Strong suction power

- With a powerful suction power of 15,000 Pa, most types of dirt – even peppercorns, peanuts and cereal flakes – can be removed efficiently.
- There are four different suction modes to choose from for every cleaning task. The combined cleaning action of the main and side brushes ensures particularly effective floor cleaning throughout the entire house.

Hair-free main and side brush

- The RVC 3 Comfort has a special structure on the brush holder that prevents hair from getting tangled in the brushes. This reduces the maintenance effort for the user.
- The specially shaped side brush prevents hair from getting tangled in it.
- A special comb tooth structure effectively prevents hair from becoming tangled in the main brush.

Automatic dust emptying

- The automatic emptying of the dust container significantly extends the autonomous cleaning time of the RVC 3 Comfort.
- The dust container of the Comfort robot does not need to be emptied manually, thus avoiding contact with dust and dirt.
- Regular emptying of the dust container ensures that the suction power of the RVC 3 Comfort remains consistently high.
