

## 8-Port Gigabit Ethernet Smart Managed Pro Switches with Cloud Management Data Sheet

GS108Tv3, GS110TPv3

ing. Therefore, NETGEAR now expands Cloud Management capabilities to select models within its Smart Managed Pro switch line with these new versions of two of our most popular Smart Managed Pro switches.

The GS108Tv3 and GS110TPv3 8-Port Gigabit Smart Managed Pro Switches provides a great value, with configurable L2 network features like VLANs and PoE operation scheduling, allowing SMB customers to deploy PoE-based VoIP phones and IP surveillance. Advanced features such as Layer 3 static routing, IPv6 management, ACL, DiffServ QoS, LACP link aggregation and Spanning Tree will satisfy even the most advanced small business networks.

The GS110TPv3 adds full 8 port PoE support for deployment of modern PoE devices. Cautious spender organizations can now deploy PoE devices connected to a cost effective switch, with a reasonable PoE power budget of 55W. Each port can provide up to 30 watts to power up connected devices. Fanless, the GS110TPv3 supports perfectly silent desktop operation or wall mounting.

Specifically for these 2 new models, additional features were added for full flexibility: Single Sign-On registration for firmware and security updates and warranty entitlement. Remote Cloud Management capability with NETGEAR Insight. By activating the NETGEAR Insight Cloud management, the users will enable fundamental management features allowing businesses simpler configuration and deployment from anywhere using the NETGEAR Insight app from mobile devices or the Insight Cloud Portal from any device with a web browser.

### Highlights

#### Flexible and cost-effective solution for SMB data, voice and video converged network

- Flexible and cost-effective solution for SMB data, voice and video converged network
- 8 Gigabit 10/100/1000BASE-T RJ-45 ports
- 1 PD port to receive power from another PoE switch or injector (GS108Tv3 only)
- 55W PoE budget available across 8 Gigabit PoE+ (802.3at/802.3af) ports (GS110TPv3 only)
- 2 dedicated Gigabit SFP fiber ports (GS110TPv3 only)
- Non-blocking switching with 16Gbps and 20Gbps
- Fanless switches for silent operation in noise sensitive environment
- Flexible mounting options - desktop and wall-mounting with VESA holes

#### Powerful Connectivity and Security Features

- Layer 3 static routing with 32 routes (IPv4) for inter-VLAN local routing
- Advanced VLAN support for better network segmentation

- L2/L3/L4 access control lists (ACLs) for granular network access control including 802.1x port authentication
- Advanced per port PoE controls for remote power management of PoE connected devices including operation scheduling (GS110TPv3 only)
- Advanced QoS (Quality of Service) for traffic prioritization including port-based, 802.1p and L2/L3/L4 DSCP-based
- Auto "denial-of-service" (DoS) prevention
- IGMP Snooping and Querier for multicast optimization
- Rate limiting and priority queuing for better bandwidth allocation
- Port mirroring for network monitoring
- Energy Efficient Ethernet (IEEE 802.3az) for maximum power savings
- Cable test to troubleshoot connection issues
- SNMP v1, v2c, v3 and RMON remote monitoring

#### Fully-integrated cloud-manageable devices\*

Remote/Cloud Management capability with NETGEAR Insight. Instantly activate NETGEAR Insight Cloud management from the web GUI, given they subscribe to Basic (first 2 devices free), Premium or Insight Pro (Insight Pro is for resellers/MSP only)

#### Smart IT, not Big IT

- Easy to manage via web-Based Management GUI or Smart Control Center (Windows PC required) for multi-switch deployment
- NETGEAR Switch Discovery Tool (NSDT) to discover, register and access to the local browser interface to configure the switches
- Network Management System (NMS300), allowing all NETGEAR business products to be deployed and managed through this single interface

#### NETGEAR quality and reliability

- Worry-free Limited Lifetime Warranty\*, online technical chat support and Next Business Day (NBD) replacement.

### Features and Benefits

| Hardware Features                                                | Benefits                                                                                                                                                                                                                                                                                                 |
|------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Fully-integrated Cloud-manageable Devices                        | Require no additional hardware (cloud keys, network portals, local servers, VPN or proxy appliances etc) to directly connect to the cloud and allow remote management. No additional hardware or software. Just switch to Insight Cloud Management mode through Web browser-based User Interface and go. |
| 1000BASE-T Copper Ethernet and PoE+ (GS110TPv3 only) connections | Support high-density VoIP, Surveillance and Wi-Fi AP deployments, scalable for future growth. Never face the risk of running out of PoE ports or PoE power budget.                                                                                                                                       |
| 1000BASE-X SFP ports (GS110TPv3 only)                            | Two dedicated Gigabit SFP ports Dedicated SFP ports provide fiber uplinks without sacrificing any downlink copper Gigabit Ethernet port, and across long distances. Support for Fiber and Copper modules.                                                                                                |
| Silent Acoustics                                                 | Fanless design allows for silent operation, great for deployment in noise-sensitive environments.                                                                                                                                                                                                        |
| Energy Efficient Ethernet (IEEE 802.3az)                         | Maximum power reduction for ongoing operation cost savings.                                                                                                                                                                                                                                              |
| Desktop and Wallmount (VESA holes available)                     | Flexible deployment on desktop, wall or other location using 75mm VESA-compliant mounts.                                                                                                                                                                                                                 |
| Kensington Lock Slot                                             | Prevent theft, removal, or tampering when used for desktop deployment.                                                                                                                                                                                                                                   |

