Description

The Cat.6A U/UTP Slim Patch Cable is a high-performance networking solution designed for modern data centers, enterprise networks, and high-density installations. Featuring a slim, space-saving design with a reduced diameter (typically around 32AWG), this cable helps improve airflow and cable management in crowded racks or patch panels without compromising performance.

Engineered to support 10 Gigabit Ethernet and frequencies up to 500 MHz, the Cat.6A U/UTP Slim Patch Cable ensures fast, reliable data transmission with minimal crosstalk and signal loss. The unshielded twisted pair (U/UTP) construction provides excellent performance in low to moderate EMI environments, while the high-quality, stranded copper conductors offer durability and flexibility for frequent reconfigurations.
