them up to cloud services or another storage medium, just in case they get lost.
- ❏ You can send the scanned photos or documents to friends by email.
- ❏ By scanning hand-drawn illustrations, you can share them on social media at a much higher quality than by just taking a photo on your mobile device.
- ❏ By scanning your favorite pages from newspapers or magazines, you can save them and dispose of the originals.

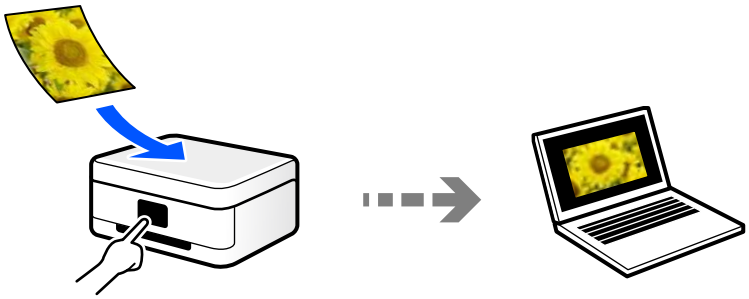

Available Scanning Methods

You can use any of the following methods to scan using this printer.

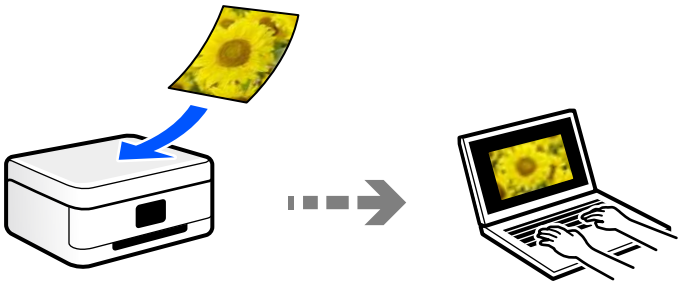

Scanning to a Computer

There are two methods of scanning originals to a computer; scanning using the printer's control panel, and scanning from the computer.

You can scan easily from the control panel.

Use the scanning application Epson ScanSmart to scan from the computer. You can edit images after scanning.

Scanning Using WSD

You can save the scanned image to a computer connected to the printer, using WSD feature.

If you are using Windows 7, you need to select WSD settings on your computer before scanning.

Setting Up a WSD Port

This section explains how to set up a WSD port for Windows 7.

Note:
For Windows 8 or later, the WSD port is set up automatically.

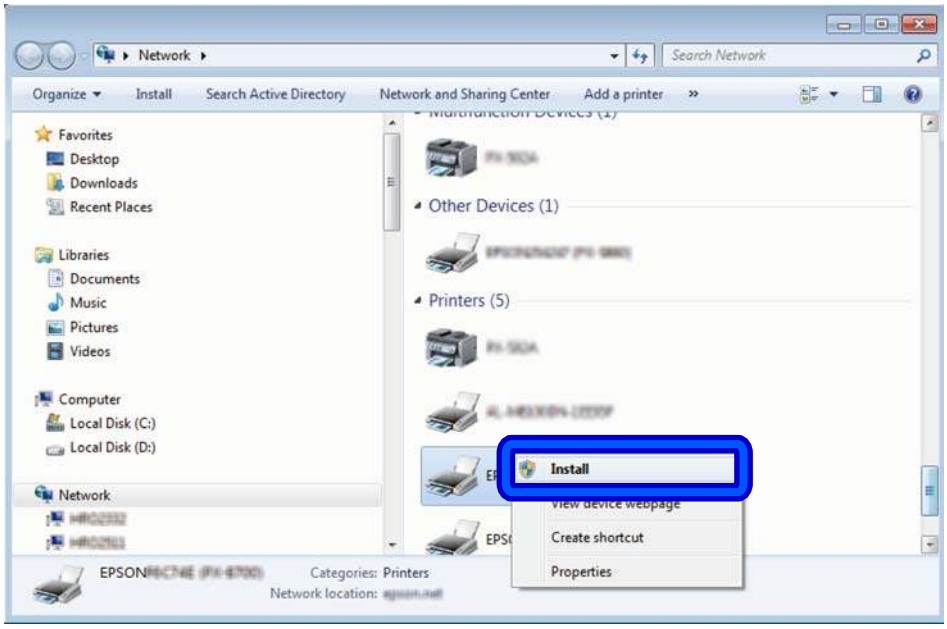

The following is necessary to set up a WSD port.

❏ The printer and the computer are connected to the network.

❏ The printer driver is installed on the computer.

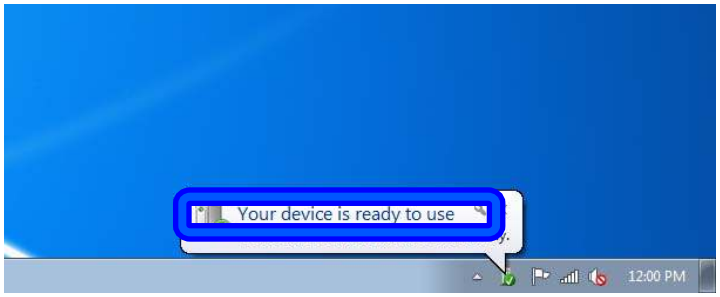

1. Turn the printer on.
2. Click start, and then click **Network** on the computer.
3. Right-click the printer, and then click **Install**.
   Click **Continue** when the **User Account Control** screen is displayed.

Click **Uninstall** and start again if the **Uninstall** screen is displayed.

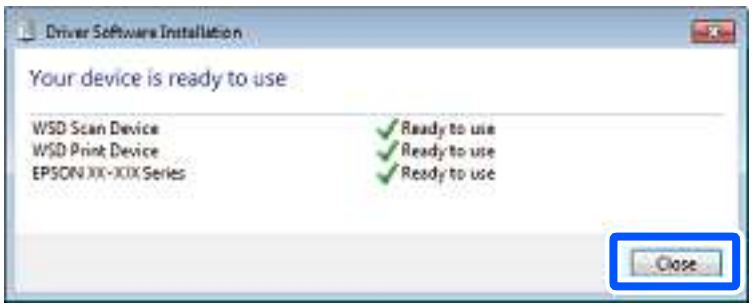

Note:
The printer name you set on the network and model name (EPSON XXXXXX (XX-XXXX)) are displayed on the network screen. You can check the printer's name set on the network from the printer's control panel or by printing a network status sheet.

4. Click **Your device is ready to use**.

5. Check the message, and then click **Close**.

6. Open the **Devices and Printers** screen.

   Click start > **Control Panel** > **Hardware and Sound** (or **Hardware**) > **Devices and Printers**.

7. Check that an icon with the printer's name on the network is displayed.

   Select the printer name when using with WSD.

Scanning Directly from Mobile Devices

You can save scanned images directly to a mobile device by using the Epson Smart Panel application.

Recommended File Formats

Generally speaking, the JPEG format is suitable for photos while the PDF format is suitable for documents.

See the following descriptions to choose the best format for what you want to do.

File Format	Description
JPEG (.jpg)	A file format that allows you to compress the data to be saved. If the compression ratio is high, the image quality declines, and you cannot convert the image back to the original quality. This is the standard image format for digital cameras. This format is suitable for images that have many colors.
PDF (.pdf)	A general file format that can be used across different operating systems and provides the same level of screen display and print result. Also, you can save multiple scans as a one file. You can view PDF files using dedicated PDF reading software or in web browsers.

Recommended Resolutions

Resolution indicates the number of pixels (smallest area of an image) for each inch (25.4 mm), and is measured in dpi (dots per inch). The advantage of increasing the resolution is that the details in the image become fine. However, it can also have the following disadvantages.

- ❏ The file size becomes large

  (When you double the resolution, the file size becomes about four times larger.)
- ❏ Scanning, saving, and reading the image takes a long time
- ❏ Sending and receiving emails or faxes takes a long time
- ❏ The image becomes too large to fit the display or print on the paper

See the table and set the appropriate resolution for the purpose of your scanned image.

Purpose	Resolution (Reference)
Displaying on a computer Sending by email	Up to 200 dpi
Printing using a printer Sending by fax	200 to 300 dpi

Scanning Originals to a Computer

There are two methods of scanning originals to a computer; scanning using the printer's control panel, and scanning from the computer.

Scanning from the Control Panel

To use this feature, make sure the following applications are installed on your computer.

OS	Application Required for Use	Checking for Installed Applications
Windows 11	❏ Epson ScanSmart ❏ Epson Scan 2	Click the start button, and then check the **All apps** > **Epson Software** folder > **Epson ScanSmart**, and the **EPSON** folder > **Epson Scan 2**.
Windows 10	❏ Epson ScanSmart ❏ Epson Scan 2	Click the start button, and then check the **Epson Software** folder > **Epson ScanSmart**, and the **EPSON** folder > **Epson Scan 2**.
Windows 8.1 / Windows 8	❏ Epson ScanSmart ❏ Epson Scan 2	Enter the application name in the search charm, and then check the displayed icon.
Windows 7	❏ Epson ScanSmart ❏ Epson Scan 2	Click the start button, and then select **All Programs**. Next, check the **Epson Software** folder > **Epson ScanSmart**, and the **EPSON** folder > **Epson Scan 2**.
OS X El Capitan (10.11) or later	❏ Epson ScanSmart ❏ Epson Scan 2	Select **Go** > **Applications** > **Epson Software**.
OS X Yosemite (10.10) / OS X Mavericks (10.9.5)	❏ Epson Event Manager ❏ Epson Scan 2	Select **Go** > **Applications** > **Epson Software**.

If the application is not installed, download and install it from the Epson website.

www.epson.com

Note:
For Windows Server operating systems, you can not use this feature.

1. Place the originals.

   "Placing Originals" on page 31

2. Select **Scan** on the control panel.

3. Select **Computer**.
4. Select a computer on which to save the scanned images.
   - ❏ If the **Select Computer** screen is displayed, select the computer from the screen.
   - ❏ If the **Scan to Computer** screen is displayed and the computer is already selected, make sure the selected computer is correct. If you want to change the computer, select , and then select another computer.

5. Select to select how to save the scanned image to a computer.
   - ❏ Preview on Computer (Windows, or OS X El Capitan (10.11) or later): Previews the scanned image on a computer before saving images.
   - ❏ Save as JPEG: Saves the scanned image in JPEG format.
   - ❏ Save as PDF: Saves the scanned image in PDF format.
6. Tap .

When using Windows, or OS X El Capitan (10.11) or later: Epson ScanSmart automatically starts on your computer, and scanning starts.

Note:
- ❏ *See the Epson ScanSmart help for detailed operation information for the software. Click **Help** on the Epson ScanSmart screen to open the help.*
- ❏ *The color, size, and border of the scanned image will not be exactly the same as the original.*

Scanning from a Computer

You can scan from a computer by using Epson ScanSmart.

This application allows you to scan documents and photos easily, and then save the scanned images in simple steps.

Note:
Windows Server operating systems are not supported.

1. Place the originals.

   "Placing Originals" on page 31

2. Start Epson ScanSmart.
   - ❏ Windows 11
     Click the start button, and then select **All apps** > **Epson Software** > **Epson ScanSmart**.
   - ❏ Windows 10
     Click the start button, and then select **Epson Software** > **Epson ScanSmart**.
   - ❏ Windows 8.1/Windows 8
     Enter the application name in the search charm, and then select the displayed icon.
   - ❏ Windows 7
     Click the start button, and then select **All Programs** > **Epson Software** > **Epson ScanSmart**.
   - ❏ Mac OS
     Select **Go** > **Applications** > **Epson Software** > **Epson ScanSmart**.
3. When the Epson ScanSmart screen is displayed, follow the on-screen instructions to scan.

   Note:
   *Click **Help** to view detailed operation information.*

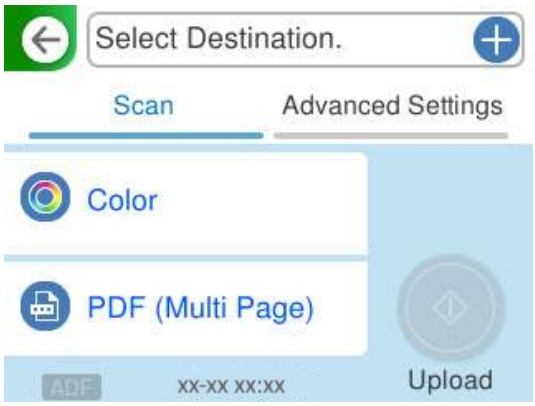

Scanning Originals to the Cloud

You can send scanned images to cloud services. Before using this feature, make settings using Epson Connect. See the following Epson Connect portal website for details.

https://www.epsonconnect.com/

http://www.epsonconnect.eu (Europe only)

1. Make sure that you have made settings using Epson Connect.
2. Place the original.
   "Placing Originals" on page 31
3. Select **Scan** on the control panel.
4. Select **Cloud**.
5. Select ⊕ on the top of the screen, and then select a destination.

6. Set items on **Scan** tab, such as the save format.

"Cloud Storage Scan Setting Items" on page 71

7. Select **Advanced Settings** tab, and then check settings, and change them if necessary.

8. Select **Scan** tab again, and then tap ⓕ.

Note:
The color, size, and border of the scanned image will not be exactly the same as the original.

Cloud Storage Scan Setting Items

B&W/Color

Select whether to scan in monochrome or in color.

File Format:

Select the format in which to save the scanned image.

When you want to save as PDF, select whether to save all originals as one file (multi-page) or save each original separately (single page).

Advanced Menu Options for Scanning to the Cloud

Note:
The items may not be available depending on other settings you made.

Scan Area:

Select the scan area. To crop the white space around the text or image when scanning, select **Auto Cropping**. To scan at the maximum area of the scanner glass, select **Max Area**.

❏ Original Orientation:

Select the orientation of the original.

(Quality)

❏ Original Type:

Select the type of your original.

❏ Resolution:

Select the scanning resolution.

Original Type:

Select the type of your original.

Density:

Select the contrast of the scanned image.

Remove Shadow:

Remove the shadows of the original that appear in the scanned image.

❏ Surround:

Remove the shadows at the edge of the original.

❏ Center:

Remove the shadows of the binding margin of the booklet.

Remove Punch Holes:

Remove the punch holes that appear in the scanned image. You can specify the area to erase the punch holes by entering a value in the box on the right.

❏ Erasing Position:

Select the position to remove the punch holes.

❏ Original Orientation:

Select the orientation of the original.

Clear All Settings

Resets the scan settings to their defaults.

Scanning Originals Using WSD

You can save the scanned image to a computer connected to the printer, using WSD feature.

Note:

❏ *This feature is only available for computers running Windows 7 or later.*

❏ *If you are using Windows 7, you need to setup your computer in advance using this feature.*

1. Place the originals.

   "Placing Originals" on page 31

2. Select **Scan** on the control panel.

3. Select **WSD**.

4. Select a computer.

5. Tap ⓘ.

Note:
The color, size, and border of the scanned image will not be exactly the same as the original.

Scanning Originals to a Smart Device

Note:
Before scanning, install Epson Smart Panel on your smart device.

1. Place the originals.

   "Placing Originals" on page 30

2. Start Epson Smart Panel on your smart device.
3. Select scan menu on the home screen.
4. Follow the on-screen instructions to scan and save the images.

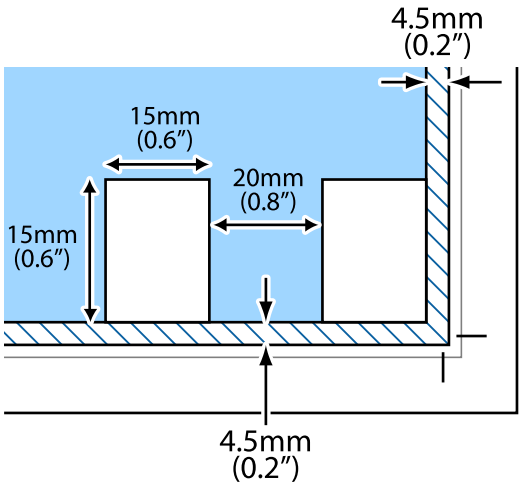

Advanced Scanning

Scanning Multiple Photos at the Same Time

Using Epson ScanSmart, you can scan multiple photos at the same time and save each image individually.

Note:
Windows Server operating systems are not supported.

1. Place the photos on the scanner glass. Place them 4.5 mm (0.2 in.) away from the horizontal and vertical edges of the scanner glass, and place them at least 20 mm (0.8 in.) away from each other.

Note:
The photos should be larger than 15×15 mm (0.6×0.6 in.).

2. Start Epson ScanSmart.
   - ❏ Windows 11
     Click the start button, and then select **All apps** > **Epson Software** > **Epson ScanSmart**.
   - ❏ Windows 10
     Click the start button, and then select **Epson Software** > **Epson ScanSmart**.
   - ❏ Windows 8.1/Windows 8
     Enter the application name in the search charm, and then select the displayed icon.
   - ❏ Windows 7
     Click the start button, and then select **All Programs** > **Epson Software** > **Epson ScanSmart**.
   - ❏ Mac OS
     Select **Go** > **Applications** > **Epson Software** > **Epson ScanSmart**.
3. When the Epson ScanSmart screen is displayed, follow the on-screen instructions to scan.

Scanned photos are saved as individual images.

Before Using Fax Features

Check the following before you start using the fax features.

❏ The printer and the phone line, and (if it is being used) the phone machine are connected correctly

❏ Fax basic settings (Fax Setting Wizard) is complete

❏ Other necessary Fax Settings are complete

See "Related Information" below to make settings.

Related Information

➡ "Connecting the Printer to a Phone Line" on page 76
➡ "Preparing the Printer to Send and Receive Faxes" on page 79
➡ "Settings to Save Received Faxes" on page 83
➡ "Fax Settings" on page 240
➡ "Making Contacts Available" on page 85
➡ "User Settings" on page 248

Connecting the Printer to a Phone Line

Compatible Telephone Lines

You can use the printer over standard analog telephone lines (PSTN = Public Switched Telephone Network) and PBX (Private Branch Exchange) telephone systems.

You may not be able to use the printer with the following phone lines or systems.

❏ VoIP phone lines such as DSL or fiber-optic digital service

❏ Digital phone lines (ISDN)

❏ Some PBX telephone systems

❏ Systems where adapters such as terminal adapters, VoIP adapters, splitters, or DSL router are connected between the telephone wall jack and the printer

Connecting the Printer to a Phone Line

Connect the printer to a phone device wall jack using an RJ-11 (6P2C) phone cable. When connecting a phone device to the printer, use a second RJ-11 (6P2C) phone cable.

Depending on the area, a phone cable may be included with the printer. If it is included, use that cable.

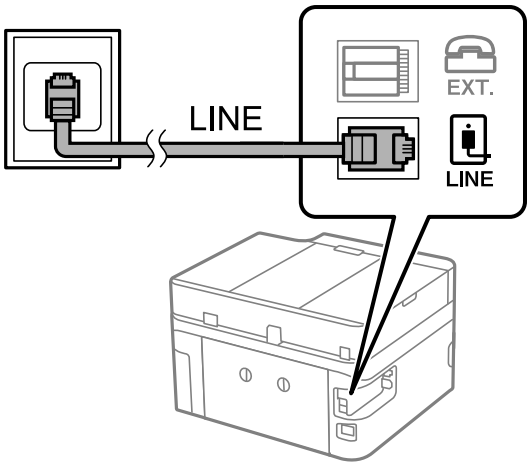

You may need to connect the phone cable to an adapter provided for your country or region.

Note:
Remove the cap from the EXT. port of the printer only when connecting your phone device to the printer. Do not remove the cap if you are not connecting your phone device.

In areas where lightning strikes occur frequently, we recommend that you use a surge protector.

Connecting to a Standard Phone Line (PSTN) or PBX

Connect a phone cable from the telephone wall jack or PBX port to the LINE port on the back of the printer.

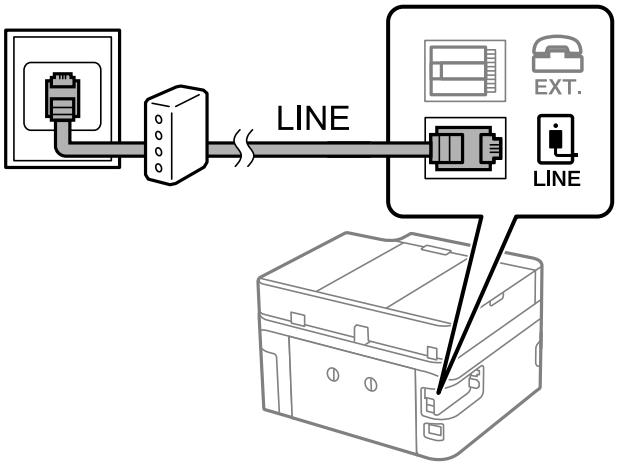

Related Information

➡ "Connecting Your Phone Device to the Printer" on page 77

Connecting to DSL or ISDN

Connect a phone cable from the DSL modem or the ISDN terminal adapter to the LINE port on the back of the printer. See the documentation provided with the modem or the adapter for more details.

Note:
If your DSL modem is not equipped with a built-in DSL filter, connect a separate DSL filter.

Related Information

➡ "Connecting Your Phone Device to the Printer" on page 77

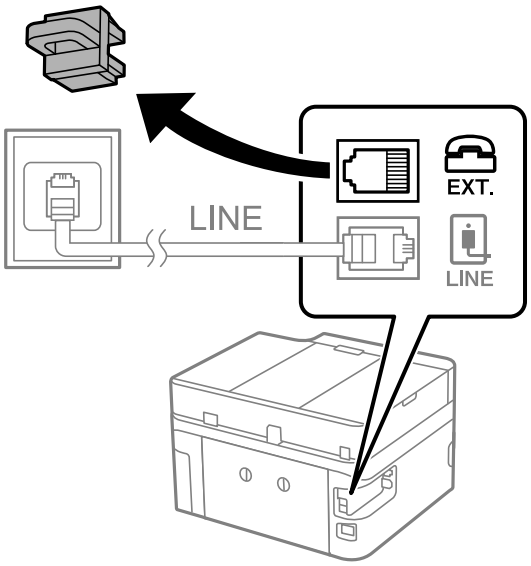

Connecting Your Phone Device to the Printer

When using the printer and your telephone on a single phone line, connect the telephone to the printer.

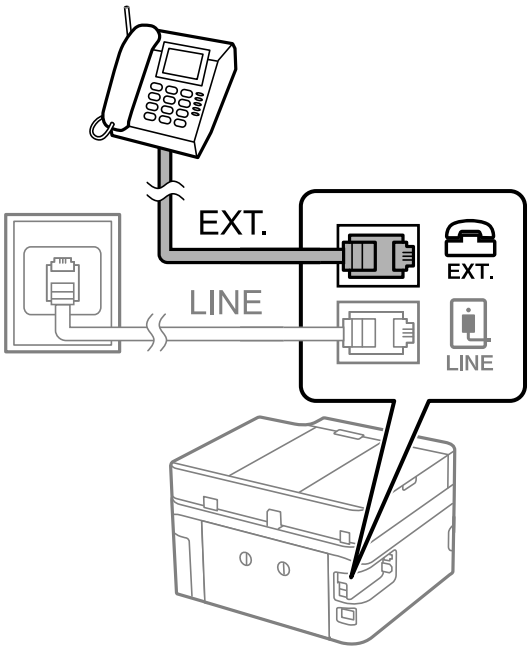

Note:

- ❏ *If your phone device has a fax function, disable the fax function before connecting. See the manuals that came with the phone device for details. Depending on the model of the phone device, the fax function cannot be completely disabled, so you may not be able to use it as an external phone.*
- ❏ *If you connect an answering machine, make sure the printer's **Rings to Answer** setting is set higher than the number of rings your answering machine is set to answer a call.*

1. Remove the cap from the EXT. port on the back of the printer.

2. Connect the phone device and the EXT. port with a phone cable.

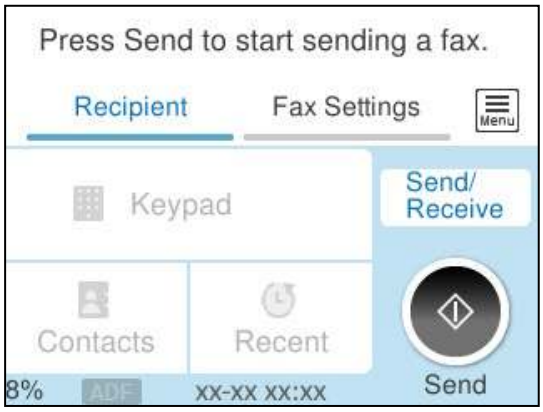

Note:
When sharing a single phone line, make sure you connect the phone device to the EXT. port of the printer. If you split the line to connect the phone device and the printer separately, the phone and the printer do not work correctly.

3. Select **Fax** on the printer's control panel.

4. Pick up the handset.

   If a message to start sending or receiving faxes is displayed as shown on the following screen, the connection has been established.

Related Information

➡ "Preparing the Printer to Send and Receive Faxes" on page 79
➡ "Making Settings for Using the Answering Machine Function on a Connected Phone" on page 82
➡ "Making Settings to Receive Faxes Operating Only a Connected Phone" on page 82
➡ "Receive Mode:" on page 241

Preparing the Printer to Send and Receive Faxes

Fax Setting Wizard configures the basic fax features to prepare the printer to send and receive faxes.

The Wizard is displayed automatically when the printer is turned on for the first time. You can also display the wizard manually from the printer's control panel. You need to run the wizard again if the wizard is skipped when the printer is first turned on or when the connection environment has changed.

❏ You can configure the following items through the wizard.

- ❏ **Header** (**Your Phone Number** and **Fax Header**)
- ❏ **Receive Mode** (**Auto** or **Manual**)
- ❏ **Distinctive Ring Detection (DRD) Setting**

❏ The following items are set automatically according to the connection environment.

- ❏ **Dial Mode** (such as **Tone** or **Pulse**)

  Fax Setting Wizard may not configure **Dial Mode** automatically when **Line Type** is set to **PBX**. In that case, configure **Dial Mode** manually.

❏ Other items in **Basic Settings** remain as they are.

Related Information

➡ "Basic Settings" on page 240

Making the Printer Ready to Send and Receive Faxes Using Fax Setting Wizard

1. Select **Settings** on the home screen on the printer's control panel.
2. Select **General Settings** > **Fax Settings** > **Fax Setting Wizard**.
3. Following the on-screen instructions, enter the sender name such as your company name, your fax number.

   Note:
   Your sender name and your fax number appear as the header for outgoing faxes.
4. Make the distinctive ring detection (DRD) setting.

   ❏ If you have subscribed to a distinctive ring service from your telephone company:

   Go to the next screen and select the ring pattern to be used for incoming faxes.

   When you select any item except **All**, **Receive Mode** is set to **Auto** and you continue to the next screen where you can check the settings you made.

   ❏ If you have not subscribed to a distinctive ring service from your telephone company, or you do not need to set this option:

   Skip this setting and go to the screen where you can check the settings you made.

   Note:
   ❏ *Distinctive ring services, offered by many telephone companies (the service name differs by company), allows you to have several phone numbers on one phone line. Each number is assigned a different ring pattern. You can use one number for voice calls and another for fax calls. Select the ring pattern assigned to fax calls in **DRD**.*

   ❏ *Depending on the region, **On** and **Off** are displayed as the **DRD** options. Select **On** to use the distinctive ring feature.*
5. Make the Receive Mode setting.

   ❏ If you do not need to connect a phone device to the printer:

   Select **No**.

   Receive Mode is set to **Auto**.

   ❏ If you need to connect a phone device to the printer:

   Select **Yes**, and then select whether or not to receive faxes automatically.
6. Check the settings you made on the screen displayed, and then proceed to the next screen.

   To correct or change settings, select .
7. Check the fax connection by selecting **Start Checking**, and then select **Print** to print a report that shows the connection status.

   Note:
   ❏ *If there are any errors reported, follow the instructions on the report to solve them.*

   ❏ *If the **Select Line Type** screen is displayed, select the line type.*

   *- When you are connecting the printer to a PBX phone system or terminal adapter, select **PBX**.*

   *- When you are connecting the printer to a standard phone line, select **PSTN**, and then select **Do Not Detect** on the **Confirmation** screen displayed. However, setting this to **Do Not Detect** may cause the printer to skip the first digit of a fax number when dialing and send the fax to the wrong number.*

Related Information

➡ "Connecting the Printer to a Phone Line" on page 76

➡ "Making Settings for Using the Answering Machine Function on a Connected Phone" on page 82
➡ "Receive Mode:" on page 241
➡ "Making Settings to Receive Faxes Operating Only a Connected Phone" on page 82
➡ "Basic Settings" on page 240

Making Settings for the Printer's Fax Features According to Use

You can configure the printer's fax features individually using the printer's control panel according to use. The settings made using **Fax Setting Wizard** can also be changed. For more details, see the descriptions of the **Fax Settings** menu.

Related Information

➡ "Fax Settings" on page 240

➡ "Selecting Settings to Send and Receive Faxes on a Computer" on page 84

Settings for a PBX Phone System

Making Settings to Use the Access Code as it is when Dialing an External Line

Make the following settings if you need to use numbers such as 0 or 9 as they are instead of as part of an external access code.

1. Select **Settings** on the printer's control panel.
2. Select **General Settings** > **Fax Settings** > **Basic Settings**.
3. Select **Line Type**, and then select **PBX**.
4. Select the **Access Code** box and set it to **Do Not Use**.
5. Select **OK** to apply the settings.

Making Settings to Send Faxes Using External Access Code (#)

You can send faxes to an outside fax number using # (hash) instead of the actual external access code such as 0 or 9.

1. Select **Settings** on the printer's control panel.
2. Select **General Settings** > **Fax Settings** > **Basic Settings**.
3. Select **Line Type**, and then select **PBX**.

4. Select the **Access Code** box and set it to **Use**.
5. Tap the **Access Code** input box, enter the external access code used for your phone system, and then tap OK.
6. Select **OK** to apply the settings.

   The #, entered instead of the actual access code, is replaced with the stored access code, such as 0 or 9, when dialing. Using a hash (#) helps to avoid connection problems when connecting to an outside line, as the dial tone from the outside line is detected before making an outside call.

   Note:
   *If you have registered recipients in **Contacts** using an external access code such as 0 or 9, set the **Access Code** to **Do Not Use**. Otherwise, you must change the code to # in **Contacts**.*

Selecting Settings When You Connect a Phone Device

Making Settings for Using the Answering Machine Function on a Connected Phone

Set up the printer to use the answering machine function of a connected phone.

1. Select **Settings** on the printer's control panel.
2. Select **General Settings** > **Fax Settings** > **Basic Settings**.
3. Set **Receive Mode** to **Auto**.
4. Set the **Rings to Answer** setting of the printer to a higher number than the number of rings for the answering machine.

   If **Rings to Answer** is set lower than the number of rings for the answering machine, the answering machine cannot receive voice calls to record voice messages. See the manuals that came with the answering machine for its settings.

The printer's **Rings to Answer** setting may not be displayed, depending on the region.

Related Information

➡ "Basic Settings" on page 240

Making Settings to Receive Faxes Operating Only a Connected Phone

When you set **Remote Receive**, you can receive faxes just by picking up the handset of the connected phone and dialing the two-digit activation code. No operation is required on the printer.

The **Remote Receive** feature is available for telephones that support tone dialing.

1. Select **Settings** on the printer's control panel.
2. Select **General Settings** > **Fax Settings** > **Basic Settings** > **Remote Receive**.
3. Tap **Remote Receive** to set this to **On**.
4. Select **Start Code**, enter a two digit code (you can enter 0 to 9, *, and #), and then tap **OK**.
5. Select **OK** to apply the settings.

Related Information

➡ "Basic Settings" on page 240

Settings to Save Received Faxes

The printer is set to print received faxes by default. Besides printing, you can set the printer to save received faxes.

❏ Inbox in the Printer

You can save received faxes to the Inbox. You can view them on the printer's control panel so that you can print only the ones you want to print or delete unnecessary faxes.

❏ A computer (PC-FAX reception)

To receive faxes on a computer, make settings using FAX Utility.

"Selecting Settings to Send and Receive Faxes on a Computer" on page 84

The above features can be used at the same time. If you use them at the same time, received documents are saved to the inbox and on a computer.

Related Information

➡ "Fax Settings" on page 240
➡ "Settings for a PBX Phone System" on page 81
➡ "Selecting Settings When You Connect a Phone Device" on page 82
➡ "Receiving Incoming Faxes" on page 95
➡ "Settings to Save Received Faxes" on page 83
➡ "Making Settings for Blocking Junk Faxes" on page 84
➡ "Selecting Settings to Send and Receive Faxes on a Computer" on page 84

Making Settings to Save Received Faxes to the Inbox

1. Select **Settings** on the printer's control panel.
2. Select **General Settings** > **Fax Settings** > **Receive Settings** > **Fax Output Settings**.
3. If a confirmation message is displayed, confirm it, and then tap **OK**.
4. Select **Save to Inbox**.
5. Select **Save to Inbox** to set this to **On**
6. Select **Options when memory is full**, select the option to use when the inbox is full.
   ❏ **Receive and print faxes**: The printer prints all received documents that cannot be saved in the Inbox.
   ❏ **Reject incoming faxes**: The printer does not answer incoming fax calls.
7. You can set a password for the inbox. Select **Inbox Password Settings**, and then set the password.

   Note:
   You cannot set a password when ***Options when memory is full*** *is set to* ***Receive and print faxes****.*

Related Information

➡ "Fax Output Settings" on page 242
➡ "Viewing Received Faxes Saved in the Printer on the LCD Screen" on page 97

Making Settings for Blocking Junk Faxes

You can block junk faxes.

1. Select **Settings** on the printer's control panel.
2. Select **General Settings** > **Fax Settings** > **Basic Settings** > **Rejection Fax**.
3. Set the condition to block junk faxes.

   Select **Rejection Fax**, and then enable the following options.

   ❏ Rejection Number List: Rejects faxes that are in the Rejection Number List.

   ❏ Fax Header Blank: Rejects faxes that have blank header information.

   ❏ Unregistered Contacts: Rejects faxes that have not been added to the contact list.
4. Tap to return to the **Rejection Fax** screen.
5. If you are using the **Rejection Number List**, select **Edit Blocked Number list**, and then edit the list.

Behavior for Rejecting Faxes

The printer behaves as follows.

❏ Ring tone rings

❏ Communication error is sent to the sender

❏ The action is recorded in Transmission Log

You can access the Transmission Log from the following:

Fax > Menu (**More** > **Transmission Log**

❏ The action is recorded in Fax Log

You can print the Fax Log from the following:

Fax > Menu (More) > **Fax Report** > **Fax Log**

Selecting Settings to Send and Receive Faxes on a Computer

To send and receive faxes on a computer, FAX Utility must be installed on a computer connected by network or USB cable.

Making Save to Computer Setting to Receive Faxes

You can receive faxes on a computer by using the FAX Utility. Install FAX Utility on the computer and make the setting. For details, see Basic Operations in the FAX Utility help (displayed on the main window).

The setting item below on the printer's control panel is set to **Yes**, and the faxes received can be saved on the computer.

Settings > **General Settings** > **Fax Settings** > **Receive Settings** > **Fax Output Settings** > **Save to Computer**

Making Save to Computer Setting to Also Print on the Printer to Receive Faxes

You can make the setting to print received faxes on the printer as well as save them on a computer.

1. Select **Settings** on the home screen on the printer's control panel.
2. Select **General Settings** > **Fax Settings** > **Receive Settings**.
3. Select **Fax Output Settings** > **Save to Computer** > **Yes and Print**.

Making Save to Computer Setting not to Receive Faxes

To set the printer not to save received faxes on the computer, change the settings on the printer.

Note:
You can also change the settings using the FAX Utility. However, if there are any faxes that have been unsaved to the computer, the feature does not work.

1. Select **Settings** on the home screen on the printer's control panel.
2. Select **General Settings** > **Fax Settings** > **Receive Settings**.
3. Select **Fax Output Settings** > **Save to Computer** > **No**.

Making Contacts Available

Registering a contacts list allows you to easily enter destinations. You can register up to 100 entries, and you can use the contacts list when you enter a fax number.

Registering or Editing Contacts

1. Select **Fax** on the home screen.
2. Select **Contacts**.
3. Do one of the following.
   - ❏ To register a new contact, select **Add Entry**, and then select **Add Contact**.
   - ❏ To edit a contact, select › on the target contact, and then select **Edit**.
   - ❏ To delete a contact, select › on the target contact, and then select **Delete**, and then select **Yes**. You do not have to perform following procedures.

4. Make the necessary settings.

   Note:
   *When entering a fax number, enter an external access code at the beginning of the fax number if your phone system is PBX and you need the access code to get an outside line. If the access code has been set in the **Line Type** setting, enter a hash (#) instead of the actual access code. To add a pause (pause for three seconds) during dialing, enter a hyphen (-).*

5. Select **OK**.

Registering or Editing Grouped Contacts

Adding contacts to a group allows you to send a fax to multiple destinations at the same time.

1. Select **Fax** on the home screen.
2. Select **Contacts**.
3. Do one of the following.
   - ❏ To register a new grouped contacts, select **Add Entry**, and then select **Add Group**.
   - ❏ To edit a grouped contacts, select › on the target grouped contacts, and then select **Edit**.
   - ❏ To delete a grouped contacts, select › on the target grouped contacts and then select **Delete**, and then select **Yes**. You do not have to perform following procedures.
4. Enter or edit the **Group Name (Required)** and the **Index Word**, and then select **Contact(s) Added to the Group (Required)**.
5. Select the contacts that you want to register in the group, and then tap **Close**.

   Note:
   - ❏ *You can register up to 99 contacts.*
   - ❏ *To deselect a contact, tap it again.*
6. Select **OK**.

Registering a Destination to Contacts from Web Config

1. Enter the printer's IP address into a browser to access Web Config.

   Enter the printer's IP address from a computer that is connected to the same network as the printer.

   You can check the IP address of the printer from the following menu.

   Settings > **General Settings** > **Network Settings** > **Network Status** > **Wired LAN/Wi-Fi Status**
2. Enter the administrator password to log in as an administrator.
3. Select in the following order.

   Scan/Copy or **Fax** tab > **Contacts**
4. Select the number that you want to register, and then click **Edit**.
5. Enter **Name** and **Index Word**.

6. Select the destination type as the **Type** option.

   Note:
   *You cannot change the **Type** option after registration is complete. If you want to change the type, delete the destination and then register again.*

7. Enter a value for each item, and then click **Apply**.

Contact Settings Items

Items	Settings and Explanation
Name	Enter a name contact name in 30 characters or less in Unicode (UTF-8). If you do not specify this, leave it blank.
Index Word	Enter words to associate with this entry for better results when searching for it. Enter 30 characters or less in Unicode (UTF-8). This field is optional.
Type	Select the type of destination you want to register.
Assign to Frequent Use	This item is not supported.
Fax Number	Enter between 1 and 64 characters using 0-9 - * # and space.
Fax Speed	Select a communication speed for the contact.

Registering Destinations as a Group

1. Enter the printer's IP address into a browser to access Web Config.

   Enter the printer's IP address from a computer that is connected to the same network as the printer.

   You can check the IP address of the printer from the following menu.

   Settings > **General Settings** > **Network Settings** > **Network Status** > **Wired LAN/Wi-Fi Status**

2. Enter the administrator password to log in as an administrator.

3. Select in the following order.

   Scan/Copy or **Fax** tab > **Contacts**

4. Select the number that you want to register, and then click **Edit**.

5. Enter a **Name** and **Index Word**.

6. Select a group from **Type**.

7. Click **Select** for **Contact(s) for Group**.

   The available destinations are displayed.

8. Select the destination that you want to register to the group, and then click **Select**.

   Note:
   Destinations can be registered to multiple groups.

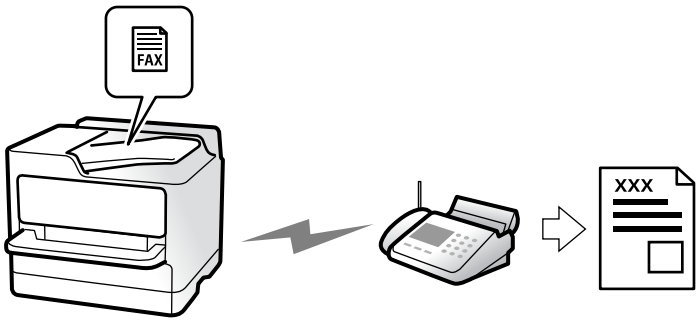

9. Click **Apply**.

Overview of this Printer's Fax Features

Feature: Sending Faxes

Sending Methods

❏ Sending automatically

When you scan an original by selecting ⓕ (**Send**), the printer dials the recipients and sends the fax.

"Sending Faxes Using the Printer" on page 91

❏ Sending manually

When you perform a manual check on the line connection by dialing the recipient, select ⓕ (**Send**) to start sending a fax directly.

