- Add Ingredients while cooking
- Customised temperature for precision cooking
- Protection system for safe, reliable cooking
- Durable and anti-scratch pot with PFAS-free ceramic coating
- Accessories included for convenient cooking
- 100+ tailored recipes with unlimited flavour
- HomeID app for endless inspiration

**Compared with HD2237, HD2238, HD2151, HD2136, HD2139, HD2103

****Test with WBSF and moisture content loss in pork and chicken, compared with stove-top cooking.

******Based on internal lab measurement with Philips Multicookers. Cooking times measured for red bean soup or beef (from heat-up to all pressures released) vs. a stove-top cooker, to well-cooked and soft results. Exact percentages might vary per product. (can use this disclaimer as a reference)

Highlights

Auto Pressure Release

Unlike traditional multicookers*, no manual valve turning or button pressing is required. Steam is released automatically at the end of pressure cooking — truly effortless, end-to-end cooking.

DualPulse Pressure

Unlike traditional multicookers* that hold steady pressure, our new technology alternates high and low pressure to create a precise cooking curve that locks in flavour. Up to 13% juicier** and 28% more tender** in meat.

35-in-1 multicooking

35 preset programmes — from beef, lamb, chicken, and duck to vegetables, seafood, beans, soup, rice, and more — with dedicated cooking methods from pressure cook, stew, bake, slow cook, sauté, steam, jam, yoghurt to reheat. Also, manual settings let you customise cooking time, temperature, and pressure level, and two shortcuts to save your favourite settings.

Time and energy saving

Get meals up to 70% faster with no compromise on taste and save up to 80% less energy compared to traditional methods***.

Simple intuitive control

Get step-by-step guidance tailored to your ingredients and cooking methods. Track your cooking status any time with an intuitive light bar to follow every stage of cooking — from heat-up and pressure build-up to pressure maintenance and automatic release.

Add Ingredients button

Forgot something? Simply press the button to add ingredients, shut the lid again, and your cooking programme will pick right up where it left off.

Customised temperature

Features customised high and low temperature settings for Slow Cook and Sauté, designed to suit different recipe needs and deliver ideal results every time.

Protection system

Equipped with 13 safety protection systems for worry-free cooking.

Ceramic coating

The heavy-duty inner pot features a worry-free, PFAS-free ceramic coating that resists sticking and scratches for easy use and cleaning.
