ThinkPad USB4 Dock 5000

Driving modern business.

The way we work has changed. Our tools should, too. The ThinkPad USB4 Dock 5000 isn't another accessory—it's a catalyst for productivity, designed for leaders who demand clarity, speed, and efficiency in every connection. Lenovo, the first PC brand to pioneer USB4 technology, has built a dock that goes beyond function—it empowers the flow of modern business.

Why you need ThinkPad USB4 Dock 5000

Command your space

Instead of juggling adapters and cables, a single USB4 connection unlocks everything: rapid charging, data transfers, video output, and seamless network access. It's one action that declutters your desk, sharpens your focus, and restores simplicity to your workspace.

Match your ambition

Big visions need bold tech. With 4x the bandwidth of last-gen USB-C docks, this system pushes limits. Drive an ultra-crisp 8K display at 60Hz for detail that inspires, or dual 4K monitors at 144Hz for multitasking at scale. Add With up to 100W PD 3.1 charging, power is not a problem.

Progress with purpose

Innovation is only complete when it's responsible. This dock is built with Environmental-in-Mind, 90% Post Consumer Content, 80% recycled material box with no plastic package. It's also TÜV-certified for reduced carbon footprint.

macOS Sonoma

Warranty

3 Years

Ship Group (What's in the Box)

Dock with Integrated 1 m USB4 Cable
100W Power Adapter
User Guide & Warranty

Security

2 x Kensington Lock Slot
(1 x Microsaver, 1 x Nanosaver)

¹ Lenovo USB-C and Thunderbolt™ Docks function with laptops that support industry standard USB-C Alt-Mode, DisplayLink, or Thunderbolt™ protocols through their Type-C™ port. Lenovo USB-C and Thunderbolt™ Docks support additional features, such as MAC address passthrough, WOL, and mirrored power button, on most Lenovo ThinkPad laptops, but such features may not be available on certain other non-Lenovo branded laptop systems.

² Depending on many factors such as the processing capability of peripheral devices, file attributes, and other factors related to system configuration and operating environments, the actual transfer rate using the various USB connectors on this device will vary and is typically slower than the data rates as defined by the respective USB specifications: - 5 Gbit/s for USB 3.1 Gen 1; 10 Gbit/s for USB 3.1 Gen 2 & 20 Gbit/s for USB 3.2.

³ The real resolution will depend on your PC and Monitor capability.

⁴ "xx" denotes a country code specific PN.