"Sending Faxes Dialing from the External Phone Device" on page 93

Recipient Designation when Sending a Fax

You can enter recipients using **Keypad**, **Contacts**, or **Recent**.

"Recipient" on page 98

"Making Contacts Available" on page 85

Scan Settings when Sending a Fax

You can select items such as **Resolution** or **Original Size (Glass)** when sending faxes.

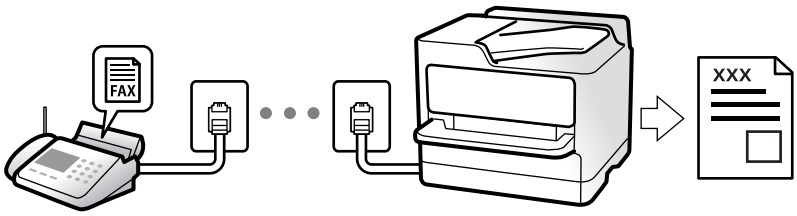

"Scan Settings:" on page 99

Using Fax Send Settings when Sending a Fax

You can use **Fax Send Settings** such as **Direct Send** (to send a large document stably) or **Send Fax Later** (to send a fax at a time you specified).

"Fax Send Settings:" on page 99

Feature: Receiving Faxes

Receive Mode

There are two options in **Receive Mode** for receiving incoming faxes.

❏ Manual

Mainly for phoning, but also for faxing

"Usage of Manual Mode" on page 95

❏ Auto

- Only for faxing (external phone device is not required)
- Mainly for faxing, and sometimes phoning

"Usage of Auto Mode" on page 96

Receiving Faxes by Operating a Connected Phone

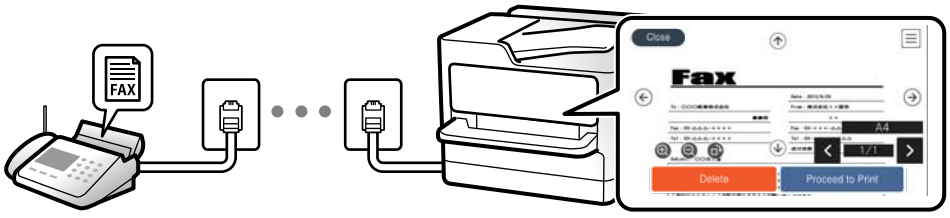

You can receive faxes by only operating an external phone device.

"Basic Settings" on page 240

"Selecting Settings When You Connect a Phone Device" on page 82

Destinations of Received Faxes

❏ Received faxes are printed by default. You can set up destinations for received faxes to the inbox. If you save in the inbox, you can check the contents on the screen.

"Fax Output Settings" on page 242

"Menu Options for Inbox" on page 101

"Viewing Received Faxes Saved in the Printer on the LCD Screen" on page 97

Feature: PC-FAX Send/Receive (Windows/Mac OS)

PC-FAX Send

You can send faxes from a computer.

"Application for Configuring Fax Operations and Sending Faxes (FAX Utility)" on page 230

"Sending a Fax from a Computer" on page 103

PC-FAX Receive

You can receive faxes on a computer.

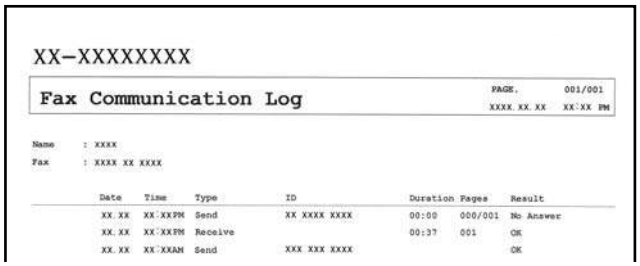

"Selecting Settings to Send and Receive Faxes on a Computer" on page 84

"Application for Configuring Fax Operations and Sending Faxes (FAX Utility)" on page 230

"Receiving Faxes on a Computer" on page 108

Features: Various Fax Reports

You can check the status of sent and received faxes in a report.

XX-XXXXXXXX

Fax Communication Log

PAGE. 001/001
XXXX XX XX XX:XX PM

Name : XXXX
Fax : XXXX XX XXXX

Date	Time	Type	ID	Duration	Pages	Result
XX.XX	XX:XXPM	Send	XX XXXX XXXX	00:00	000/001	No Answer
XX.XX	XX:XXPM	Receive		00:37	001	OK
XX.XX	XX:XXAM	Send	XXX XXX XXXX			OK

"Report Settings" on page 245

"Fax Send Settings:" on page 99

"Transmission Log:" on page 101

"Fax Report:" on page 101

Feature: Security when Sending and Receiving Faxes

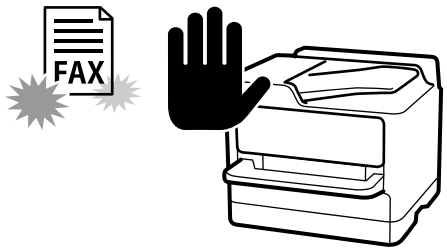

You can use many security features such as **Direct Dialing Restrictions** to prevent sending to the wrong destination, or **Backup Data Auto Clear** to prevent information leakage. You can set a password for the inbox in the printer.

"Security Settings" on page 245

"Save to Inbox:" on page 242

Features: Other Useful Features

Blocking Junk Faxes

You can reject junk faxes.

"Rejection Fax:" on page 241

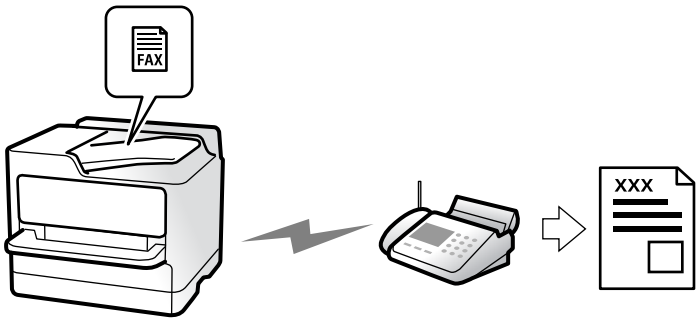

Receiving Faxes After Dialing

After dialing to another fax machine, you can receive documents from that fax machine.

"Receiving Faxes by Making a Phone Call" on page 97

"Polling Receive:" on page 101

Sending Faxes Using the Printer

You can send faxes by entering fax numbers for recipients on the printer's control panel.

Note:
When sending a fax in monochrome, you can preview the scanned image on the LCD screen before sending.

1. Place the originals.

   You can send up to 100 pages in one transmission; however depending on the remaining amount of memory, you may not be able to send faxes even with less than 100 pages.

   "Placing Originals" on page 30

2. Select **Fax** on the printer's control panel.

3. Specify the recipient.

   "Selecting Recipients" on page 92

4. Select the **Fax Settings** tab, and then make settings as necessary.

   "Fax Settings" on page 98

5. Tap ⓕ on the **Recipient** tab to send the fax.

   Note:
   - ❏ *If the fax number is busy or there are some problems, the printer automatically redials after one minute.*
   - ❏ *To cancel sending, tap ⓧ.*
   - ❏ *It takes longer to send a fax in color because the printer performs scanning and sending simultaneously. While the printer is sending a fax in color, you cannot use the other features.*

Selecting Recipients

You can specify recipients on the **Recipient** tab to send the fax using the following methods.

Entering Fax Number Manually

Select **Keypad**, enter a fax number on the screen displayed, and then select **OK**.

- To add a pause (pause for three seconds during dialing), enter a hyphen (-).

- If you have set an external access code in **Line Type**, enter "#" (hash) instead of the actual external access code at the beginning of the fax number.

Note:
*If you cannot manually enter a fax number, **Direct Dialing Restrictions** in **Security Settings** is set to **On**. Select fax recipients from the contacts list or the sent fax history.*

Selecting the recipients from the contacts list

Select **Contacts**, select recipients you want to send, and then select **Close**. If the recipient you want to send to has not been registered in **Contacts** yet, select **Add Entry** and register it.

Selecting the recipients from the sent fax history

Select **Recent**, and then select a recipient.

Note:
*To delete recipients you entered, display the list of recipients by tapping on the field of a fax number or the number of recipients on the LCD screen, select the recipient from the list, and then select **Remove**.*

Related Information

➡ "Making Contacts Available" on page 85

Various Ways of Sending Faxes

Sending a Fax after Checking the Scanned Image

You can preview the scanned image on the LCD screen before sending the fax. (Monochrome faxes only)

1. Place the originals.

   "Placing Originals" on page 30

2. Select **Fax** on the home screen.

3. Specify the recipient.

   "Selecting Recipients" on page 92

4. Select the **Fax Settings** tab, and then make settings as necessary.

   "Fax Settings" on page 98

5. Select **Preview** on the **Recipient** tab to scan, and then check the scanned document image.

   - : Moves the screen in the direction of the arrows.
   - : Reduces or enlarges.
   - 

: Moves to the previous or the next page.

   Note:
   - ❏ *When **Direct Send** is enabled, you cannot preview.*
   - ❏ *When the preview screen is left untouched for the time set in **Settings** > **General Settings** > **Fax Settings** > **Send Settings** > **Fax Preview Display Time**, the fax is sent automatically.*
   - ❏ *The image quality of a sent fax may be different from what you previewed depending on the capability of the recipient machine.*

6. Select **Start Sending**. Otherwise, select **Cancel**

   Note:
   The image quality of a sent fax may be different from what you previewed depending on the capability of the recipient machine.

Sending Faxes Dialing from the External Phone Device

You can send a fax by dialing using the connected telephone when you want to talk over the phone before sending a fax, or when the recipient's fax machine does not switch to the fax automatically.

1. Pick up the handset of the connected telephone, and then dial the recipient's fax number using the phone.

   Note:
   When the recipient answers the phone, you can talk with the recipient.

2. Select **Fax** on the home screen.

3. Make necessary settings on the **Fax Settings**.

   "Fax Settings" on page 98

4. When you hear a fax tone, tap ◇, and then hang up the handset.

   Note:
   When a number is dialed using the connected telephone, it takes longer to send a fax because the printer performs scanning and sending simultaneously. While sending the fax, you cannot use the other features.

Sending Different Size Documents Using ADF (ADF Continuous Scan)

Sending faxes by placing originals one by one, or by placing originals by size, you can send them as one document at their original sizes.

Note:
If you load a batch of originals that have mixed sizes into the ADF, the originals are sent at the width of the widest original among them and the length of each original.

1. Place the first batch of originals at the same size.
2. Select **Fax** on the home screen.
3. Specify the recipient.

   "Selecting Recipients" on page 92
4. Select the **Fax Settings** tab, and then tap **ADF Continuous Scan** to set this to **On**.

   You can also make settings such as the resolution and the sending method as necessary.
5. Tap ⓕ (**Send**) on the **Recipient** tab.
6. When scanning the first set of originals is complete and a message is displayed on the control panel asking you to scan the next set of originals, select **Yes**, set the next originals, and then select **Start Scanning**.

   Note:
   *If you leave the printer untouched for the time set in **Settings** > **General Settings** > **Fax Settings** > **Send Settings** > **Wait Time for Next Original** after you have been prompted to set the next originals, the printer stops storing and starts sending the document.*

Sending Many Pages of a Monochrome Document (Direct Send)

When sending a fax in monochrome, the scanned document is temporarily stored in the printer's memory. Therefore, sending a lot of pages may cause the printer to run out of memory and stop sending the fax. You can avoid this by enabling the **Direct Send** feature, however, it takes longer to send the fax because the printer performs scanning and sending simultaneously. You can use this feature when there is only one recipient.

Accessing the Menu

You can find the menu on the printer's control panel below.

Fax > **Fax Settings** > **Direct Send**.

Sending Faxes in Monochrome at Specified Time of the Day (Send Fax Later)

You can set to send a fax at a specified time. Only monochrome faxes can be sent when the time to send is specified.

1. Select **Fax** on the home screen.
2. Specify the recipient.

   "Selecting Recipients" on page 92
3. Select the **Fax Settings** tab, and then select **Send Fax Later**.

4. Tap the **Send Fax Later** field to set this to **On**.
5. Select the **Time** field, enter the time you want to send the fax, and then select **OK**.
6. Select **OK** to apply the settings.

   You can also make settings such as the resolution and the sending method as necessary.
7. Send the fax.

   Note:
   *You cannot send another fax until the fax has been sent at the specified time. If you want to send another one, you need to cancel the scheduled fax by selecting **Fax** on the home screen, and then deleting it.*

Receiving Faxes on the Printer

If the printer is connected to the phone line and basic settings have been completed using the Fax Setting Wizard, you can receive faxes.

You can save received faxes, check them on the printer screen, and print them as necessary.

Received faxes are printed in the printer's initial settings.

When you want to check the status of the fax settings, print a **Fax Settings List** by selecting **Fax** > Menu (More) > **Fax Report** > **Fax Settings List**.

Receiving Incoming Faxes

There are two options in **Receive Mode**.

Related Information

➡ "Usage of Manual Mode" on page 95
➡ "Usage of Auto Mode" on page 96

Usage of Manual Mode

This mode is mainly for making phone calls, but is also for faxing.

Receiving Faxes

When the telephone rings, you can answer the ringing manually by picking up the handset.

❏ When you hear a fax signal (baud):

Select **Fax** on the printer's home screen, select **Send/Receive** > **Receive**, and then tap ⓕ. Next, hang up the handset.

❏ If the ringing is for a voice call:

You can answer the phone as normal.

Receiving Faxes Using only the Connected Telephone

When **Remote Receive** is set, you can receive faxes by simply entering the **Start Code**.

When the telephone rings, pick up the handset. When you hear a fax tone (baud), dial the two digit **Start Code**, and then hang up the handset.

Related Information

➡ "Remote Receive:" on page 241

Usage of Auto Mode

This mode allows you to use the line for the following uses.

❏ Using the line for faxing only (external telephone is not necessary)

❏ Using the line for faxing mainly, and sometimes phoning

Receiving Faxes Without an External Phone Device

The printer automatically switches to receive faxes when the number of rings you set in **Rings to Answer** is complete.

Receiving Faxes With an External Phone Device

A printer with an external phone device works as follows.

❏ When the answering machine answers within the number of rings set in **Rings to Answer**:

- If the ringing is for a fax: The printer automatically switches to receive faxes.
- If the ringing is for a voice call; The answering machine can receive voice calls and record voice messages.

❏ When you pick up the handset within the number of rings set in **Rings to Answer**:

- If the ringing is for a fax: Hold the line until the printer automatically starts receiving the fax. Once the printer starts receiving the fax, you can hang up the handset. To start receiving the fax immediately, use the same steps as for **Manual**. You can receive the fax using the same steps as for **Manual**. Select **Fax** on the home screen, and then select **Send/Receive** > **Receive**. Next, tap ⓕ, and then hang up the handset.
- If the ringing is for a voice call: You can answer the phone as normal.

❏ When the ringing stops and the printer automatically switches to receive faxes:

- If the ringing is for a fax: The printer starts receiving faxes.
- If the ringing is for a voice call: You cannot answer the phone. Ask the person to call you back.

Note:
*Set the number of rings to answer for the answering machine to a lower number than the number set in **Rings to Answer**. Otherwise, the answering machine cannot receive voice calls to record voice messages. For details on setting up the answering machine, see the manual supplied with the answering machine.*

Receiving Faxes by Making a Phone Call

You can receive a fax stored on another fax machine by dialing the fax number.

Receiving Faxes by Polling (Polling Receive)

You can receive a fax stored on another fax machine by dialing the fax number. Use this feature to receive a document from a fax information service. However, if the fax information service has an audio guidance feature that you need to follow to receive a document, you cannot use this feature.

Note:
To receive a document from a fax information service that uses audio guidance, just dial the fax number using the connected telephone, and operate the phone and the printer following the audio guidance.

1. Select **Fax** on the home screen.
2. Tap Menu (More).
3. Tap **Polling Receive** to set this to **On**, and then tap **Close**.
4. Enter the fax number.

   "Selecting Recipients" on page 92

   Note:
   *When **Security Settings** > **Direct Dialing Restrictions** is set to **On**, you can only select fax recipients from the contact list or the sent fax history. You cannot manually enter a fax number.*
5. Tap ◇ to start **Polling Receive**.

Viewing Received Faxes Saved in the Printer on the LCD Screen

If you set up to save received faxes in the printer, you can view the contents and print as necessary.

"Settings to Save Received Faxes" on page 83

1. Tap on the home screen.

   Note:

   When there are received faxes that have not been read, the number of unread documents is displayed on the on the home screen.

2. Tap **Open Inbox (XX Unread)**.

3. If the inbox has been password protected, enter the inbox password.
4. Select the fax you want to view from the list.

   The contents of the fax are displayed.

   ❏ : Moves the screen in the direction of the arrows.

   ❏ : Reduces or enlarges.

   ❏ : Rotates the image to the right by 90 degrees.

   ❏ : Moves to the previous or the next page.

   ❏ To hide the operation icons, tap anywhere on the preview screen except for the icons. Tap again to display the icons.
5. Select whether to print or delete the document you have viewed, and then follow the on-screen instructions.

> ***Important:***
>
> *If the printer runs out of memory, receiving and sending faxes is disabled. Delete documents that you have already read or printed.*

Menu Options for Faxing

Recipient

Select the menus on the control panel as described below.

Fax > **Recipient**

Keypad:

Manually enter a fax number.

Contacts:

Select a recipient from the contacts list. You can also add or edit a contact.

Recent:

Select a recipient from the sent fax history. You can also add the recipient to the contacts list.

Related Information

➡ "Selecting Recipients" on page 92

Fax Settings

Select the menus on the control panel as described below.

Fax > **Fax Settings**

Scan Settings:

Resolution:

Select the resolution of the outgoing fax. If you select a higher resolution, the data size becomes larger and it takes time to send the fax.

Density:

Sets the density of the outgoing fax. + makes the density darker, and - makes it lighter.

Remove Background:

Select the darkness of the background. Tap + to lighten (whiten) the background and tap - to darken (blacken) it.

If you select **Auto**, the background colors of the originals are detected, and they are removed or lightened automatically. It is not applied correctly if the background color is too dark or not detected.

Sharpness:

Enhances or defocuses the outline of the image. + enhances the sharpness, and - defocuses the sharpness.

ADF 2-Sided:

Scans both sides of originals placed in the ADF and sends a monochrome fax.

ADF Continuous Scan:

Sending faxes by placing originals one by one, or by placing originals by size, you can send them as one document at their batches of same size originals.

"Sending Different Size Documents Using ADF (ADF Continuous Scan)" on page 94

Original Size (Glass):

Select the size and orientation of the original you placed on the scanner glass.

Color Mode:

Select whether to scan in color or in monochrome.

Fax Send Settings:

Direct Send:

Sends a monochrome fax while scanning the originals. Since scanned originals are not stored temporarily in the printer's memory even when sending a large volume of pages, you can avoid printer errors due to a lack of memory. Note that sending using this feature takes longer than not using this feature.

You cannot use this feature when:

- ❏ Sending a fax using the **ADF 2-Sided** option
- ❏ Sending a fax to multiple recipients

"Sending Many Pages of a Monochrome Document (Direct Send)" on page 94

Send Fax Later:

Sends a fax at a time you specify. You can only send monochrome faxes when using this option.

"Fax Send Settings:" on page 99

Add Sender Information:

Add Sender Information:

Select the position where you want to include the header information (sender name and fax number) in the outgoing fax, or not to include the information.

- **Off**: Sends a fax with no header information.
- **Outside of Image**: Sends a fax with header information in the top white margin of the fax. This keeps the header from overlapping with the scanned image, however, the fax received by the recipient may be printed across two sheets depending on the size of the originals.
- **Inside of Image**: Sends a fax with header information approximately 7 mm lower than the top of the scanned image. The header may overlap with the image, however, the fax received by the recipient will not be split into two documents.

Fax Header:

Select the header for the recipient. To use this feature, you should register multiple headers in advance.

Additional Information:

Select the information you want to add. You can select one from **Your Phone Number** and **Destination List**.

Transmission Report:

Prints a transmission report after you send the fax.

Print on Error prints a report only when an error occurs.

When **Attach Fax image to report** has been set in **Settings** > **General Settings** > **Fax Settings** > **Report Settings**, faxes with errors are also printed with the report.

Clear All Settings:

Restores all settings in **Scan Settings** and **Fax Send Settings** to their defaults.

Related Information

- "Sending Different Size Documents Using ADF (ADF Continuous Scan)" on page 94
- "Sending Many Pages of a Monochrome Document (Direct Send)" on page 94

Using Other Faxing Features

Printing Fax Report Manually

1. Select **Fax** on the home screen.
2. Tap (More).
3. Select **Fax Report**.
4. Select the report you want to print, and then follow the on-screen instructions.

Note:
*You can change the report format. From the home screen, select **Settings** > **General Settings** > **Fax Settings** > **Report Settings**, and then change the **Attach Fax image to report** or **Report Format** settings.*

Sending a Fax from a Computer

You can send faxes from the computer by using the FAX Utility and PC-FAX driver.

For details on how to operate FAX Utility, see Basic Operations in the FAX Utility help (displayed on the main window).

Note:

❏ *Check if the FAX Utility and the printer's PC-FAX driver are installed before using this feature.*

"Application for Configuring Fax Operations and Sending Faxes (FAX Utility)" on page 230

"Application for Sending Faxes (PC-FAX Driver)" on page 230

❏ *If the FAX Utility is not installed, install the FAX Utility using the EPSON Software Updater (application for updating software).*

EPSON Software Updater FY19 "Application for Updating Software and Firmware (Epson Software Updater)" on page 232

Sending Documents Created Using an Application (Windows)

By selecting a printer fax from the **Print** menu of an application like Microsoft Word or Excel, you can directly transmit data such as documents, drawings, and tables you have created, with a cover sheet.

Note:
The following explanation uses Microsoft Word as an example. The actual operation may differ depending on the application you use. For details, see the application's help.

1. Using an application, create a document to transmit by fax.

2. Click **Print** from the **File** menu.

   The application's **Print** window appears.

3. Select **XXXXX (FAX)** (where XXXXX is your printer name) in **Printer**, and then check the settings for fax sending.

   ❏ Specify **1** in **Number of copies**. Fax may not be transmitted correctly if you specify **2** or more.

   ❏ You can send up to 100 pages in one fax transmission.

4. Click **Printer Properties** or **Properties** if you want to specify **Paper Size**, **Orientation**, **Color**, **Image Quality**, or **Character Density**.

   For details, see the PC-FAX driver help.

5. Click **Print**.

   Note:
   *When Using FAX Utility for the first time, a window for registering your information is displayed. Enter the necessary information, and then click **OK**.*

   The **Recipient Settings** screen is displayed.

6. When you want to send other documents in the same fax transmission, select the **Add documents to send** checkbox.

   The screen for adding documents is displayed when you click **Next** in step 9.

7. Select **Attach a cover sheet** checkbox if necessary.

8. Specify a recipient.

   ❏ Selecting a recipient from **PC-FAX Phone Book**:

   If the recipient is saved in the phone book, do the steps below.

   ❶ Click the **PC-FAX Phone Book** tab.

   ❷ Select the recipient from the list and click **Add**.

❏ Selecting a recipient from the contacts on the printer:

If the recipient is saved in the contacts on the printer, do the steps below.

❶ Click the **Contacts on Printer** tab.

❷ Select contacts from the list and click **Add** to proceed to **Add to Recipient** window.

❸ Select the contacts from the list displayed, and then click **Edit**.

❹ Add the personal data such as **Company/Corp.** and **Title** as necessary, and then click **OK** to return to the **Add to Recipient** window.

❺ As necessary, select the checkbox of **Register in the PC-FAX Phone Book** to save the contacts to **PC-FAX Phone Book**.

❻ Click **OK**.

❏ Specifying a recipient directly:

Do the steps below.

❶ Click the **Manual Dial** tab.

❷ Enter the necessary information.

❸ Click **Add**.

Furthermore, by clicking **Save to Phone Book**, you can save the recipient in the list under the **PC-FAX Phone Book** tab.

Note:

❏ *If your printer's Line Type is set to **PBX** and the access code has been set to use # (hash) instead of entering the exact prefix code, enter # (hash). For details, see Line Type in Basic Settings from related information link below.*

❏ *If you have selected **Enter fax number twice** in the **Optional Settings** on the FAX Utility main screen, you need to enter the same number again when you click **Add** or **Next**.*

The recipient is added to the **Recipient List** displayed in the upper part of the window.

9. Click **Next**.

❏ If you selected the **Add documents to send** checkbox, follow the steps below to add documents in the **Document Merging** window.

❶ Open a document you want to add, and then select the same printer (fax name) in the **Print** window. The document is added to the **Document List to Merge** list.

❷ Click **Preview** to check the merged document.

❸ Click **Next**.

Note:

*The **Image Quality** and **Color** settings you have selected for the first document are applied to other documents.*

❏ If you selected the **Attach a cover sheet** checkbox, specify the content of the cover sheet in the **Cover Sheet Settings** window.

❶ Select a cover sheet from samples in the **Cover Sheet** list. Note that there is no function to create an original cover sheet or to add an original cover sheet to the list.

❷ Enter the **Subject** and **Message**.

❸ Click **Next**.

Note:
*Set the following as necessary in **Cover Sheet Settings**.*

❏ *Click **Cover Sheet Formatting** if you want to change the order of the items on the cover sheet. You can select the cover sheet size in **Paper Size**. You can also select a cover sheet at a different size to the document being transmitted.*

❏ *Click **Font** if you want to change the font used for the text on the cover sheet.*

❏ *Click **Sender Settings** if you want to change the sender information.*

❏ *Click **Detailed Preview** if you want to check the cover sheet with the subject and the message you entered.*

10. Check the transmission content and click **Send**.

Make sure the name and fax number of the recipient are correct before transmitting. Click **Preview** to preview the cover sheet and document to transmit.

Once transmission starts, a window displaying the transmission status appears.

Note:

❏ *To stop transmitting, select the data, and click **Cancel** . You can also cancel using the printer's control panel.*

❏ *If an error occurs during transmission, the **Communication error** window appears. Check the error information and retransmit.*

❏ *The Fax Status Monitor screen (the screen mentioned above where you can check the transmission status) is not displayed if **Display Fax Status Monitor During Transmission** is not selected in the **Optional Settings** screen of the FAX Utility main screen.*

Sending Documents Created Using an Application (Mac OS)

By selecting a fax-capable printer from the **Print** menu of a commercially available application, you can send data such as documents, drawings, and tables, you have created.

Note:
The following explanation uses TextEdit, a standard Mac OS application as an example.

1. Create the document you want to send by fax in an application.

2. Click **Print** from the **File** menu.

The application's **Print** window is displayed.

3. Select your printer (fax name) in **Name**, click ▼ to display the detailed settings, check the print settings, and then click **OK**.

4. Select settings for each item.

   ❏ Specify **1** in **Number of copies**. Even if you specify **2** or more, only 1 copy is sent.

   ❏ You can send up to 100 pages in one fax transmission.

   Note:
   The page size of documents you can send is the same as the paper size you can fax from the printer.

5. Select **Fax Settings** from the popup menu, and then select settings for each item.

   See the PC-FAX driver's help for explanations on each setting.

   Click  in the bottom left corner of the window to open the PC-FAX driver's help.

6. Select the **Recipient Settings** menu, and then specify the recipient.

   ❏ Specifying a recipient directly:

   Click the **Add** item, enter the necessary information, and then click . The recipient is added to the Recipient List displayed in the upper part of the window.

   If you have selected **Enter fax number twice** in the PC-FAX driver settings, you need to enter the same number again when you click .

   If your fax connection line requires a prefix code, enter External Access Prefix.

   Note:
   *If your printer's Line Type is set to **PBX** and the access code has been set to use # (hash) instead of entering the exact prefix code, enter # (hash). For details, see Line Type in Basic Settings from the Related Information link below.*

   ❏ Selecting a recipient from the phone book:

   If the recipient is saved in the phone book, click . Select the recipient from the list, and then click **Add** > **OK**.

   If your fax connection line requires a prefix code, enter External Access Prefix.

   Note:
   *If your printer's Line Type is set to **PBX** and the access code has been set to use # (hash) instead of entering the exact prefix code, enter # (hash). For details, see Line Type in Basic Settings from the Related Information link below.*

7. Check the recipient settings, and then click **Fax**.

   Sending starts.

   Make sure the name and fax number of the recipient are correct before transmitting.

   Note:
   ❏ *If you click the printer icon in Dock, the transmission status check screen is displayed. To stop sending, click the data, and then click **Delete**.*

   ❏ *If an error occurs during transmission, the **Sending failed** message is displayed. Check the transmission records on the **Fax Transmission Record** screen.*

   ❏ *Mixed paper size documents may not be sent correctly.*

Receiving Faxes on a Computer

Faxes can be received by a printer and saved in PDF format on a computer connected to the printer. Use the FAX Utility (application) to make settings.

For details on how to operate FAX Utility, see Basic Operations in the FAX Utility help (displayed on the main window). If the password entry screen is displayed on the computer screen while you are making settings, enter the password. If you do not know the password, contact your administrator.

Note:

❏ *Check if the FAX Utility has been installed and the FAX Utility settings have been made before using this feature.*

"Application for Configuring Fax Operations and Sending Faxes (FAX Utility)" on page 230

❏ *If the FAX Utility is not installed, install the FAX Utility using the EPSON Software Updater (application for updating software).*

EPSON Software Updater FY19 *"Application for Updating Software and Firmware (Epson Software Updater)" on page 232*

Important:

❏ *To receive faxes on a computer, the **Receive Mode** on the printer's control panel must be set to **Auto**. Contact your administrator for information on the printer settings status. To make settings on the printer's control panel, select **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** > **Receive Mode**.*

❏ *The computer set to receive faxes should always be on. Received documents are saved in the printer's memory temporarily before the documents are saved on the computer. If you turn off the computer, the printer's memory might become full as it cannot send the documents to the computer.*

❏ *The number of documents that have been temporarily saved to the printer's memory are displayed on the*  *on the printer's control panel.*

❏ *To read the received faxes, you need to install a PDF viewer such as Adobe Reader in the computer.*

Checking for New Faxes (Windows)

By setting up a computer to save faxes received by the printer, you can check the processing status of received faxes, and whether or not there are any new faxes using the fax icon on the Windows task bar. By setting up the computer to display a notification when new faxes are received, a notification screen pops up near the Windows system tray, and you can check the new faxes.

Note:

❏ *Received fax data saved to the computer is removed from the printer's memory.*

❏ *You need Adobe Reader to view the received faxes saved as PDF files.*

Using the Fax Icon on the Task Bar (Windows)

You can check for new faxes and the operation status by using the fax icon displayed on the Windows taskbar.

1. Check the icon.

❏ : Standing by.

❏ : Checking for new faxes.

❏ : New faxes received.

2. Right-click the icon, and then click **View Receiving Fax Record**.

   The **Receiving Fax Record** screen is displayed.

3. Check the date and the sender in the list, and then open the received file as a PDF.

   Note:
   ❏ *Received faxes are automatically renamed using the following naming format.*

   YYYYMMDDHHMMSS_xxxxxxxxxx_nnnnn (Year/Month/Day/Hour/Minute/Second_sender's number)

   ❏ *You can also open the received fax folder directly when you right-click the icon. For details, see **Optional Settings** in the FAX Utility and its help (displayed on the main window).*

While the fax icon indicates that it is standing by, you can check for new faxes instantly by selecting **Check new faxes now**.

Using the Notification Window (Windows)

When you enable the FAX Utility to notify you about new faxes a notification window is displayed near the task bar for each the fax.

1. Check the notification screen displayed on your computer screen.

   Note:
   The notification screen disappears if no operation is performed for a given length of time. You can change the notification settings such as the display time.

2. Click anywhere in the notification screen, except for the  button.

   The **Receiving Fax Record** screen is displayed.

3. Check the date and the sender in the list, and then open the received file as a PDF.

   Note:
   ❏ *Received faxes are automatically renamed using the following naming format.*

   YYYYMMDDHHMMSS_xxxxxxxxxx_nnnnn (Year/Month/Day/Hour/Minute/Second_sender's number)

   ❏ *You can also open the received fax folder directly when you right-click the icon. For details, see **Optional Settings** in the FAX Utility and its help (displayed on the main window).*

Checking for New Faxes (Mac OS)

You can check for new faxes using one of the following methods. This is available only on computers set to **"Save" (save faxes on this computer)**.

❏ Open the received fax folder (specified in **Received Fax Output Settings.**).

❏ Open the Fax Receive Monitor and click **Check new faxes now**.

❏ Select the **Notify me of new faxes via a dock icon** in the **Fax Receive Monitor** > **Preferences** in the FAX Utility, the fax receive monitor icon on the Dock jumps to notify you that new faxes have arrived.

Open the Received Fax Folder from Received Fax Monitor (Mac OS)

You can open the save folder from the computer specified to receive faxes when selecting **"Save" (save faxes on this computer)**.

1. Click the received fax monitor icon on the Dock to open **Fax Receive Monitor**.
2. Select the printer and click **Open folder**, or double click the printer name.
3. Check the date and the sender in the file name, and then open the PDF file.

   Note:
   - ❏ *Received faxes are automatically renamed using the following naming format.*
   - ❏ *YYYYMMDDHHMMSS_xxxxxxxxxx_nnnnn (Year/Month/Day/Hour/Minute/Second_sender's number)*
   - ❏ *Information sent from the sender is displayed as the sender's number. This number may not be displayed depending on the sender.*

Canceling the Feature that Saves Incoming Faxes to the Computer

You can cancel saving faxes to the computer by using the FAX Utility.

For details, see Basic Operations in the FAX Utility help (displayed on the main window).

Note:
- ❏ *If there are any faxes that have not been saved to the computer, you cannot cancel the feature that saves faxes on the computer.*
- ❏ *You can also change the settings on the printer. Contact your administrator for information on canceling settings to save received faxes on the computer.*

Cleaning the Paper Path for Paper Feeding Problems. 112

Improving Print, Copy, Scan, and Fax Quality. 114

Cleaning the Printer. 129

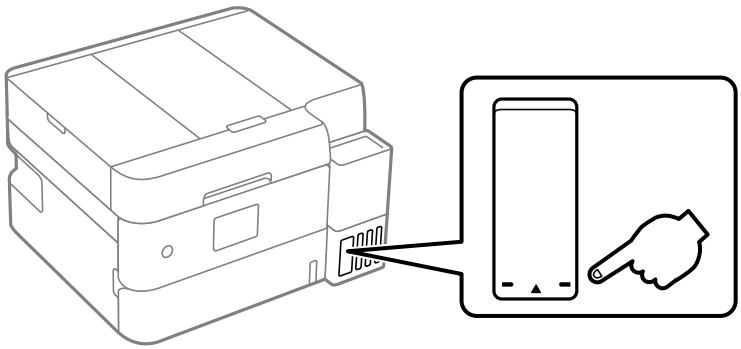

Cleaning Spilled ink. 129

Checking the Ink Level

To confirm the actual ink remaining, visually check the ink levels in all of the printer's tanks.

Important:

Prolonged use of the printer when the ink level is below the lower line could damage the printer.

Note:

You can also check the approximate ink levels from the status monitor on the printer driver.

❏ *Windows*

*Click **EPSON Status Monitor 3** on the **Maintenance** tab.*

*If **EPSON Status Monitor 3** is disabled, click **Extended Settings** on the **Maintenance** tab, and then select **Enable EPSON Status Monitor 3**.*

❏ *Mac OS*

*Apple menu > **System Preferences** > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**) > Epson(XXXX) > **Options & Supplies** > **Utility** > **Open Printer Utility** > **EPSON Status Monitor***

➡ "It is Time to Replace the Maintenance Box" on page 213

Cleaning the Paper Path for Paper Feeding Problems

When paper is not fed from paper cassette correctly, clean the roller inside.

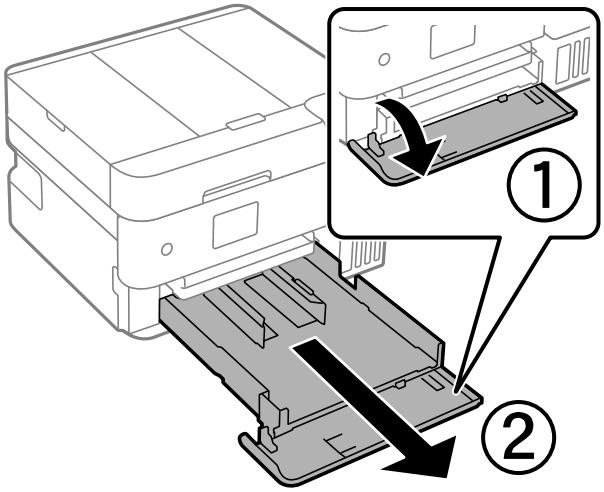

1. Turn off the printer by pressing the ⏻ button.
2. Unplug the power cord, and then disconnect the power cord.
3. Close the document cover if it is open.

4. Make sure that the ink tank cap is securely closed.

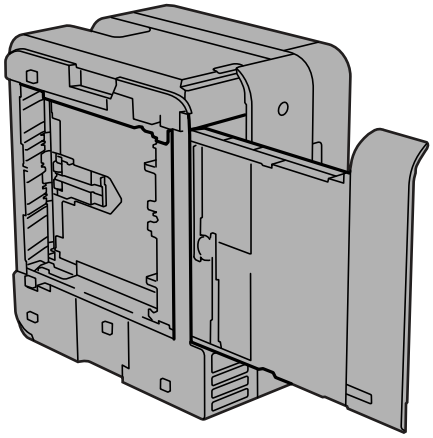

> ***Important:***
> *If ink tank cap is not securely closed, ink may leak.*

5. Slide out the paper cassette, and then remove the paper.

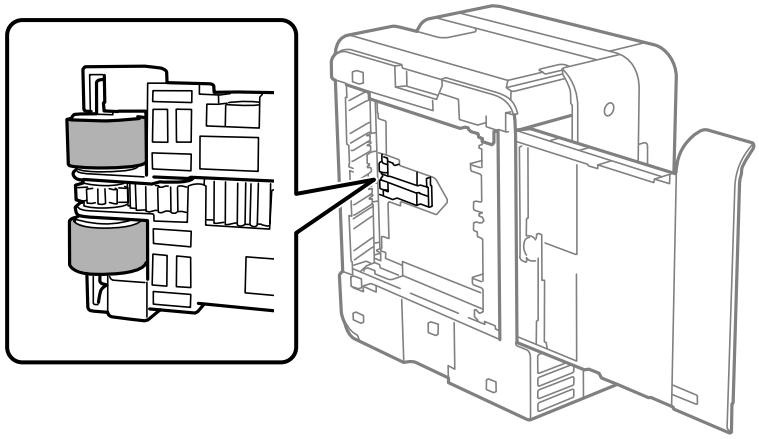

6. Stand the printer on its side with the printer's ink tank at the bottom.

> ***Caution:***
> *Be careful not to trap your hand or fingers when standing the printer. Otherwise you may be injured.*

> ***Important:***
> *Do not leave the printer standing for a long time.*

7. Dampen a soft cloth with water, wring it out thoroughly, and then wipe the roller while rotating it with the cloth.

8. Return the printer to its normal position, and then insert the paper cassette.
9. Connect the power cord.

Improving Print, Copy, Scan, and Fax Quality

Adjusting the Print Quality

If you notice blank pages being ejected, misaligned vertical lines, blurred images, or horizontal banding, try **Print Quality Adjustment**.

> ***Important:***
> *Head cleaning may be necessary after performing **Print Quality Adjustment**. Check the following items when performing head cleaning.*
> - ❏ *Head cleaning consumes ink and should not be performed more than necessary.*
> - ❏ *When ink is low, you may not be able to clean the print head.*
> - ❏ *Do not turn off the printer during head cleaning. If the head cleaning is incomplete, you may not be able to print.*

1. Select **Maintenance** on the printer's control panel.
2. Select **Print Quality Adjustment**.
3. Follow the on-screen instructions to print the adjustment pattern and scan it.

> ***Caution:***
> *Close the document cover before scanning.*

Adjustments are performed automatically.

Note:

- ❏ *If scanning fails, check the paper set on the scanner glass and select **Start Scanning**. If the paper is folded or not properly aligned with the corner mark, it cannot be scan.*
- ❏ *Even if a blank sheet is ejected, follow the on-screen instructions to scan. If you scan a blank sheet of paper, scanning will fail. If this occurs, select **Cancel** and follow the on-screen instructions.*
- ❏ *If the problem does not improve even after performing **Print Quality Adjustment**, go to **Maintenance** to perform all available print head adjustments (nozzle check, cleaning, Alignment adjustment). See Related Information for more details.*

Related Information

➡ "Checking and Cleaning the Print Head" on page 115

➡ "Aligning the Print Head" on page 119

Checking and Cleaning the Print Head

If the nozzles are clogged, the printouts become faint, there is visible banding, or unexpected colors appear. If the nozzles are severely clogged, a blank sheet will be printed. When print quality has declined, first use the nozzle check feature to check if the nozzles are clogged. If the nozzles are clogged, clean the print head.

