LANCOM CPE blackline Rack Mount

19" mounting bracket for LANCOM gateways in blackline housing

With the LANCOM CPE blackline Rack Mount, you can mount your LANCOM SD-WAN gateways in the blackline CPE housing in a 19" rack in a stable and professional way. In order to store your router without being noticed, just a single height unit is required in the rack. The smart installation concept also offers you maximum flexibility in terms of device orientation, as it allows installation with the device front facing both the front and the rear. This allows either the front status LEDs to be read in the installed state or, alternatively, the rear interfaces to be reached conveniently.

- → Rack-mounting bracket for easy mounting of LANCOM SD-WAN gateways in blackline CPE housing
- → Front or rear mounting possible
- → Occupies one height unit in the 19" server rack
- → Sturdy metal housing with black powder coating
- → Dimensions: 48.3 cm x 4.4 cm x 26.6 cm (WxHxD)

LANCOM CPE blackline Rack Mount

Easy mounting of LANCOM SD-WAN gateways

LANCOM SD-WAN gateways in blackline CPE housing stow space-savingly inside 19" racks with the LANCOM CPE blackline Rack Mount. This way, you install the entire network in the server rack and see all of your devices at a glance.

Flexible gateway alignment

The LANCOM CPE blackline Rack Mount offers you maximum freedom for your device orientation: You can either install your router with the front of the device facing forward so that you can always keep an eye on the status LEDs, or you can choose to install it at the rear so that you can easily reach the interfaces.

Space-saving unit in the server rack

With the device in place, the LANCOM CPE blackline Rack Mount occupies a single height unit in a 19" rack. This enables you to install the device in a single cabinet along with your other network components.
