

Floormount OM55

Item no.: 5600

Floor mounting system specifically for Samsung OM55B / OM55N-S

The Samsung OMN-S series includes ultra-high-brightness screens specifically designed for use in shop windows. Modern shopping centers and shop windows are now small worlds of experience, visually enhanced with video or animation based promotional content.

The OM55 Floormount is a floor-mounting system specifically designed for these slim 55" screens from the innovative digital signage series.

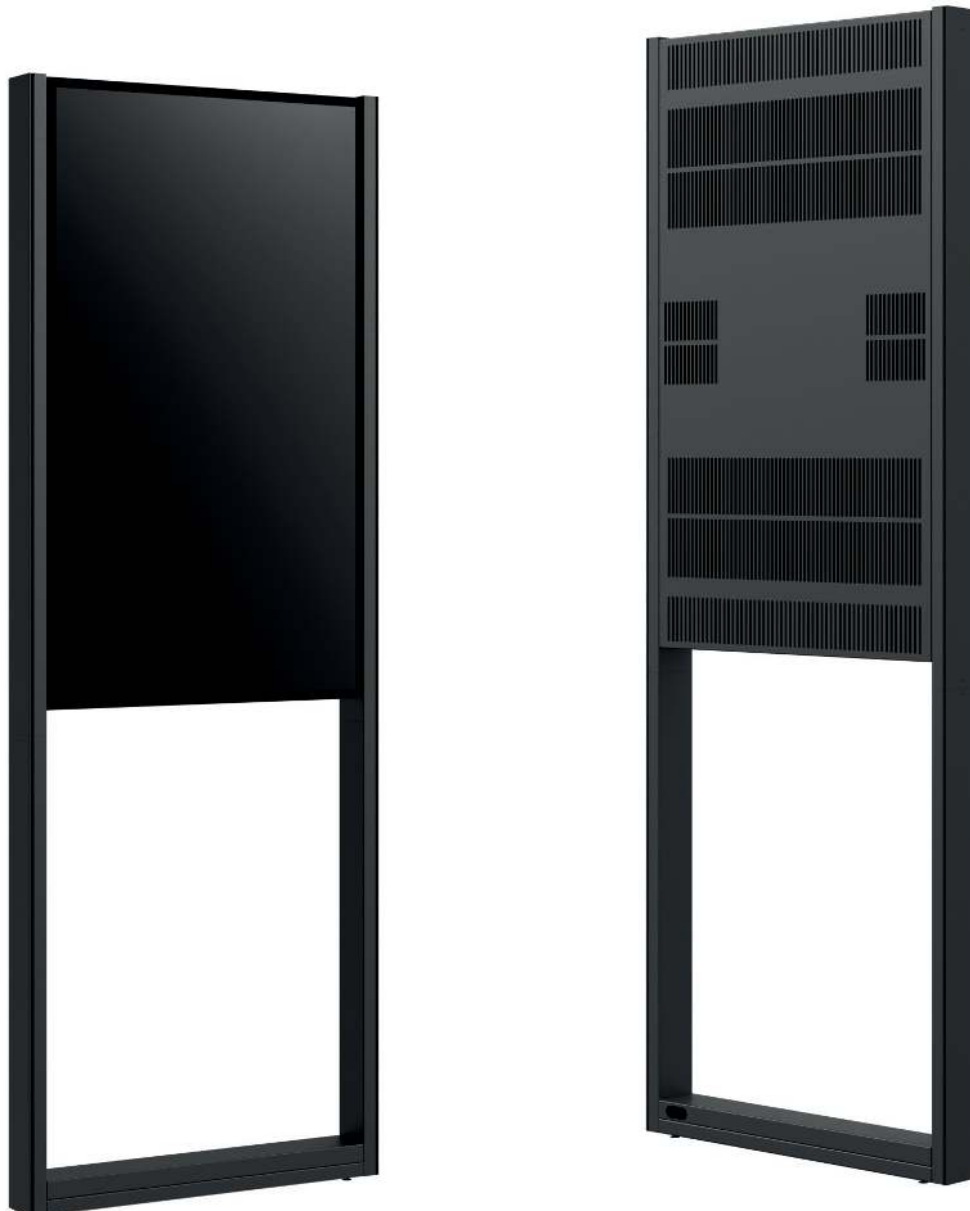

The sturdy mounting system is screwed directly to the floor, providing maximum stability.

The shallow base plate allows the system to be positioned close to the shop window.

Cable routing is integrated within the frame and the two support columns, ensuring a clean appearance.

The surface is black and finished with a solvent free, impact and scratch resistant powder coating.

Alternatively, a freestanding stand system or a ceiling mount is available.

