Description

The Equip 121173 Cat.6 RJ45 Pass Through Plug is built for fast, accurate, and reliable termination of Cat.6 Ethernet cables. Its pass-through design allows conductors to be inserted through the connector and out the front, enabling installers to easily verify correct wiring order before crimping, reducing errors and improving efficiency.

Supporting Cat.6 performance, this 8P8C UTP connector is suitable for 24-27 AWG cables with a maximum cable diameter of 6.5 mm and maximum insulated wire diameter of 1.08 mm. The pass-through design ensures stable Gigabit Ethernet connections for professional networking.

Supplied in a 100 pcs/pack, this plug is ideal for creating custom-length patch cables in office installations, home networks, and professional structured cabling environments.