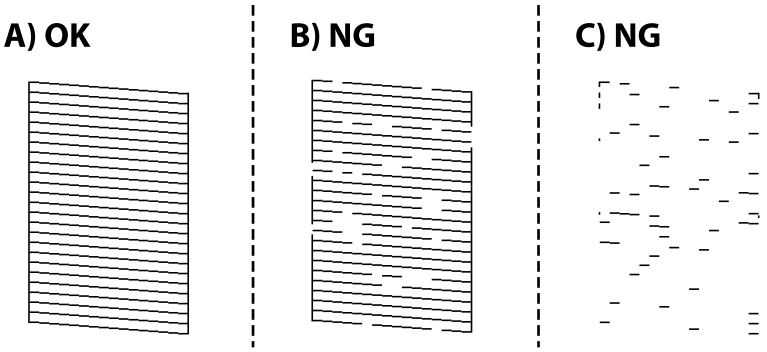

Important:

- ❏ *Do not open the scanner unit or turn off the printer during head cleaning. If the head cleaning is incomplete, you may not be able to print.*
- ❏ *Head cleaning consumes ink and should not be performed more than necessary.*
- ❏ *When ink is low, you may not be able to clean the print head.*
- ❏ *If print quality has not improved after running a nozzle check and Cleaning alternately 3 times or Power Cleaning once, wait for at least 12 hours without printing (we recommend turning off the printer), and then run a nozzle check. If print quality has still not improved, run Cleaning and a nozzle check again. If it has still not improved, run Power Ink Flushing.*
- ❏ *To prevent the print head from drying out, do not unplug the printer while the power is on.*

You can check and clean the print head by using the printer's control panel.

1. Select **Maintenance** on the printer's control panel.
2. Select **Print Head Nozzle Check**.
3. Follow the on-screen instructions to load paper and print the nozzle check pattern.

4. Check the printed pattern to see if the print head nozzles are clogged.

❏ A:

All lines are printed. Select . No further steps are needed.

❏ B or close to B

Some nozzles are clogged. Select , and then select **Cleaning**, follow the on-screen instructions to clean the print head.

When cleaning is finished, the nozzle check pattern is printed automatically.

❏ C or close to C

If most lines are missing or not printed, this indicates most nozzles are clogged. Select , and then select **Power Cleaning**, follow the on-screen instructions to run **Power Cleaning**.

When **Power Cleaning** is finished, the nozzle check pattern is printed automatically. For details, see "Related information" below.

5. Repeat cleaning and printing the pattern until all lines are printed completely.

> ***Important:***
> *If print quality has not improved after running a nozzle check and Cleaning alternately 3 times or Power Cleaning once, wait for at least 12 hours without printing (we recommend turning off the printer), and then run a nozzle check. If print quality has still not improved, run Cleaning and a nozzle check again. If it has still not improved, run Power Ink Flushing.*

Note:
You can also check and clean the print head from the printer driver.

❏ *Windows*

*Click **Print Head Nozzle Check** on the **Maintenance** tab.*

❏ *Mac OS*

*Apple menu > **System Preferences** > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**) > Epson(XXXX) > **Options & Supplies** > **Utility** > **Open Printer Utility** > **Print Head Nozzle Check***

Related Information

➡ “Running Power Cleaning” on page 117
➡ “Running Power Ink Flushing” on page 117

Running Power Cleaning

The **Power Cleaning** feature may improve print quality in the following cases.

❏ When most nozzles are clogged.

❏ When the printout comes out as a blank sheet.

Before running this feature, use the nozzle check feature to check if the nozzles are clogged, read the following instructions.

> ***Important:***
> *The Power Cleaning uses more ink than the Cleaning.*

1. Select **Maintenance** on the printer's control panel.
2. Select **Print Head Cleaning**, and then select **Yes**, you can run the nozzle check. If you select **No**, you can select **Power Cleaning**.
3. Follow the on-screen instructions to run the Power Cleaning feature.

   Note:
   If you cannot run this feature, solve the problems that are displayed on the screen. Next, follow this procedure from step 1 to run this feature again.
4. After running this feature, run the nozzle check to make sure the nozzles are not clogged.

   For details on how to run the nozzle check, see the related information link below.

> ***Important:***
> *If print quality has not improved after running Power Cleaning, wait for at least 12 hours without printing (we recommend turning off the printer), and then run a nozzle check. If print quality has still not improved, run Cleaning and a nozzle check again. If it has still not improved, run Power Ink Flushing.*

Note:
*You can also run **Power Cleaning** from the printer driver.*

❏ *Windows*

Maintenance** tab > **Print Head Cleaning** > **Power Cleaning

❏ *Mac OS*

*Apple menu > **System Preferences** > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**) > Epson(XXXX) > **Options & Supplies** > **Utility** > **Open Printer Utility** > **Print Head Cleaning** > **Power Cleaning***

Related Information

➡ "Checking and Cleaning the Print Head" on page 115

Running Power Ink Flushing

The **Power Ink Flushing** utility allows you to replace all of the ink inside the ink tubes. In the following situations, you may need to use this feature to improve the print quality.

❏ You printed or performed head cleaning when the ink levels were too low to be seen in the ink tank windows.

❏ You performed the nozzle check and Cleaning3 times or running **Power Cleaning** once, and then waited for at least 12 hours without printing, and then run the nozzle check. If it has still not improved, run **Cleaning** and nozzle check again. Nevertheless, it has still not improved yet.

Before running this feature, read the following instructions.

> ***Important:***
> *Make sure that there is enough ink in the ink tanks.*
> *Visually check all ink tanks are at least a third full. Low ink levels during Power Ink Flushing could damage the product.*

> ***Important:***
> *Maintenance box replacement may be required.*
> *Ink will be deposited to the maintenance box. If it becomes full, you must prepare and install a replacement maintenance box to continue printing.*

Note:
When the ink levels or the free space in the maintenance box are insufficient for Power Ink Flushing, you cannot run this feature. Even in this case, the levels and the free space for printing may remain.

1. Select **Maintenance** on the printer's control panel.
2. Select **Power Ink Flushing**.
3. Follow the on-screen instructions to run the Power Ink Flushing feature.

   Note:
   If you cannot run this feature, solve the problems that are displayed on the screen. Next, follow this procedure from step 1 to run this feature again.
4. After running this feature, run the nozzle check to make sure the nozzles are not clogged.

   For details on how to run the nozzle check, see the related information link below.

> ***Important:***
> *If print quality has not improved after running Power Ink Flushing, contact Epson support.*

Note:
*You can also run **Power Ink Flushing** from the printer driver.*

❏ *Windows*

*Click **Power Ink Flushing** on the **Maintenance** tab*

❏ *Mac OS*

*Apple menu > **System Preferences** > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**) > Epson(XXXX) > **Options & Supplies** > **Utility** > **Open Printer Utility** > **Power Ink Flushing***

Related Information

➡ "Checking and Cleaning the Print Head" on page 115

Preventing nozzle clogging

Always use the power button when turning the printer on and off.

Check that the power light is off before you disconnect the power cord.

The ink itself can dry out if it is not covered. Just like placing a cap on a fountain pen or an oil pen to prevent it from drying, make sure the print head is capped properly to prevent the ink from drying.

When the power cord is unplugged or a power outage occurs while the printer is in operation, the print head may not be capped properly. If the print head is left as it is, it will dry out causing nozzles (ink outlets) to clog.

In these cases, turn the printer on and off again as soon as possible to cap the print head.

Aligning the Print Head

If you notice a misalignment of vertical or horizontal lines, or blurred images, align the print head.

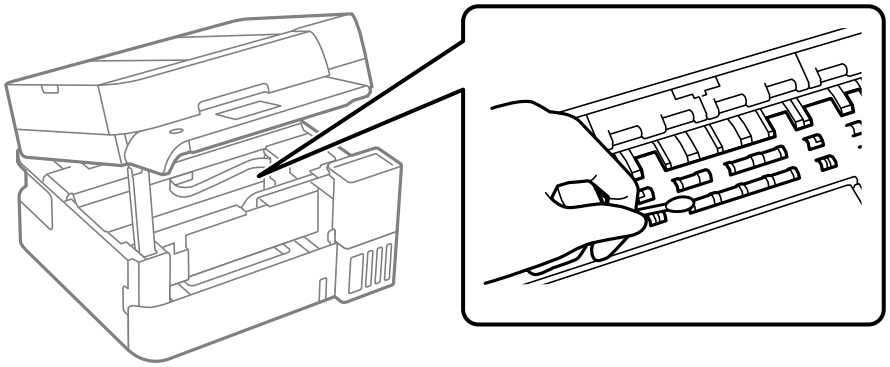

1. Select **Maintenance** on the printer's control panel.
2. Select **Print Head Alignment**.
3. Select one of the alignment menus.
   - ❏ If vertical lines look misaligned or the printouts look blurry , select **Vertical Alignment**.
   - ❏ If horizontal banding occurs at regular intervals, select **Horizontal Alignment**.
4. Follow the on-screen instructions.

Cleaning the Paper Path for Ink Smears

When the printouts are smeared or scuffed, clean the roller inside.

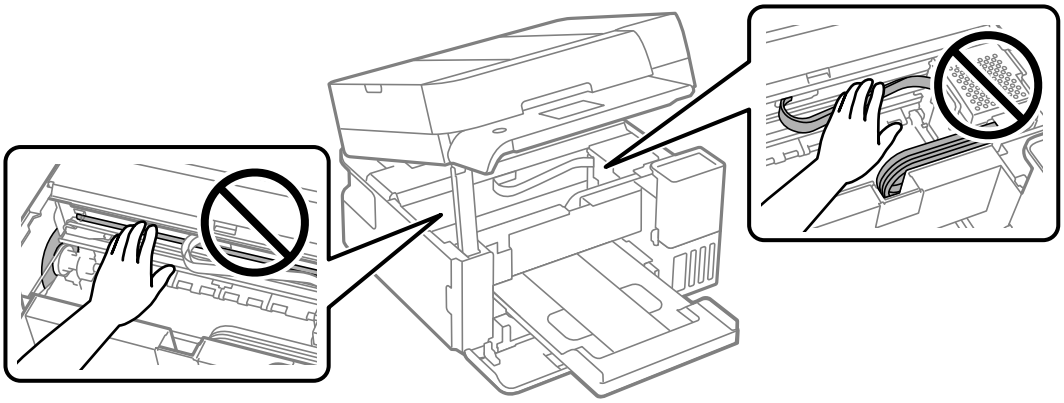

1. Select **Maintenance** on the printer's control panel.
2. Select **Paper Guide Cleaning**.
3. Follow the on-screen instructions to load paper and clean the paper path.
4. Repeat this procedure until the paper is not smeared with ink.

5. When the problem cannot be cleared after cleaning the paper path, the part inside the printer that is shown in the illustration is smeared. Turn off the printer, and then wipe off the ink using a cotton swab.

Important:

- ❏ *Do not use tissue paper to clean the inside of the printer. The print head nozzles may be clogged with lint.*
- ❏ *Do not touch the parts shown in the following illustration. Doing so may cause a malfunction.*

Cleaning the Scanner Glass

When the copies or scanned images are smeared, clean the scanner glass.

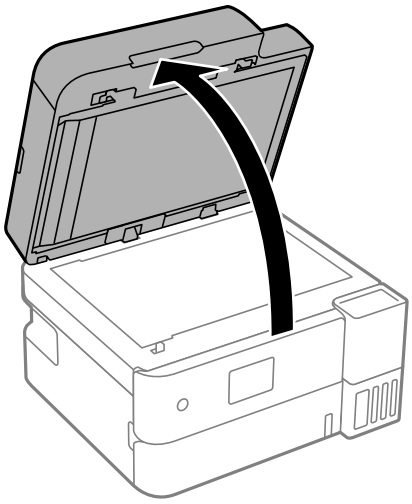

Caution:

Be careful not to trap your hand or fingers when opening or closing the document cover. Otherwise you may be injured.

Important:

Never use alcohol or thinner to clean the printer. These chemicals can damage the printer.

1. Open the document cover.

2. Use a soft, dry, clean cloth to clean the scanner glass.

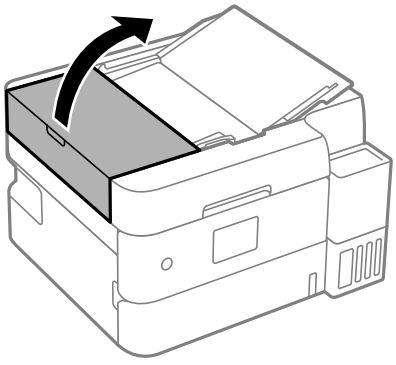

> ***Important:***
>
> ❏ *If the glass surface is stained with grease or some other hard-to-remove material, use a small amount of glass cleaner and a soft cloth to remove it. Wipe off all remaining liquid.*
>
> ❏ *Do not press the glass surface too hard.*
>
> ❏ *Be careful not to scratch or damage the surface of the glass. A damaged glass surface can decrease the scan quality.*

Cleaning the ADF

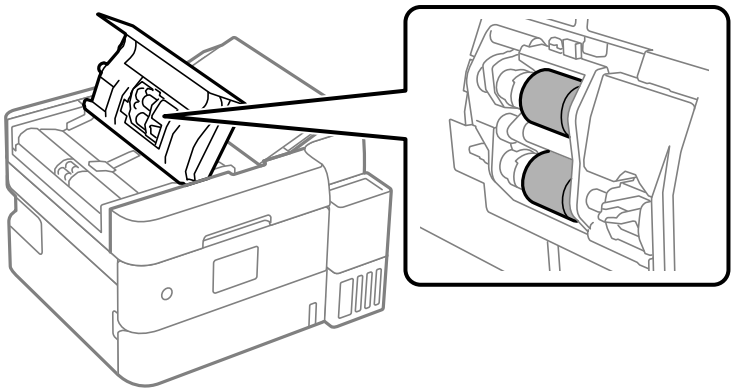

When the copied or scanned images from the ADF are smeared or the originals do not feed in the ADF correctly, clean the ADF.

> ***Important:***
>
> *Never use alcohol or thinner to clean the printer. These chemicals can damage the printer.*

1. Open the ADF cover.

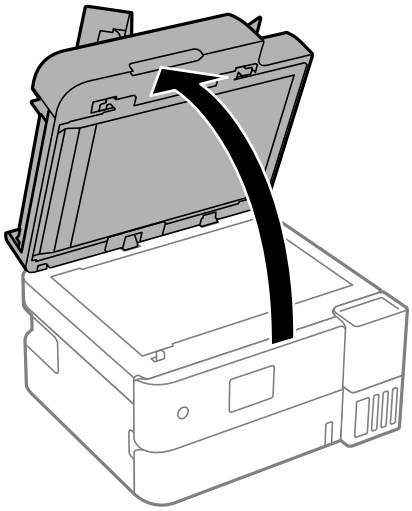

2. Use a soft, moist cloth to clean the roller and the interior of the ADF.

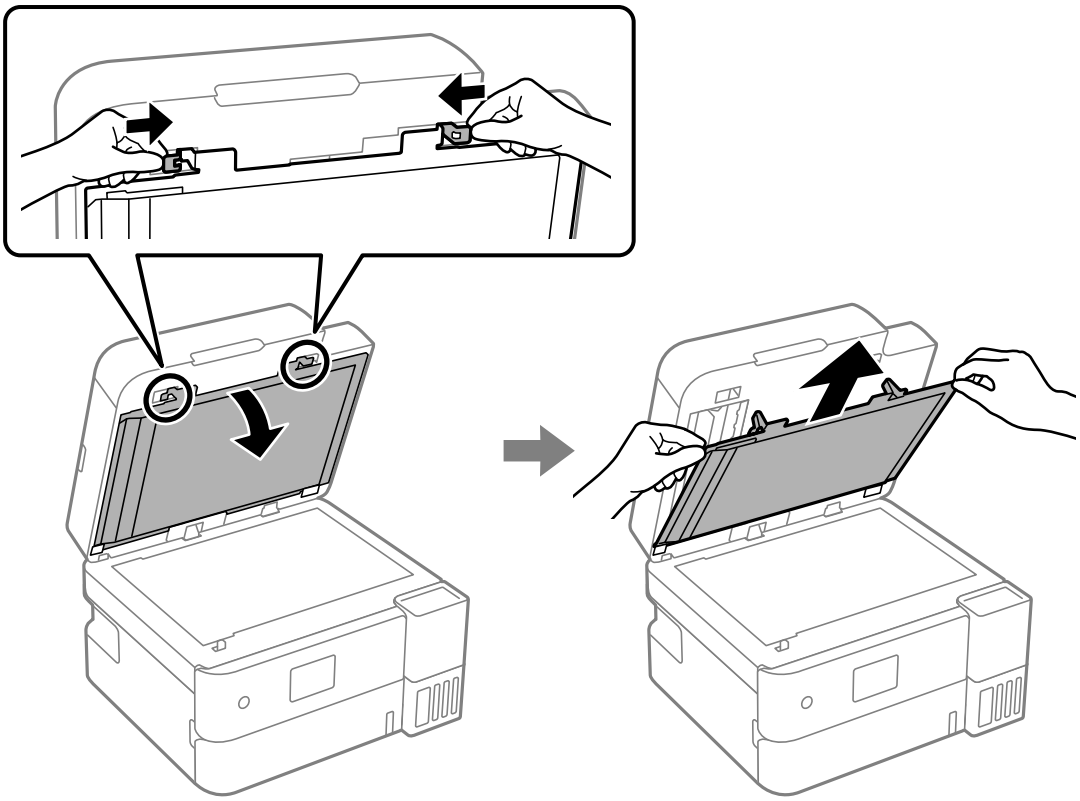

> ***Important:***
> *Using a dry cloth may damage the surface of the roller. Use the ADF after the roller has dried.*

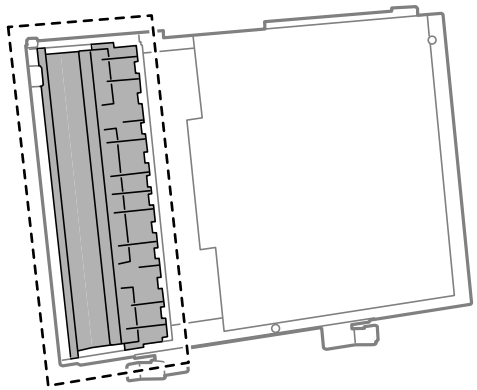

3. Open the document cover.

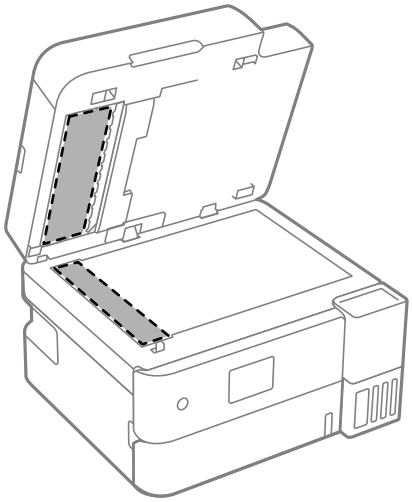

4. Release both tabs and remove the document mat.

5. Clean the part that is shown in the illustration.

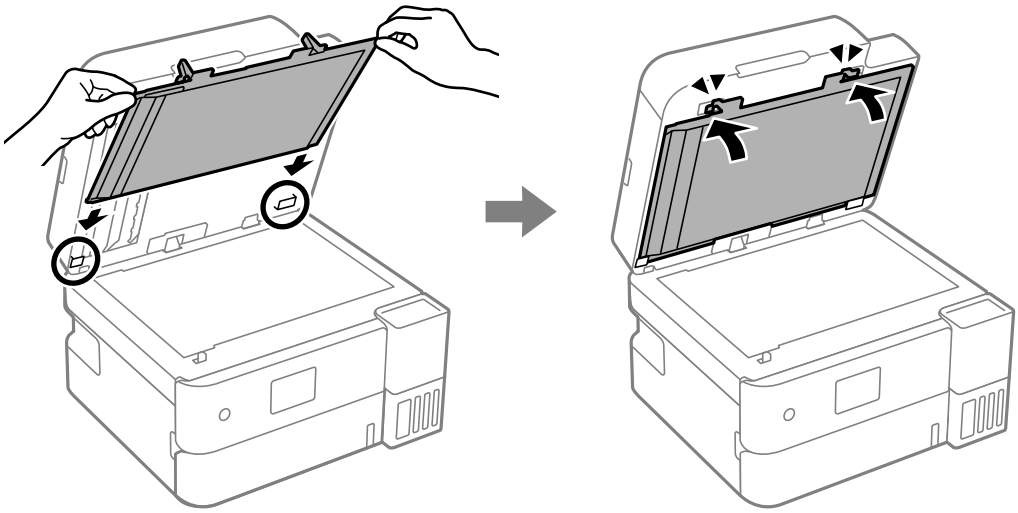

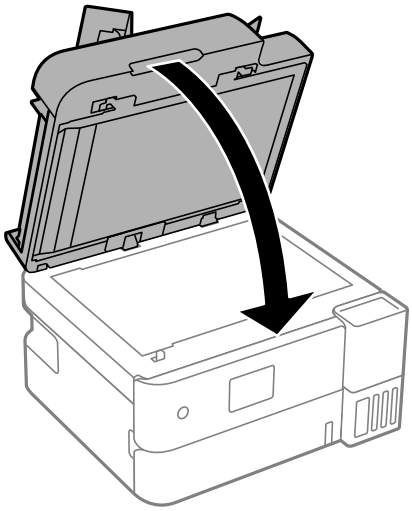

Important:

- ❏ *If the glass surface is stained with grease or some other hard-to-remove material, use a small amount of glass cleaner and a soft cloth to remove it. Wipe off all remaining liquid.*
- ❏ *Do not press the glass surface too hard.*
- ❏ *Be careful not to scratch or damage the surface of the glass. A damaged glass surface can decrease the scan quality.*

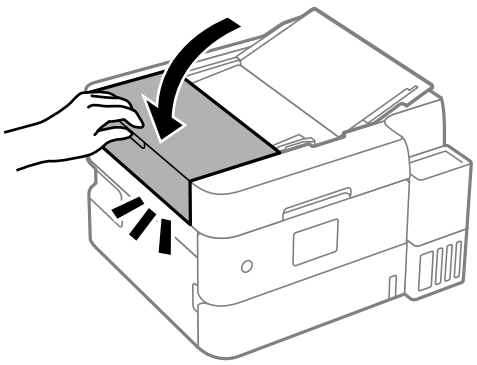

6. Reattach the document mat.

7. Close the document cover.

8. Close the ADF cover it clicks.

Cleaning the Translucent Film

When the printout is not improved after aligning the print head or cleaning the paper path, the translucent film inside the printer may be smeared.

Items required:

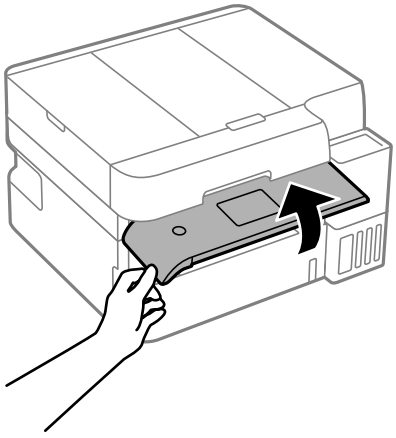

❏ Cotton swabs (several)

❏ Water with a few drops of detergent (2 to 3 drops of detergent in 1/4 cup of tap water)

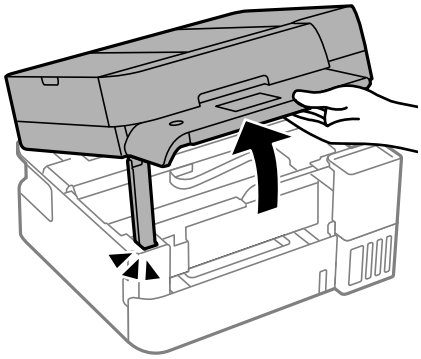

❏ Light for checking smears

> ***Important:***
> *Do not use cleaning liquid other than water with a few drops of detergent.*

1. Turn off the printer by pressing the ⏻ button.
2. Close the document cover if it is open.
3. Raise the control panel.

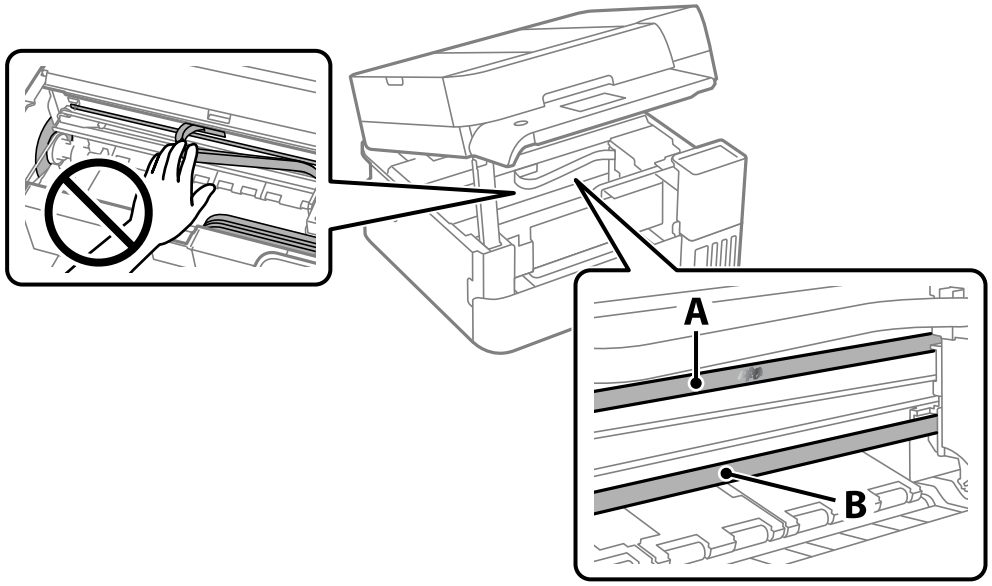

4. Open the scanner unit until it clicks.

5. Check if the translucent film is smeared. Smears are easier to see if you use a light.

   If there are smears (such as finger marks or grease) on the translucent film (A), go to the next step.

   A: Translucent film

   B: Rail

> ***Important:***
>
> *Be careful not to touch the rail (B). Otherwise, you may not be able to print. Do not wipe off the grease on the rail, because this is necessary for operations.*

6. Moisten a cotton swab with the water with a few drops of detergent so that it is not dripping water, and then wipe the smeared part.

   Be careful not to touch the ink that has adhered inside the printer.

> ***Important:***
>
> *Wipe off the smear gently. If you press the cotton swab too hard to the film, the springs of the film may be dislocated and the printer may be damaged.*

7. Use a new dry cotton swab to wipe the film.

> ***Important:***
> *Do not leave any fibers on the film.*

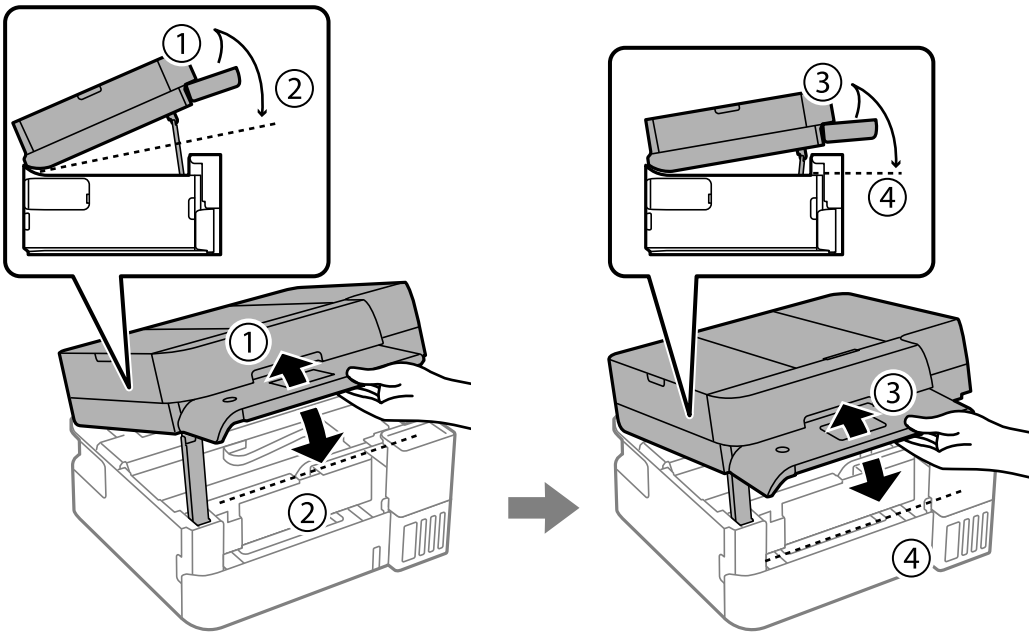

Note:
To prevent the smear from spreading, frequently replace the cotton swab with a new one.

8. Repeat steps 5 and 6 until the film is not smeared.

9. Visually check that the film is not smeared.

10. Close the scanner unit.

    For safety, the scanner unit is closed in two steps.

Note:
The scanner unit must be closed completely before it can be opened again.

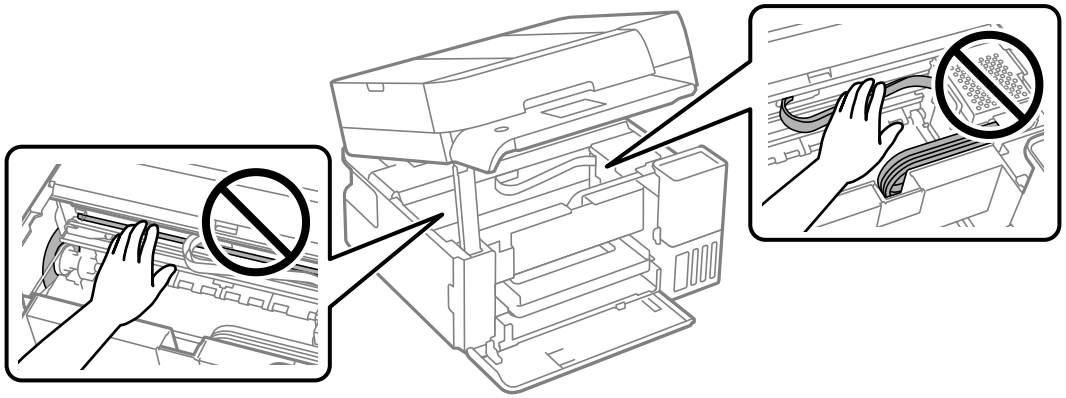

Cleaning the Printer

If the components and the case are dirty or dusty, turn off the printer and clean them using a soft, clean cloth that has been dampened with water. If you cannot remove the dirt, try adding a small amount of mild detergent to the damp cloth.

Important:

- ❏ *Be careful not to get water onto the printer mechanism or any electrical components. Otherwise, the printer could be damaged.*
- ❏ *Never use alcohol or paint thinner to clean the components and the case. These chemicals can damage them.*
- ❏ *Do not touch the parts shown in the following illustration. Doing so may cause a malfunction.*

Cleaning Spilled ink

If ink has been spilled, follow these procedures to clean it up.

- ❏ If there is ink residue on the printer, in the area around the tank, wipe it off using a napless, clean cloth or cotton swab.
- ❏ If ink spills on the desk or floor, wipe it off immediately. If the ink dries, it will be difficult to remove. To prevent the spill from spreading, blot the ink with a dry cloth, and then wipe it with a moist cloth.
- ❏ If ink gets on your hands, wash them with water and soap.

In These Situations

When Replacing a Computer. 131

Saving Power. 131

Disabling your Wi-Fi Connection. 131

Checking the Total Number of Pages Fed Through the Printer. 132

Installing the Applications Separately. 132

Re-Setting the Network Connection. 135

Connecting a Device and Printer Directly (Wi-Fi Direct). 146

Adding or Changing the Printer's Connection. 149

Transporting and Storing the Printer. 152

When Replacing a Computer

You need to install the printer driver and other software on the new computer.

Access the following website, and then enter the product name. Go to **Setup**, and then start setting up. Follow the on-screen instructions.

https://epson.sn

Saving Power

The printer enters sleep mode or turns off automatically if no operations are performed for a set period. You can adjust the time before power management is applied. Any increase will affect the product's energy efficiency. Please consider the environment before making any change.

1. Select **Settings** on the home screen.
2. Select **General Settings** > **Basic Settings**.
3. Do one of the following.

   Note:
   *Your product may have the **Power Off Settings** or **Power Off Timer** feature depending on the location of purchase.*

   ❏ Select **Sleep Timer** or **Power Off Settings** > **Power Off If Inactive** or **Power Off If Disconnected**, and then make settings.

   ❏ Select **Sleep Timer** or **Power Off Timer**, and then make settings.

Related Information

➡ "Application for Printing from a Computer (Windows Printer Driver)" on page 228

Disabling your Wi-Fi Connection

If you used to use Wi-Fi (wireless LAN) but no longer need to do so due to a change in connection mode and so on, you can disable your Wi-Fi connection.

By removing unnecessary Wi-Fi signals, you can also reduce the load on your standby power.

1. Tap  on the printer's home screen.
2. Select **Wi-Fi**.
3. Select **Change Access Point**.
4. Select **Others**.
5. Select **Disable Wi-Fi**.

   Follow the on-screen instructions.

Checking the Total Number of Pages Fed Through the Printer

You can check the total number of pages fed through the printer. The information is printed together with the nozzle check pattern.

1. Select **Maintenance** on the printer's control panel.
2. Select **Print Head Nozzle Check**.
3. Follow the on-screen instructions to load paper and print the nozzle check pattern.

Note:
You can also check the total number of pages fed from the printer driver.

❏ *Windows*

*Click **Printer and Option Information** on the **Maintenance** tab.*

❏ *Mac OS*

*Apple menu > **System Preferences** (or **System Settings** > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**) > Epson(XXXX) > **Options & Supplies** > **Utility** > **Open Printer Utility** > **Printer and Option Information***

Installing the Applications Separately

Connect your computer to the network and install the latest version of applications from the website. Log in to your computer as an administrator. Enter the administrator password if the computer prompts you.

Note:
❏ *When reinstalling an application, you need to uninstall it first.*

❏ *You can download the latest applications from the Epson website.*

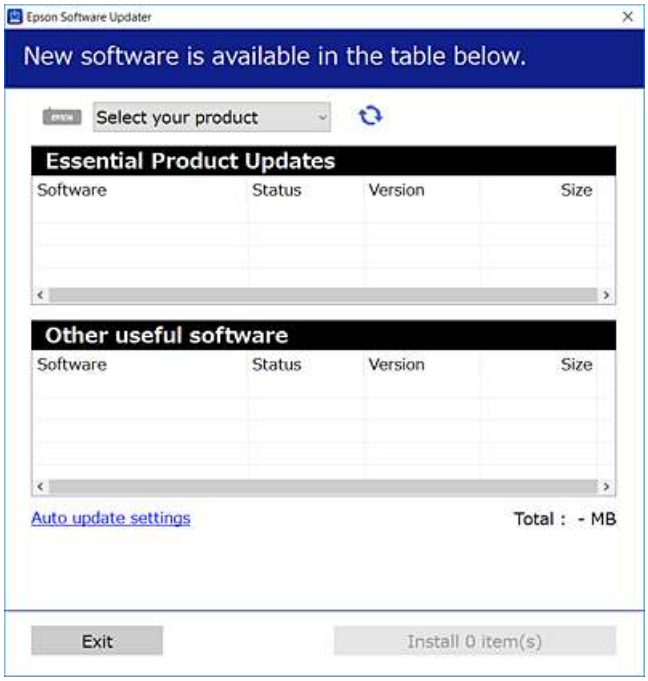

http://www.epson.com

❏ *If you use Windows Server operating systems, you cannot use Epson Software Updater. Download the latest applications from the Epson website.*

1. Make sure the printer and the computer are available for communication, and the printer is connected to the Internet.

2. Start Epson Software Updater.

   The screenshot is an example on Windows.

3. For Windows, select your printer, and then click to check for the latest available applications.

4. Select the items you want to install or update, and then click the install button.

> ***Important:***
>
> *Do not turn off or unplug the printer until the update is complete. Doing so may result in malfunction of the printer.*

➡ "Application for Updating Software and Firmware (Epson Software Updater)" on page 232

Checking if a genuine Epson printer driver is installed - Windows

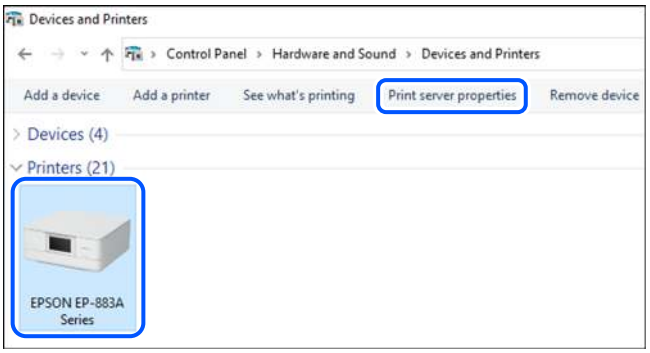

You can check if a genuine Epson printer driver is installed on your computer by using one of the following methods.

❏ Windows 11

Click on the start button, select **Settings** > **Bluetooth & devices** > **Printers & scanners**, and then click **Print server properties** under **Related settings**.

❏ Windows 10/Windows 8.1/Windows 8/Windows 7/Windows Server 2022/Windows Server 2019/Windows Server 2016/Windows Server 2012 R2/Windows Server 2012/Windows Server 2008 R2

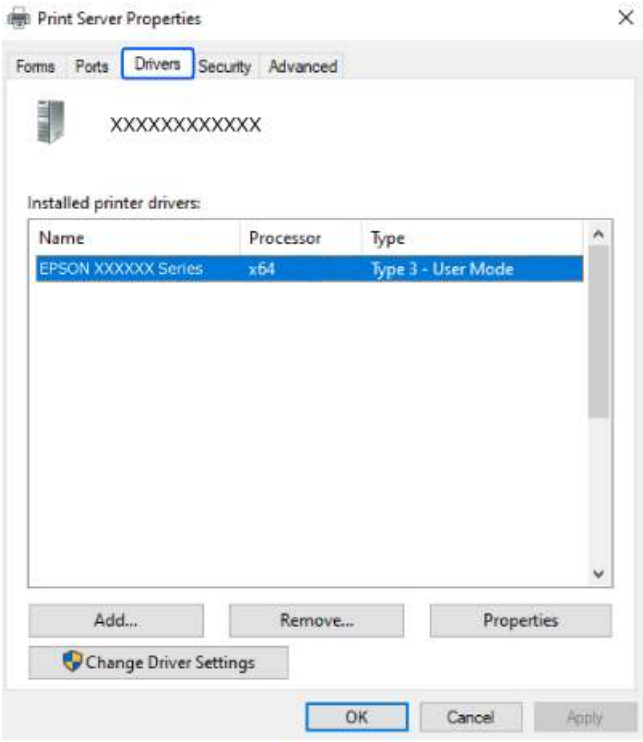

Select **Control Panel** > **View devices and printers** (**Printers**, **Printers and Faxes**) in **Hardware and Sound**, click the printer icon, and then click **Print server properties** at the top of the window.

❏ Windows Server 2008

Right-click on the **Printers** folder, and then click **Run as administrator** > **Server Properties**.

Click the **Drivers** tab. If your printer name is displayed in the list, a genuine Epson printer driver is installed on your computer.

Related Information

➡ "Installing the Applications Separately" on page 132

Checking if a genuine Epson printer driver is installed - Mac OS

You can check if a genuine Epson printer driver is installed on your computer by using one of the following methods.

Select **System Preferences** (or **System Settings**) from the Apple menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then select the printer. Click **Options & Supplies**, and if the **Options** tab and **Utility** tab are displayed on the window, a genuine Epson printer driver is installed on your computer.

Related Information

➡ "Installing the Applications Separately" on page 132

Re-Setting the Network Connection

The printer's network settings need to be adjusted in the following cases.

- ❏ When using a printer with a network connection
- ❏ Your network environment has changed
- ❏ You replaced the wireless router
- ❏ Changing the connection method to the computer (for example, switching from a USB connection to a Wi-Fi connection)

Making Settings for Connecting to the Computer

You can run the installer using one of the following methods.

Setting up from the website

Access the following website, and then enter the product name. Go to **Setup**, and then start setting up.

https://epson.sn

You can also watch the procedure in the Web Video Manuals. Access the following website.

https://support.epson.net/publist/vlink.php?code=NPD7415

Setting up using the software disc

If your printer came with a software disc and you are using a Windows computer with a disc drive, insert the disc into the computer, and then follow the on-screen instructions.

