One lamp. Your switch. Three light settings.

Change your room ambience to suit whatever you're doing. With the Philips SceneSwitch LED lamp, you can easily change the setting from bright light, to natural light and to a cosy warm glow. All you need is your existing switch.

High-quality light

- Light all around

Light beyond illumination

- Restore the lamp to the default factory setting
- No dimmer or additional installation needed
- The lamp can memorise your last setting

Highlights

Light all around
Thanks to its innovative, vintage design shape, this LED bulb prevents the shadow that normally appears at the beam spread edge. The result? Natural warm white light all around.

Reset (Sceneswitch)

If multiple lamps are used and they are no longer synchronised, simply toggle the switch (turn it on and off again within 1 second) to restore the lamps to the default factory setting.

Plug and play

Does not require any additional installation or a dimmer switch. This lamp is not suitable for use with dimmers. If used on a dimmer setting, the dimmer is set to 100% brightness.

Auto memory (sceneswitch)

This Scene Switch lamp has a built-in memory chip which will memorise your last light setting if the switch is turned off for longer than 6 seconds. If you don't often switch between activities, the light will be in your favourite mode when you turn it on again.
