Light rated power	1,2 W
Light sensor automatically adjusts the brightness of the display	
Date and time switching display	
Stepless dimming nightlight, capacitive touch on/off	
Sleep mode: nightlight gradually dims and turns off at a fixed time	
Alarm function	
Default snooze mode	
12/24H hour system optional	
Power supply mode	Built-in rechargeable lithium battery or DC 5V input
LED color temperature	4000K

PRODUCT ILLUSTRATION

PRODUCT CHARGING AND USER GUIDE

1 PRODUCT CHARGING:

Insert the USB power cable into the device's USB power output port, and insert the other end into the power input interface to charge the product battery. The red charging indicator light turns on during charging and turns off when fully charged. If the "Lo" indicator on the display flashes, it indicates low battery and requires immediate charging to prevent the clock from resetting due to power loss.

2 BUTTON FUNCTIONS:

TOGGLE SWITCH:

When set to "Off," the nightlight is off, and the clock enters standby mode. All buttons are disabled.

When set to "On," the display screen turns on, and all buttons are operable.

When set to "Energy Saving," the display screen turns off and enters energy-saving mode.

☀️ BUTTON:

Short press: Turn on/off the nightlight.

Long press: Adjust brightness steplessly.

In "Energy Saving" mode: A short press wakes up the display screen. After 30 seconds, the screen turns off automatically. Double-tap to turn on the nightlight.

FUNCTION BUTTON:

Short press: Switch between "Year-Month-Day-Time" display.

SETTING BUTTON:

Short press: Enter alarm setting mode.

Long press (2 seconds): Enter date and clock setting mode.

UP BUTTON:

Long press (2 seconds): Switch between 12H and 24H hour systems.

When setting clock, date, or alarm: Short press to increment value step by step; long press for rapid adjustment.

DOWN BUTTON:

Short press: Decrement value step by step.

Long press: Rapidly decrement value.

3 FUNCTION SETTING:

TIME SETTING:

To set the time, press and hold the "Setting" button for 2 seconds until you hear a "tick" sound. This will activate the date setting mode, and the "year" value will start flashing. Use the "Up" and "Down" buttons to adjust the year. Once the year is set, briefly press the "Setting" button to proceed to the next parameters: "Month," "Day," "Hour," and "Minute." Adjust each value using the same method as for the year. After completing all adjustments, press the "Setting" button briefly to exit the setting mode. If no action is taken within 10 seconds, the system will automatically exit the setting mode.

ALARM CLOCK SETTING:

Press the "Setting" button once to display oFR1. Continue pressing to select oFR2 or oFR3. R1, R2, and R3 represent three groups of alarm clocks, while oF indicates that the alarm clock is off. Press the "Up" button to switch to the onR1 display, which simultaneously activates the alarm clock.

In this state, press and hold the "Setting" button for 2 seconds until you hear a "tick" sound to enter the alarm clock setting mode. First, adjust the "hour" using the "Up" and "Down" buttons. Press the "Setting" button again to switch to the "minute" setting, and adjust it similarly using the "Up" and "Down" buttons. Once the settings are complete, press the "Setting" button again to exit.

When the alarm rings, touch any button to turn it off. If no action is taken, the alarm sound will continue for 1 minute before automatically entering snooze mode for 10 minutes. During snooze mode, press any button to turn off the snooze. If the snooze cycle completes three times, the alarm will automatically turn off.

NIGHTLIGHT SETTING:

Short press the ☀️ button to turn the nightlight on/off. Long press ☀️ to adjust brightness. The light retains the last brightness level used.

HOURS SYSTEM SETTING:

The default is 24H. In the time display state, long press "Up" button to enter hour system settings. Short press "Up" button to toggle between 12H and 24H formats.

SLEEP MODE:

Long press the "Function" button to enter sleep mode. The nightlight flashes twice to confirm. In sleep mode, the nightlight gradually dims and turns off after 30 minutes. To reactivate sleep mode, long press the "Function" button again.

CAUTIONS

- This product is for indoor use only.
- Switch the power to "Off" if not used for a long time.
- Ensure that the product is not exposed to strong electromagnetic interference, as this may cause the lights to turn on or off unexpectedly.
- This product has a built-in rechargeable lithium battery. Please avoid polluting the environment when disposing of it, and try to classify and recycle the product as much as possible.
- The light source of this lamp is not replaceable. When the light source reaches the end of its life, the entire lamp should be replaced.
- The product may tip over on a table with a tilt greater than 6 degrees.

PACKING ACCESSORIES

- USB Cable × 1
- Instruction Manual × 1

In compliance with EU Directive WEEE this product is marked with this symbol. It means that used electrical and electronic products should not be mixed with general household waste.

There is a separate collections system for these products in compliance with WEEE directive, otherwise contaminative and hazardous substances can pollute the environment.

With the CE sign, Techly[®] ensures that the product is conformed to the basic European standards and directives.

We also declare the product's compliance with the minimum requirements expressed in Chapter II of EU Regulation 2023/988 (GSPR) relating to general product safety.