Making Settings for Connecting to the mobile device

You can use the printer via the wireless router from your mobile device when you connect the printer to the same network as the wireless router.

To set up a new connection, access the following website from the mobile device that you want to connect to the printer. Enter the product name, go to Setup, and then start the setup.

https://epson.sn

You can watch the procedure in the Web Video Manuals. Access the following website.

https://support.epson.net/publist/vlink.php?code=VC00006

Note:
If you have already set up the connection between your mobile device and the printer but need to reconfigure it, you can do so from an app such as Epson Smart Panel.

Configuring Wi-Fi Settings from the Control Panel

If you are not using a computer or mobile device to set up the printer connection, you can do so on the control panel.

You can select network settings from the printer's control panel in several ways. Choose the connection method that matches the environment and conditions that you are using.

If you know the SSID and password for your wireless router, you can set them manually.

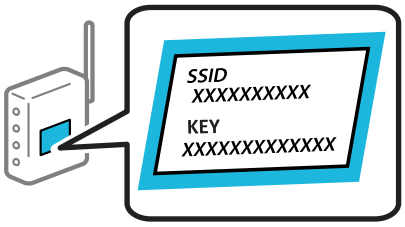

Related Information

➡ “Making Wi-Fi Settings by Entering the SSID and Password” on page 136
➡ “Making Wi-Fi Settings by Push Button Setup (WPS)” on page 137
➡ “Making Wi-Fi Settings by PIN Code Setup (WPS)” on page 138

Making Wi-Fi Settings by Entering the SSID and Password

You can set up a Wi-Fi network by entering the information necessary to connect to a wireless router from the printer's control panel. To set up using this method, you need the SSID and password for a wireless router.

Note:
If you are using a wireless router with its default settings, the SSID and password are on the label. If you do not know the SSID and password, see the documentation provided with the wireless router.

1. Tap  on the home screen.
2. Select **Wi-Fi**.
3. Tap **Start Setup**.

   If the network connection is already set up, the connection details are displayed. Tap **Change Access Point** to change the settings.

   If the printer has already been connected by Ethernet, tap **Change to Wi-Fi connection.**, and then select **Yes** after checking the message.
4. Select **Wi-Fi Setup Wizard**.
5. Follow the on-screen instructions to select the SSID, enter the password for the wireless router, and start setup.

   If you want to check the network connection status for the printer after setup is complete, see the related information link below for details.

   Note:
   - ❏ *If you do not know the SSID, check if it is written on the label of the wireless router. If you are using the wireless router with its default settings, use the SSID written on the label. If you cannot find any information, see the documentation provided with the wireless router.*
   - ❏ *The password is case-sensitive.*
   - ❏ *If you do not know the password, check if the information is written on the label of the wireless router. On the label, the password may be written "Network Key", "Wireless Password", and so on. If you are using the wireless router with its default settings, use the password written on the label.*
   - ❏ *If the SSID you want to connect to is not displayed, make Wi-Fi settings using software or apps on your computer or mobile device. For more information, enter https://epson.sn in your browser to open the website, enter your product name, and go to **Setup**.*

➡ “Making Settings for Connecting to the Computer” on page 135
➡ “Making Settings for Connecting to the mobile device” on page 136

Making Wi-Fi Settings by Push Button Setup (WPS)

You can automatically set up a Wi-Fi network by pressing a button on the wireless router. If the following conditions are met, you can set up by using this method.

❏ The wireless router is compatible with WPS (Wi-Fi Protected Setup).

❏ The current Wi-Fi connection was established by pressing a button on the wireless router.

Note:
If you cannot find the button or you are setting up using the software, see the documentation provided with the wireless router.

1. Tap  on the home screen.
2. Select **Wi-Fi**.
3. Tap **Start Setup**.

   If the network connection is already set up, the connection details are displayed. Tap **Change Access Point** to change the settings.

   If the printer has already been connected by Ethernet, tap **Change to Wi-Fi connection.**, and then select **Yes** after checking the message.
4. Select **Push Button Setup (WPS)**.
5. Follow the on-screen instructions.

   If you want to check the network connection status for the printer after setup is complete, see the related information link below for details.

   Note:
   If connection fails, restart the wireless router, move it closer to the printer, and try again. If it still does not work, print a network connection report and check the solution.

➡ "Checking the Printer's Network Connection Status (Network Connection Report)" on page 139

Making Wi-Fi Settings by PIN Code Setup (WPS)

You can automatically connect to a wireless router by using a PIN code. You can use this method to set up if a wireless router is capable of WPS (Wi-Fi Protected Setup). Use a computer to enter a PIN code into the wireless router.

1. Tap  on the home screen.
2. Select **Wi-Fi**.
3. Tap **Start Setup**.

   If the network connection is already set up, the connection details are displayed. Tap **Change Access Point** to change the settings.

   If the printer has already been connected by Ethernet, tap **Change to Wi-Fi connection.**, and then select **Yes** after checking the message.
4. Select **Others** > **PIN Code Setup (WPS)**.

5. Follow the on-screen instructions.

   If you want to check the network connection status for the printer after setup is complete, see the related information link below for details.

   Note:
   See the documentation provided with your wireless router for details on entering a PIN code.

Related Information

➡ "Checking the Printer's Network Connection Status (Network Connection Report)" on page 139

Checking the Printer's Network Connection Status (Network Connection Report)

You can print a network connection report to check the status between the printer and the wireless router.

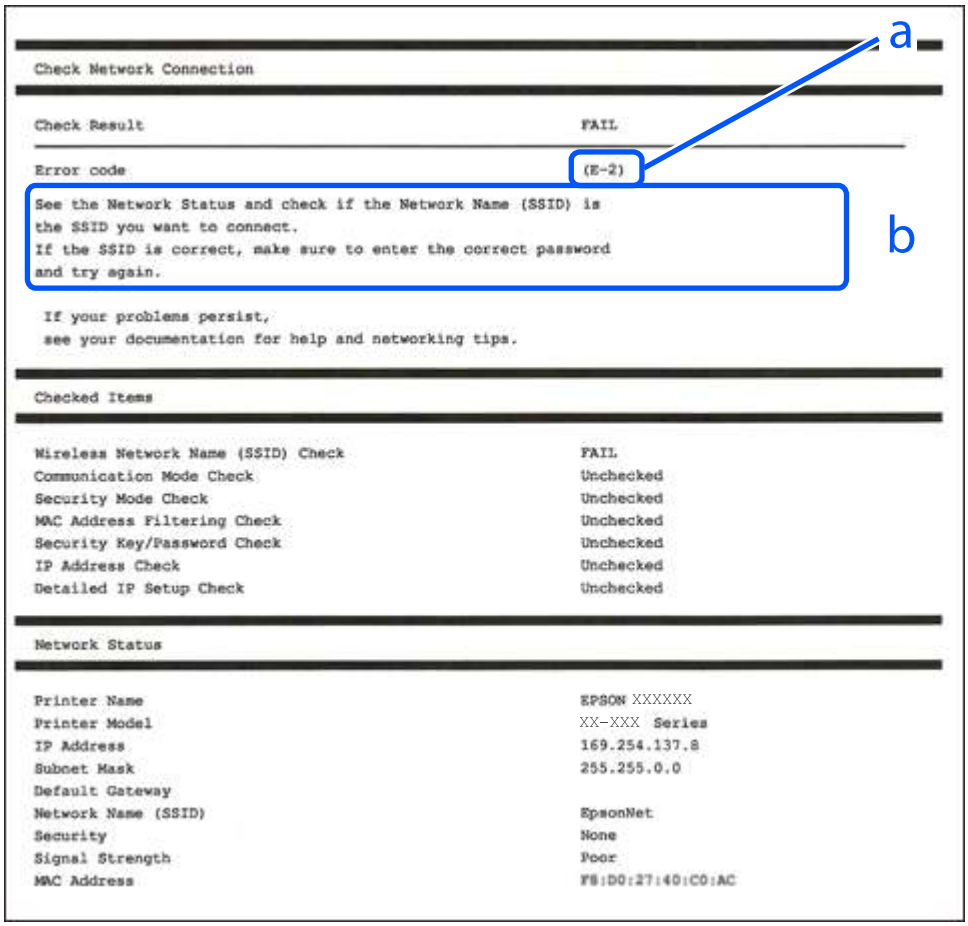

1. Select **Settings** on the home screen.
2. Select **General Settings** > **Network Settings** > **Connection Check**.

   The connection check starts.
3. Follow the instructions on the printer's screen to print the network connection report.

   If an error has occurred, check the network connection report, and then follow the printed solutions.

Messages and Solutions on the Network Connection Report

Check the messages and error codes on the network connection report, and then follow the solutions.

a. Error code

b. Network Environment Message

E-1

Solutions:

- ❏ Make sure the Ethernet cable is securely connected to your printer and to your hub or other network device.
- ❏ Make sure your hub or other network device is turned on.
- ❏ If you want to set up a Wi-Fi connection, reselect the Wi-Fi settings because they are currently disabled.

Related Information

➡ "Configuring Wi-Fi Settings from the Control Panel" on page 136

E-2, E-3, E-7

Solutions:

- ❏ Make sure your wireless router is turned on.
- ❏ Confirm that your computer or device is connected correctly to the wireless router.
- ❏ Turn off the wireless router. Wait for about 10 seconds, and then turn it on.
- ❏ Place the printer closer to your wireless router and remove any obstacles between them.
- ❏ If you have entered the SSID manually, check if it is correct. Check the SSID from the **Network Status** part on the network connection report.
- ❏ If an wireless router has multiple SSIDs, select the SSID that is displayed. When the SSID is using a non-compliant frequency, the printer does not display them.
- ❏ If you are using push button setup to establish a network connection, make sure your wireless router supports WPS. You cannot use push button setup if your wireless router does not support WPS.
- ❏ Makes sure you know your SSID and password before connecting to the wireless router. If you are using a wireless router with its default settings, the SSID and password are located on a label on the wireless router. If you do not know your SSID and password, contact the person who set up the wireless router, or see the documentation provided with the wireless router.
- ❏ If you are connecting to an SSID generated from a tethering mobile device, check for the SSID and password in the documentation provided with the mobile device.
- ❏ If your Wi-Fi connection suddenly disconnects, check for the conditions below. If any of these conditions are applicable, reset your network settings by downloading and running the software from the following website.

  https://epson.sn > **Setup**

  - ❏ Another mobile device was added to the network using push button setup.
  - ❏ The Wi-Fi network was set up using any method other than push button setup.
  - ❏ When replacing the wireless router.

Related Information

➡ "Re-Setting the Network Connection" on page 135
➡ "Configuring Wi-Fi Settings from the Control Panel" on page 136

E-5

Solutions:

❏ Make sure the wireless router's security type is set to one of the options below. If it is set to anything else, change the security type on the wireless router.

- ❏ WEP-64 bit (40 bit)
- ❏ WEP-128 bit (104 bit)
- ❏ WPA PSK (TKIP/AES)*
- ❏ WPA2 PSK (TKIP/AES)*
- ❏ WPA3-SAE (AES)

* WPA PSK is also known as WPA Personal. WPA2 PSK is also known as WPA2 Personal.

❏ Turn off the wireless router. Wait for about 10 seconds, and then turn it on.

❏ Reconfigure the printer's network settings.

E-6

Solutions:

❏ Check if MAC address filtering is disabled. If it is enabled, register the printer's MAC address so that it is not filtered. See the documentation provided with the wireless router for details. You can check the printer's MAC address from the **Network Status** part on the network connection report.

❏ If your wireless router is using shared authentication with WEP security, make sure the authentication key and index are correct.

❏ If the number of connectable devices on the wireless router is less than the number of network devices that you want to connect, make settings on the wireless router to increase the number of connectable devices. See the documentation provided with the wireless router to make settings.

❏ Turn off the wireless router. Wait for about 10 seconds, and then turn it on.

❏ Make network settings of the printer again.

Related Information

➡ "Making Settings for Connecting to the Computer" on page 135

E-8

Solutions:

❏ If the wireless router's DHCP is enabled, set the printer's TCP/IP settings to Auto.

❏ If the printer's Obtain IP Address setting is set to Manual, the IP address you manually set is invalid due to out of range (for example: 0.0.0.0). Set a valid IP address from the printer's control panel.

❏ Turn off the wireless router. Wait for about 10 seconds, and then turn it on.

❏ Make network settings of the printer again.

Related Information

➡ "Setting a Static IP Address for the Printer" on page 151

E-9

Solutions:

Check the following.

❏ Devices are turned on.

❏ You can access the Internet and other computers or network devices on the same network from the devices you want to connect to the printer.

If your printer and network devices still do not connect after confirming the above, try the following.

❏ Turn off the wireless router. Wait for about 10 seconds, and then turn it on.

❏ Configure network settings on the computer that is on the same network as the printer using the installer. You can download it from the following website.

https://epson.com/support (U.S.)

https://epson.ca/support (Canada)

https://latin.epson.com/support (Latin America)

https://epson.sn > **Setup** (Other regions)

If the problem continues to occur, check the IP address of the printer listed in the Network Connection Report and contact your router manufacturer.

Related Information

➡ "Making Settings for Connecting to the Computer" on page 135

E-10

Solutions:

Check the following.

❏ Other devices on the network are turned on.

❏ Network addresses (IP address, subnet mask, and default gateway) are correct if you have set the printer's Obtain IP Address setting to Manual.

Reset the network address if it is incorrect. You can check the IP address, subnet mask, and default gateway from the **Network Status** section on the network connection report.

If DHCP is enabled, change the printer's Obtain IP Address setting to Auto. If you want to set the IP address manually, check the printer's IP address from the **Network Status** part on the network connection report, and then select Manual on the network settings screen. Set the subnet mask to [255.255.255.0].

If your printer and network devices still do not connect after confirming the above, try the following.

❏ Turn off the wireless router. Wait for about 10 seconds, and then turn it on.

❏ Configure network settings on the computer that is on the same network as the printer using the installer. You can run it from the following website.

https://epson.com/support (U.S.)

https://epson.ca/support (Canada)

https://latin.epson.com/support (Latin America)

https://epson.sn > **Setup** (Other regions)

Related Information

➡ "Setting a Static IP Address for the Printer" on page 151

E-11

Solutions:

Check the following.

❏ The default gateway address is correct if you set the printer's TCP/IP Setup setting to Manual.

❏ The device that is set as the default gateway is turned on.

Set the correct default gateway address. You can check the default gateway address from the **Network Status** section on the network connection report.

If your printer and network devices still do not connect after confirming the above, try the following.

❏ Turn off the wireless router. Wait for about 10 seconds, and then turn it on.

❏ Configure network settings on the computer that is on the same network as the printer using the installer. You can run it from the following website.

https://epson.com/support (U.S.)

https://epson.ca/support (Canada)

https://latin.epson.com/support (Latin America)

https://epson.sn > **Setup** (Other regions)

Related Information

➡ "Setting a Static IP Address for the Printer" on page 151

E-12

Solutions:

Check the following.

❏ Other devices on the network are turned on.

❏ The network addresses (IP address, subnet mask, and default gateway) are correct if you are entering them manually.

❏ The network addresses for other devices (subnet mask and default gateway) are the same.

❏ The IP address does not conflict with other devices.

If your printer and network devices still do not connect after confirming the above, try the following.

❏ Turn off the wireless router. Wait for about 10 seconds, and then turn it on.

❏ Configure network settings again using the installer. You can run it from the following website.

https://epson.com/support (U.S.)

https://epson.ca/support (Canada)

https://latin.epson.com/support (Latin America)

https://epson.sn > **Setup** (Other regions)

❏ You can register several passwords on a wireless router that uses WEP security type. If several passwords are registered, check if the first registered password is set on the printer.

Related Information

➡ "Setting a Static IP Address for the Printer" on page 151

E-13

Solutions:

Check the following.

❏ Network devices such as a wireless router, hub, and router are turned on.

❏ The TCP/IP Setup for network devices has not been set up manually. (If the printer's TCP/IP Setup is set automatically while the TCP/IP Setup for other network devices is performed manually, the printer's network may differ from the network for other devices.)

If it still does not work after checking the above, try the following.

❏ Turn off the wireless router. Wait for about 10 seconds, and then turn it on.

❏ Configure network settings on the computer that is on the same network as the printer using the installer. You can run it from the following website.

https://epson.com/support (U.S.)

https://epson.ca/support (Canada)

https://latin.epson.com/support (Latin America)

https://epson.sn > **Setup** (Other regions)

❏ You can register several passwords on a wireless router that uses the WEP security type. If several passwords are registered, check if the first registered password is set on the printer.

Network Environment Messages

Message	Solution
The Wi-Fi environment needs to be improved. Turn the wireless router off and then turn it on. If the connection does not improve, see the documentation for the wireless router.	After moving the printer closer to the wireless router and removing any obstacles between them, turn off the wireless router. Wait for about 10 seconds, and then turn it on. If it still does not connect, see the documentation supplied with the wireless router.

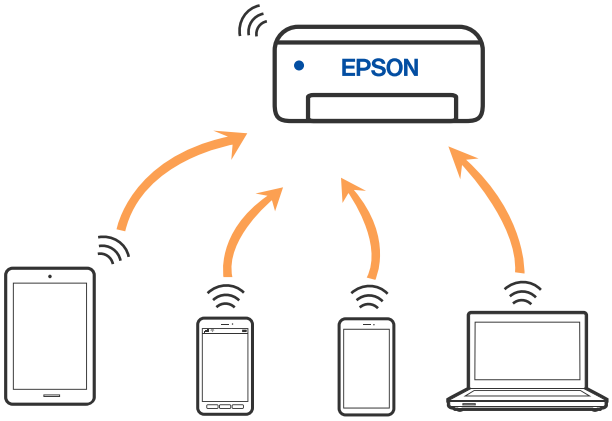

Message	Solution
*No more devices can be connected. Disconnect one of the connected devices if you want to add another one.	You have connected the maximum number of devices allowed via the printer's Wi-Fi Direct (Simple AP) connection. To add another computer or mobile device, disconnect one of the connected devices. You can confirm the number of devices that can be connected simultaneously and the number of connected devices by checking the network status sheet or the printer's control panel.
The same SSID as Wi-Fi Direct exists in the environment. Change the Wi-Fi Direct SSID if you cannot connect a mobile device to the printer.	On the printer's control panel, go to the Wi-Fi Direct Setup screen and select the menu to change the setting. You can change the part of the network name that after DIRECT-XX-. The network name must be 22 characters or less.

Connecting a Device and Printer Directly (Wi-Fi Direct)

Wi-Fi Direct (Simple AP) allows you to connect a device directly to the printer without a wireless router and print from the device.

About Wi-Fi Direct

Use this connection method when you are not using Wi-Fi at home or at the office, or when you want to connect the printer and the computer or mobile devices directly. In this mode, the printer acts as a wireless router and you can connect the devices to the printer without having to use a standard wireless router. However, devices directly connected to the printer cannot communicate with each other through the printer.

The printer can be connected by Wi-Fi or Ethernet, and Wi-Fi Direct (Simple AP) connection simultaneously. However, if you start a network connection in Wi-Fi Direct (Simple AP) connection when the printer is connected by Wi-Fi, the Wi-Fi is temporarily disconnected.

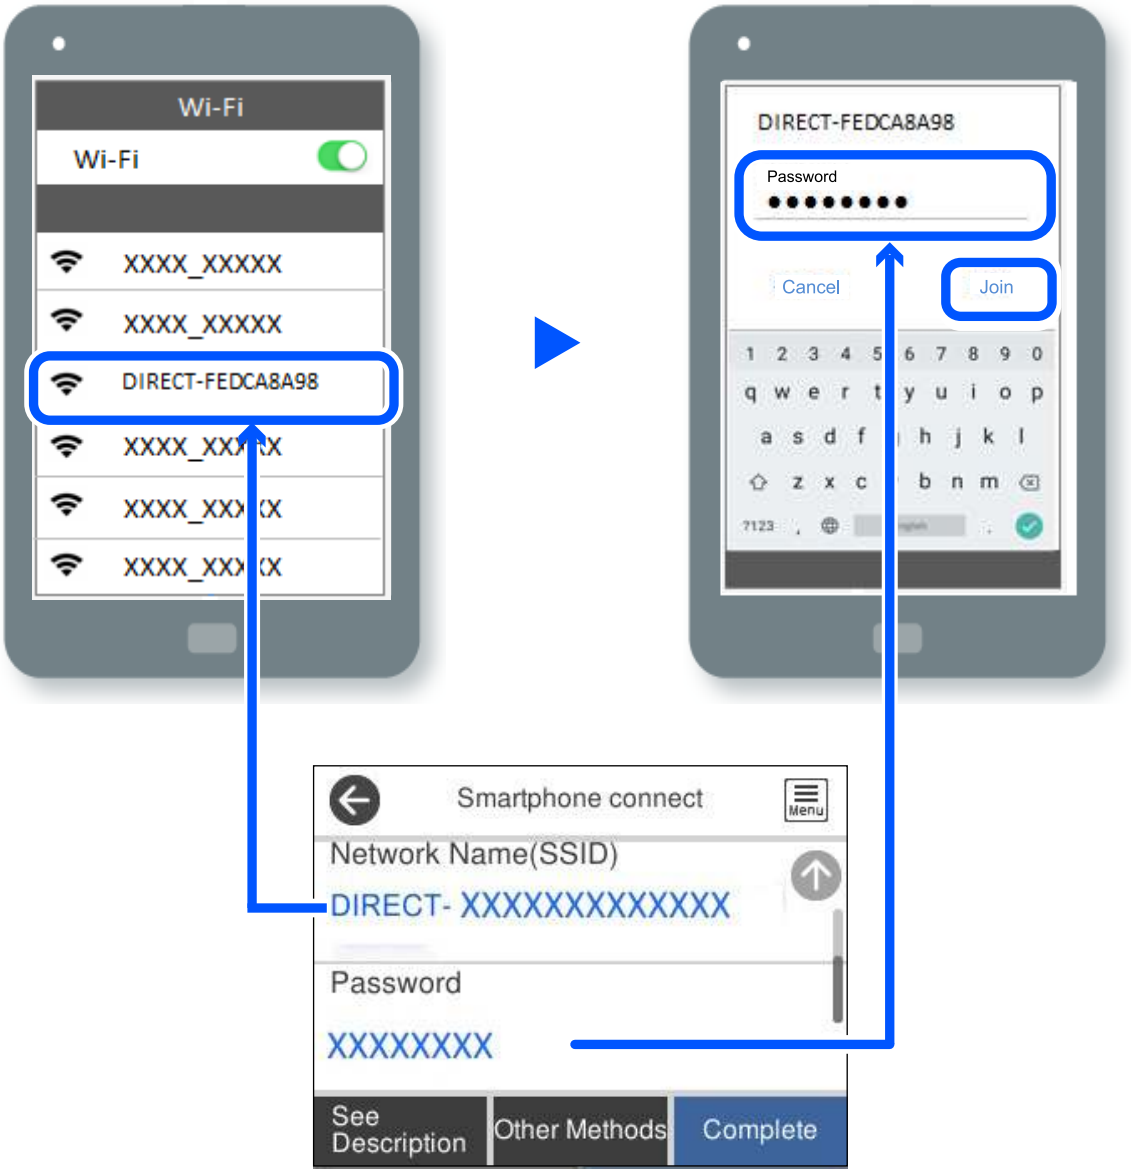

Connecting to Devices using Wi-Fi Direct

This method allows you to connect the printer directly to devices without a wireless router.

Note:
For iOS or Android users, it is convenient to set up from Epson Smart Panel.

You only need to make these settings for the printer and the device that you want to connect to once. Unless you disable Wi-Fi Direct or restore the network settings to their defaults, you do not need to make these settings again.

1. Tap  on the home screen.
2. Tap **Wi-Fi Direct**.
3. Tap **Start Setup**.
4. Scroll down the printer screen to display the SSID and password required to set up the connection. Select the SSID displayed on your device and enter the password.

5. On the printing app screen for the device, select the printer that you want to connect to.
6. On the printer's control panel, select **Complete**.

For devices that have been connected to the printer before, select the network name (SSID) on the device's Wi-Fi screen to connect them again.

Note:
If you are using an iOS device, you can also connect by scanning the QR code with the standard iOS camera. See the link below https://epson.sn.

Disconnecting Wi-Fi Direct (Simple AP) Connection

Note:
When Wi-Fi Direct (Simple AP) connection disabled, all computers and mobile devices connected to the printer in Wi-Fi Direct (Simple AP) connection are disconnected. If you want to disconnect a specific device, disconnect from the device instead of the printer.

1. Tap  on the printer's home screen.
2. Select **Wi-Fi Direct**.
   The Wi-Fi Direct information is displayed.
3. Tap **Start Setup**.
4. Tap .
5. Select **Disable Wi-Fi Direct**.
6. Tap the **Disable the settings**.
7. Follow the on-screen instructions.

Changing the Wi-Fi Direct (Simple AP) Settings Such as the SSID

When Wi-Fi Direct (simple AP) connection is enabled, you can change the settings from  > **Wi-Fi Direct** > **Start Setup** > , and then the following menu items are displayed.

Change Network Name

Change the Wi-Fi Direct (simple AP) network name (SSID) used for connecting to the printer to your arbitrary name. You can set the network name (SSID) in ASCII characters that is displayed on the software keyboard on the control panel. You can enter up to 22 characters.

When changing the network name (SSID), all connected devices are disconnected. Use the new network name (SSID) if you want to re-connect the device.

Change Password

Change the Wi-Fi Direct (simple AP) password for connecting to the printer to your arbitrary value. You can set the password in ASCII characters that is displayed on the software keyboard on the control panel. You can enter 8 to 22 characters.

When changing the password, all connected devices are disconnected. Use the new password if you want to re-connect the device.

Change Frequency Range

Change the frequency range of Wi-Fi Direct used for connecting to the printer. You can select 2.4 GHz or 5 GHz.

When changing the frequency range, all connected devices are disconnected. Re-connect the device.

Note that you cannot re-connect from devices that do not support 5 GHz frequency range when changing to 5 GHz.

Disable Wi-Fi Direct

Disable Wi-Fi Direct (simple AP) settings of the printer. When disabling it, all devices connected to the printer in Wi-Fi Direct (Simple AP) connection are disconnected.

Restore Default Settings

Restore all Wi-Fi Direct (simple AP) settings to their defaults.

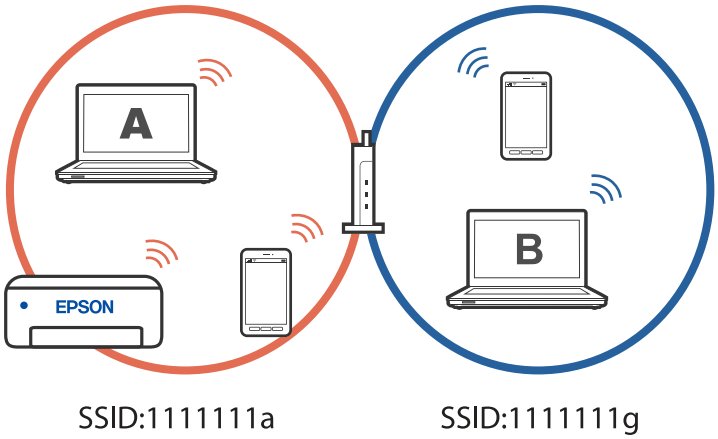

The Wi-Fi Direct (simple AP) connection information of the mobile devices saved to the printer is deleted.

Adding or Changing the Printer's Connection

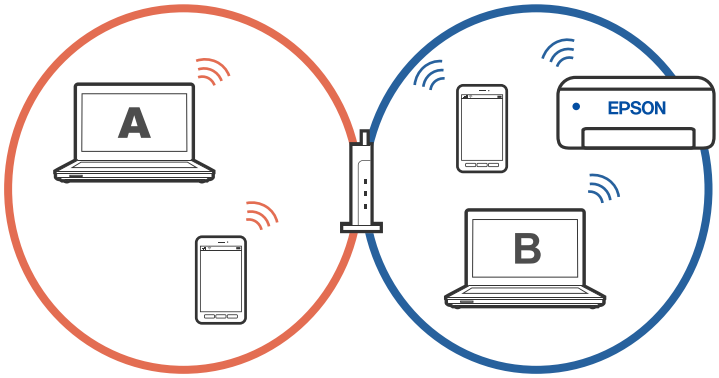

To Set Up a Printer on Multiple Computers

Although several computers can be connected to the same wireless router, each computer may be assigned a different SSID.

If the SSIDs assigned by the wireless router are not handled as the same network, then each computer is effectively connected to a different network. When you start setting up the printer from computer A, the printer is added to the same network as computer A allowing computer A to print from it.

Furthermore, if you start setting up the printer from computer B in the configuration shown above, the printer is set up on computer B's network allowing computer B to print but not computer A.

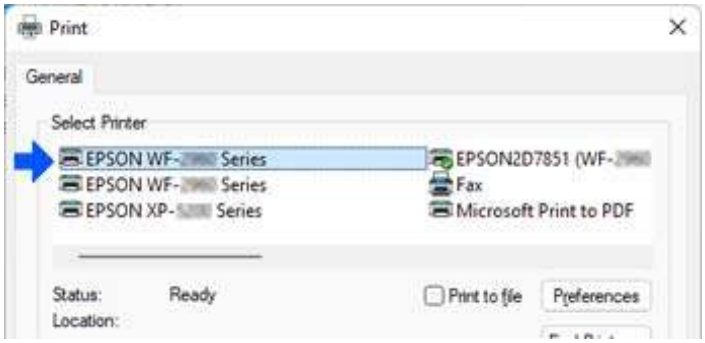

To prevent this from happening, when you want to connect the printer to a second computer, make sure the second computer is on the same network as the printer before you begin setup.

Changing the Connection from Wi-Fi to USB

Follow the steps below if the Wi-Fi you are using is unstable, or if you want to change to a more stable USB connection.

1. Connect the printer to a computer using a USB cable.
2. When you print, select the printer whose name does not end with "(Network)" or the printer name in parentheses.

   Example of Windows 11

   Example of Windows 10

Changing the Connection from Wi-Fi to Wired LAN

If the Wi-Fi you are using is unstable, or if you want to change to a more stable wired LAN connection, follow these instructions.

1. Select **Settings** on the home screen.
2. Select **General Settings** > **Network Settings** > **Connection Settings** > **Ethernet**.
3. Follow the guide to connect the LAN cable.

Setting a Static IP Address for the Printer

This section describes how to make settings from the printer's control panel.

1. Select **Settings** on the printer's home screen.
2. Select **General Settings** > **Network Settings** > **Advanced** > **TCP/IP**.
3. Select **Obtain IP Address**, and then select **Manual**.
4. Enter the IP address.

   Focus moves to the forward segment or the back segment separated by a period if you select ◀ and ▶.

   Confirm the value reflected on the previous screen.
5. Set up the **Subnet Mask** and **Default Gateway**.

   Confirm the value reflected on the previous screen.

   > ***Important:***
   > *If the combination of the IP Address, Subnet Mask and Default Gateway is incorrect, you cannot proceed with the settings. Confirm that there is no error in the entry.*
6. Enter the IP address for the primary DNS server.

   Confirm the value reflected on the previous screen.

   Note:
   *When you select **Auto** for the IP address assignment settings, you can select the DNS server settings from **Manual** or **Auto**. If you cannot obtain the DNS server address automatically, select **Manual** and enter the DNS server address. Then, enter the secondary DNS server address directly. If you select **Auto**, go to step 8.*
7. Enter the IP address for the secondary DNS server.

   Confirm the value reflected on the previous screen.
8. Tap **Start Setup**.

Transporting and Storing the Printer

When you need to store the printer or transport it when moving or for repairs, follow the steps below to pack the printer.

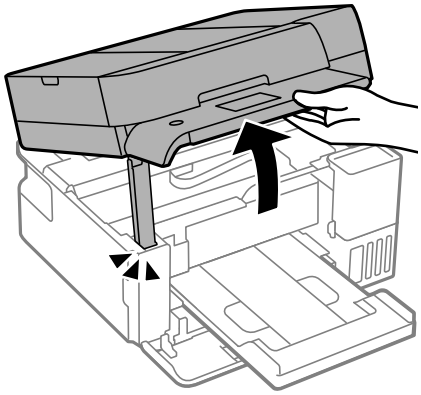

1. Turn off the printer by pressing the ⏻ button.
2. Make sure the power light turns off, and then unplug the power cord.

   > ***Important:***
   > *Unplug the power cord when the power light is off. Otherwise, the print head does not return to the home position causing the ink to dry, and printing may become impossible.*

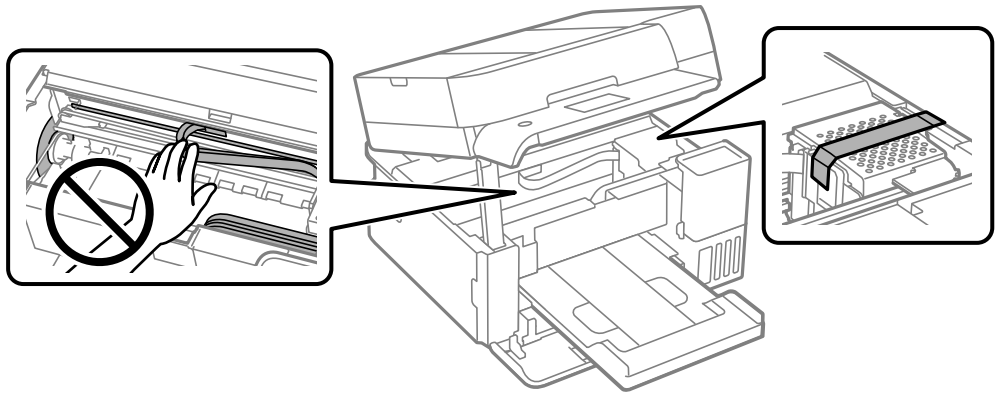

3. Disconnect all cables such as the power cord and USB cable.
4. Remove all of the paper from the printer.
5. Make sure there are no originals on the printer.
6. Close the document cover if it is open.
7. Raise the control panel.

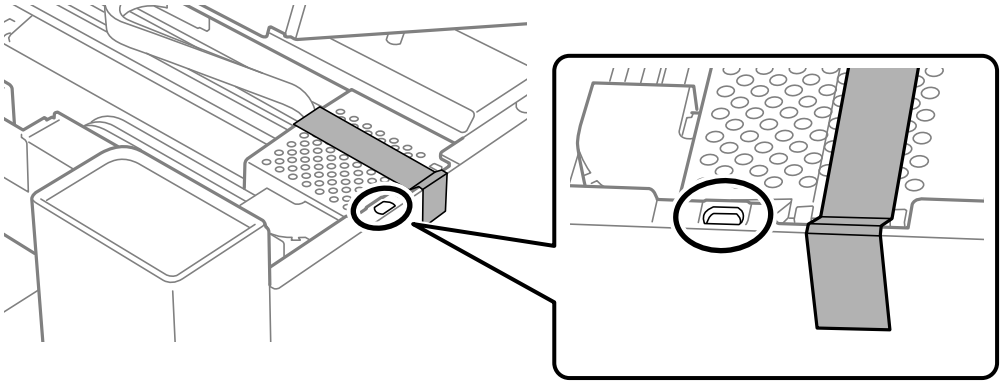

8. Open the scanner unit until it clicks.

9. Secure the print head to the case with tape.

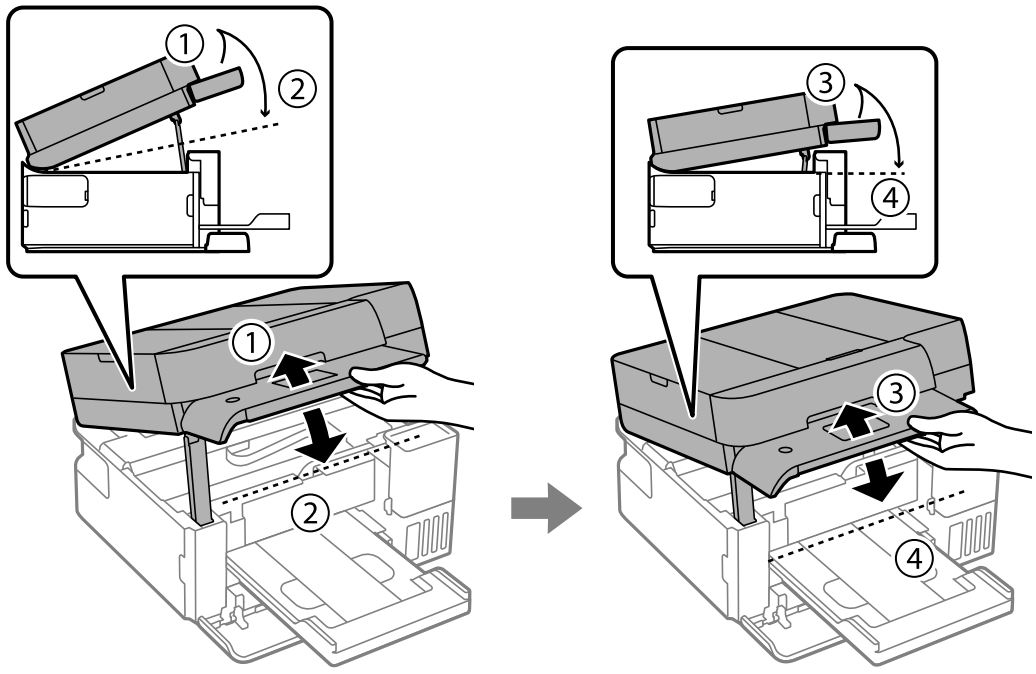

Note:
Be sure to apply the tape as shown below, without covering the holes, or you will not be able to close the scanner unit.

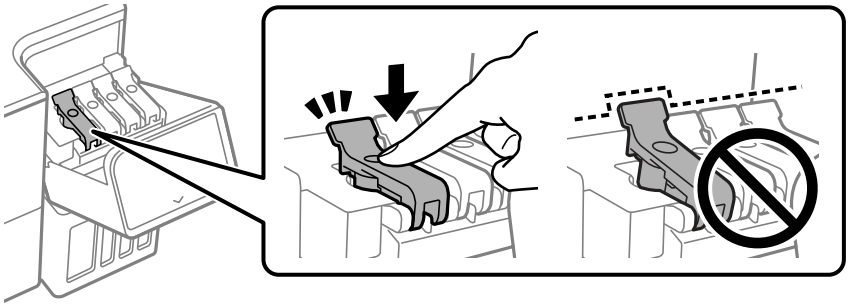

10. Close the scanner unit.

    For safety, the scanner unit is closed in two steps.

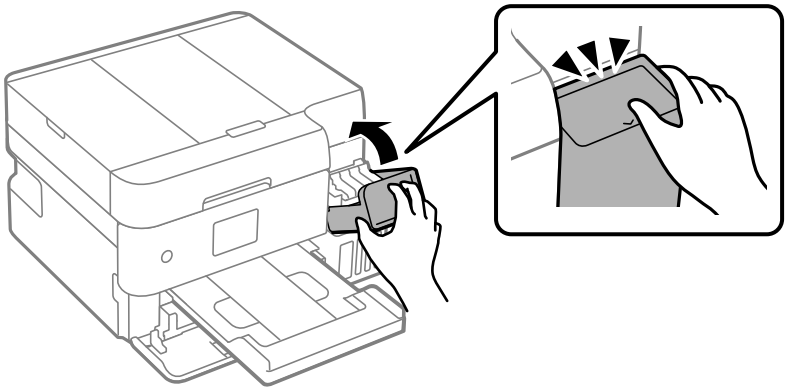

Note:
The scanner unit must be closed completely before it can be opened again.

