1. Supported frequency bands are dependent on regional variants and may not be available in all markets.
2. The maximum data rates mentioned are theoretical values. Actual performance may vary due to settings, cabling, temperature, network configuration, interface, device compatibility, environmental and on-site conditions, and other similar factors. References to power capability, signal or processing speed, signal range or distance, data encryption, storage capacity, display properties, or other performance metrics are based on optimal conditions derived from industry standards and provided for informational purposes only.
3. The actual battery life may vary depending on several factors such as network conditions, connected devices, streaming content, device settings, and battery ageing.
4. Specifications may be subject to change without prior notice.
