

# KOAMTAC® Scan and Charge

## Galaxy Tab Active2

**Rugged ▸ Powered ▸ Designed ▸ Connected ▸ Equipped ▸**

This bluetooth barcode sled scanner is the culmination of decades of engineering and human-centered design experience focused on maximizing efficiency and minimizing costs of auto-identification in any industry.

### Rugged
The KDC470/475 are IP65-rated and have a 5' drop spec. This means the device is dust tight and water resistant; it's ideal for any environment.

### Powered
Advanced power management puts the scanner in "hibernation mode" when not actively in use, allowing the battery to outlast an average work shift. When power does run out, charging is easy with a Micro USB connector, charging cradle, replacing the battery through the slot on the side, or using optinal extended battery.

### Designed
The KDC470/475 attaches to any smart device via a case for a sled scanning solution. This unique modular design allows you to upgrade your smart device without worrying about replacing the entire barcode/RFID solution.

### Connected
Bluetooth® allows seamless connectivity with any device.

### Equipped
The KDC470/475 allows for several enhancements including RFID, extended battery, and pistol grip companions - expanding the many ways you can collect data with the device.

Coming in 1D Laser, 1D CCD, and 2D Imager models the KDC470/475 is able to read all major symbologies. 8 MB of on-board memory stores over 400,000 UPC product barcodes and allows basic applications to run right on the device.

KTSync® software with keyboard wedging, application generation, database look up, inventory management, and KDC configuration features is included for Android and Windows devices. Complementary SDK and technical support from top engineers and the development team ensure ease of data collection in any situation.
