

SmallRig

Crab-Shaped Clamp

Operating Instruction

SmallRig Crab-Shaped Clamp 5319 is made from aerospace-grade aluminum, ensuring durability and strength. It features 1/4"-20 threaded holes and 1/4"-20 locating holes for versatile expansion. The swivel tip design of the clamp improves compatibility with both flat and rounded surfaces by adjusting the swivel of the clamp tips to ensure equipment stability. The clamp can be attached to surfaces up to 50mm (2.0in) wide and lined with protective pads to prevent scratches and increase clamping stability.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.

Product Details

Key Features

- 1.Expansion Interfaces: Features 1/4"-20 threaded holes and 1/4"-20 locating holes
- 2.Swivel Tip Enhancement: Increases the contact area for more stable clamping of flat or tubular objects
- 3.Max Clamping Range of 50mm / 2in: Lined with anti-slip pads for enhanced stability

Specifications

Product Dimensions: 98.6 x 71.2 x 24.0mm / 3.8 x 2.8 x 0.9in

Package Dimensions: 105.0 x 97.5 x 32.0mm / 4.1 x 3.8 x 1.2in

Net Weight: 137.0 ± 5.0g / 4.8 ± 0.2oz

Package Weight: 167.0 ± 5.0g / 5.9 ± 0.2oz

Material(s): Silicone, Plastic, Aluminum Alloy
