

Grip Pro

Bakker Elkhuizen

Get a better grip on ergonomics and your work!

Every hand is different, which means that not every mouse is equally comfortable for everyone. Especially in environments where many different users work, it is important that a mouse feels comfortable and healthy for as many people as possible. Grip Pro is a vertical mouse that is versatile and designed for a natural hand position.

Ergonomic background

Working with a traditional mouse for long periods of time can lead to increased muscle tension and complaints in the hand, wrist, forearm and shoulder (Andersen et al., 2019; Oakman & Kinsman, 2021). Ergonomic mice with a (semi-)vertical angle reduce forearm rotation (pronation) compared to traditional models, while remaining familiar to users (Lin et al., 2021). Research shows that this mouse shape leads to a more neutral hand and wrist position, which is associated with lower muscle activity in the forearm and greater comfort during prolonged screen use (Aarås et al., 2021; Schmid et al., 2015). For users who want to prevent or reduce complaints, Grip Pro is an ergonomically sound solution.
