C-3 Saphir

C-3 Saphir – attractively staged

For those who love the extravagant design, the C-3 Saphir, with its slightly tinted Tempered Glass side panel and front LED effects, that stretch across the left side of the front, makes it the ideal candidate for a high-end system with trendy LED lighting. Not only the 120mm RGB LED fan fitted as standard on the rear panel contributes to this, but above all the colors and colour change effects that can be set via a switch. Space for up to four additional, optionally available fans round off the connection variety of the integrated circuit board.

On the top of the case is a magnetic dust filter insert. At the front you will find USB 2.0 and 3.0 ports, the HD-Audio jacks and all important switches, including the manual switching of the LED effects. A removable dust filter under the power supply and a variety of ways to lay the cables, complete the offer.

- ✓RGB control board
- ✓illuminated connections in the front
- ✓120mm RGB fan
- ✓Side panel made of Tempered Glass
