BNC016

Digital clock

- LCD alarm clock
- Vertical alignment LCD display*
- 4 levels of display brightness
- Touch snooze function
- 12/24 hour display
- Quick set function
- W140mm x H60mm x D150mm
- DC adaptor included
- Button cell back up battery included

BNC016BK

***Vertical alignment (VA) displays** are a form of LCDs in which the liquid crystals naturally align vertically to the glass substrates. When no voltage is applied, the liquid crystals remain perpendicular to the substrate creating a black display between crossed polarizers. When voltage is applied, the liquid crystals shift to a tilted position allowing light to pass through and create a gray-scale display depending on the amount of tilt generated by the electric field. The resulting appearance to the viewer is remarkable.
