Highlights

Soft, flexible shield

Baby's skin needs extra care. Soft shield technology follows the natural curves of your baby's face, so they experience fewer skin marks and less irritation**. Our rounded shield minimises pressure on the cheeks for extra gentleness.

Orthodontic silicone teat

Our orthodontic teats are designed using soft silicone to support natural mouth muscle movements to help lower the risk of malocclusion. The narrow neck teat is designed to reduce pressure between the tongue and palate. Philips Avent ultra Soothers are independently accredited by the Oral Health Foundation. Made from 100% food-grade silicone, they are more durable and long-lasting than rubber (latex) teats and are free from BPA, BPS, phthalate, PVC and polycyclic aromatic hydrocarbons.

98% teat acceptance

Our textured silicone teats are designed to mimic the feel of mum's breast. When we asked parents how their little ones respond to them, an average of 98% said their babies accept Philips Avent ultra soft soothers.

Designed with experts

We worked closely with parents and healthcare professionals to develop the unique design of Philips Avent ultra soft soothers.

80% plant-based*

More sustainable choices let you give the best care with less impact on the planet. The full Philips Avent ultra range features soothers and sterilising cases made using 80% plant-based materials.*

Sterilising carrying case

The carrying case doubles as a steriliser so that soothers are always ready when you need them. Just add water and microwave for 3 minutes for easy sterilisation that generates up to 50% less CO2 emissions.***
