

C111 LP

Lightweight Ear Hook Microphone

AKG
by HARMAN

Small AND Effective

The C111 LP is built of stainless steel – an almost unbreakable material – to ensure ruggedness and reliability. Still it is bendable, which allows perfect fitting to any head size of any performer. The tiny skin boom visually disappears against the face. With only 7g of weight it is very comfortable and convenient to use. A flat frequency response ensures perfect audio quality. A carrying pouch, a windscreen and a cable clip complete a microphone, fitting all AKG pocket transmitters.

Stainless steel

Soft and flexible boom

Ultralight weight design

Excellent sound

Carry pouch and cable clip

Fitting all AKG pocket transmitters