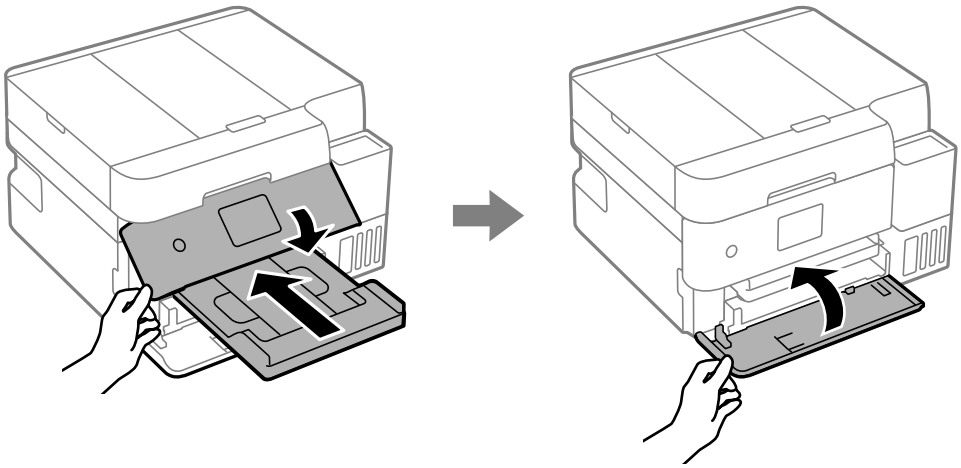

11. Make sure to install the cap onto the ink tank securely.

12. Close the ink tank cover securely.

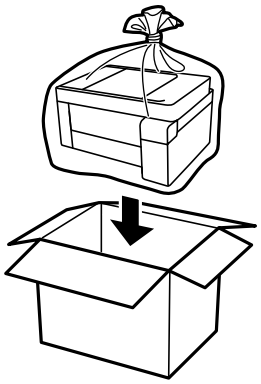

13. Prepare to pack the printer as shown below.

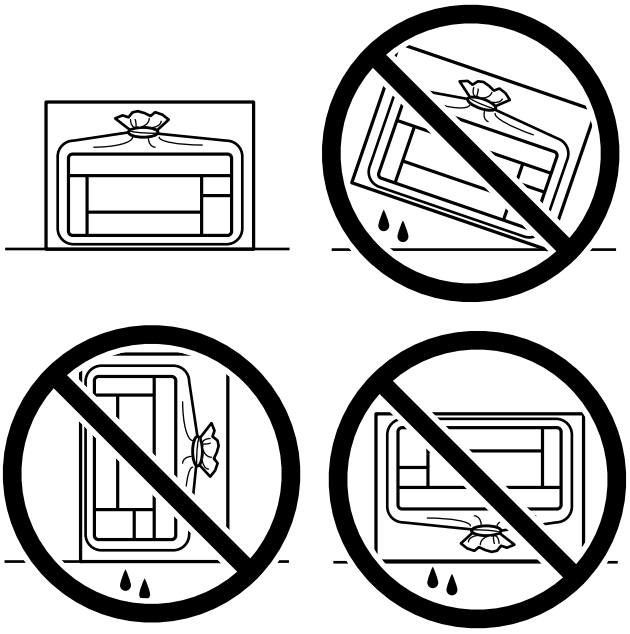

14. Place the printer in the plastic bag and fold it closed.

15. Pack the printer in its box using the protective materials.

Important:

❏ *When storing or transporting the printer, place the printer in the plastic bag and fold it closed. Avoid tilting the printer, placing it vertically, or turning it upside down; otherwise ink may leak.*

❏ *When storing or transporting an ink bottle, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take precautions to prevent ink from leaking when transporting the bottle, for example, putting the bottle in a bag.*

❏ *Do not put opened ink bottles in the box with printer.*

When you use the printer again, make sure you remove the tape securing the print head. If print quality has declined the next time you print, clean and align the print head.

Solving Problems

Cannot Print, Scan, or Fax. 158

Printing, Copying, Scanning, and Faxing Quality is Poor. 176

Cannot Select Paper Type or Paper Source in Printer Driver. 198

A Message is Displayed on the LCD Screen. 198

Paper Gets Jammed. 200

It is Time to Refill the Ink. 207

It is Time to Replace the Maintenance Box. 213

Cannot Operate the Printer as Expected. 215

Cannot Solve Problem. 220

Cannot Print, Scan, or Fax

Problem Solving

Read this section if you cannot print, scan, or fax as expected or if there are problems when printing. See the following for solutions to some common problems.

Is the printer on?

Solutions

- ❑ Make sure the printer is turned on.
- ❑ Make sure the power cord is correctly connected.

➡ "Power Does Not Turn On" on page 215
➡ "Cannot Solve Problem" on page 220

Is any paper jammed in the printer?

Solutions

If paper is jammed in the printer, it cannot start printing. Remove the jammed paper from the printer.

➡ "Paper Gets Jammed" on page 200

Is the printer itself working properly?

Solutions

- ❑ If an error message is displayed on the LCD screen, check the error.
- ❑ Print a status sheet and use it to check if the printer itself can print properly.

➡ "A Message is Displayed on the LCD Screen" on page 198
➡ "Print Status Sheet:" on page 238

Are you having connection problems?

Solutions

- ❑ Make sure the cables are properly connected for all connections.
- ❑ Make sure that any network device (router, hub) or USB hub that you use is operating normally.
- ❑ If you have a Wi-Fi connection, make sure that the Wi-Fi connection settings are correct.
- ❑ If you have a network connection, check the network that your computer and printer are connected to, and make sure that the names of the networks match.

➡ "The Printer Cannot Connect to the Network" on page 163
➡ "The Printer Cannot Connect by USB" on page 162
➡ "Checking the Printer's Network Connection Status (Network Connection Report)" on page 139

Has print data been sent correctly?

Solutions

- ❏ Make sure there is no print data standing by from a previous job.
- ❏ Check the printer driver to make sure the printer is not offline.

➡ "There is still a job waiting to be printed." on page 160
➡ "The printer is paused or offline." on page 160

The Application or Printer Driver do not Work Properly

Cannot Print Even Though a Connection has been Established (Windows)

One of the following situations may be the cause.

A genuine Epson printer driver has not been installed.

Solutions

If a genuine Epson printer driver (EPSON XXXXX) has not been installed, the available functions are limited. We recommend using a genuine Epson printer driver.

➡ "Checking if a genuine Epson printer driver is installed - Windows" on page 133
➡ "Checking if a genuine Epson printer driver is installed - Mac OS" on page 135

There is a problem with the software or data.

Solutions

- ❏ Make sure that a genuine Epson printer driver (EPSON XXXXX) is installed. If a genuine Epson printer driver is not installed, the available functions are limited. We recommend using a genuine Epson printer driver.
- ❏ If you are printing a large data size image, the computer may run out of memory. Print the image at a lower resolution or a smaller size.
- ❏ If you have tried all of the solutions and have not solved the problem, try uninstalling and then reinstalling the printer driver.
- ❏ You may be able to clear the problem by updating the software to the latest version. To check the software status, use the software update tool.

➡ "Checking if a genuine Epson printer driver is installed - Windows" on page 133
➡ "Checking if a genuine Epson printer driver is installed - Mac OS" on page 135
➡ "Installing the Applications Separately" on page 132
➡ "Application for Updating Software and Firmware (Epson Software Updater)" on page 232

There is a problem with the printer's status.

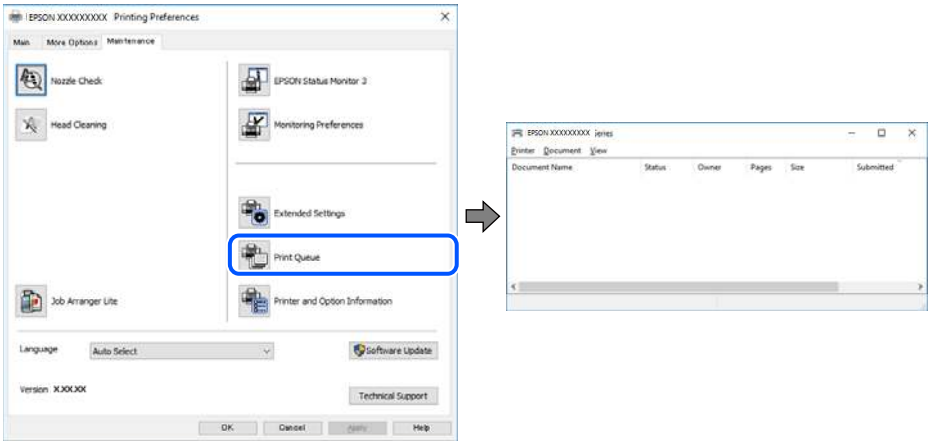

Solutions

Click **EPSON Status Monitor 3** on the printer driver's **Maintenance** tab, and then check the printer status. If **EPSON Status Monitor 3** is disabled, click **Extended Settings** on the **Maintenance** tab, and then select **Enable EPSON Status Monitor 3**.

There is still a job waiting to be printed.

Solutions

Click **Print Queue** on the printer driver's **Maintenance** tab. If unnecessary data remains, select **Cancel all documents** from the **Printer** menu.

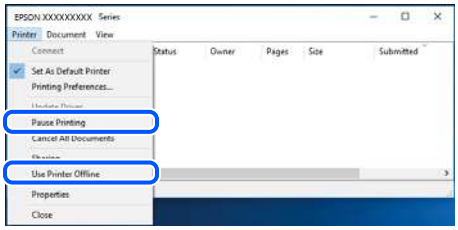

The printer is paused or offline.

Solutions

Click **Print Queue** on the printer driver's **Maintenance** tab.

If the printer is offline or paused, clear the related setting from the **Printer** menu.

The printer is not selected as the default printer.

Solutions

Right-click the printer icon in **Control Panel** > **View devices and printers** (or **Printers**, or **Printers and Faxes**) and click **Set as default printer**.

Note:
If there are multiple printer icons, select the correct one based on the connection type, as described below.

USB connection: EPSON XXXX Series

Network connection: EPSON XXXX Series (network)

If you install the printer driver multiple times, copies of the printer driver may be created. If copies such as "EPSON XXXX Series (copy 1)" are created, right-click the copied driver icon, and then click **Remove Device**.

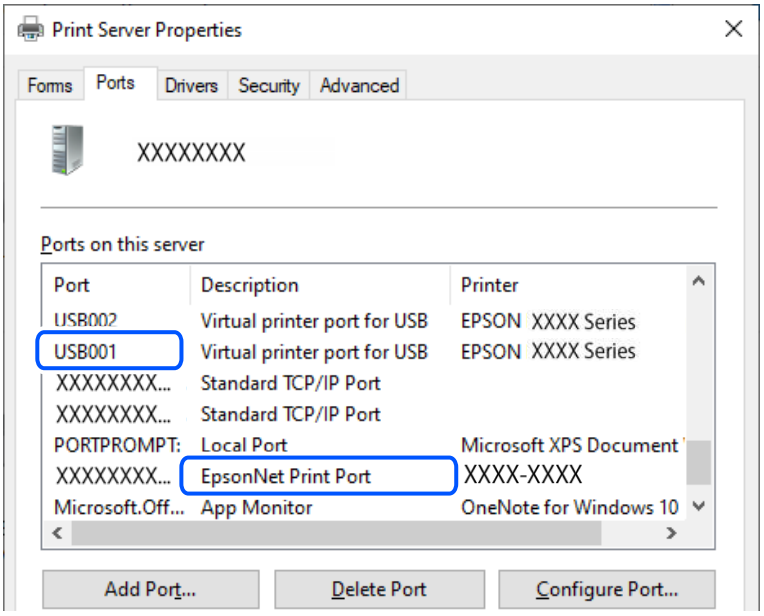

The printer port is not set correctly.

Solutions

Click **Print Queue** on the printer driver's **Maintenance** tab.

Make sure the printer port is set correctly as shown below in **Property** > **Port** from the **Printer** menu.

USB connection: **USBXXX**, Network connection: **EpsonNet Print Port**

Cannot Print Even Though a Connection has been Established (Mac OS)

One of the following situations may be the cause.

A genuine Epson printer driver has not been installed.

Solutions

If a genuine Epson printer driver (EPSON XXXXX) has not been installed, the available functions are limited. We recommend using a genuine Epson printer driver.

➡ "Checking if a genuine Epson printer driver is installed - Windows" on page 133
➡ "Checking if a genuine Epson printer driver is installed - Mac OS" on page 135

There is a problem with the software or data.

Solutions

- ❏ Make sure that a genuine Epson printer driver (EPSON XXXXX) is installed. If a genuine Epson printer driver is not installed, the available functions are limited. We recommend using a genuine Epson printer driver.
- ❏ If you are printing a large data size image, the computer may run out of memory. Print the image at a lower resolution or a smaller size.
- ❏ If you have tried all of the solutions and have not solved the problem, try uninstalling and then reinstalling the printer driver.
- ❏ You may be able to clear the problem by updating the software to the latest version. To check the software status, use the software update tool.

➡ "Checking if a genuine Epson printer driver is installed - Windows" on page 133
➡ "Checking if a genuine Epson printer driver is installed - Mac OS" on page 135
➡ "Installing the Applications Separately" on page 132

➡ "Application for Updating Software and Firmware (Epson Software Updater)" on page 232

There is a problem with the status of the printer.

Solutions

Make sure the printer status is not **Pause**.

Select **System Preferences** from the **Apple** menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then double-click the printer. If the printer is paused, click **Resume**.

Cannot Print Even Though a Connection has been Established (iOS)

One of the following situations may be the cause.

Paper Setup Auto Display is disabled.

Solutions

Enable **Paper Setup Auto Display** in the following menu.

Settings > **General Settings** > **Printer Settings** > **Paper Source Settings** > **Paper Setup Auto Display**

AirPrint is disabled.

Solutions

Enable the AirPrint setting in Web Config.

➡ "Application for Configuring Printer Operations (Web Config)" on page 231

Cannot Scan Even Though a Connection has been Correctly Established

Scanning at a high resolution over a network.

Solutions

Try scanning at a lower resolution.

The Printer Cannot Connect by USB

One of the following situations may be the cause.

The USB cable is not plugged into the USB inlet correctly.

Solutions

Connect the USB cable securely to the printer and the computer.

There is a problem with the USB hub.

Solutions

If you are using a USB hub, try to connect the printer directly to the computer.

There is a problem with the USB cable or the USB inlet.

Solutions

Connect the USB cable to a different port, or change the USB cable.

The printer is connected to a SuperSpeed USB port.

Solutions

If you connect the printer to a SuperSpeed USB port using a USB 2.0 cable, a communication error may occur on some computers. In this case, reconnect the printer using one ofthe following methods.

- ❏ Use a USB 3.0 cable(Supported models only).
- ❏ Connect to a Hi-Speed USB port on the computer.
- ❏ Connect to a SuperSpeed USB port other than the port that generated the communication error.

➡ "Interface Specifications" on page 253

The Printer Cannot Connect to the Network

Main causes and solutions for network connection problems

Check the following to see if there is a problem with the operation or settings for the connected device.

Check the cause of the printer network connection failure.

Solutions

Print out the network connection check report to see the issue and check the recommended solutions.

See the following related information for details on reading the network connection check report.

Note:
If you want to check more information on the network settings, print a network status sheet.

➡ "Checking the Printer's Network Connection Status (Network Connection Report)" on page 139
➡ "Messages and Solutions on the Network Connection Report" on page 140

Use the Epson Printer Connection Checker to improve the connection to the computer. (Windows)

Solutions

You may be able to solve the problem depending on the results of the check.

1. Double-click the **Epson Printer Connection Checker** icon on the desktop.

   Epson Printer Connection Checker starts.

   If there is no icon on the desktop, follow the methods below to start Epson Printer Connection Checker.

   - ❏ Windows 11

     Click the start button, and then select **All apps** > **Epson Software** > **Epson Printer Connection Checker**.

❏ Windows 10

Click the start button, and then select **Epson Software** > **Epson Printer Connection Checker**.

❏ Windows 8.1/Windows 8

Enter the application name in the search charm, and then select the displayed icon.

❏ Windows 7

Click the start button, and then select **All Programs** > **Epson Software** > **Epson Printer Connection Checker**.

2. Follow the on-screen instructions.

Note:
If the printer name is not displayed, install a genuine Epson printer driver.

"Checking if a genuine Epson printer driver is installed - Windows" on page 133

When you have identified the problem, follow the solution displayed on the screen.

If you cannot solve the problem, see the information at the links below based on your situation.

❏ The printer is not recognized over a network connection

"Checking the Printer's Network Connection Status (Network Connection Report)" on page 139

❏ The printer is recognized, but printing cannot be performed.

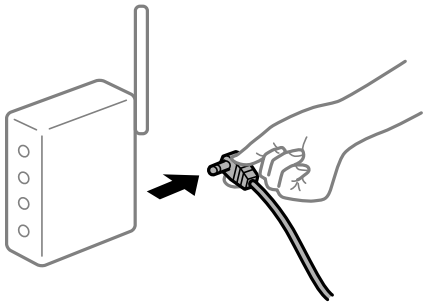

"Cannot Print Even Though a Connection has been Established (Windows)" on page 159

Something is wrong with the network devices for Wi-Fi connection.

Solutions

Try the following if you can reset the wireless LAN router in your environment.

Turn off the devices you want to connect to the network. Wait for about 10 seconds, and then turn on the devices in the following order; wireless router, computer or mobile devices, and then printer. Move the printer and computer or mobile devices closer to the wireless router to help with radio wave communication, and then try to configure network settings again.

Devices cannot receive signals from the wireless router because they are too far apart.

Solutions

After moving the computer or the mobile devices and the printer closer to the wireless router, turn off the wireless router, and then turn it back on.

When changing the wireless router, the settings do not match the new router.

Solutions

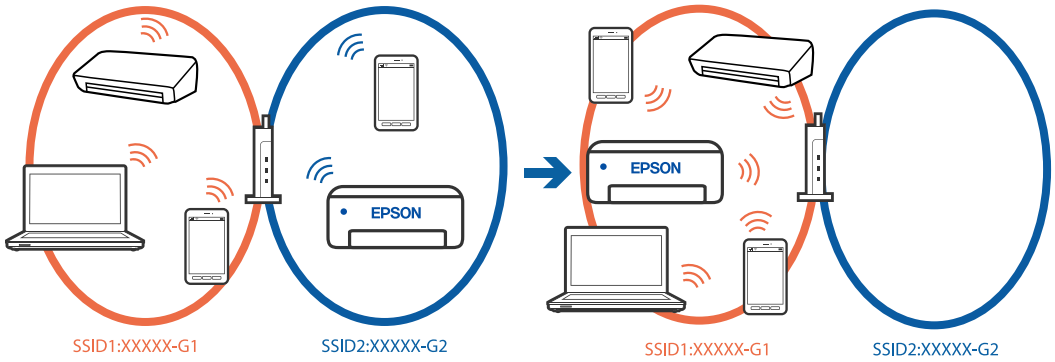

Reconfigure the settings so that they match the new wireless router.

➡ "Re-Setting the Network Connection" on page 135

The SSIDs connected from the computer or mobile devices and computer are different.

Solutions

When you are using multiple wireless routers at the same time or the wireless router has multiple SSIDs and devices are connected to different SSIDs, you cannot connect to the wireless router.

Connect the computer or mobile devices to the same SSID as the printer.

- ❏ Check the SSID that the printer is connected to by printing out the network connection check report.
- ❏ On all of the computers and mobile devices you want to connect to the printer, check the name of the Wi-Fi or network you are connected to.
- ❏ If the printer and your computer or mobile devices are connected to different networks, reconnect the devices to the SSID that the printer is connected to.

A privacy separator on the wireless router is enabled.

Solutions

Most wireless routers have a separator function that blocks communication between devices within the same SSID. If you cannot communicate between the printer and the computer or mobile devices even if they are connected to the same network, disable the separator function on the wireless router. See the manual provided with the wireless router for details.

The IP address is incorrectly assigned.

Solutions

If the IP address assigned to the printer is 169.254.XXX.XXX, and the subnet mask is 255.255.0.0, the IP address may not be assigned correctly.

Select **Settings** > **General Settings** > **Network Settings** > **Advanced** > **TCP/IP** on the printer's control panel, and then check the IP address and the subnet mask assigned to the printer.

Restart the wireless router or reset the network settings for the printer.

If the printer network settings are incorrect, reconfigure the printer network settings according to the network environment.

➡ "Setting a Static IP Address for the Printer" on page 151

The device connected to the USB 3.0 port causes radio frequency interference.

Solutions

When you connect a device to the USB 3.0 port on a Mac, radio frequency interference may occur. Try the following if you cannot connect to wireless LAN (Wi-Fi) or if operations become unstable.

- ❏ Place the device that is connected to the USB 3.0 port further away from the computer.
- ❏ Connect to the SSID for the 5 GHz range.

There is a problem with the network settings on the computer or mobile devices.

Solutions

Try accessing any website from your computer or mobile devices to make sure that your device's network settings are correct. If you cannot access any websites, there is a problem on the computer or mobile devices.

Check the network connection for the computer or mobile devices. See the documentation provided with the computer or mobile devices for details.

The printer has been connected by Ethernet using devices that support IEEE802.3az (Energy Efficient Ethernet).

Solutions

When you connect the printer by Ethernet using devices that support IEEE802.3az (Energy Efficient Ethernet), the following problems may occur depending on the hub or router that you are using.

- ❏ Connection becomes unstable, the printer is connected and disconnected again and again.
- ❏ Cannot connect to the printer.
- ❏ The communication speed becomes slow.

Follow the steps below to disable IEEE802.3az for the printer and then connect.

1. Remove the Ethernet cable connected to the computer and the printer.
2. When IEEE802.3az for the computer is enabled, disable it.

   See the documentation provided with the computer for details.
3. Connect the computer and the printer with an Ethernet cable directly.
4. On the printer, print a network connection report.

   "Checking the Printer's Network Connection Status (Network Connection Report)" on page 139
5. Check the printer's IP address on the network connection report.
6. On the computer, access Web Config.

   Launch a Web browser, and then enter the printer's IP address.

   "Application for Configuring Printer Operations (Web Config)" on page 231
7. Select **Log in** and enter the administrator password.
8. Select **Network** > **Wired LAN**.
9. Select **OFF** for **IEEE 802.3az**.

10. Click **Next**.
11. Click **OK**.
12. Remove the Ethernet cable connected to the computer and the printer.
13. If you disabled IEEE802.3az for the computer in step 2, enable it.
14. Connect the Ethernet cables that you removed in step 1 to the computer and the printer.

If the problem still occurs, devices other than the printer may be causing the problem.

Cannot Send or Receive Faxes

Cannot Send or Receive Faxes

One of the following situations may be the cause.

There are some problems in the telephone wall jack.

Solutions

Check that the telephone wall jack works by connecting a phone to it and testing it. If you cannot make or receive calls, contact your telecommunication company.

There are some problems in connecting to the telephone line.

Solutions

Select **Settings** > **General Settings** > **Fax Settings** > **Check Fax Connection** on the control panel to run the automatic fax connection check. Try the solutions printed on the report.

Communication error occurs.

Solutions

Select **Slow(9,600bps)** in **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** > **Fax Speed** on the control panel.

Connected to a DSL phone line without DSL filter.

Solutions

To connect to a DSL phone line, you need to use a DSL modem equipped with a built-in DSL filter, or install a separate DSL filter to the line. Contact your DSL provider.

"Connecting to DSL or ISDN" on page 77

There are some problems in the DSL filter when you connect to a DSL phone line.

Solutions

If you can not send or receive fax, connect the printer directly to a telephone wall jack to see if the printer can send a fax. If it works, the problem may be caused by the DSL filter. Contact your DSL provider.

Cannot Send Faxes

One of the following situations may be the cause.

The connection line is set to PSTN in a facility where a private branch exchange (PBX) is being used.

Solutions

Select **PBX** in **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** > **Line Type** on the control panel.

Sending faxes without entering an access code in an environment in which a PBX is installed.

Solutions

If your phone system requires an external access code to get an outside line, register the access code to the printer, and enter # (hash) at the beginning of a fax number when sending.

The recipient's fax number is wrong.

Solutions

Check that the recipient's number registered in your contacts list or that you entered directly using the keypad is correct. Or, check with the recipient that the fax number is correct.

The recipient's fax machine is not ready to receive faxes.

Solutions

Ask the recipient if the recipient's fax machine is ready to receive a fax.

The data being sent is too large.

Solutions

You can send faxes at a smaller data size using one of the following methods.

- ❏ When you send the fax in monochrome, enable **Direct Send** in **Fax** > **Fax Settings** > **Fax Send Settings**.

  "Sending Many Pages of a Monochrome Document (Direct Send)" on page 94

- ❏ Use a connected phone

  "Sending Faxes Dialing from the External Phone Device" on page 93

- ❏ Send sections of the originals as separate faxes

The header information for outgoing faxes is not registered.

Solutions

Select **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** > **Header** and set up the header information. Some fax machines automatically reject incoming faxes that do not include header information.

Your caller ID is blocked.

Solutions

Contact your telecommunications company to unblock your caller ID. Some phones or fax machines automatically reject anonymous calls.

Cannot Receive Faxes

One of the following situations may be the cause.

The Receive Mode is set to Manual while an external phone device is connected to the printer.

Solutions

If an external phone device is connected to the printer and is sharing a phone line with the printer, select **Settings** >**General Settings** > **Fax Settings** > **Basic Settings**, and then set **Receive Mode** to **Auto**.

The available memory of the inbox is not enough.

Solutions

100 received documents have been saved in the inbox in total. Delete the unnecessary documents.

The computer that will save the received faxes is not turned on.

Solutions

When you have made settings to save received faxes to a computer, turn on the computer. The received fax is deleted once it has been saved to the computer.

The sender has sent the fax without header information.

Solutions

Ask the sender if header information is setup on their fax machine. Or, disable **Fax Header Blank** in **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** > **Rejection Fax** > **Rejection Fax**. Faxes that do not include header information are blocked when this setting is enabled.

The sender's fax number has not been registered in the contacts list.

Solutions

Register the sender's fax number to contact list. Or disable **Unregistered Contacts** in **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** > **Rejection Fax** > **Rejection Fax**. Faxes sent from numbers that have not been registered to this list are blocked when this setting is enabled.

The sender's fax number has been registered to the Rejection Number List.

Solutions

Make sure that the sender's number can be deleted from the **Rejection Number List** before deleting it. Delete it from **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** > **Rejection Fax** > **Edit Blocked Number list**. Or disable the **Rejection Number List** in **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** > **Rejection Fax** > **Rejection Fax**. Faxes sent from numbers that have been registered to this list are blocked when this setting is enabled.

Subscribing to a call forwarding service.

Solutions

If you have subscribed to a call forwarding service, the printer may not be able to receive faxes. Contact the service provider.

Cannot Send Faxes to a Specific Recipient

One of the following situations may be the cause.

The recipient's machine takes a long time to answer.

Solutions

If the recipient machine does not pick up your call within 50 seconds after the printer has finished dialing, the call ends with an error. Dial using a connected telephone to check how long it takes before you hear a fax tone. If it takes more than 50 seconds, add pauses after the fax number to send the fax. The − is used to enter pauses. A hyphen is entered as the pause mark. One pause is about three seconds. Add multiple pauses as needed.

The Fax Speed setting registered in the contact list is wrong.

Solutions

Select the recipient from the contact list, select ›, and then select **Edit** > **Fax Communication Mode** > **Slow(9,600bps)**.

Cannot Send Faxes at a Specified Time

The printer's date and time is wrong.

Solutions

Select **Settings** > **General Settings** > **Basic Settings** > **Date/Time Settings**, and then set the correct date and time.

Faxes Are Sent at the Wrong Size

One of the following situations may be the cause.

The originals are not placed correctly.

Solutions

- ❏ If you are using the scanner glass, make sure the original is placed correctly against the alignment marks.
- ❏ If you are using the scanner glass and the edge of the scanned image is missing, move the original slightly away from the edge of the scanner glass.

➡ "Placing Originals" on page 30

There is dust or dirt on the originals or the scanner glass.

Solutions

Remove any dust or dirt from the originals, and clean the scanner glass.

➡ "Cleaning the Scanner Glass" on page 120

Received Faxes Are Not Printed

One of the following situations may be the cause.

An error has occurred in the printer such as a paper jam.

Solutions

Clear the printer error, and then ask the sender to resend the fax.

Printing received faxes is disabled under the current settings.

Solutions

If **Save to Computer** is set to **Yes**, change the setting to **Yes and Print**. Or, disable **Save to Inbox** and **Save to Computer** allows printing to be performed.

You can find **Save to Inbox** and **Save to Computer** in **Settings** > **General Settings** > **Fax Settings** > **Receive Settings** > **Fax Output Settings**.

Cannot Send or Receive Faxes Even Though a Connection has been Correctly Established

One of the following situations may be the cause.

The software is not installed.

Solutions

Make sure that the PC-FAX driver is installed on the computer. The PC-FAX driver is installed with FAX Utility. Follow the steps below to check if it is installed.

Make sure the printer (fax) is displayed in **Devices and Printers**, **Printer**, or **Printers and Other Hardware**. The printer (fax) is displayed as "EPSON XXXXX (FAX)". If the printer (fax) is not displayed, uninstall and then reinstall the FAX Utility. See the following to access **Devices and Printers**, **Printer**, or **Printers and Other Hardware**.

❏ Windows 11

Click on the start button, and then select **Settings** > **Bluetooth & devices** > **Printers & scanners**.

❏ Windows 10

Click on the start button, and then select **Windows System** > **Control Panel** > **View devices and printers** in **Hardware and Sound**.

❏ Windows 8.1/Windows 8

Select **Desktop** > **Settings** > **Control Panel** > **View devices and printers** in **Hardware and Sound** or **Hardware**.

❏ Windows 7

Click the start button, and select **Control Panel** > **View devices and printers** in **Hardware and Sound** or **Hardware**.

User authentication failed when a fax is sent.

Solutions

Set the user name and password in the printer driver. When the security feature that restricts users from accessing the printer's fax function is enabled, and a fax is sent from the computer, user authentication is performed with the user name and password set in the printer driver.

There are some problems with fax connection and fax settings.

Solutions

Try the resolutions for fax connection and fax settings.

Cannot Send or Receive Even Though a Connection has been Correctly Established

One of the following situations may be the cause.

The software is not installed.

Solutions

Make sure that the PC-FAX driver is installed on the computer. The PC-FAX driver is installed with FAX Utility. Follow the steps below to check if it is installed.

Select **System Preferences** (or **System Settings**) from the Apple menu > **Printers & Scanners** (or **Print & Scan** or **Print & Fax**), and then make sure the printer (fax) is displayed. The printer (fax) is displayed as "FAX XXXX (USB)" or "FAX XXXX (IP)". If the printer (fax) is not displayed, click [+] and then register the printer (fax).

PC-FAX driver is paused.

Solutions

Select **System Preferences** (or **System Settings**) from the Apple menu > **Printers & Scanners** (or **Print & Scan** or **Print & Fax**), and then double-click the printer (fax). If the printer is paused, click **Resume** (or **Resume Printer**).

User authentication failed when a fax is sent.

Solutions

Set the user name and password in the printer driver. When the security feature that restricts users from accessing the printer's fax function is enabled, and a fax is sent from the computer, user authentication is performed with the user name and password set in the printer driver.

There are some problems with fax connection and fax settings.

Solutions

Try the resolutions for fax connection and fax settings.

Paper Does Not Feed Properly

Points to Check

One of the following situations may be the cause.

The installation location is inappropriate.

Solutions

Place the printer on a flat surface and operate in the recommended environmental conditions.

➡ "Environmental Specifications" on page 258

Unsupported paper is being used.

Solutions

Use paper supported by this printer.

➡ "Available Paper and Capacities" on page 223
➡ "Unavailable Paper Types" on page 226

Paper handling is inappropriate.

Solutions

Follow paper handling precautions.

➡ "Paper Handling Precautions" on page 27

Too many sheets are loaded in the printer.

Solutions

Do not load more than the maximum number of sheets specified for the paper. For plain paper, do not load above the line indicated by the triangle symbol on the edge guide.

➡ "Available Paper and Capacities" on page 223

The paper settings on the printer are incorrect.

Solutions

Make sure the paper size and paper type settings match the actual paper size and paper type loaded in the printer.

➡ "Paper Size and Type Settings" on page 28

Paper slips when paper dust adheres to the roller.

Solutions

If the paper you have been using until now does not feed properly, paper dust may have adhered to the roller. Clean the roller.

➡ "Cleaning the Paper Path for Ink Smears" on page 119

Paper Feeds at a Slant

One of the following situations may be the cause.

The paper is curled.

Solutions

If the paper is curled or the edges of the paper are folded, it may touch the print head and be fed at an angle.

Place the paper on a flat surface to check if it is curled. If it is, flatten it.

The paper is loaded incorrectly.

Solutions

Load paper in the correct direction, and slide the edge guides against the edges of the paper.

➡ "Loading Paper" on page 29

Several Sheets of Paper are Fed at a Time

One of the following situations may be the cause.

The paper is moist or damp.

Solutions

Load new paper.

Static electricity is causing sheets of paper to stick to each other.

Solutions

Fan the paper before loading. If the paper still does not feed, load one sheet of paper at a time.

Multiple sheets of paper feed at the same time during manual 2-sided printing.

Solutions

Remove any paper that is loaded in the paper source before you reload the paper.

Paper is Ejected During Printing

Letterhead is not selected as the paper type.

Solutions

When you load letterhead paper (paper on which information such as the sender's name or corporation name are pre-printed in the header), select **Letterhead** as the paper type setting.

Original Does Not Feed in the ADF

One of the following situations may be the cause.

Unsupported originals are being used.

Solutions

Use originals supported by the ADF.

➡ "ADF Specifications" on page 251

The originals are loaded incorrectly.

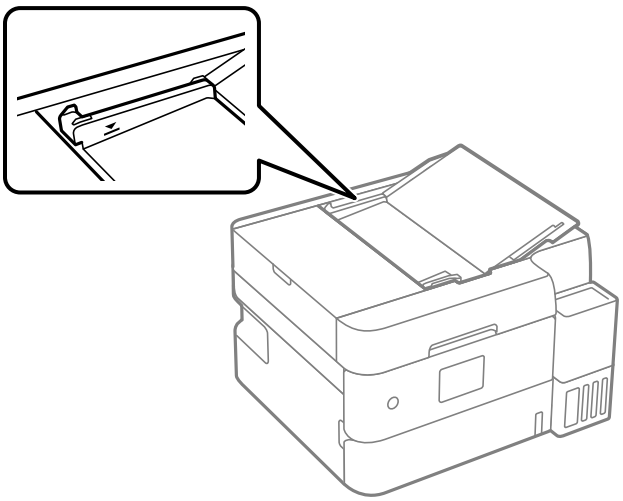

Solutions

Load originals in the correct direction, and slide the ADF edge guide against the edge of the originals.

Too many originals are loaded in the ADF.

Solutions

Do not load originals above the line indicated by the triangle symbol on the ADF.

A paper feeding problem occurred in the ADF.

Solutions

Reduce the amount of paper being loaded.

The original slips when paper dust adheres to the roller.

Solutions

Clean the inside of the ADF.

➡ "Cleaning the ADF" on page 121

Originals are not detected.

Solutions

On the screen for copy, scan, or fax, check that the ADF icon ison. If it is off, place the originals again.

Printing, Copying, Scanning, and Faxing Quality is Poor

Print Quality is Poor

Color Missing, Banding, or Unexpected Colors Appear in Printout

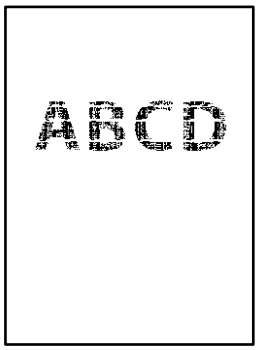

The print head nozzles may be clogged.

Solutions

- ❑ Perform a nozzle check to see if the print head nozzles are clogged. Perform a nozzle check, and then clean the print head if any of the print head nozzles are clogged. If you have not used the printer for a long time, the print head nozzles may be clogged and ink drops may not be discharged.
- ❑ If you printed when the ink levels were too low to be seen in the ink tanks windows, refill the ink tank to the upper lines and then use the **Power Ink Flushing** utility to replace the ink inside the ink tubes. After you use the utility, perform a nozzle check to see if print quality has improved.

➡ "Checking and Cleaning the Print Head" on page 115
➡ "Running Power Cleaning" on page 117
➡ "Adjusting the Print Quality" on page 114

Print Quality is Poor with Black Ink

The print head nozzles may be clogged.

Solutions

❏ Perform a nozzle check to see if the print head nozzles are clogged. Perform a nozzle check, and then clean the print head if any of the print head nozzles are clogged. If you have not used the printer for a long time, the print head nozzles may be clogged and ink drops may not be discharged.

"Checking and Cleaning the Print Head" on page 115

❏ If you cannot solve the problem using head cleaning, you can print immediately with a mixture of color inks to create composite black by changing the following settings in Windows.

Click **Extended Settings** on the printer driver's **Maintenance** tab. If you select **Use a Mixture of Color Inks to Create Black**, you can print at **Standard** print quality when the **Paper Type** is **Plain paper**, **Letterhead**, or **Envelope**.

Note that this feature cannot solve nozzle clogging. To solve nozzle clogging, contact Epson support.

Colored Banding Appears at Intervals of Approximately 3.4 cm

The following causes can be considered.

The paper type in the printer settings is incorrect.

Solutions

Make sure the paper type in the printer settings matches the actual paper type.

➡ "List of Paper Type" on page 28

The print quality setting is too low.

Solutions

When printing on plain paper,use a higher quality setting.

❏ Windows

Select **High** from **Quality** on the printer driver's **Main** tab.

❏ Mac OS

Select **Fine** as **Print Quality** from the print dialog's **Print Settings** menu.

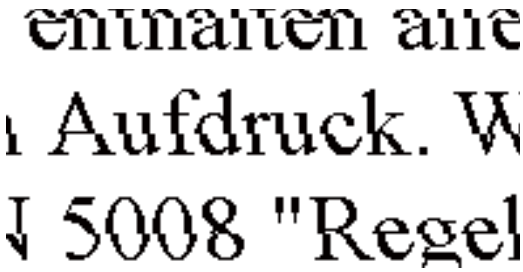

The print head position is out of alignment.

Solutions

Select the **Maintenance** > **Print Head Alignment** > **Horizontal Alignment** menu on the control panel to align the print head.

Blurry Prints, Vertical Banding, or Misalignment

One of the following situations may be the cause. Try the solutions in the order shown.

The print head position is out of alignment.

Solutions

Select the **Maintenance** > **Print Head Alignment** > **Vertical Alignment** menu on the control panel to align the print head.

The bidirectional printing setting is enabled.

Solutions

If print quality does not improve even after aligning the print head, disable the bidirectional setting.

During bidirectional (or high speed) printing, the print head prints while moving in both directions, and vertical lines may be misaligned. Disabling this setting may slow down printing speed but improve print quality.

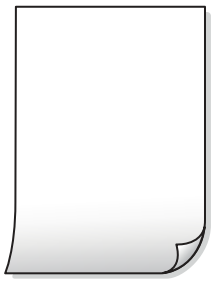

❏ Windows

Clear **Bidirectional Printing** on the printer driver's **More Options** tab.

❏ Mac OS

Select **System Preferences** (or **System Settings**) from the Apple menu > **Printers & Scanners** (or **Print & Scan** or **Print & Fax**), and then select the printer. Click **Options & Supplies** > **Options** (or **Driver**). Select **Off** as the **Bidirectional Printing** setting.

Printout Comes Out as a Blank Sheet

The print head nozzles may be clogged.

Solutions

Perform the nozzle check, and then try Cleaning or Power Cleaning if the print head nozzles are clogged.

➡ "Checking and Cleaning the Print Head" on page 115

➡ "Running Power Cleaning" on page 117
➡ "Adjusting the Print Quality" on page 114

The print settings and the paper size loaded in the printer are different.

Solutions

Change the print settings according to the paper size loaded in the printer. Load paper in the printer that matches the print settings.

Multiple sheets of paper are fed into the printer at the same time.

Solutions

See the following to prevent multiple sheets of paper being fed into the printer at the same time.

➡ "Several Sheets of Paper are Fed at a Time" on page 174

Printed at an Angle

The paper is curled.

Solutions

If the paper is curled or the edges of the paper are folded, it may touch the print head and be fed at an angle.

Place the paper on a flat surface to check if it is curled. If it is, flatten it.

The paper is loaded incorrectly.

Solutions

Load paper in the correct direction, and slide the edge guides against the edges of the paper.

➡ "Loading Paper" on page 29

Paper Is Smeared or Scuffed

One of the following situations may be the cause.

The paper is loaded incorrectly.

Solutions

When horizontal banding (perpendicular to the printing direction) appears, or the top or bottom of the paper is smeared, load paper in the correct direction and slide the edge guides to the edges of the paper.

➡ "Loading Paper" on page 29

The paper path is smeared.

Solutions

When vertical banding (parallel to the printing direction) appears, or the paper is smeared, clean the paper path.

➡ "Cleaning the Paper Path for Ink Smears" on page 119

The paper is curled.

Solutions

Place the paper on a flat surface to check if it is curled. If it is, flatten it.

The print head is rubbing the surface of the paper.

Solutions

When printing on thick paper, the print head is close to the printing surface and the paper may be scuffed. In this case, enable the reduce scuff setting. If you enable this setting, print quality may decline or printing may slow down.

Windows

Click **Extended Settings** on the printer driver's **Maintenance** tab, and then select **Short Grain Paper**.

The back of the paper was printed before the side that had already been printed was dry.

Solutions

When performing manual 2-sided printing, make sure that the ink is completely dry before reloading the paper.

When printing using automatic 2-sided printing, the print density is too high and the drying time is too short.

