Hama Payment Wristband, NFC, Pay Contactlessly, for Watch/Smart Watch, 20mm, blk

Bracelet

00178657

Pay in the blink of an eye: with the payment wristband, you can leave your wallet tucked away. Simply upgrade your (smart)watch with the NFC wristband and pay contactlessly with ease. Spontaneous coffee runs or a quick stop at the bakery - make your everyday life a little less complicated.

- Reliable partner, uncomplicated setup: connect the payment wristband to the Fidesmo app and then add the credit or debit card to Fidesmo Pay–ready for contactless payment
- Pay securely and contactlessly: the passive NFC chip is only activated when the wristband is approx. 2 - 4 cm from the card reader. A digitally encrypted token, derived from the linked card's card number, is used in the payment wristband
- Huge network: the Fidesmo app supports 800 banks worldwide, and this network is constantly being expanded - your bank is sure to be among them
- Highest standards: Visa and Mastercard agree, which is why the entire payment wristband is certified, from the wristband to the app to the chip
- Universal measurement: with the standard web width of 20mm, suitable for many analogue watches, Hama smart watches and other brands
- Timeless and elegant: design harmonises with many wristwatches and smart watches, the soft yet robust silicone is comfortable to wear against the skin
- If you lose the NFC wristband, it can be blocked via the Fidesmo app
- Unobtrusive payment wristband: nothing on the watch strap indicates it can be used for payment
- Quick closure: quickly attach the payment wristband to watches and swap them with quick-closing spring clips
- Suitable for wrists with a circumference of between approx. 14.4 cm and 22 cm (for example for the "7010" Hama smart watch), for right and left-handed people
