

LSA Punch Down Tool

129119

The equip[®] LSA punch down tool for all data, information and telecommunications cabling. Applicable for all LSA-series and RJ45 jacks and high band. Allows the connection of conductor diameters (0.35~0.9mm) and core diameters (0.7~2.6mm). When wiring a second wire in contact, the sensor is switched off (depending on number of wires and wire specification). The cutter can be switched off to allow the looping of a potential on adjacent contacts

Specification

Type	Insertion Tool
Technology	LSA IDC Termination
Design	With Sensor
Connection	For Solid Conductor 0.7 ~ 2.6mm

Key Features

- LSA Punch Down Tool
- Robust design for continuous use
- Pressing/Cutting in one step
- Provides pull hooks and blade
- Sturdy Plastic housing
- Cutting device and tactile sensor can be switched off

Package Contents

- 1 x LSA Punch Down Tool