Solutions

When using the automatic 2-sided printing feature and printing high density data such as images and graphs, set the print density to lower and the drying time to longer.

Printed Photos are Sticky

The wrong side of the photo paper was used.

Solutions

Make sure you are printing on the printable side. If you print on the wrong side of the photo paper, you need to clean the paper path.

Images or Photos Contain Unexpected Colors

One of the following situations may be the cause.

The print head nozzles may be clogged.

Solutions

Perform a nozzle check to see if the print head nozzles are clogged. Perform a nozzle check, and then clean the print head if any of the print head nozzles are clogged. If you have not used the printer for a long time, the print head nozzles may be clogged and ink drops may not be discharged.

➡ "Checking and Cleaning the Print Head" on page 115

➡ "Running Power Cleaning" on page 117

➡ "Adjusting the Print Quality" on page 114

Color correction has been applied.

Solutions

When printing from the Windows printer driver, the Epson auto photo adjustment setting is applied by default depending on the paper type. Try changing the setting.

On the **More Options** tab, select **Custom** in **Color Correction**, and then click **Advanced**. Change the **Scene Correction** setting from **Automatic** to any other option. If changing the setting does not work, use any color correction method other than **PhotoEnhance** in **Color Management**.

Colors in the Printout Differ from Those on the Display

The color properties for the display device you are using have not been adjusted correctly.

Solutions

Display devices such as computer screens have their own display properties. If the display is unbalanced, the image is not displayed with proper brightness and colors. Adjust the properties of the display device, then perform the following.

❏ Windows

Access the printer driver window, select **Custom** as the **Color Correction** setting on the **More Options** tab, and then click **Advanced**. Select **EPSON Standard** as the **Color Mode** setting.

❏ Mac OS

Access the print dialog. Select **Color Options** from the pop-up menu, and then click the arrow next to **Advanced Settings**. Select **EPSON Standard** as the **Mode** setting.

The display device is reflecting external light.

Solutions

Avoid direct sunlight and view the image in an environment where the appropriate lighting is assured.

The display device has a high resolution.

Solutions

Colors may differ from what you see on mobile devices with high-resolution displays.

The display device and the printer have a different process of producing colors.

Solutions

Colors on a display are not quite identical to those on paper because the display device and the printer have a different process of producing colors. Adjust the color properties so that the colors match more closely.

Cannot Print Without Margins

The borderless feature is not enabled in the print settings.

Solutions

Enable the borderless feature in the print settings. If you select a paper type that does not support borderless printing, you cannot select **Borderless**. Select a paper type that supports borderless printing.

❏ Windows

Select **Borderless** on the printer driver's **Main** tab.

❏ Mac OS

Select a borderless paper size from **Paper Size**.

➡ "Paper for Borderless Printing" on page 225

The Edges of the Image are Cropped During Borderless Printing

Because the image is slightly enlarged, the protruding area is cropped.

Solutions

Select a smaller enlargement setting.

❏ Control panel

Change the **Expansion** setting.

❏ Windows

Click **Settings** next to the **Borderless** checkbox on the printer driver's **Main** tab, and then change the settings.

❏ Mac OS

Change the **Expansion** setting from the print dialog's **Print Settings** menu.

Aspect ratios of the image data and paper size are different.

Solutions

If the aspect ratios of the image data and paper size are different, the long side of the image is cropped if it extends beyond the long side of the paper.

The Position, Size, or Margins of the Printout Are Incorrect

One of the following situations may be the cause.

The paper is loaded incorrectly.

Solutions

Load paper in the correct direction, and slide the edge guides against the edges of the paper.

➡ "Loading Paper" on page 29

The paper size in the printer settings is incorrect.

Solutions

Make sure the paper size in the printer settings matches the actual paper size.

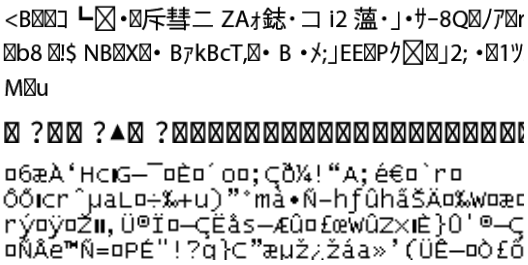

The margin setting inthe application software is not within the printable area.

Solutions

Adjust the margin setting in the application so that it falls within the printable area.

➡ "Printable Area" on page 250

Printed Characters Are Incorrect or Garbled

One of the following situations may be the cause.

The USB cable is not connected correctly.

Solutions

Connect the USB cable securely to the printer and the computer.

There is a job waiting to be printed.

Solutions

Cancel any paused print jobs.

➡ "There is still a job waiting to be printed." on page 160

The computer has been manually put into the Hibernate or Sleep mode while printing.

Solutions

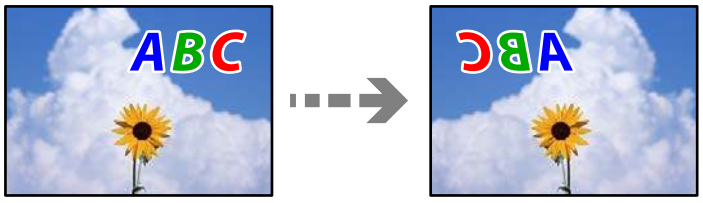

Do not put the computer manually into the **Hibernate** mode or **Sleep** mode while printing. Pages of garbled text may be printed the next time you start the computer.

You are using the wrong printer driver.

Solutions

Make sure that the printer driver you are using is for this printer. Check the printer name on the top of the printer driver window.

The Printed Image Is Inverted

The invert option is enabled in the print settings.

Solutions

Clear any mirror image settings in the printer driver or the application.

❏ Windows

Clear **Mirror Image** on the printer driver's **More Options** tab.

❏ Mac OS

Clear **Mirror Image** from the print dialog's **Print Settings** menu.

Mosaic-Like Patterns Appear in the Printout

Low resolution images or photos were printed.

Solutions

When printing images or photos, print using high-resolution data. Images on web sites are often low resolution even if they look good enough on the display, and so print quality may decline when you print them.

Copy Quality is Poor

Banding or Unexpected Colors Appear, or Colors Are Missing

The print head nozzles may be clogged.

Solutions

- ❏ Perform a nozzle check to see if the print head nozzles are clogged. Perform a nozzle check, and then clean the print head if any of the print head nozzles are clogged. If you have not used the printer for a long time, the print head nozzles may be clogged and ink drops may not be discharged.
- ❏ If you printed when the ink levels were too low to be seen in the ink tanks windows, refill the ink tank to the upper lines and then use the **Power Ink Flushing** utility to replace the ink inside the ink tubes. After you use the utility, perform a nozzle check to see if print quality has improved.

➡ "Checking and Cleaning the Print Head" on page 115
➡ "Running Power Cleaning" on page 117
➡ "Adjusting the Print Quality" on page 114

Colored Banding Appears at Intervals of Approximately 3.4 cm

The following causes can be considered.

The paper type in the printer settings is incorrect.

Solutions

Make sure the paper type in the printer settings matches the actual paper type.

➡ "List of Paper Type" on page 28

The print quality setting is too low.

Solutions

When copying on plain paper, use a higher quality setting.

Select **High** as the **Quality** setting.

➡ "Quality:" on page 61

The print head position is out of alignment.

Solutions

Select the **Maintenance** > **Print Head Alignment** > **Horizontal Alignment** menu on the control panel to align the print head.

Blurry Copies, Vertical Banding, or Misalignment

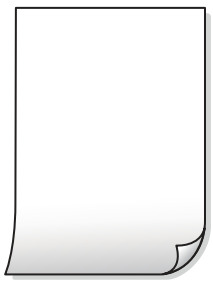

One of the following situations may be the cause.

The print head position is out of alignment.

Solutions

Select the **Maintenance** > **Print Head Alignment** > **Horizontal Alignment** menu on the control panel to align the print head.

Printout Comes Out as a Blank Sheet

The print head nozzles may be clogged.

Solutions

Perform the nozzle check, and then try Cleaning or Power Cleaning if the print head nozzles are clogged.

➡ "Checking and Cleaning the Print Head" on page 115

➡ "Running Power Cleaning" on page 117

➡ "Adjusting the Print Quality" on page 114

The print settings and the paper size loaded in the printer are different.

Solutions

Change the print settings according to the paper size loaded in the printer. Load paper in the printer that matches the print settings.

Multiple sheets of paper are fed into the printer at the same time.

Solutions

See the following to prevent multiple sheets of paper being fed into the printer at the same time.

➡ "Several Sheets of Paper are Fed at a Time" on page 174

Paper Is Smeared or Scuffed

One of the following situations may be the cause.

The paper is loaded incorrectly.

Solutions

When horizontal banding (perpendicular to the printing direction) appears, or the top or bottom of the paper is smeared, load paper in the correct direction and slide the edge guides to the edges of the paper.

➡ "Loading Paper" on page 29

The paper path is smeared.

Solutions

When vertical banding (parallel to the printing direction) appears, or the paper is smeared, clean the paper path.

➡ "Cleaning the Paper Path for Ink Smears" on page 119

The paper is curled.

Solutions

Place the paper on a flat surface to check if it is curled. If it is, flatten it.

Cannot Copy Without Margins

Borderless is not set in the print settings.

Solutions

Select **Copy** > **Advanced Settings** > **Borderless Copy**, and then enable the setting . If you select a paper that does not support borderless printing, you cannot enable borderless settings. Select a paper type that supports borderless printing.

➡ "Paper for Borderless Printing" on page 225

The edges of the Image are Cropped During Borderless Copying

Because the image is slightly enlarged, the protruding area is cropped.

Solutions

Select a smaller enlargement setting.

Select **Copy** > **Advanced Settings** > **Borderless Copy** > **Expansion** on the control panel, and then change the setting.

The Position, Size, or Margins of the Copies are Incorrect

The following causes can be considered.

The paper is loaded incorrectly.

Solutions

Load paper in the correct direction, and slide the edge guides against the edges of the paper.

➡ "Loading Paper" on page 29

The originals are not placed correctly.

Solutions

- ❏ If you are using the scanner glass, make sure the original is placed correctly against the alignment marks.
- ❏ If you are using the scanner glass and the edge of the scanned image is missing, move the original slightly away from the edge of the scanner glass.

➡ "Placing Originals" on page 30

There is dust or dirt on the scanner glass.

Solutions

When placing the originals on the scanner glass, remove any dust or dirt from the originals, and clean the scanner glass. If there is dust or stains on the glass, the copy area may extend to include the dust or stains, resulting in the wrong copying position or small images.

➡ "Cleaning the Scanner Glass" on page 120

The paper size in the printer settings is incorrect.

Solutions

Make sure the paper size in the printer settings matches the actual paper size.

Uneven Colors, Smears, Dots, or Straight Lines Appear in the Copied Image

One of the following situations may be the cause.

The paper path is dirty.

Solutions

Clean the paper path.

➡ "Cleaning the Paper Path for Ink Smears" on page 119

There is dust or dirt on the originals or the scanner glass.

Solutions

Remove any dust or dirt from the originals, and clean the scanner glass.

➡ "Cleaning the Scanner Glass" on page 120

There is dust or dirt on the ADF or originals.

Solutions

Clean the ADF, and remove any dust or dirt from the originals.

➡ "Cleaning the ADF" on page 121

The original was pressed with too much force.

Solutions

If you press with too much force, blurring, smudges, and spots may occur.

Do not press with too much force on the original or the document cover.

➡ "Placing Originals" on page 30

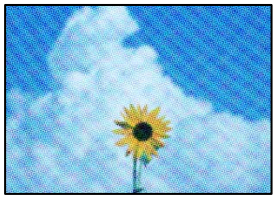

The copy density setting is too high.

Solutions

Lower the copy density setting.

➡ "Basic Menu Options for Copying" on page 59

Moiré (Cross-Hatch) Patterns Appear in the Copied Image

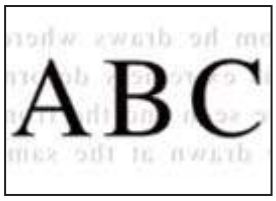

If the original is a printed document such as a magazine or a catalog, a dotted moiré pattern appears.

Solutions

Change the reduce and enlarge setting. If a moiré pattern still appears, place the original at a slightly different angle.

➡ "Basic Menu Options for Copying" on page 59

An Image of the Reverse Side of the Original Appears in the Copied Image

One of the following situations may be the cause.

When scanning thin originals, images on the back may be scanned at the same time.

Solutions

Place the original on the scanner glass and then place a piece of black paper over it.

➡ "Placing Originals" on page 31

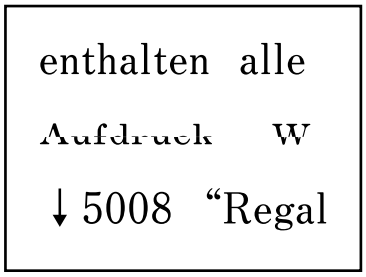

The copy density setting is too high.

Solutions

Lower the copy density setting.

➡ "Basic Menu Options for Copying" on page 59

The Text or Image Copied from the ADF is Squeezed or Stretched

Some originals may not be scanned properly from the ADF.

Solutions

Place originals on the scanner glass.

Select ⓘ, and then select **How To** > **Place Originals** > **Scanner Glass**. Select **Finish** to close the animation screen.

➡ "Placing Originals" on page 31

Scanned Image Problems

Uneven Colors, Dirt, Spots, Appear when Scanning from the Scanner Glass

There is dust or dirt on the originals or the scanner glass.

Solutions

Remove any dust or dirt from the originals, and clean the scanner glass.

➡ "Cleaning the Scanner Glass" on page 120

The original was pressed with too much force.

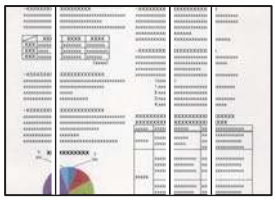

Solutions

If you press with too much force, blurring, smudges, and spots may occur.

Do not press with too much force on the original or the document cover.

➡ "Placing Originals" on page 30

Straight Lines Appear when Scanning from ADF

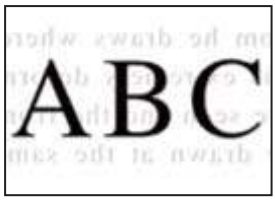

There is dust or dirt on the ADF or originals.

Solutions

Clean the ADF, and remove any dust or dirt from the originals.

➡ "Cleaning the ADF" on page 121

An Image of the Reverse Side of the Original Appears in the Scanned Image

When scanning thin originals, images on the back may be scanned at the same time.

Solutions

Place the original on the scanner glass and then place a piece of black paper over it.

➡ "Placing Originals" on page 31

Cannot Scan the Correct Area on the Scanner Glass

The originals are not placed correctly.

Solutions

- ❏ If you are using the scanner glass, make sure the original is placed correctly against the alignment marks.
- ❏ If you are using the scanner glass and the edge of the scanned image is missing, move the original slightly away from the edge of the scanner glass.

➡ "Placing Originals" on page 30

There is dust or dirt on the scanner glass.

Solutions

Remove any dust or dirt from the scanner glass and document cover. If there is any dust or dirt around the original, the scanning range expands to include it.

➡ "Cleaning the Scanner Glass" on page 120

When scanning multiple originals using Epson ScanSmart, there is not enough of a gap between the originals.

Solutions

When placing multiple originals on the scanner glass, make sure there is a gap of at least 20 mm (0.8 in.) between the originals.

Cannot Solve Problems in the Scanned Image

Check the following if you have tried all of the solutions and have not solved the problem.

There are problems with the scanning software settings.

Solutions

Use Epson Scan 2 Utility to initialize the settings for the scanner software.

Note:
Epson Scan 2 Utility is an application supplied with the scanner software.

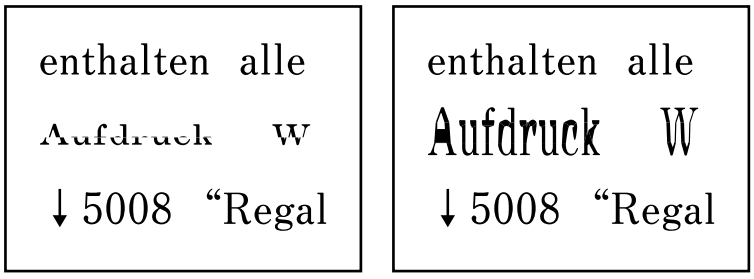

Note:
*For Windows Server operating systems, make sure the **Desktop Experience** feature is installed.*

1. Start the Epson Scan 2 Utility.
   - ❏ Windows 11
     Click the start button, and then select **All apps** > **EPSON** > **Epson Scan 2 Utility**.
   - ❏ Windows 10/Windows Server 2022/Windows Server 2019/Windows Server 2016
     Click the start button, and then select **EPSON** > **Epson Scan 2 Utility**.
   - ❏ Windows 8.1/Windows 8/Windows Server 2012 R2/Windows Server 2012
     Enter the application name in the search charm, and then select the displayed icon.
   - ❏ Windows 7/Windows Server 2008 R2/Windows Server 2008
     Click the start button, and then select **All Programs** > **EPSON** > **Epson Scan 2** > **Epson Scan 2 Utility**.
   - ❏ Mac OS
     Select **Go** > **Applications** > **Epson Software** > **Epson Scan 2 Utility**.
2. Select the **Other** tab.
3. Click **Reset**.

If initialization does not solve the problem, uninstall and reinstall the scanner software.

➡ "Installing the Applications Separately" on page 132

The Text or Image Scanned from the ADF is Squeezed or Stretched

Some originals may not be scanned properly from the ADF.

Solutions

Place originals on the scanner glass.

Select ⓘ, and then select **How To** > **Place Originals** > **Scanner Glass**. Select **Finish** to close the animation screen.

➡ "Placing Originals" on page 31

The Quality of the Sent Fax is Poor

Quality of the Sent Fax is Poor

The following causes can be considered.

There is dust or dirt on the originals or the scanner glass.

Solutions

Remove any dust or dirt from the originals, and clean the scanner glass.

➡ "Cleaning the Scanner Glass" on page 120

The original was pressed with too much force.

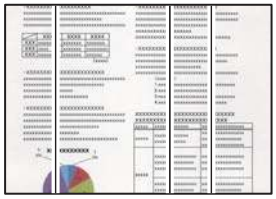

Solutions

If you press with too much force, blurring, smudges, and spots may occur.

Do not press with too much force on the original or the document cover.

➡ "Placing Originals" on page 30

Straight Lines Appear when Sending Faxes from the ADF

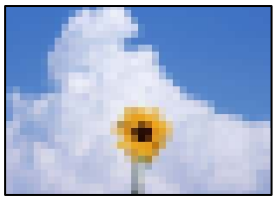

There is dust or dirt on the ADF or originals.

Solutions

Clean the ADF, and remove any dust or dirt from the originals.

➡ "Cleaning the ADF" on page 121

The Image Quality of the Sent Fax is Poor

The following causes can be considered.

The resolution is set to low.

Solutions

If you do not know the performance of the sender's fax machine, set the following before sending a fax.

- ❏ Select **Fax** > **Fax Settings** and then make the **Resolution** setting to set the highest quality image.
- ❏ Select **Fax** > **Fax Settings** and then enable **Direct Send**.

  Note that if you set **Resolution** to **Photo** but you send the fax without enabling **Direct Send**, the fax may be sent at a lower resolution.

ECM setting is disabled.

Solutions

Select **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** and enable the **ECM** setting on the control panel. This may clear errors that occur due to connection problems. Note that the speed of sending and receiving faxes may be slower than when **ECM** is disabled.

An Image of the Reverse Side of the Original Appears in the Sent Fax

The following causes can be considered.

When scanning thin originals, images on the back may be scanned at the same time.

Solutions

Place the original on the scanner glass and then place a piece of black paper over it.

➡ "Placing Originals" on page 31

The density setting is high when sending faxes.

Solutions

Select **Fax** > **Fax Settings** > **Scan Settings** > **Density**, and then lower the setting.

Received Fax Quality is Poor

The Image Quality of Received Faxes is Poor

The following causes can be considered.

ECM setting is disabled.

Solutions

Select **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** and enable the **ECM** setting on the control panel. This may clear errors that occur due to connection problems. Note that the speed of sending and receiving faxes may be slower than when **ECM** is disabled.

The image quality setting is low on the sender's fax machine.

Solutions

Ask the sender to send faxes at a higher quality.

Cannot Select Paper Type or Paper Source in Printer Driver

A genuine Epson printer driver has not been installed.

Solutions

If a genuine Epson printer driver (EPSON XXXXX) has not been installed, the available functions are limited. We recommend using a genuine Epson printer driver.

➡ "Checking if a genuine Epson printer driver is installed - Windows" on page 133

➡ "Checking if a genuine Epson printer driver is installed - Mac OS" on page 135

A Message is Displayed on the LCD Screen

If an error message is displayed on the LCD screen, follow the on-screen instructions or the solutions below to solve the problem.

Error Messages	Solutions
Printer Error Turn on the printer again. See your documentation for more details.	Open the inner cover and the scanner unit, and then remove any paper or protective material inside the printer. Turn the power off and on again.
Paper out in XX.	Load paper, and then insert the paper cassette all the way.

Error Messages	Solutions
The printer's borderless printing ink pad is nearing the end of its service life. It is not a user-replaceable part. Please contact Epson support.	Contact Epson or an authorised Epson service provider to replace the borderless printing ink pad*. It is not a user-serviceable part. Tap **OK** to resume printing.
The printer's borderless printing ink pad has reached the end of its service life. It is not a user-replaceable part. Please contact Epson support.	Contact Epson or an authorised Epson service provider to replace the borderless printing ink pad*. It is not a user-serviceable part. However, you can perform operations that do not use ink such as scanning.
Paper Setup Auto Display is set to Off. Some features may not be available. For details, see your documentation.	If **Paper Setup Auto Display** is disabled, you cannot use AirPrint.
No dial tone is detected.	This problem might be resolved by selecting **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** > **Line Type** and then selecting **PBX**. If your phone system requires an external access code to get an outside line, set the access code after selecting **PBX**. Use # (hash) instead of the actual access code when entering an outside fax number. This makes connection more secure. If the error message is still displayed, set the **Dial Tone Detection** settings to disabled. However, disabling this feature may drop the first digit of a fax number and send the fax to the wrong number.
The combination of the IP address and the subnet mask is invalid. See your documentation for more details.	Enter the correct IP address or default gateway. Contact the person who setup the network for assistance.
To use cloud services, update the root certificate from the Epson Web Config utility.	Run Web Config, and then update the root certificate.
Check that the printer driver is installed on the computer and that the port settings for the printer are correct. Check that the printer driver is installed on the computer and that the USB port settings for the printer are correct.	Click **Print Queue** on the printer driver's **Maintenance** tab. Make sure the printer port is selected correctly in **Property** > **Port** from the **Printer** menu as follows. Select "**USBXXX**" for a USB connection, or "**EpsonNet Print Port**" for a network connection.
Recovery Mode Update Firmware	The printer has started in recovery mode because the firmware update failed. Follow the steps below to try to update the firmware again. Follow the steps below to try to update the firmware again. 1. Connect the computer and the printer with a USB cable. ***Important:*** ❏ *During recovery mode, you cannot update the firmware over a network connection. You can only use a USB connection.* ❏ *Use a USB 2.0 type A-B cable.* 2. Download the latest firmware from your local Epson website to your computer, and then start the update.

*In some print cycles a very small amount of surplus ink may be collected in the borderless printing ink pad. To prevent ink leakage from the pad, the product is designed to stop borderless printing when the pad has reached its limit. Whether and how often this is required will vary according to the number of pages you print using the borderless print option. The need for replacement of the pad does not mean that your printer has ceased to operate in accordance with its specifications. The printer will advise you when the pad requires replacing and this can

only be performed by an authorised Epson Service provider. The Epson warranty does not cover the cost of this replacement.

Paper Gets Jammed

Check the error displayed on the control panel and follow the instructions to remove the jammed paper, including any torn pieces. Next, clear the error.

Important:

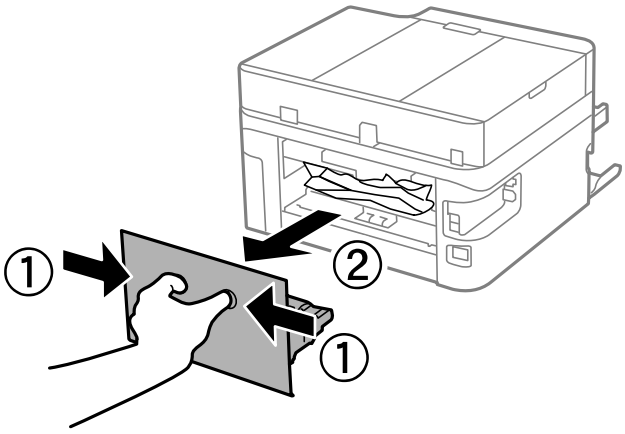

- ❏ *Remove the jammed paper carefully. Removing the paper with too much force may damage the printer.*
- ❏ *When removing jammed paper, avoid tilting the printer, placing it vertically, or turning it upside down; otherwise ink may leak.*

Removing Jammed Paper

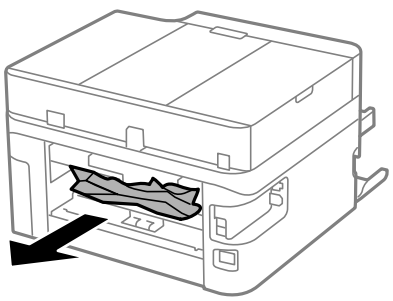

Caution:

- ❏ *Be careful not to trap your hand or fingers when opening or closing the scanner unit. Otherwise you may be injured.*
- ❏ *Never touch the buttons on the control panel while your hand is inside the printer. If the printer starts operating, it could cause an injury. Be careful not to touch the protruding parts to avoid injury.*

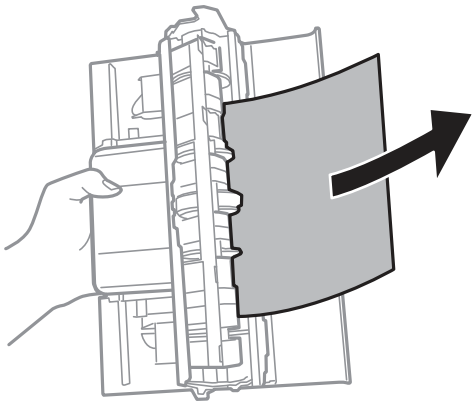

1. Remove the rear cover.

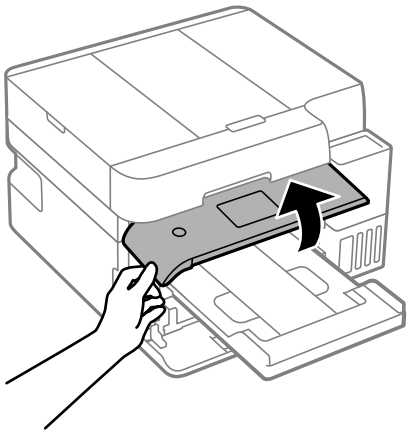

2. Remove the jammed paper.

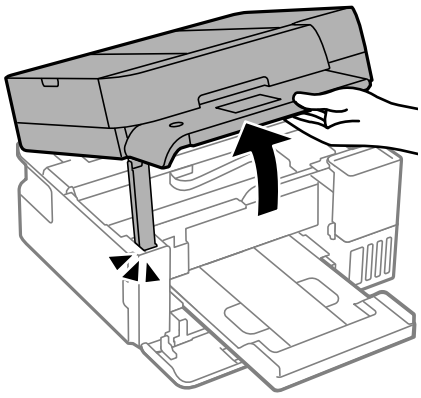

3. Remove jammed paper from the rear cover.

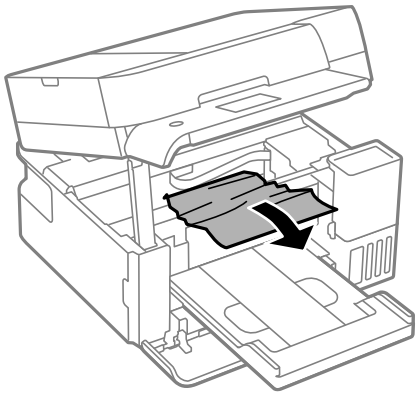

4. Insert the rear cover in the printer.
5. Close the document cover if it is open.
6. Raise the control panel.

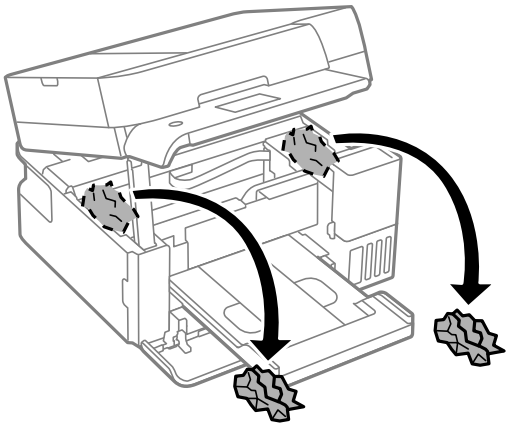

7. Open the scanner unit until it clicks.

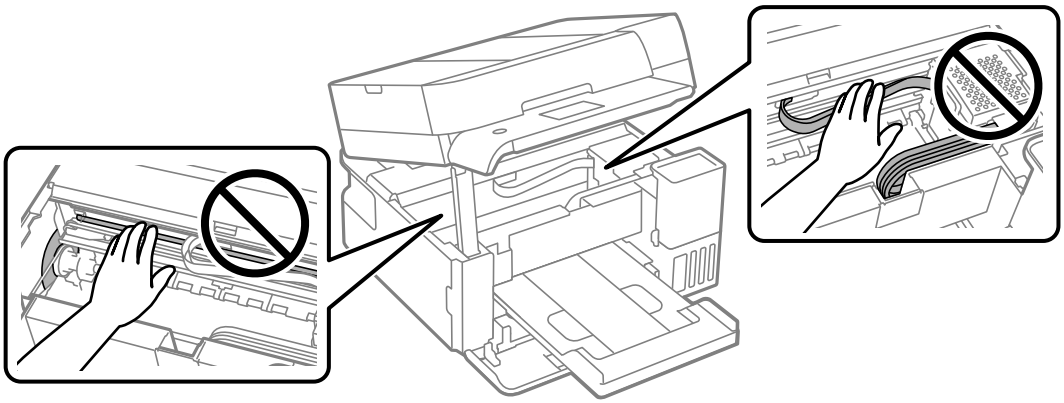

8. Remove the jammed paper.

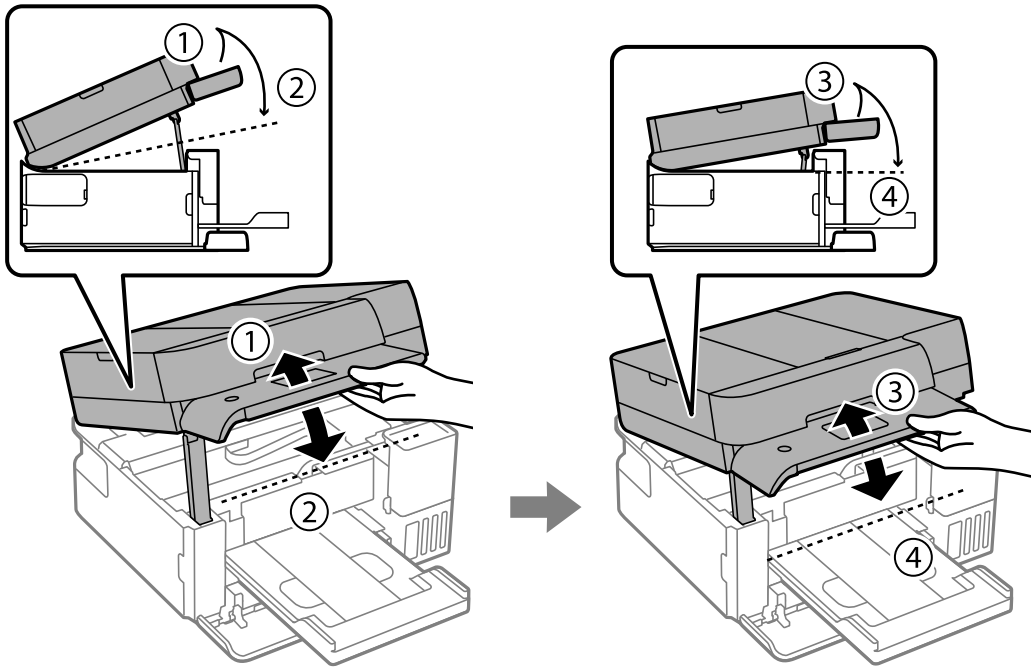

Important:

Do not touch the white flat cable, translucent film, and ink tubes inside the printer. Doing so may cause a malfunction.

9. Close the scanner unit.

   For safety, the scanner unit is closed in two steps.

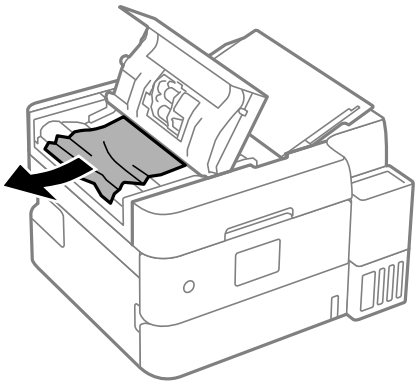

Note:
The scanner unit must be closed completely before it can be opened again.

Removing Jammed Paper from the ADF

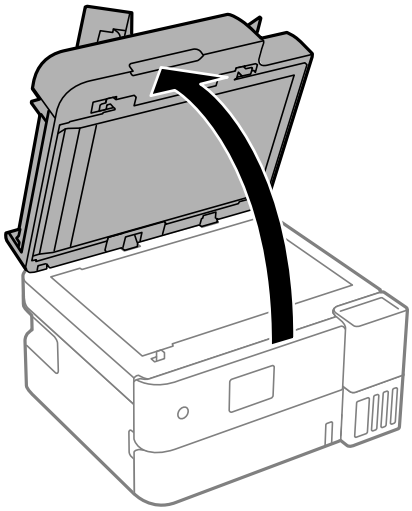

1. Open the ADF cover.

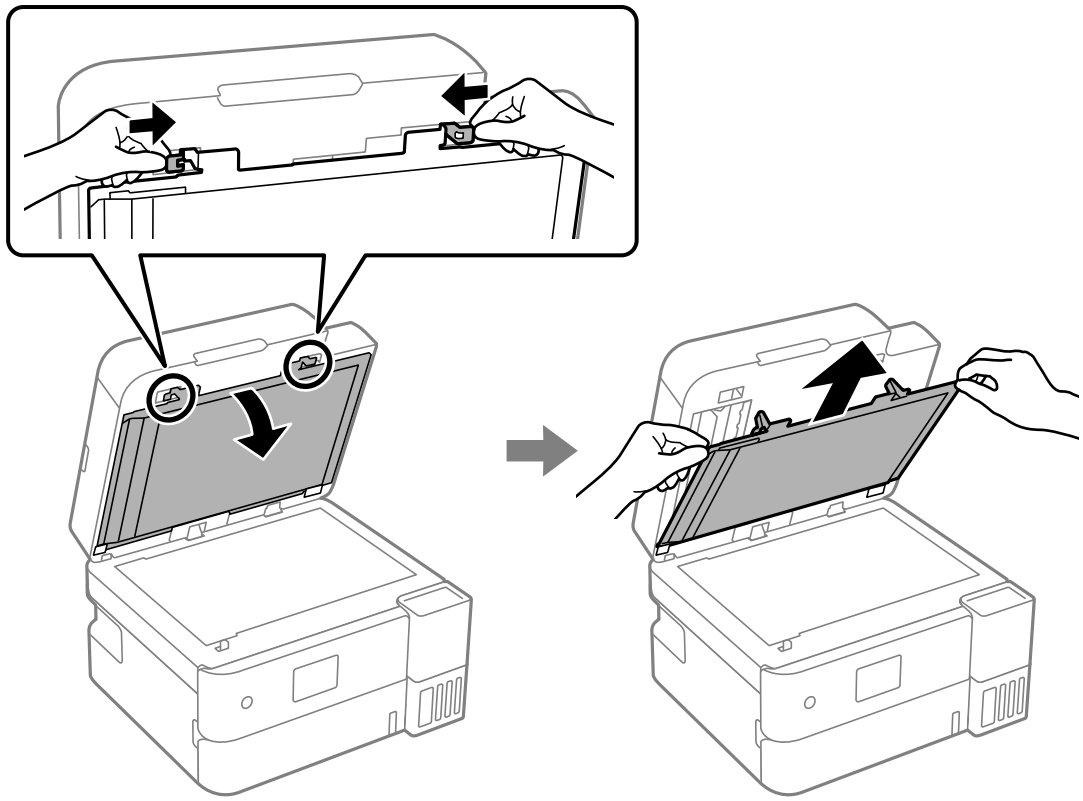

2. Remove the jammed paper.

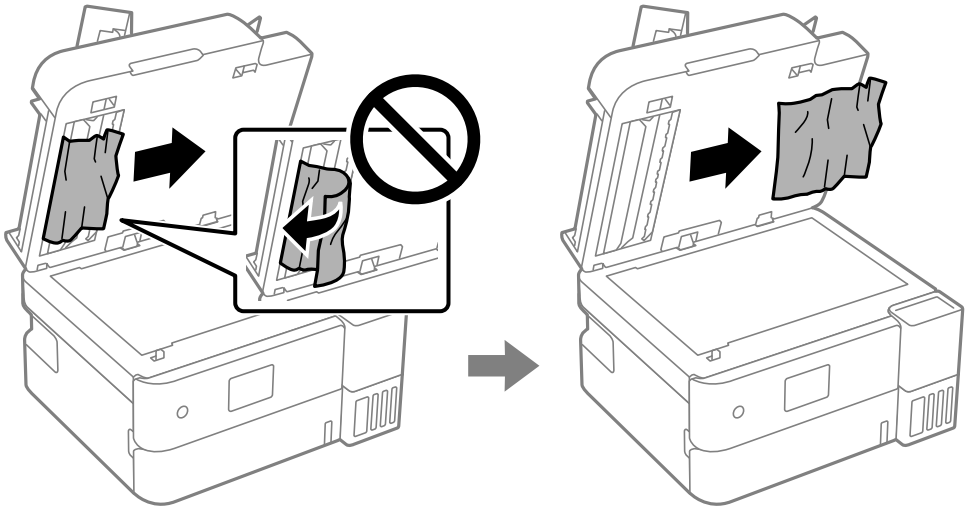

3. Open the document cover.

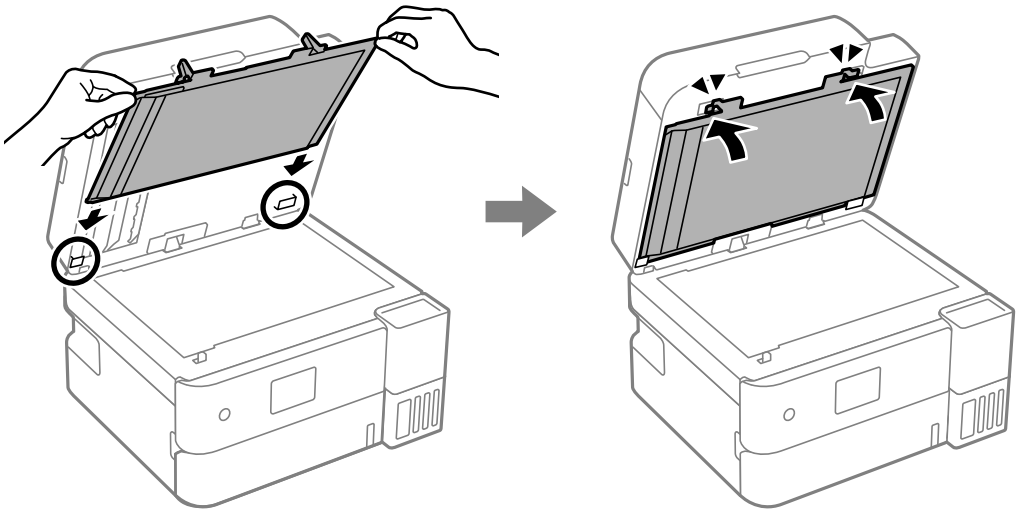

4. Release both tabs and remove the document mat.

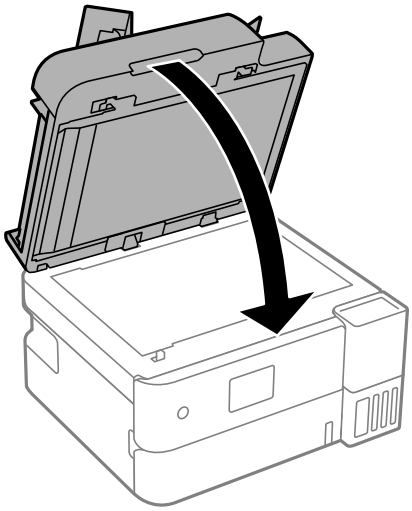

5. Remove the jammed paper.

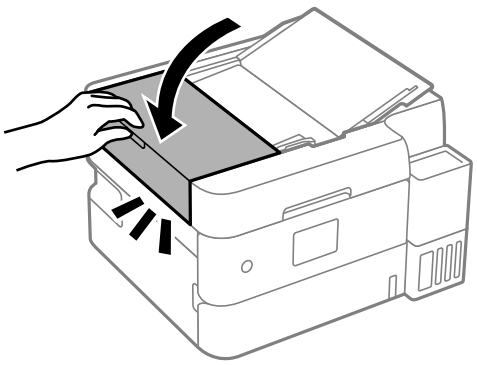

6. Reattach the document mat.

7. Close the document cover.

8. Close the ADF cover until it clicks.

Preventing Paper Jams

Check the following if paper jams occur frequently.