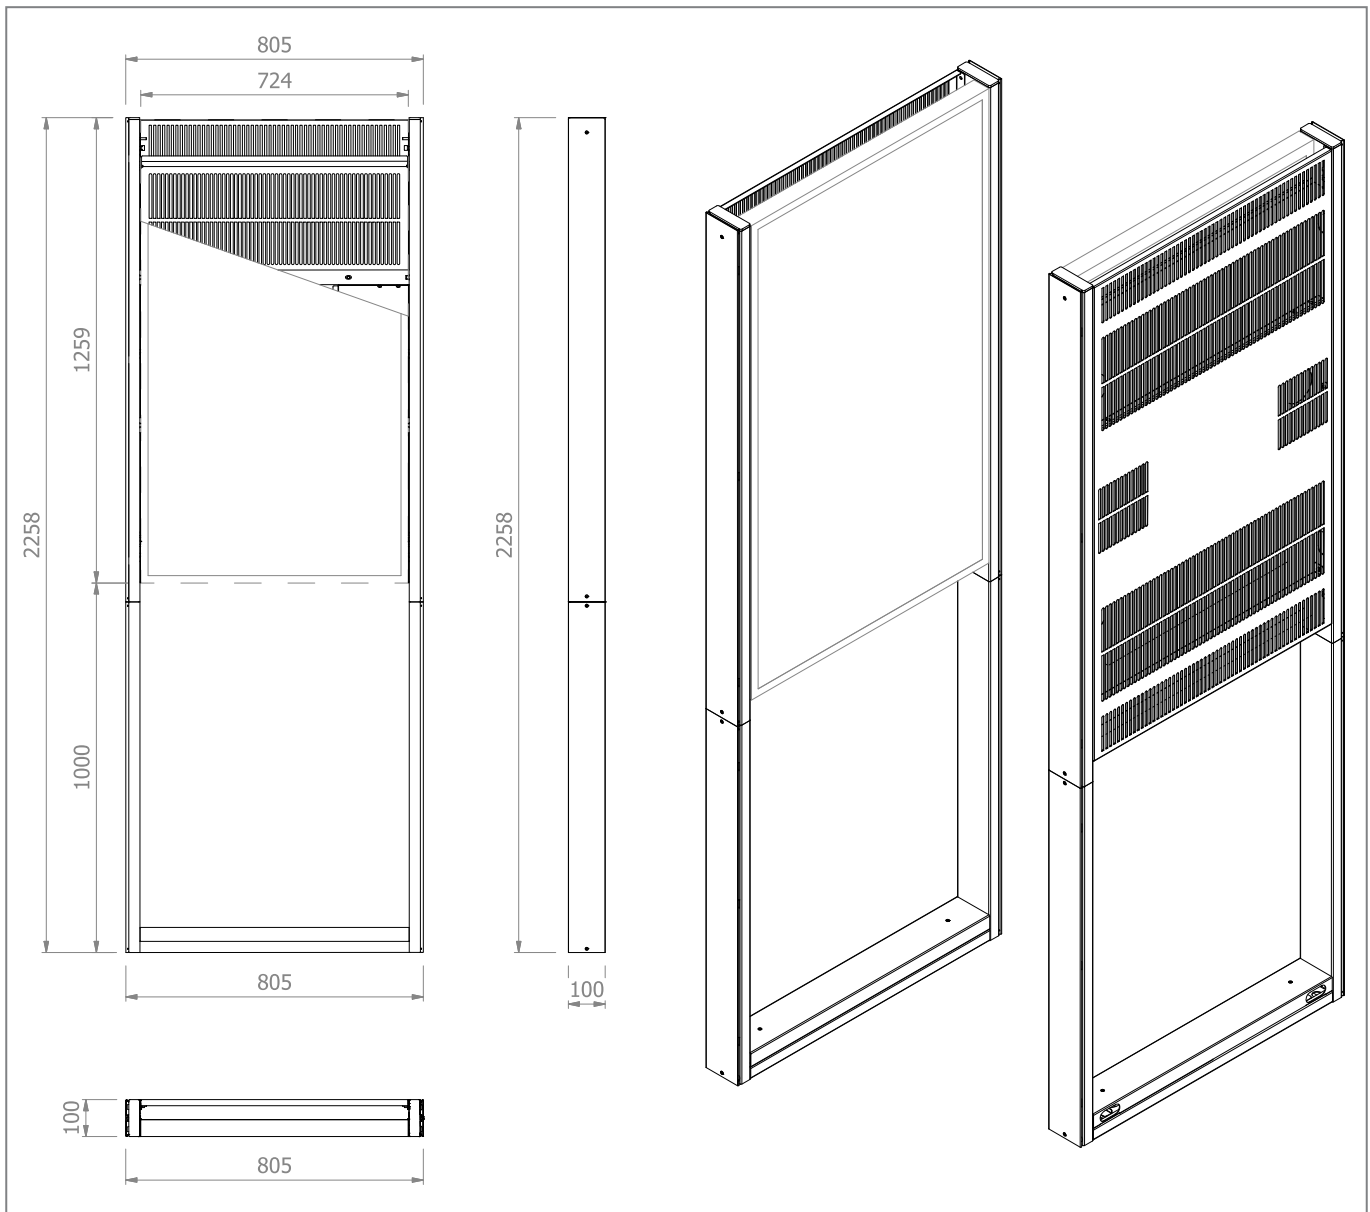

Floormount OM55

Item no.: 5600
