Kuando Busylight Omega
for Microsoft Lync/SfB, Cisco Jabber various UC platforms
Qualified for Lync/Skype for Business

Busylight is a 2 in 1 solution
It rings and flashes on incoming calls **preventing missed calls**
It provides visual presence to the open office **Stopping interruptions**
The Busylight software (SfB) provides valuable hot key functions **for easy call handling.**

The Busylight UC Omega is designed for the open office, front offices and cubicle environments etc. where an extra-large light and/or a higher volume ringtone is needed.

Presence indicator - Displays Lync presence state

- Manage your time by preventing, unwanted interruptions by colleagues.
- Gives you control over your availability.
- Saves walking to colleagues in the office that are busy or on a call.
- Helps prevent errors caused by interruptions.

Call / IM Alert - Rings and/or flashes on Lync/SfB and Cisco Jabber incoming calls and IMs

Call Alert - Rings and flashes on incoming calls and IMs The Busylight Lync rings/flashes when you receive an incoming Lync call or IM. You can also mute the ringtone and use the silent flashes exclusively, giving you silent Lync call notifications from a distance.

- Ensures fewer missed calls – especially in headset environments
- Helps to avoid missing IMs/Chats
- Integrated with Lync so you only hear sounds for calls and IMs
- Signals on unanswered call and IM
- Configurable volume and ringtones

Lync/SfB call handling tools (Only for Lync and Skype for Business)

- Busy-on-Busy feature. Suppress 2nd incoming calls – so you're not disturbed when on a call and forward 2nd incoming call to preselected destination
- Fast Dialout Hotkey – Highlight a number, press a hotkey to dial
- Answer/Hang-up calls Hotkey – no need to click toast or press your headset

Mounting: With adhesive tape for attachment to monitor, cubicle, screen etc.

Software – same for #15306 Busylight Alpha and #15620 KuandoBOX