❏ Place the printer on a flat surface and operate in the recommended environmental conditions.

"Environmental Specifications" on page 258

❏ Use the paper supported by this printer.

"Available Paper and Capacities" on page 223

❏ Follow paper handling precautions.

"Paper Handling Precautions" on page 27

❏ Load paper in the correct direction, and slide the edge guide against the edge of the paper.

"Loading Paper" on page 29

❏ Do not load more than the maximum number of sheets specified for paper.

Remove any jammed documents.

❏ Reduce the amount of paper loaded.

❏ Load one sheet of paper at a time if you have loaded several sheets of paper.

❏ Make sure the paper size and paper type settings match the actual paper size and paper type loaded in the printer.

"List of Paper Type" on page 28

It is Time to Refill the Ink

Ink Bottle Handling Precautions

Read the following instructions before refilling ink.

Storing precautions for ink

❏ Keep the ink bottles out of direct sunlight.

❏ Do not store the ink bottles in high or freezing temperatures.

❏ Epson recommends using the ink bottle before the date printed on the package.

❏ When storing or transporting an ink bottle, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take precautions to prevent ink from leaking when transporting the bottle, for example, putting the bottle in a bag.

❏ After bringing an ink bottle inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.

❏ Do not open the ink bottle package until you are ready to fill the ink tank. The ink bottle is vacuum packed to maintain its reliability. If you leave an ink bottle unpacked for a long time before using it, normal printing may not be possible.

❏ Once you open an ink bottle, we recommend using it as soon as possible.

Handling precautions for refilling ink

- ❏ To ensure you receive premium print quality and to help protect your print head, a variable ink safety reserve remains in the ink tank when your printer indicates to refill ink. The yields quoted for you do not include this reserve.
- ❏ For optimum print results do not maintain low ink levels for extended periods of time.
- ❏ Use ink bottles with the correct part code for this printer.
- ❏ The ink for this printer must be handled carefully. Ink may splatter when the ink tanks are being filled or refilled with ink. If ink gets on your clothes or belongings, it may not come off.
- ❏ Do not shake too vigorously or squeeze the ink bottles.
- ❏ Prolonged use of the printer when the ink level is below the lower line could damage the printer. Fill the ink tank to the upper line while the printer is not operating. To display the correct ink level estimates, reset the ink level after filling the tank.
- ❏ To obtain optimum printing results, refill the ink tanks to the upper line at least once every year.

Ink consumption

- ❏ To maintain optimum print head performance, some ink is consumed from all ink tanks during maintenance operations such as print head cleaning. Ink may also be consumed when you turn the printer on.
- ❏ When printing in monochrome or grayscale, color inks instead of black ink may be used depending on the paper type or print quality settings. This is because a mixture of color inks is used to create black.
- ❏ The ink in the ink bottles supplied with your printer is partly used during initial setup. In order to produce high quality printouts, the print head in your printer will be fully charged with ink. This one-off process consumes a quantity of ink and therefore these bottles may print fewer pages compared to subsequent ink bottles.
- ❏ Quoted yields may vary depending on the images that you are printing, the paper type that you are using, the frequency of your prints and environmental conditions such as temperature.
- ❏ Visually check ink levels in the actual ink tanks. Prolonged use of the printer when the ink is expended could damage the printer. Epson recommends filling the ink tank to the upper line when the printer is not operating to reset the ink level.

Refilling the Ink Tank

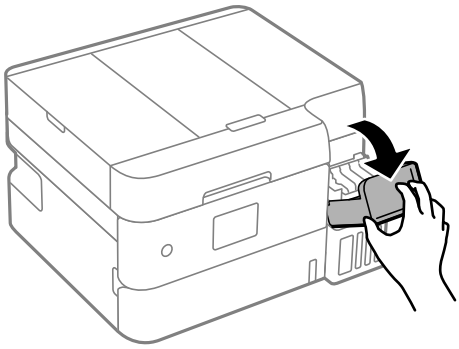

1. Select **Maintenance** on the printer's control panel.

   Read all of the usage precautions for filling ink on the screen, and then proceed to the next screen.

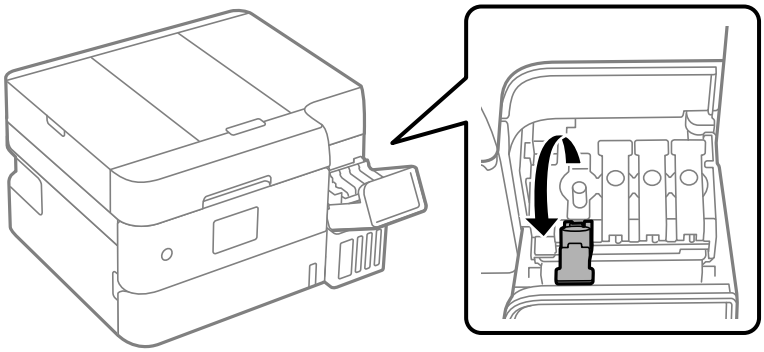

2. Select **Fill Ink**.

3. Close the document cover if it is open.

4. Open the ink tank cover.

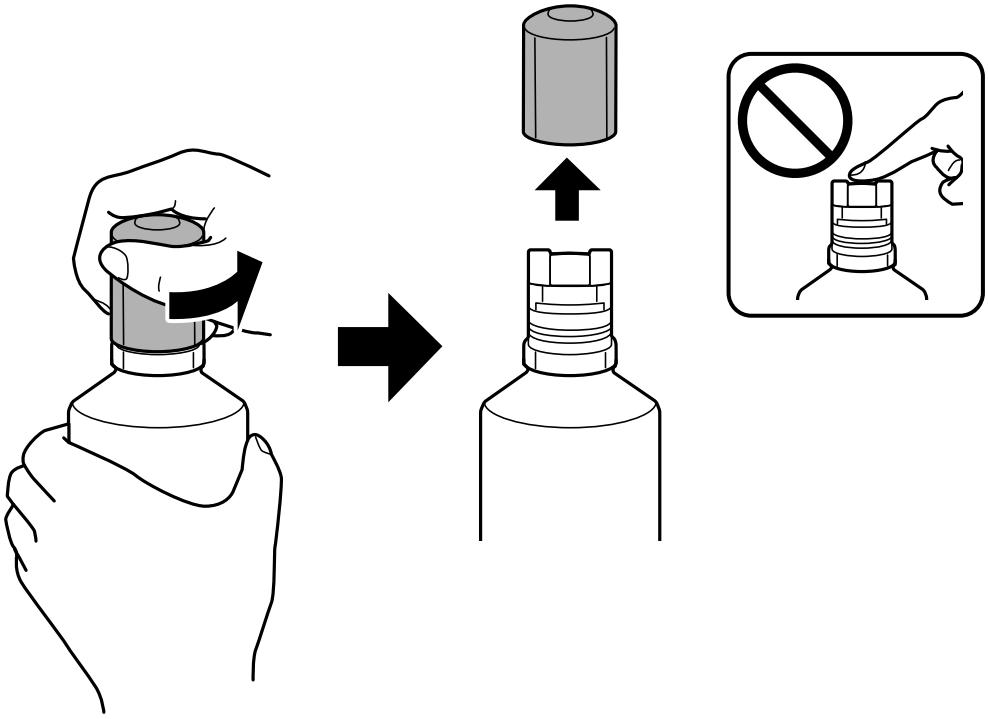

5. Open the cap of the ink tank.

> ***Important:***
> *Make sure that the color of the ink tank matches the ink color that you want to refill.*

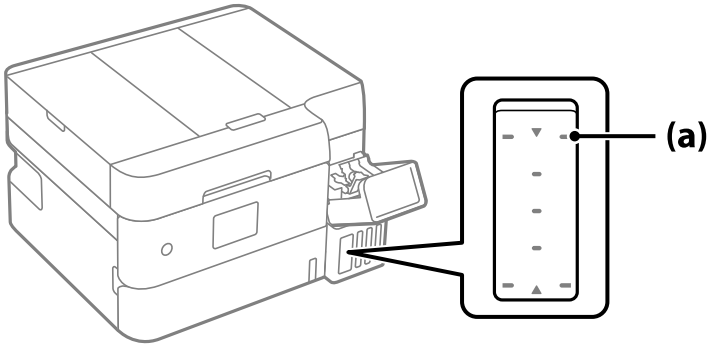

6. While holding the ink bottle upright, turn the cap slowly to remove it.

Important:

- ❏ *Epson recommends the use of genuine Epson ink bottles.*
- ❏ *Be careful not to spill any ink.*
- ❏ *Do not touch the top of the ink bottle after removing the cap; otherwise you may be smeared with ink.*

7. Check the upper line (a) in the ink tank.

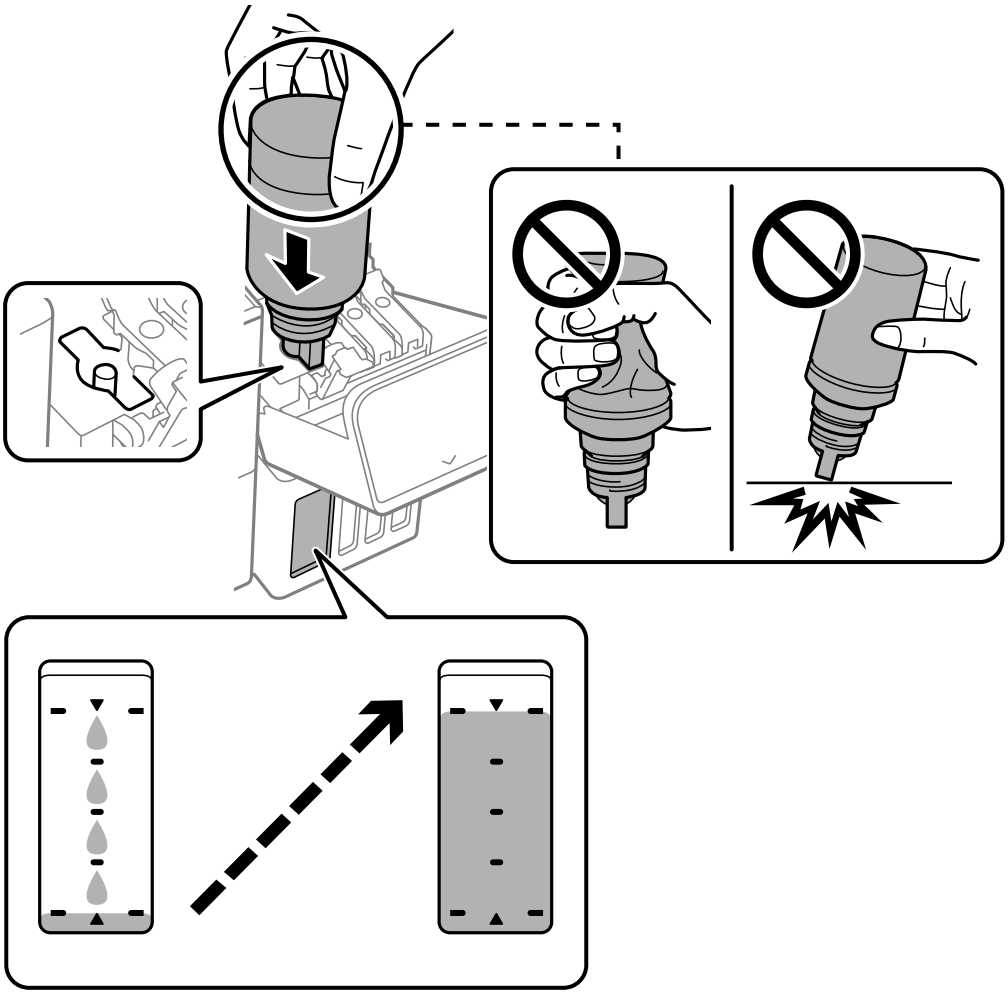

8. Align the top of the ink bottle with the filling port, and then insert it straight into the port to fill ink until it stops automatically at the upper line.

   When you insert the ink bottle into the filling port for the correct color, ink starts pouring and the flow stops automatically when the ink reaches the upper line.

   If the ink does not start flowing into the tank, remove the ink bottle and reinsert it.

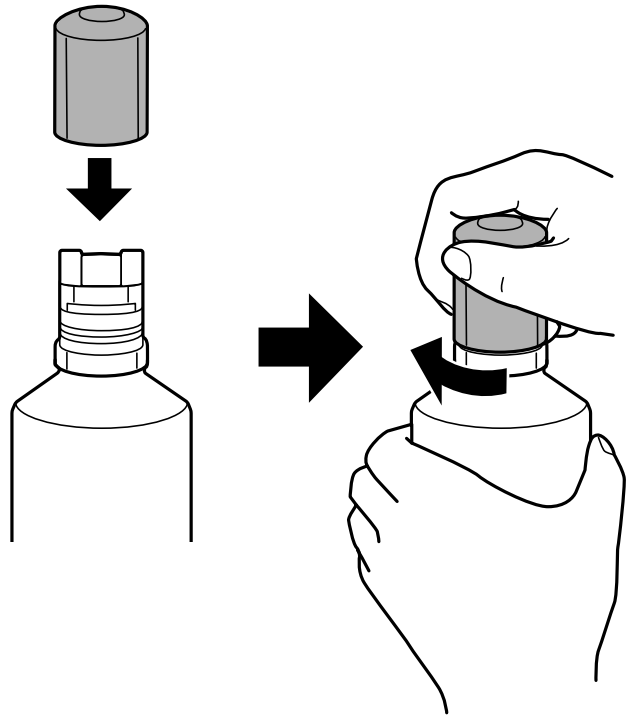

However, do not remove and reinsert the ink bottle when the ink has reached the upper line; otherwise ink may leak or the printer may be damaged if the ink rises above the upper line.

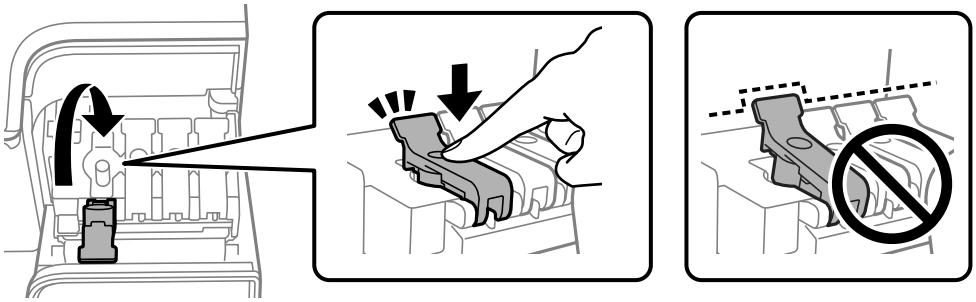

9. When you have finished filling the ink, remove the ink bottle.

> ***Important:***
>
> *Do not leave the ink bottle inserted; otherwise the bottle may be damaged or ink may leak.*

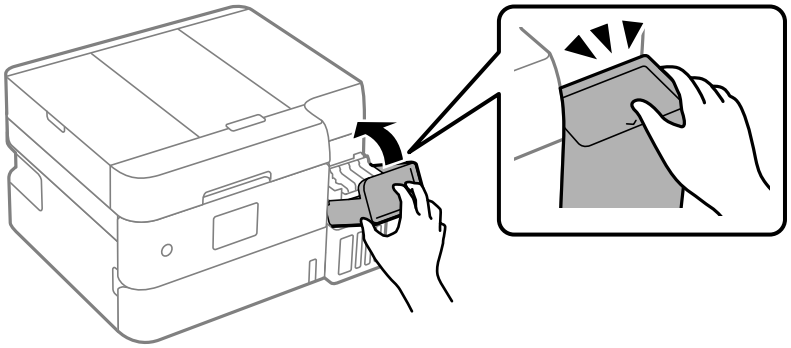

Note:
If any ink remains in the ink bottle, tighten the cap and store the bottle upright for later use.

10. Close the ink tank cap securely.

11. Close the ink tank cover firmly.

12. Follow the on-screen instructions to set the ink level of the color of the ink you refilled.

> ***Important:***
> *Even if you do not refill ink up to the upper line on the ink tank, you can continue using the printer. To keep your printer operating at its best, however, fill ink tank up to the upper line and reset the ink level immediately.*

Related Information

➡ "Ink Bottle Handling Precautions" on page 207
➡ "Ink Bottle Codes" on page 226

Notes on Resetting the Ink Level

Be sure to reset the ink level after refilling the ink.

If you refilled two or more ink tanks, you need to select all of the tanks that you refilled and reset their ink levels.

Unless you reset the ink level, the ink level displayed does not change even after refilling the ink.

Related Information

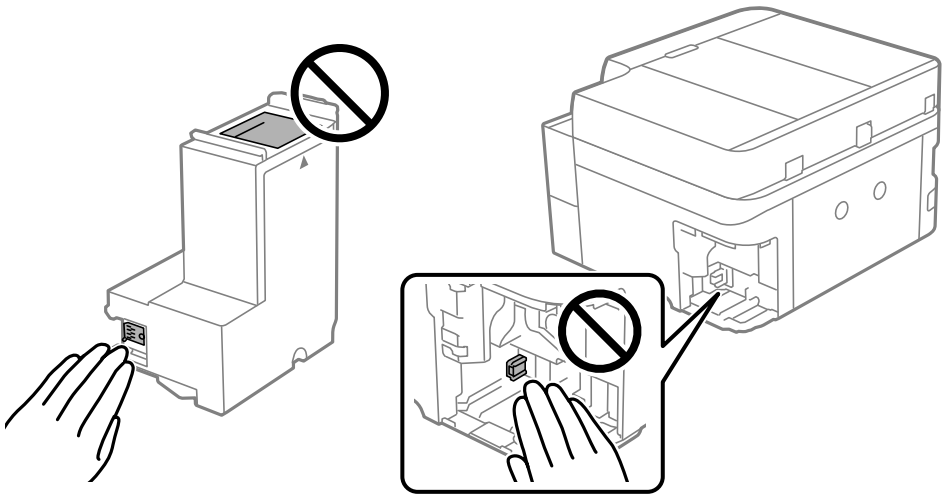

➡ "Checking the Ink Level" on page 112

It is Time to Replace the Maintenance Box

Maintenance Box Handling Precautions

Read the following instructions before replacing the maintenance box.

❏ Do not touch the sections shown in the illustration. Doing so may prevent normal operation and you may get smeared with ink.

❏ Do not drop the maintenance box or subject it to strong shocks.

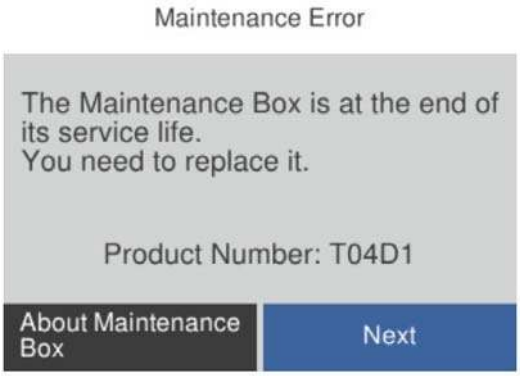

❏ Do not replace the maintenance box during printing; otherwise, ink may leak.

- ❏ Do not remove the maintenance box and its cover except when replacing the maintenance box; otherwise ink may leak.
- ❏ When the cover cannot be reattached, the maintenance box may not be installed correctly. Remove the maintenance box, and re-install it.
- ❏ Do not tilt the used maintenance box until after it is sealed in the plastic bag; otherwise ink may leak.
- ❏ Do not touch the openings in the maintenance box as you may get smeared with ink.
- ❏ Do not reuse a maintenance box which has been removed and left detached for a long period. Ink inside the box will have solidified and no more ink can be absorbed.
- ❏ Keep the maintenance box out of direct sunlight.
- ❏ Do not store the maintenance box in high or freezing temperatures.

Replacing a Maintenance Box

In some print cycles a very small amount of surplus ink may be collected in the maintenance box. To prevent ink leakage from the maintenance box, the printer is designed to stop printing when the absorbing capacity of the maintenance box has reached its limit. Whether and how often this is required will vary according to the number of pages you print, the type of material that you print and the number of cleaning cycles that the printer performs.

When a message is displayed prompting you to replace the maintenance box, refer to the animations displayed on the control panel. The need for replacement of the box does not mean that your printer has ceased to operate in accordance with its specifications. The Epson warranty does not cover the cost of this replacement. It is a user-serviceable part.

Note:

- ❏ *When the maintenance box is full, you cannot print and clean the print head until it is replaced to avoid ink leakage. However, you can perform operations that do not use ink such as scanning.*
- ❏ *When the following screen is displayed, the part cannot be replaced by users. Contact Epson support.*

  Borderless printing is not available, but printing with a border is available.

Related Information

➡ "Maintenance Box Code" on page 227

Cannot Operate the Printer as Expected

The Printer Does Not Turn On or Off

Power Does Not Turn On

One of the following situations may be the cause.

The power cord is not properly plugged into the electrical outlet.

Solutions

Make sure the power cord is securely plugged in.

The ⏻ button was not pressed for long enough.

Solutions

Hold down the ⏻ button for a little longer.

Power Does Not Turn Off

The ⏻ button was not pressedfor long enough.

Solutions

Hold down the ⏻ button for a little longer. If you still cannot turn off the printer, unplug the power cord. Then plug the power cord back in and turn the printer back on and off by pressing the ⏻ button, in order avoid drying out the print head.

Power Turns Off Automatically

The Power Off Settings or Power Off Timer feature is enabled.

Solutions

❏ Select **Settings** > **General Settings** > **Basic Settings** > **Power Off Settings**, and then disable the **Power Off If Inactive** and **Power Off If Disconnected** settings.

❏ Select **Settings** > **General Settings** > **Basic Settings**, and then disable the **Power Off Timer** Setting.

Note:
*Your product may have the **Power Off Settings** or **Power Off Timer** feature depending on the location of purchase.*

Operations are Slow

Printing Is Too Slow

One of the following situations may be the cause.

Unnecessary applications are running.

Solutions

Close any unnecessary applications on your computer or mobile devices.

The print quality setting is too high.

Solutions

Lower the quality setting.

Bidirectional printing is disabled.

Solutions

Enable the bidirectional (or high speed) setting. When this setting is enabled, the print head prints while moving in both directions, and the printing speed increases.

❏ Windows

Select **Bidirectional Printing** on the printer driver's **More Options** tab.

❏ Mac OS

Select **System Preferences** (or **System Settings**) from the Apple menu > **Printers & Scanners** (or **Print & Scan** or **Print & Fax**), and then select the printer. Click **Options & Supplies** > **Options** (or **Driver**). Select On as the **Bidirectional Printing** setting.

Quiet Mode is enabled.

Solutions

Disable **Quiet Mode**. The printing speed slows down when the printer is running in **Quiet Mode**.

❏ Control panel

Select  on the home screen, and then select **Off**.

❏ Windows

Select **Off** as the **Quiet Mode** setting on the printer driver's **Main** tab.

❏ Mac OS

Select **System Preferences** (or **System Settings**) from the Apple menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then select the printer. Click **Options & Supplies** > **Options** (or **Driver**). Select Off as the **Quiet Mode** setting.

There may be network connection problems with the wireless router.

Solutions

Reboot the wireless router while taking into consideration other users connected to the network. If this does not solve the problem, place the printer closer to your wireless router or see the documentation provided with the access point.

The printer is printing high density data such as photos on plain paper.

Solutions

If you are printing high-density data such as photos on plain paper, printing may take some time into maintain print quality. This is not a malfunction.

Printing Slows Down Dramatically During Continuous Printing

The printer has slowed down to prevent the printer mechanism from overheating and being damaged.

Solutions

You can continue printing. To return to normal printing speed, leave the printer idle for at least 30 minutes with the power turned on.

Scanning Speed Is Slow

The scanning resolution setting is too high.

Solutions

Try scanning at a lower resolution.

LCD Screen Gets Dark

The printer is in sleep mode.

Solutions

Tap anywhere on the LCD screen to return it to its former state.

The Printer Is Loud

Quiet Mode is disabled on the printer.

Solutions

If operations sounds are too loud, enable **Quiet Mode**. Enabling this feature may reduce printing speed.

❏ Control panel

Select  on the home screen, and then enable **Quiet Mode**.

❏ Windows

Enable **Quiet Mode** on the printer driver's **Main** tab.

❏ Mac OS

Select **System Preferences** (or **System Settings**) from the Apple menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then select the printer. Click **Options & Supplies** > **Options** (or **Driver**). Enable the **Quiet Mode** setting.

The Date and Time Are Incorrect

Error occurred in power supply.

Solutions

After a power failure caused by a lightning strike or if the power is left off for a long time, the clock may show the wrong time. Set the date and the time correctly in **Settings** > **General Settings** > **Basic Settings** > **Date/Time Settings** on the control panel.

The Root Certificate Needs to be Updated

The root certificate has expired.

Solutions

Run Web Config, and then update the root certificate.

➡ "Application for Configuring Printer Operations (Web Config)" on page 231

Cannot Perform Manual 2-sided Printing (Windows)

EPSON Status Monitor 3 is disabled.

Solutions

On the printer driver's **Maintenance** tab, click **Extended Settings**, and then select **Enable EPSON Status Monitor 3**.

However, manual 2-sided printing may not be available when the printer is accessed over a network or is used as a shared printer.

The Print Settings Menu is Not Displayed (Mac OS)

The Epson Printer Driver has Not been Installed Correctly.

Solutions

If the **Print Settings** menu is not displayed on macOS Catalina (10.15) or later, macOS High Sierra (10.13), macOS Sierra (10.12), OS X El Capitan (10.11), OS X Yosemite (10.10), OS X Mavericks (10.9), the Epson printer driver has not been installed correctly. Enable it from the following menu.

Select **System Preferences** from the Apple menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), remove the printer, and then add the printer again.

macOS Mojave (10.14) cannot access **Print Settings** in applications made by Apple such as TextEdit.

A Message Prompting You to Reset the Ink Level is Displayed Even After Refilling the Ink

Ink level was not reset.

Solutions

After refilling the ink, follow the on-screen instructions to reset the ink level.

➡ "Notes on Resetting the Ink Level" on page 213

The Ink Level Display does not Change Even After Refilling the Ink

Ink level was not reset.

Solutions

After refilling the ink, follow the on-screen instructions to reset the ink level.

➡ "Notes on Resetting the Ink Level" on page 213

Cannot Make Calls on the Connected Telephone

The phone cable is not connected correctly.

Solutions

Connect the telephone to the EXT. port on the printer, and pick up the receiver. If you cannot hear a dial tone through the receiver, connect the phone cable correctly.

Sender's Fax Number Not Displayed

The sender's fax number is not set to the sender's machine.

Solutions

The sender may not have set the fax number. Contact the sender.

Sender's Fax Number Displayed on Received Faxes is Wrong

The sender's fax number set to the sender's machine is wrong.

Solutions

The sender may have set the fax number incorrectly. Contact the sender.

Answering Machine Cannot Answer Voice Calls

The printer's Rings to Answer setting is set to less than the number of rings for your answering machine.

Solutions

Select **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** > **Rings to Answer**, and then set a number higher than the number of rings for your answering machine.

A Lot of Junk Faxes Have Been Received

The printer's feature to block junk faxes has not been set up.

Solutions

Make **Rejection Fax** settings in **Settings** > **General Settings** > **Fax Settings** > **Basic Settings**.

"Making Settings for Blocking Junk Faxes" on page 84

Cannot Solve Problem

If you cannot solve the problem after trying all of the solutions, contact Epson support.

If you cannot solve printing or copying problems, see the following related information.

Related Information

➡ "Cannot Solve Printing or Copying Problems" on page 220
➡ "Contacting Epson Support" on page 263

Cannot Solve Printing or Copying Problems

Try the solutions in the order shown, until you solve the problem.

❏ Make sure you match the paper type loaded in the printer and the paper type selected on the printer to the paper type setting in the printer driver.

"Paper Size and Type Settings" on page 28

❏ Use a higher quality setting on the control panel or in the printer driver.

❏ To check the actual ink remaining, visually check the ink levels in the printer's tanks. Refill the ink tanks if the ink levels are below the lower lines.

❏ Align the print head.

"Aligning the Print Head" on page 119

❏ Run a nozzle check to see if the print head nozzles are clogged.

If there are missing segments in the nozzle check pattern, the nozzles may be clogged. Run a nozzle check and Cleaning alternately 3 times or Power Cleaning once, and check if the clogging has cleared.

Note that print head cleaning uses some ink.

If there are still missing segments in the nozzle check pattern, turn off the printer and wait for at least 12 hours without printing, and then run a nozzle check. If print quality has still not improved, run Cleaning and a nozzle check again. If it has still not improved, run Power Ink Flushing.

"Checking and Cleaning the Print Head" on page 115

"Running Power Cleaning" on page 117

"Running Power Ink Flushing" on page 117

❏ If the problem is clogging, leaving the printer for a while without printing may solve the problem.

You can check the following items while the printer is off.

❏ Make sure you are using genuine Epson ink bottles.

Try to use genuine Epson ink bottles. This product is designed to adjust colors based on the use of genuine Epson ink bottles. The use of non-genuine ink bottles may cause print quality to decline.

❏ Make sure there are no paper fragments left inside the printer.

When you remove the paper, do not touch the translucent film with your hand or the paper.

❏ Make sure the paper is loaded with the printable side facing up and not curled.

"Paper Handling Precautions" on page 27

"Available Paper and Capacities" on page 223

"Unavailable Paper Types" on page 226

If you cannot solve the problem by checking the solutions above, contact Epson support.

Unavailable Paper Types

Do not use the following paper types. Using these types of paper can cause paper feed problems and smears on the printouts.

❏ Papers that are wavy

❏ Papers that are torn or cut

❏ Papers that are folded

❏ Papers that are damp

❏ Papers that are too thick or too thin

❏ Papers that have stickers

Do not use the following envelopes. Using these types of envelope causes paper jams and smears on the printout.

❏ Envelopes that are curled or folded

❏ Envelopes with adhesive surfaces on the flaps or window envelopes

❏ Envelopes that are too thin

They may curl during printing.

Consumable Products Information

Ink Bottle Codes

Epson recommends the use of genuine Epson ink bottles.

The following are the codes for genuine Epson ink bottles.

Important:

❏ *Epson warranty does not cover damage caused by inks other than those specified, including any genuine Epson ink not designed for this printer or any third party ink.*

❏ *Other products not manufactured by Epson may cause damage that is not covered by Epson's warranties, and under certain circumstances, may cause erratic printer behavior.*

Note:

❏ *Ink bottle codes may vary by location. For the correct codes in your area, contact Epson support.*

❏ *Although the ink bottles may contain recycled materials, this does not affect printer function or performance.*

❏ *Specifications and appearance of the ink bottle are subject to change without prior notice for improvement.*

Maintenance Box Code

Epson recommends the use of a genuine Epson maintenance box.

Maintenance box code: T04D1

Important:

Once a maintenance box has been installed in a printer it cannot be used with other printers.

Software Information

This section introduces some of the applications available for your printer. For a list of supported software, see the following Epson website or launch Epson Software Updater for confirmation. You can download the latest applications.

https://www.epson.com

Related Information

➡ "Application for Updating Software and Firmware (Epson Software Updater)" on page 232

Application for Printing from a Computer (Windows Printer Driver)

The printer driver controls the printer based on the commands from an application. Selecting settings in the printer driver provides the best printing results. You can also check the status of the printer or keep it in top operating condition using the printer driver utility.

Note:
*You can change the language of the printer driver. Select the language you want to use from the **Language** setting on the **Maintenance** tab.*

Accessing the printer driver from applications

To select settings that apply only to the application you are using, access the driver from that application.

Select **Print** or **Print Setup** from the **File** menu. Select your printer, and then click **Preferences** or **Properties**.

Note:
Operations differ depending on the application. See the application's help for details.

Accessing the printer driver from the control panel and so on

To select settings that apply to all of the applications, follow the steps below.

❏ Windows 11

Click on the start button, and then select **Settings** > **Bluetooth & devices** > **Printers & scanners**. Click your printer, and then select **Printing preferences**.

❏ Windows 10/Windows Server 2022/Windows Server 2019/Windows Server 2016

Click on the start button, and then select **Windows System** > **Control Panel** > **View devices and printers** in **Hardware and Sound**. Right-click on your printer, or press and hold it and then select **Printing preferences**.

❏ Windows 8.1/Windows 8/Windows Server 2012 R2/Windows Server 2012

Select **Desktop** > **Settings** > **Control Panel** > **View devices and printers** in **Hardware and Sound**. Right-click on your printer, or press and hold it and then select **Printing preferences**.

❏ Windows 7/Windows Server 2008 R2

Click the start button, and select **Control Panel** > **View devices and printers** in **Hardware and Sound**. Right-click on your printer and select **Printing preferences**.

❏ Windows Server 2008

Click the start button, and select **Control Panel** > **Printers** in **Hardware and Sound**. Right-click on your printer and select **Printing preferences**.

Accessing the printer driver from the printer icon on the task bar

The printer icon on the desktop task bar is a shortcut icon allowing you to quickly access the printer driver.

If you click the printer icon and select **Printer Settings**, you can access the same printer settings window as the one displayed from the control panel. If you double-click this icon, you can check the status of the printer.

Note:
*If the printer icon is not displayed on the task bar, access the printer driver window, click **Monitoring Preferences** on the **Maintenance** tab, and then select **Register the shortcut icon to the taskbar**.*

Starting the utility

Access the printer driver window. Click the **Maintenance** tab.

Application for Printing from a Computer (Mac OS Printer Driver)

The printer driver controls the printer according to the commands from an application. Making settings on the printer driver provides the best printing results. You can also check the status of the printer or keep it in top operating condition using the printer driver utility.

Accessing the printer driver from applications

Click **Page Setup** or **Print** on the **File** menu of your application. If necessary, click **Show Details** (or ▼) to expand the print window.

Note:
*Depending on the application being used, **Page Setup** may not be displayed in the **File** menu, and the operations for displaying the print screen may differ.See the application's help for details.*

Starting the utility

Select **System Preferences** from the Apple menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then select the printer. Click **Options & Supplies** > **Utility** > **Open Printer Utility**.

Application for Controlling the Scanner (Epson Scan 2)

Epson Scan 2 is a scanner driver that allows you to control the scanner. You can adjust the size, resolution, brightness, contrast, and quality of the scanned image. You can also start this application from a TWAIN-compliant scanning application. See the software help for details on using the features.

Starting on Windows

Note:
*For Windows Server operating systems, make sure the **Desktop Experience** feature is installed.*

❏ Windows 11

Click the start button, and then select **All apps** > **EPSON** > **Epson Scan 2**.

❏ Windows 10/Windows Server 2022/Windows Server 2019/Windows Server 2016

Click the start button, and then select **EPSON** > **Epson Scan 2**.

❏ Windows 8.1/Windows 8/Windows Server 2012 R2/Windows Server 2012

Enter the application name in the search charm, and then select the displayed icon.

❏ Windows 7/Windows Server 2008 R2/Windows Server 2008

Click the start button, and then select **All Programs** > **EPSON** > **Epson Scan 2**.

Starting on Mac OS

Select **Go** > **Applications** > **Epson Software** > **Epson Scan 2**.

Application for Configuring Fax Operations and Sending Faxes (FAX Utility)

FAX Utility is an application that allows you to configure various settings for sending and receiving faxes on a computer. You can create or edit the contacts list to be used when sending a fax, configure to save received faxes in PDF format on the computer, and so on. See the application's help for details.

Note:

❏ *Windows Server operating systems are not supported.*

❏ *Make sure you have installed the printer driver before installing FAX Utility.*

❏ *Make sure the FAX Utility has been installed. See "Starting on Windows" or "Starting on Mac OS" below to check if the application has been installed.*

Starting on Windows

❏ Windows 11

Click the start button, and select **All Apps** > **Epson Software** > **FAX Utility**.

❏ Windows 10

Click the start button, and select **Epson Software** > **FAX Utility**.

❏ Windows 8.1/Windows 8

Enter the application name in the search charm, and then select the displayed icon.

❏ Windows 7

Click the start button, and select **All Programs** (or **Programs**) > **Epson Software** > **FAX Utility**.

Starting on Mac OS

Select **System Preferences** (or **System Settings**) from the Apple menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then select the printer (FAX). Click **Options & Supplies** > **Utility** > **Open Printer Utility**.

Application for Sending Faxes (PC-FAX Driver)

PC-FAX driver is an application that allows you to send a document created on a separate application as a fax directly from the computer. PC-FAX driver is installed when you install FAX Utility. See the application's help for details.

Note:

❏ *Windows Server operating systems are not supported.*

❏ *Check if PC-FAX driver has been installed. See "Accessing from Windows" or "Accessing from Mac OS" below.*

❏ *The operation differs depending on the application you used to create the document. See the application's help for details.*

Accessing from Windows

In the application, select **Print** or **Print Setup** from the **File** menu. Select your printer (FAX), and then click **Preferences** or **Properties**.

Accessing from Mac OS

In the application, select **Print** from the **File** menu. Select your printer (FAX) as the **Printer** setting, and then select **Fax Settings** or **Recipient Settings** from the pop-up menu.

Application for Configuring Printer Operations (Web Config)

Web Config is an application that runs in a web browser, such as Microsoft Edge and Safari, on a computer or mobile device. You can confirm the printer status or change the network service and printer settings. To use Web Config, connect the printer and the computer or device to the same network.

The following browsers are supported. Use the latest version.

Microsoft Edge, Firefox, Chrome, Safari

Note:
You may be asked to enter the administrator password while using Web Config. See the related information below for more details.

Related Information

➡ "Default Value of the Administrator Password" on page 15

Running Web Config on a Web Browser

1. Check the printer's IP address.

   Select the network icon on the printer's home screen, and then select the active connection method to confirm the printer's IP address.

   Note:
   You can also check the IP address by printing the network connection report.

2. Launch a Web browser from a computer or mobile device, and then enter the printer's IP address.

   Format:

   IPv4: http://the printer's IP address/

   IPv6: http://[the printer's IP address]/

   Examples:

   IPv4: http://192.168.100.201/

   IPv6: http://[2001:db8::1000:1]/

   Note:
   If you are using a the mobile devices, you can also run Web Config from the product information screen of the Epson Smart Panel app.

   Since the printer uses a self-signed certificate when accessing HTTPS, a warning is displayed on the browser when you start Web Config; this does not indicate a problem and can be safely ignored.

Application for Updating Software and Firmware (Epson Software Updater)

Epson Software Updater is an application that installs new software, and updates firmware over the Internet. If you want to check for update information regularly, you can set the interval for checking for updates in Epson Software Updater's Auto Update Settings.

Note:
Windows Server operating systems are not supported.

Starting on Windows

❏ Windows 11

Click the start button, and then select **All apps** > **EPSON Software** > **Epson Software Updater**.

❏ Windows 10

Click the start button, and then select **EPSON Software** > **Epson Software Updater**.

❏ Windows 8.1/Windows 8

Enter the application name in the search charm, and then select the displayed icon.

❏ Windows 7

Click the start button, and then select **All Programs** > **EPSON Software** > **Epson Software Updater**.

Note:
*You can also start Epson Software Updater by clicking the printer icon on the task bar on the desktop, and then selecting **Software Update**.*

Starting on Mac OS

Select **Go** > **Applications** > **Epson Software** > **Epson Software Updater**.

Related Information

➡ "Installing the Applications Separately" on page 132

Settings Menu List

Select **Settings** on the home screen of the printer to make various settings.

Feature names and setting menu items may change depending on the firmware version.

General Settings

Select the menus on the control panel as described below.

Settings > **General Settings**

Basic Settings

Select the menus on the control panel as described below.

Settings > **General Settings** > **Basic Settings**

LCD Brightness:

Adjust the brightness of the LCD screen.

Sound:

Mute:

Select **On** to mute sounds such as those emitted when pressing buttons on the control panel.

Normal Mode:

Select the volume for sounds such as those emitted when pressing buttons on the control panel.

