FELLOWES® Helios 60

Thermal Binders

Large Office Thermal Binder

For Heavy Use

- Efficient, ergonomic design
- Thermo Sense automatically detects the spine width and selects optimum binding cycle
- Audio and visual indicators clearly signal when ready to bind
- Automatically shuts off when not in use to reduce energy consumption
- 2 year warranty

Unique features

THERMO SENSE

Heat Shield

Sleep MODE

Fellowes

FELLOWES® Helios 60

Unique Features

Safety barier prevents user contact with the heating plate. The barrier is opened manually and closes automatically

Automatically finds the optimum heat / time combination for the total document size

Automatically shuts down during periods of inactivity to reduce energy consumption

HOW DOES THE HELIOS 60 WORK…

1 The binding clamp pulls open, enabling the documents to be inserted into the binder. With the document standing on the heating element, the binding clamp can then return to support the documents during the binding cycle.
2 Opening the binding clamp activates ThermoSense. This feature automatically detects the total thickness of any document and sets the binding cycle accordingly.
3 The binding clamp includes the HeatShield feature, a safety barrier to prevent users touching the heated plate during the binding cycle.
4 The user can observe the binding progress and is alerted when the cycle is complete.
