EN EXTERNAL HDD CASE FOR 2.5" / 3.5" HDD / SSD

Interface:	USB 3.0
Drive type:	2.5" / 3.5" SATA SSD / HDD
Data transfer rate:	5 Gb/s
Maximum supported capacity:	16 TB
Auxiliary power supply:	12 V=2 A
Dimensions:	18.3 × 11 × 2.8 cm
Weight:	300 g
Colour:	Black
Compatibility:	Windows XP / Vista / 7 / 8 / 10 / 11 / macOS / Linux

AK-87 is a functional enclosure designed for creating external mass storage based on internal hard drives. It enables the effective use of both HDD and SSD drives with a SATA interface, supporting two popular formats: 2.5" and 3.5". This solution is dedicated to expanding disk space, data archiving, and fast transfer of large files. The AK-87 design provides support for drives with a maximum capacity of up to 16 TB. The device is equipped with a USB 3.0 interface, which offers high-speed data transmission at up to 5 Gb/s. Installing a drive in the enclosure is based on a Plug & Play mechanism and does not require the installation of additional drivers. The set includes an auxiliary power supply, dedicated for use with drives that have higher power consumption. The enclosure features wide system compatibility, including Windows, macOS, and Linux.