Fax:

Select the volume for the following fax functions.

Ring Tone:

Set the volume for the sound emitted when the printer receives a fax.

Receive Completion Notice:

Set the volume for the sound emitted when fax reception is complete.

Print Completion Notice:

Set the volume for the sound emitted when a received fax finishes printing.

Receiver:

Set the volume for the dial sound when the printer sends a fax.

Send Completion Notice:

Set the volume for the sound emitted when sending a fax is complete.

Button Press:

Set the volume when tapping the items on the screen on the control panel.

ADF Document Set:

Set the volume for the sound emitted when originals are placed in the ADF.

Error Tone:

Set the volume for the sound emitted when an error occurs.

Quiet Mode:

Select sound settings in Quiet Mode.

Fax:

Select the volume for the following fax functions.

Ring Tone:

Set the volume for the sound emitted when the printer receives a fax.

Receive Completion Notice:

Set the volume for the sound emitted when fax reception is complete.

Print Completion Notice:

Set the volume for the sound emitted when a received fax finishes printing.

Receiver:

Set the volume for the dial sound when the printer sends a fax.

Send Completion Notice:

Set the volume for the sound emitted when sending a fax is complete.

Button Press:

Set the volume when tapping the items on the screen on the control panel.

ADF Document Set:

Set the volume for the sound emitted when originals are placed in the ADF.

Error Tone:

Set the volume for the sound emitted when an error occurs.

Sleep Timer:

Adjust the time period to enter a sleep mode (energy saving mode) when the printer has not performed any operations. The LCD screen turns black when the setting time passes.

Power Off Timer:

Your product may have this feature or the **Power Off Settings** feature depending on the location of purchase.

Select this setting to turn the printer off automatically when it is not used for a specified period of time. You can adjust the time before power management is applied. Any increase will affect the product's energy efficiency. Please consider the environment before making any change.

Power Off Settings:

Your product may have this feature or the **Power Off Timer** feature depending on the location of purchase.

Power Off If Inactive:

Select this setting to turn the printer off automatically if it is not used for a specified period of time. You can adjust the time before power management is applied. Any increase will affect the product's energy efficiency. Please consider the environment before making any change.

Power Off If Disconnected:

Select this setting to turn the printer off after a specified period of time when all ports including the LINE port are disconnected. This feature may not be available depending on your region.

See the following website for the specified period of time.

https://www.epson.eu/energy-consumption

Date/Time Settings:

Date/Time:

Enter the current date and time.

Daylight Saving Time:

Select the summer time setting that applies to your area.

Time Difference:

Enter the time difference between your local time and UTC (Coordinated Universal Time).

Language:

Select the language used on the LCD screen.

Operation Time Out:

Select **On** to return to the initial screen when no operations have been performed for the specified time.

Keyboard:

Change the layout of the keyboard on the LCD screen.

Status Light:

Adjusts the brightness of the **Status Light**. When set to minimum, the **Status Light** is off.

Printer Settings

Select the menus on the control panel as described below.

Settings > **General Settings** > **Printer Settings**

Paper Source Settings:

Paper Setting:

Select the paper size and paper type you loaded in the paper source. You can make **Favorite Paper Settings** in paper size and paper type.

A4/Letter Auto Switching:

Select **On** to feed paper from the paper source set as A4 size when there is no paper source set as Letter, or feed from the paper source set as Letter size when there is no paper source set as A4.

Error Notice:

Paper Size Notice:

Select **On** to display an error message when the selected paper size does not match the loaded paper.

Paper Type Notice:

Select **On** to display an error message when the selected paper type does not match the loaded paper.

Paper Setup Auto Display:

Select **On** to display the **Paper Setting** screen when loading paper in the paper source. If you disable this feature, you cannot print from an iPhone, iPad, or iPod touch using AirPrint.

Universal Print Settings:

These print settings are applied when you print by an external device without using the printer driver. The offset settings are applied when you print using the printer driver.

Top Offset:

Adjust the top margin of the paper.

Left Offset:

Adjust the left margin of the paper.

Top Offset in Back:

Adjust the top margin for the back of the page when performing 2-sided printing.

Left Offset in Back:

Adjust the left margin for the back of the page when performing 2-sided printing.

Check Paper Width:

Select **On** to check the paper width before printing. This prevents printing beyond the edges of the paper when the paper size setting is incorrect, but this may lower the print speed.

Skip Blank Page:

Skips blank pages in the print data automatically to save paper.

Auto Error Solver:

Select an action to perform when a 2-sided printing error or a memory full error occurs.

❏ On

Displays a warning and prints in single-sided mode when a 2-sided printing error occurs, or prints only what the printer could process when a memory full error occurs.

❏ Off

Displays an error message and cancels printing.

Quiet Mode:

Select **On** to reduce noise during printing, however, this may lower the print speed. Depending on the paper type and print quality settings you selected, there may be no difference in the printer's noise level. Select **On** to prioritize reducing operation noise. To prioritize printing speed, select **On (Low Level)**.

Ink Drying Time:

Select the ink drying time you want to use when performing 2-sided printing. After the printer prints on one side, it waits a little while for it to dry before printing on the other side. If your printout is smeared, increase the time setting.

PC Connection via USB:

Select **Enable** to allow a computer to access the printer when connected by USB. When **Disable** is selected, printing and scanning that is not sent over a network connection is restricted.

Related Information

➡ "Saving Power" on page 131

Network Settings

Select the menus on the control panel as described below.

Settings > **General Settings** > **Network Settings**

Connection Settings:

Connect the printer to the network over a wireless LAN. Select your connection method and follow the on-screen instructions.

Wi-Fi:

Wi-Fi Setup Wizard:

Configures Wi-Fi settings by having you enter the SSID and password.

Push Button Setup (WPS):

Makes Wi-Fi settings by Push Button Setup (WPS).

Others:

PIN Code Setup (WPS):

Configures Wi-Fi settings via PIN Code Setup (WPS).

Disable Wi-Fi:

Disables Wi-Fi. Infrastructure connections will be disconnected.

Ethernet:

Set up or change a network connection that uses a LAN cable and hub. When this is being used, Wi-Fi connections are disabled.

Wi-Fi Direct:

(Menu) :

Change Network Name:

Changes the Wi-Fi Direct SSID (network name).

Change Password:

Changes the password for the Wi-Fi Direct connection.

Change Frequency Range:

Select the frequency band for Wi-Fi Direct connection. Changing the frequency disconnects the connected device.

The availability of these channels and use of the product outdoors over these channels varies by location.

http://support.epson.net/wifi5ghz/

Disable Wi-Fi Direct:

Disables the Wi-Fi Direct function.

Restore Default Settings:

Resets the Wi-Fi Direct settings.

Other Methods:

iOS:

Displays a QR code to connect a mobile device using Wi-Fi Direct.

Android:

Displays a QR code to connect a mobile device using Wi-Fi Direct.

Other OS Devices:

Displays the SSID and password to connect using Wi-Fi Direct.

Easy Connect with App:

Establish a wireless LAN connection using the wireless LAN information for your computer or mobile device.

Network Status:

Wired LAN/Wi-Fi Status:

Displays the printer's network information.

Wi-Fi Direct Status:

Displays the Wi-Fi Direct setting information.

Print Status Sheet:

Prints a network status sheet.

The information for Ethernet, Wi-Fi, Wi-Fi Direct, and other network parameters is printed on two or more pages.

Connection Check:

Checks the current network connection and prints a report. If there are any problems with the connection, see the report for solutions.

Advanced:

Device Name:

Changes the device name to any name within 2 to 53 characters.

TCP/IP:

Configures the IP settings, if the IP address is static.

For automatic configuration, use the IP address assigned by DHCP.

To set manually, switch to **Manual** and then enter the IP address you want to assign.

Proxy Server:

Set this if you are using a proxy server in your network environment and want to set it for the printer as well.

IPv6 Address:

Sets whether or not to enable IPv6 addressing.

Link Speed & Duplex:

Select an appropriate Ethernet speed and duplex setting. If you select a setting other than Auto, make sure the setting corresponds to the settings on the hub you are using.

Related Information

➡ "Configuring Wi-Fi Settings from the Control Panel" on page 136

➡ "Connecting a Device and Printer Directly (Wi-Fi Direct)" on page 146

Web Service Settings

Select the menus on the control panel as described below.

Settings > **General Settings** > **Web Service Settings**

Epson Connect Services:

Displays whether the printer is registered and connected to Epson Connect.

You can register to the service by selecting **Register** and follow the instructions.

For usage guides, see the following portal website.

https://www.epsonconnect.com/

http://www.epsonconnect.eu (Europe only)

When you have registered, you can change the following settings.

Suspend/Resume:

Select whether to suspend or resume Epson Connect services.

Unregister:

Unregisters the printer from Epson Connect services.

Fax Settings

Select the menus on the control panel as described below.

Settings > **General Settings** > **Fax Settings**

Basic Settings

You can find the menu on the printer's control panel below.

Settings > **General Settings** > **Fax Settings** > **Basic Settings**

Fax Speed:

Select the fax transmission speed. We recommend selecting **Slow(9,600bps)** when a communication error occurs frequently, when sending/receiving a fax to/from abroad, or when you are using an IP (VoIP) phone service.

ECM:

Automatically corrects errors in the fax transmission (Error Correction Mode), mostly caused by telephone line noise. If this is disabled, you cannot send or receive documents in color.

Dial Tone Detection:

Detects a dial tone before starting to dial. If the printer is connected to a PBX (Private Branch Exchange) or digital phone line, the printer may fail to start dialing. In this situation, change the **Line Type** setting to **PBX**. If this does not work, disable this feature. However, disabling this feature may drop the first digit of a fax number and send the fax to the wrong number.

Dial Mode:

Select the type of phone system to which you have connected the printer. When set to **Pulse**, you can temporarily switch the dialing mode from pulse to tone by pressing * ("T" is displayed) while entering numbers on the control panel. This setting may not be displayed depending on your region or country.

Line Type:

Select the line type to which you have connected the printer.

PSTN:

Select **PSTN** when the printer is connected to a public switched telephone network.

PBX:

Select **PBX** when using the printer in an environment that uses extensions and requires an external access code, such as 0 and 9, to get an outside line. For an environment that uses a DSL modem or terminal adapter, selecting **PBX** is also recommended.

Access Code:

Select **Use**, and then register an external access code such as 0 or 9. Then, when sending a fax to an outside fax number, enter # (hash) instead of the real code. When registering in **Contacts**, add a # (hash) instead of [0] or [9] to register the destination.

"Connecting to a Standard Phone Line (PSTN) or PBX" on page 77

Header:

Enter your sender name and fax number. These appear as a header on outgoing faxes.

Your Phone Number:

You can enter up to 20 characters using 0-9, +, or space.

Fax Header:

You can register up to 21 sender names as necessary. You can enter up to 40 characters for each sender name.

Receive Mode:

Select the receive mode.

"Receiving Incoming Faxes" on page 95

DRD:

If you have subscribed to a distinctive ring service from your telephone company, select the ring pattern to be used for incoming faxes. The distinctive ring service, offered by many telephone companies (the service name differs by company), allows you to have several phone numbers on one phone line. Each number is assigned different ring pattern. You can use one number for voice calls and another for fax calls. Depending on the region, this option may be **On** or **Off**.

Rings to Answer:

Select the number of rings that must occur before the printer automatically receives a fax.

Remote Receive:

Remote Receive:

When you answer an incoming fax call on a phone connected to the printer, you can start receiving the fax by entering the code using the phone.

Start Code:

Set the start code of **Remote Receive**. Enter two characters using 0-9, *, #.

Rejection Fax:

Rejection Fax:

Select options to reject receiving junk faxes.

Rejection Number List:

If the other party's phone number is in the rejection number list, set whether to reject the receiving faxes.

Fax Header Blank:

If the other party's phone number is blocked, set whether to reject receiving the faxes.

Unregistered Contacts:

If the other party's phone number is not in the contacts, set whether to reject receiving the faxes.

Edit Blocked Number list:

You can register up to 30 fax numbers to reject the faxes and calls. Enter up to 20 characters using 0-9, *, #, or space.

Send Settings

You can find the menu on the printer's control panel below.

Settings > **General Settings** > **Fax Settings** > **Send Settings**

Wait Time for Next Original:

Wait Time for Next Original:

Enable this to start sending the fax after you scan a document by tapping ⓘ, and then wait for the next original until the time specified has passed.

Time:

Set the time to wait for the next original.

Fax Preview Display Time:

Fax Preview Display Time:

Enable this to start sending the fax after the specified time has passed without performing any operations after displaying the preview screen.

Time:

Specify the time to preview the scanned document before sending it.

Receive Settings :

Fax Output Settings

You can find the menu on the printer's control panel below.

Settings > **General Settings** > **Fax Settings** > **Receive Settings** > **Fax Output Settings**

Save to Inbox:

Save to Inbox:

Saves received faxes to the printer's Inbox. Up to 100 documents can be saved. Note that saving 100 documents may not be possible depending on the usage conditions such as the file size of saved documents, and using of multiple fax saving features at a time.

Though the received faxes are not automatically printed, you can view them on the printer's screen and print only the ones you need.

Options when memory is full:

You can select the operation to print the received fax or refuse to receive it when the Inbox memory is full.

Inbox Password Settings:

Password protects the Inbox to restrict users from viewing received faxes. Select **Change** to change the password, and select **Reset** to cancel password protection. When changing or resetting the password, you need the current password.

You cannot set a password when **Options when memory is full** has been set to **Receive and print faxes**.

Save to Computer:

Saves received faxes as PDF files on a computer connected to the printer. You can only set this to **Yes** by using the FAX Utility (application). You cannot enable this from printer's control panel. Install the FAX Utility on the computer in advance. After changing change this setting **Yes**, you can select **Yes and Print** from the printer's control panel.

Print Settings

You can find the menu on the printer's control panel below.

Settings > **General Settings** > **Fax Settings** > **Receive Settings** > **Print Settings**

Auto Reduction:

Prints received large-size faxes at a reduced size so they fit on the paper in the paper source. Reducing may not always be possible depending on the received data. If this is turned off, large documents are printed at their original size on multiple sheets, or a blank second page may be ejected.

Split Page Settings:

Prints received faxes with the page split when their size is larger than the size of the paper loaded in the printer. If the amount that exceeds the paper length is less than the value set in **Delete Print Data After Split** > **Threshold**, the excess is discarded. If the amount that exceeds the paper length is over the set value, the excess is printed on another sheet.

Delete Print Data After Split:

Delete Print Data After Split:

Select the area of the document to delete when the amount that exceeds the paper length is less than the value set in **Threshold**.

Threshold:

If the amount that exceeds the paper length is less than or equal to this value, the excess is discarded and is not printed.

Overlap When Split:

Overlap When Split:

When this is set to **On** and the data is divided and printed because the amount exceeds the **Delete Print Data After Split** > **Threshold**, the divided data is printed using the overlapping length specified in **Overlapping Width**.

Overlapping Width:

Data that exceeds this value is printed over.

Auto Rotation:

Rotates faxes received as landscape-oriented A5 size documents so that they are printed on A5 size paper. This setting is applied when the paper size setting is set to A5.

By selecting **Off**, faxes received as landscape-oriented A5 size, which are the same width as A4 portrait documents, are assumed to be A4 size faxes and printed as such.

Check the paper size setting in **Settings** > **General Settings** > **Printer Settings** > **Paper Source Settings**.

Add Reception Information:

Prints reception information on the received fax, even if the sender does not set the header information. The reception information includes the received date and time, sender's ID, and page number (such as "P1"). When **Split Page Settings** is enabled, the split page number is also included.

2-Sided:

2-Sided:

Prints multiple pages of received faxes on both sides of the paper.

Binding Margin:

Select the binding position.

Print Start Timing:

Select options to start printing received faxes.

- ❏ All Pages Received: Printing starts after receiving all of the pages. Printing starts from the first or last page depending on the **Collation Stack** setting. See the explanation for **Collation Stack**.
- ❏ First Page Received: Starts printing when the first page is received, and then prints the pages in order as they are received. If the printer cannot start printing, such as when it is printing other jobs, the printer starts printing received pages as a batch when it is available.

Collation Stack:

When this setting is enabled, the pages are printed in reverse order so that the printed documents are stacked in the correct order. When the printer is running low on memory, this feature may not be available.

Print Suspend Time:

Print Suspend Time:

During the specified time period, the printer saves documents received in the printer's memory without printing them. This feature can be used for noise prevention at night or to prevent confidential documents from being disclosed while you are away. Before using this feature, make sure there is enough free memory.

Time to Stop:

Stops printing documents.

Time to Restart:

Restarts printing documents automatically.

Quiet Mode:

Reduces the noise the printer makes when printing faxes, print speed may be reduced.

Report Settings

You can find the menu on the printer's control panel below.

Settings > **General Settings** > **Fax Settings** > **Report Settings**

Fax Log Auto Print:

Prints the fax log automatically. Select **On(Every 30)** to print a log every time 30 fax jobs are completed. Select **On(Time)** to print the log at a specified time. However, if the number of fax jobs exceeds 30, the log is printed before the specified time.

Attach Fax image to report:

Prints a **Transmission Report** with an image of the first page of the sent document. Select **On(Large Image)** to print the upper part of the page without reducing. Select **On(Small Image)** to print the entire page reducing it to fit onto the report.

Report Format:

Selects a format for fax reports in **Fax** > Menu (**More**) > **Fax Report** other than **Protocol Trace**. Select **Detail** to print with error codes.

Security Settings

You can find the menu on the printer's control panel below.

Settings > **General Settings** > **Fax Settings** > **Security Settings**

Direct Dialing Restrictions:

Selecting **On** disables manual entry of the recipient's fax numbers, so that the operator can only select recipients from the contacts list or sent history.

Selecting **Enter Twice** requires the operator to enter the fax number again if the number is manually entered.

Selecting **Off** enables manual entry of the recipient's fax numbers.

Broadcasting Restrictions:

Selecting **On** allows only one fax number to be entered as the Recipient.

Confirm Address List:

Selecting **On** displays a recipient confirmation screen before starting the transmission.

You can select the recipients from **All** or **Only for Broadcasting**.

Backup Data Auto Clear:

Backup copies of sent and received documents are usually temporarily stored in the printer's memory in case of an unexpected power failure or incorrect operations.

Selecting **On** automatically erases the backups when sending or receiving a document completes successfully and the backups become unnecessary.

Clear Backup Data:

Erases all backup copies temporarily stored in the printer's memory. Run this before you give the printer to someone else or dispose of it.

Check Fax Connection

You can find the menu on the printer's control panel below.

Settings > **General Settings** > **Fax Settings** > **Check Fax Connection**

Selecting **Check Fax Connection** checks that the printer is connected to the phone line and ready for fax transmission. You can print the check result on A4 size plain paper.

Fax Setting Wizard

You can find the menu on the printer's control panel below:

Settings > **General Settings** > **Fax Settings** > **Fax Setting Wizard**

Selecting **Fax Setting Wizard** makes basic fax settings. Follow the on-screen instructions.

Country/Region:

Select the country or region in which you are using your printer. If you change the country or region, your fax settings return to their defaults and you must select them again.

Maintenance

Select the menus on the control panel as described below.

Settings > **Maintenance**

Print Quality Adjustment:

Select this feature if there are any problems with your printouts. You can check for clogged nozzles and clean the print head if necessary, and then adjust some parameters to improve print quality.

Print Head Nozzle Check:

Select this feature to check if the print head nozzles are clogged. The printer prints a nozzle check pattern.

Print Head Cleaning:

Select this feature to clean clogged nozzles in the print head.

Power Ink Flushing:

The **Power Ink Flushing** utility allows you to replace all of the ink inside the ink tubes.

Print Head Alignment:

Ruled Line Alignment:

Select this feature to align vertical lines.

Horizontal Alignment:

Select this feature if horizontal banding appears at regular intervals in your printouts.

Fill Ink:

Select this feature to reset the ink levels to 100% when refilling the ink tank.

Ink Level Setting:

Select this feature to set the ink level according to the actual ink remaining.

Remaining capacity of Maintenance box:

Displays the approximate service life of the maintenance box. When  is displayed, the maintenance box is nearly full. When  is displayed, the maintenance box is full.

Paper Guide Cleaning:

Select this feature if there are ink stains on the internal rollers. The printer feeds paper to clean the internal rollers.

Related Information

Print Status Sheet

Select the menus on the control panel as described below.

Settings > **Print Status Sheet**

Configuration Status Sheet:

Print information sheets showing the current printer status and settings.

Supply Status Sheet:

Print information sheets showing the status of consumables.

Usage History Sheet:

Print information sheets showing the usage history of the printer.

Print Counter

Select the menus on the control panel as described below.

Settings > **Print Counter**

Displays the total number of prints, B&W prints, and color prints including items such as the status sheet from the time you purchased the printer. If you select **Print Sheet**, the Usage History Sheet is printed.

You can also check the number of pages printed from other functions on the Usage History Sheet.

User Settings

Select the menus on the control panel as described below.

Settings > **User Settings**

Copy:

You can change the default settings in the copy menu.

Fax:

You can change the default settings in the Fax menu.

"Fax Settings" on page 98

Scan to Computer

You can change the default settings in the Scan to Computer menu.

Scan to Cloud:

You can change the default settings in the Scan to Cloud menu.

"Cloud Storage Scan Setting Items" on page 71

Customer Research

Select the menus on the control panel as described below.

Settings > **Customer Research**

If you agree to provide customer usage information, product usage information such as the number of prints will be provided to Seiko Epson Corporation.

The information collected is used to improve our products and services.

Provide usage data:

Displays whether or not you have agreed to provide your customer usage information.

Country/Region:

Displays the country or region where you are using the product if you have agreed to provide your customer usage information.

Restore Default Settings

Select the menus on the control panel as described below.

Settings > **Restore Default Settings**

Network Settings:

Resets the network settings to their defaults.

Copy:

Resets the copy settings to their defaults.

Scan Settings:

Resets the scan settings to their defaults.

Fax Settings:

Resets the fax settings to the default.

Clear All Data and Settings:

Clears all the personal information stored in the printer's memory and resets all settings to their defaults.

Firmware Update

Select the menus on the control panel as described below.

Settings > **Firmware Update**

Update:

Check if a later version of the firmware has been uploaded to the network server. If an update is available, you can select whether or not to start updating.

Notification:

Select **On** to receive a notification if a firmware update is available.

Product Specifications

Printer Specifications

Print Head Nozzle Placement		Black ink nozzles: 400×1 rows Color ink nozzles: 128×3 rows for each color
Weight of Paper*	Plain Paper	64 to 90 g/m²
	Envelopes	75 to 100 g/m²

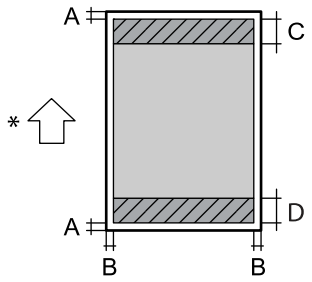

* Even when the paper thickness is within this range, the paper may not feed in the printer or the print quality may decline depending on the paper properties or quality.

Printable Area

Printable Area for Single Sheets

Print quality may decline in the shaded areas due to the printer's mechanism.

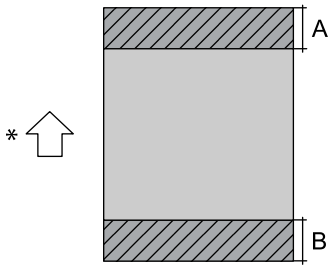

Printing with borders

A	3.0 mm (0.12 in.)
B	3.0 mm (0.12 in.)
C	41.0 mm (1.61 in.)
D	37.0 mm (1.46 in.)

*Direction of paper being fed.

Borderless printing

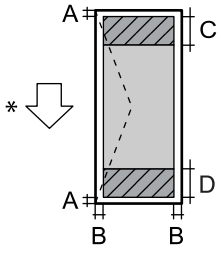

A	44.0 mm (1.73 in.)
B	40.0 mm (1.57 in.)

*Direction of paper being fed.

Printable Area for Envelopes

Print quality may decline in the shaded areas due to the printer's mechanism.

A	3.0 mm (0.12 in.)
B	3.0 mm (0.12 in.)
C	18.0 mm (0.71 in.)
D	41.0 mm (1.61 in.)

*Direction of paper being fed.

Scanner Specifications

Scanner Type	Flatbed
Photoelectric Device	CIS
Effective Pixels	10200×14040 pixels (1200 dpi)
Maximum Document Size	216×297 mm (8.5×11.7 in.) A4, Letter
Scanning Resolution	1200 dpi (main scan) 2400 dpi (sub scan)
Output Resolution	50 to 9600 dpi in 1 dpi increments
Color Depth	Color ❏ 48 bits per pixel internal (16 bits per pixel per color internal) ❏ 24 bits per pixel external (8 bits per pixel per color external) Grayscale ❏ 16 bits per pixel internal ❏ 8 bits per pixel external
Light Source	LED

ADF Specifications

ADF Type	Auto duplex scanning
Available Paper Sizes	A4, Letter, 8.5×13 in.*, Legal*
Paper Type	Plain Paper
Weight of Paper	64 to 95 g/m²
Loading Capacity	A4, Letter, 8.5×13 in.: 30 sheets or 3.3 mm Legal: 10 sheets

* Single-sided scanning only.

Even when the original meets the specifications for media that can be placed in the ADF, it may not feed from the ADF or the scan quality may decline depending on the paper properties or quality.

Fax Specifications

Fax Type	Walk-up black and white and color fax capability (ITU-T Super Group 3)
Supported Lines	Standard analogue telephone lines, PBX (Private Branch Exchange) telephone systems

Resolution	Monochrome	❏ Standard: 8 pel/mm×3.85 line/mm (203 pel/in.×98 line/in.) ❏ Fine: 8 pel/mm×7.7 line/mm (203 pel/in.×196 line/in.) ❏ Photo: 8 pel/mm×7.7 line/mm (203 pel/in.×196 line/in.)
	Color	200×200 dpi
Speed		Up to 33.6 kbps
Compression Method	Monochrome	MH/MR/MMR
	Color	JPEG
Communication Standards		G3, SuperG3
Sending Paper Size	Scanner Glass	A4, Letter
	ADF	A4, Letter, 8.5×13 in., Legal
Recording Paper Size		A4, B5, A5, Letter, Legal
Transmission Speed*1		Approx. 3 sec. (A4 ITU-T chart No.1 Standard MMR 33.6 kbps)
Page Memory*2		Up to 100 pages (when an ITU-T No.1 chart is received in monochrome standard mode)
Contacts	Number of Contacts	Up to 100
	Number of Grouped Contacts	Up to 99
Redial*3		2 times (with 1 minute intervals)
Interface		RJ-11 Phone Line, RJ-11 Telephone set connection

*1 The actual speed depends on the document, recipient's device, and the status of the phone line.

*2 Retained even during a power outage.

*3 The specifications may differ by country or region.

Using Port for the Printer

The printer uses the following port. These ports should be allowed to become available by the network administrator as necessary.

When the Sender (Client) is the Printer

Use	Destination (Server)	Protocol	Port Number
When Epson Connect is used	Epson Connect Server	HTTPS	443
		XMPP	5222
Control WSD	Client computer	WSD (TCP)	5357

When the Sender (Client) is the Client Computer

Use	Destination (Server)	Protocol	Port Number
Discover the printer from an application such as EpsonNet Config, printer driver, and scanner driver.	Printer	ENPC (UDP)	3289
Collect and set up the MIB information from an application such as EpsonNet Config, printer driver, and scanner driver.	Printer	SNMP (UDP)	161
Forwarding LPR data	Printer	LPR (TCP)	515
Forwarding RAW data	Printer	RAW (Port9100) (TCP)	9100
Forwarding AirPrint (IPP/IPPS printing) data	Printer	IPP/IPPS (TCP)	631
Searching WSD printer	Printer	WS-Discovery (UDP)	3702
Web Config	Printer	HTTP (TCP)	80
		HTTPS (TCP)	443
Forwarding FaxOut Data	Printer	IPP FaxOut (TCP)	631
PC-FAX	Printer	HTTP (TCP)	80
		HTTPS (TCP)	443*

* This port is not available outside of Europe, the Middle East, and Africa (EMEA).

Interface Specifications

For Computer	Hi-Speed USB*

* USB 3.0 cables are not supported.

Network Specifications

Wi-Fi Specifications

See the following table for Wi-Fi specifications.

Countries or regions except for those listed below	"Table A" on page 254

Ireland, United Kingdom, Austria, Germany, Liechtenstein, Switzerland, France, Belgium, Luxemburg, Netherlands, Italy, Portugal, Spain, Denmark, Finland, Norway, Sweden, Iceland, Guadeloupe, Martinique, Mayotte, New Caledonia, Saint Pierre and Miquelon, Reunion, French Polynesia, French Guiana, Wallis and Futuna, Croatia, Cyprus, Greece, North Macedonia, Serbia, Slovenia, Malta, Bosnia and Herzegovina, Kosovo, Montenegro, Albania, Bulgaria, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovakia, Israel, Australia, New Zealand, China, Hong Kong, Mongolia, Taiwan, South Korea	"Table B" on page 254
Turkey	Serial numbers starting with XCZD, XCZE, XDPB, XDPC: "Table A" on page 254 Serial numbers starting with XCZC, XDPA: "Table B" on page 254

Table A

Standards	IEEE802.11b/g/n*1
Frequency Range	2.4 GHz
Channels	1/2/3/4/5/6/7/8/9/10/11/12/13
Coordination Modes	Infrastructure, Wi-Fi Direct (Simple AP)*2*3
Security Protocols*4	WEP (64/128bit), WPA2-PSK (AES)*5, WPA3-SAE (AES)

*1 Only available for the HT20

*2 Not supported for IEEE 802.11b

*3 Infrastructure and Wi-Fi Direct modes or an Ethernet connection can be used simultaneously.

*4 Wi-Fi Direct supports WPA2-PSK (AES) only.

*5 Complies with WPA2 standards with support for WPA/WPA2 Personal.

Table B

Standards	IEEE802.11a/b/g/n*1/ac
Frequency Ranges	IEEE802.11b/g/n: 2.4 GHz, IEEE802.11a/n/ac: 5 GHz

Channels	Wi-Fi	2.4 GHz	1/2/3/4/5/6/7/8/9/10/11/12*2/13*2
		5 GHz*3	W52 (36/40/44/48), W53 (52/56/60/64), W56 (100/104/108/112/116/120/124/128/132/136/140/144), W58 (149/153/157/161/165)
	Wi-Fi Direct	2.4 GHz	1/2/3/4/5/6/7/8/9/10/11/12*2/13*2
		5 GHz*3	W52 (36/40/44/48) W58 (149/153/157/161/165)
Connection Modes	Infrastructure, Wi-Fi Direct (Simple AP) *4*5		
Security Protocols*6	WEP (64/128bit), WPA2-PSK (AES)*7, WPA3-SAE (AES)		

*1 Only available for the HT20

*2 Not available in Taiwan

*3 The availability of these channels and use of the product outdoors over these channels varies by location. For more information, see the following website.

http://support.epson.net/wifi5ghz/

*4 Not supported for IEEE 802.11b

*5 Infrastructure and Wi-Fi Direct modes or an Ethernet connection can be used simultaneously.

*6 Wi-Fi Direct only supports WPA2-PSK (AES) .

*7 Complies with WPA2 standards with support for WPA/WPA2 Personal.

Ethernet Specifications

Standards	IEEE802.3i (10BASE-T)*1 IEEE802.3u (100BASE-TX) IEEE802.3az (Energy Efficient Ethernet)*2
Communication Mode	Auto, 10Mbps Full duplex, 10Mbps Half duplex, 100Mbps Full duplex, 100Mbps Half duplex
Connector	RJ-45

*1 Use a category 5e or higher STP (Shielded twisted pair) cable to prevent risk of radio interference.

*2 The connected device should comply with IEEE802.3az standards.

Network Functions and IPv4/IPv6

Functions			Supported	Remarks
Network Printing	EpsonNet Print (Windows)	IPv4	✓	-
	Standard TCP/IP (Windows)	IPv4, IPv6	✓	-
	WSD Printing (Windows)	IPv4, IPv6	✓	-
	Bonjour Printing (Mac OS)	IPv4, IPv6	✓	-
	IPP Printing (Windows, Mac OS)	IPv4, IPv6	✓	-
	Epson Connect (Email Print, Remote Print)	IPv4	✓	-
	AirPrint (iOS, Mac OS)	IPv4, IPv6	✓	iOS 5 or later, OS X Mavericks (10.9.5) or later*
Network Scanning	Epson Scan 2	IPv4, IPv6	✓	-
	Epson ScanSmart	IPv4	✓	Windows 7 or later, or OS X El Capitan (10.11) or later
	Epson Event Manager (Mac OS)	IPv4	✓	OS X Yosemite (10.10)/OS X Mavericks (10.9.5)
	Epson Connect (Scan to Cloud)	IPv4	✓	-
	AirPrint (Scan)	IPv4, IPv6	✓	OS X Mavericks (10.9.5) or later*
Fax	Send a fax	IPv4	✓	-
	Receive a fax	IPv4	✓	-
	AirPrint (Faxout)	IPv4, IPv6	✓	OS X Mavericks (10.9.5) or later*

* We recommend using the latest version of iOS or Mac OS.

Security Protocol

SSL/TLS	HTTPS Server/Client, IPPS
TLS Version	1.3, 1.2, 1.1*, 1.0*
SNMPv3	

* Disabled by default.

Supported Third Party Services

Services		Supported	Remarks
AirPrint	Print	✓	iOS 5 or later/OS X Mavericks (10.9.5) or later*
	Scan	✓	OS X Mavericks (10.9.5) or later*
	Fax	✓	OS X Mavericks (10.9.5) or later*

* We recommend using the latest version of iOS or Mac OS.

Dimensions

Dimensions	Storage ❏ Width: 375 mm (14.8 in.) ❏ Depth: 347 mm (13.7 in.) ❏ Height: 240 mm (9.4 in.) Printing ❏ Width: 375 mm (14.8 in.) ❏ Depth: 506 mm (19.9 in.) ❏ Height: 269 mm (10.6 in.)
Weight*	Approx. 7.3 kg (16.1 lb)

* Without the ink and the power cord.

Electrical Specifications

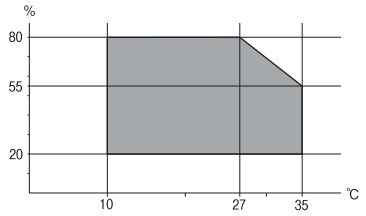

Power Supply Rating	AC 100-240 V	AC 220-240 V
Rated Frequency Range	50-60 Hz	50-60 Hz
Rated Current	0.4-0.2 A	0.2 A
Power Consumption (with USB Connection)	Standalone copying: Approx. 15.0 W (ISO/IEC24712) Ready mode: Approx. 7.4 W Sleep mode: Approx. 0.7 W Power off: Approx. 0.1 W	Standalone copying: Approx. 15.0 W (ISO/IEC24712) Ready mode: Approx. 7.4 W Sleep mode: Approx. 0.7 W Power off: Approx. 0.1 W

Note:

❏ *Check the label on the printer for its voltage.*

❏ *For European users, see the following Website for details on power consumption.*
http://www.epson.eu/energy-consumption

Environmental Specifications

Operation	Use the printer within the temperature (°C) and humidity (%) ranges shown in the graph, and in an environment without condensation. 
Storage	Temperature after initial ink charging: -15 to 40°C (-5 to 104°F)* Temperature before initial ink charging: -20 to 40°C (-4 to 104°F)* Humidity: 5 to 85% RH (without condensation)

* You can store for one month at 40°C (104°F).

Environmental Specifications for Ink Bottles

Storage Temperature	-20 to 40 °C (-4 to 104 °F)*
Freezing Temperature	-15 °C (5 °F) Ink thaws and is usable after approximately 2 hours at 25 °C (77 °F).

* You can store ink bottles for one month at 40 °C (104 °F).

System Requirements

❏ Windows

Windows 7, Windows 8/8.1, Windows 10, Windows 11 or later

Windows Server 2008 or later

❏ Mac OS

Mac OS X 10.9.5 or later, macOS 11 or later

❏ Chrome OS

Note:
Only supports the standard OS features.

Regulatory Information

Standards and Approvals

Standards and Approvals for U.S. Model

Safety	UL60950-1 CAN/CSA C22.2 No. 60950-1-07
EMC	FCC Part 15 Subpart B Class B CAN ICES-3 (B)/NMB-3 (B)

This equipment contains the following wireless module.

Manufacturer: Seiko Epson Corporation

Type: J26H005

This product conforms to Part 15 of the FCC Rules and RSS of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated so that the radiator is kept at least 7.9 inches (20 cm) or more away from a person's body (excluding extremities: hands, wrists, feet and ankles).

Standards and Approvals for European Models

The following models are CE/UKCA marked and in compliance with the relevant statutory requirements.

The full text of the declaration of conformity is available at the following website:

https://www.epson.eu/conformity

C626A, C626B

CE

Standards and Approvals for Australian Model

EMC	AS/NZS CISPR32 Class B

Epson hereby declares that the following equipment Models are in compliance with the essential requirements and other relevant provisions of AS/NZS4268:

C626A

Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product.

Standards and Approvals for New Zealand Model

General Warning

The grant of a Telepermit for any item of terminal equipment indicates only that Telecom has accepted that the item complies with minimum conditions for connection to its network. It indicates no endorsement of the product by Telecom, nor does it provide any sort of warranty. Above all, it provides no assurance that any item will work correctly in all respects with another item of Telepermitted equipment of a different make or model, nor does it imply that any product is compatible with all of Telecom's network services.

Telepermitted equipment only may be connected to the EXT telephone port. This port is not specifically designed for 3-wire-connected equipment. 3-wire-connected equipment might not respond to incoming ringing when attached to this port.

Important Notice

Under power failure conditions, this telephone may not operate. Please ensure that a separate telephone, not dependent on local power, is available for emergency use.

This equipment is not capable, under all operating conditions, of correct operation at the higher speeds for which it is designed. Telecom will accept no responsibility should difficulties arise in such circumstances.

This equipment shall not be set up to make automatic calls to the Telecom '111' Emergency Service.

ZICTA Type Approval for Users in Zambia

See the following website to check the information for ZICTA Type Approval.

https://support.epson.net/zicta/

German Blue Angel

See the following website to check whether or not this printer meets the standards for the German Blue Angel.

https://www.epson.de/blauerengel

Restrictions on Copying

Observe the following restrictions to ensure the responsible and legal use of the printer.

Copying of the following items is prohibited by law:

- ❏ Bank bills, coins, government-issued marketable securities, government bond securities, and municipal securities
- ❏ Unused postage stamps, pre-stamped postcards, and other official postal items bearing valid postage
- ❏ Government-issued revenue stamps, and securities issued according to legal procedure

Exercise caution when copying the following items:

- ❏ Private marketable securities (stock certificates, negotiable notes, checks, etc.), monthly passes, concession tickets, etc.
- ❏ Passports, driver's licenses, warrants of fitness, road passes, food stamps, tickets, etc.

Note:
Copying these items may also be prohibited by law.

Responsible use of copyrighted materials:

Printers can be misused by improperly copying copyrighted materials. Unless acting on the advice of a knowledgeable attorney, be responsible and respectful by obtaining the permission of the copyright holder before copying published material.

Nameplate

The nameplate is located on the bottom of the product.

Where to Get Help

Technical Support Web Site. 263

Contacting Epson Support. 263

Technical Support Web Site

If you need further help, visit the Epson support website shown below. Select your country or region and go to the support section of your local Epson website. The latest drivers, FAQs, manuals, or other downloadables are also available from the site.

http://support.epson.net/

http://www.epson.eu/support (Europe)

If your Epson product is not operating properly and you cannot solve the problem, contact Epson support services for assistance.

Contacting Epson Support

Before Contacting Epson

If your Epson product is not operating properly and you cannot solve the problem using the troubleshooting information in your product manuals, contact Epson support services for assistance.

The following Epson support list is based on the country of sale. Some products may not be sold in your current location, so be sure to contact Epson support for the area in which you purchased your product.

If Epson support for your area is not listed below, contact the dealer where you purchased your product.

Epson support will be able to help you much more quickly if you give them the following information:

- ❏ Product serial number

  (The label attachment position depends on the product; it may be on the back, the open side of the cover, or the bottom.)

- ❏ Product model

- ❏ Product software version

  (Click **About**, **Version Info**, or a similar button in the product software.)

- ❏ Brand and model of your computer

- ❏ Your computer operating system name and version

- ❏ Names and versions of the software applications you normally use with your product

Note:
Depending on the product, the dial list data for fax and/or network settings may be stored in the product's memory. Due to breakdown or repair of a product, data and/or settings may be lost. Epson shall not be responsible for the loss of any data, for backing up or recovering data and/or settings even during a warranty period. We recommend that you make your own backup data or take notes.

Help for Users in Europe