| Software Features                                                                                                                                                                                                                       | Benefits                                                                                                                                                                                                                                                                                                               |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Remote setup, management, and monitoring anywhere, anytime, from your mobile device, PC, Mac, or tablet                                                                                                                                 | Locally or remotely setup, configure, manage, monitor or even troubleshoot your network from anywhere, anytime. Check network status, view dashboards for network health and activity, power cycle PoE ports, etc, and update firmware remotely. No need to be on-site, open up ports to your network, or VPN into it. |
| Auto-join and Configure (Zero-Touch Provisioning)                                                                                                                                                                                       | Additional Insight Managed devices added to the network automatically inherit settings and configuration.                                                                                                                                                                                                              |
| Multi-site, Multi-network Single Pane-of-Glass View                                                                                                                                                                                     | View and configure multiple networks across multiple sites, all from one single app; NETGEAR Insight.                                                                                                                                                                                                                  |
| Comprehensive IPv6 Support for Management, ACLs and QoS                                                                                                                                                                                 | Build current network with future in mind. Ensure investment protection and a smooth migration to an IPv6-based network without switch replacement.                                                                                                                                                                    |
| IPv4                                                                                                                                                                                                                                    | A simple way to provide segmentation of the network with internal routing through the switch – reserving the router for external traffic routing only, making the entire network more efficient.                                                                                                                       |
| Robust security features: <ul style="list-style-type: none"> <li>• 802.1x authentication (EAP)</li> <li>• Port-based security by locked MAC</li> <li>• ACL filtering to permit or deny traffic based on MAC and IP addresses</li> </ul> | Build a secured, converged network with all types of traffic by preventing external attacks and blocking malware while allowing secure access for authorized users.                                                                                                                                                    |
| Comprehensive QoS features: <ul style="list-style-type: none"> <li>• Port-based or VLAN 802.1p-based prioritization</li> <li>• Layer 3-based (DSCP) prioritization</li> <li>• Port-based egress rate limiting</li> </ul>                | Advanced controls for optimized network performance and better delivery of mission-critical traffic such as voice and video.                                                                                                                                                                                           |

## 8-Port Gigabit Ethernet Smart Managed Pro Switches with Cloud Management Data Sheet

GS108Tv3, GS110TPv3

| Software Features (con't)                       | Benefits                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|-------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Auto-VoIP, Auto-Voice VLAN, and Auto-Video VLAN | Automatic Voice over IP prioritization (Auto-VoIP) simplifies most complex multi-vendor IP telephone deployments either based on protocols (SIP, H.323 and SCCP) or on OUI bytes (default database and user-based OUIs) in the phone source MAC address, providing the best class of service to VoIP streams (both data and signaling) over other ordinary traffic by classifying traffic, and enabling correct egress queue configuration. Similarly, Auto-Video VLAN enables IGMP snooping to minimize broadcast streams. |
| IGMP Snooping and MLD Snooping                  | Facilitate fast receiver joins and leaves for multicast streams. Save cost and improve network efficiency by ensuring multicast traffic only reaches designated receivers without the need of an extra multicast router.                                                                                                                                                                                                                                                                                                    |
| Protected Ports                                 | Ensure no exchange of unicast, broadcast, or multicast traffic between the protected ports on the switch, thereby improving the security of your converged network. This allows your sensitive phone conversations to stay private and your surveillance video clips can be forwarded to their designated storage device without leakage or alteration.                                                                                                                                                                     |
| DHCP Snooping                                   | Ensure IP address allocation integrity by only allowing DHCP messages from trusted DHCP servers and dropping malformed DHCP messages with a port or MAC address mismatch.                                                                                                                                                                                                                                                                                                                                                   |
| Dynamic VLAN Assignment (RADIUS)                | IP phones and PCs can authenticate on the same port but under different VLAN assignment policies. Users are free to move around and enjoy the same level of network access regardless of their physical location on the network.                                                                                                                                                                                                                                                                                            |
| Port Trunking/Link Aggregation (LACP)           | Build up bigger bandwidth to support aggregated uplink/downlink traffic or to provide redundant link(s). Aggregate up to 8 ports for 8Gbps connections.                                                                                                                                                                                                                                                                                                                                                                     |
| Loop Prevention and Auto-DoS Prevention         | Detect and prevent (auto port shutdown) accidental network loops and protect against DoS attacks.                                                                                                                                                                                                                                                                                                                                                                                                                           |
| PoE Timer and Scheduling (GS110TPv3 only)       | Allows IT administrators to increase network security, better utilize network resources and conserve energy by scheduling or remotely controlling on/off of PoE ports.                                                                                                                                                                                                                                                                                                                                                      |
| Port Mirroring and Cable Test                   | Many-to-one port mirroring for better and quicker network diagnostics and troubleshooting. Cable test easily identifies bad Ethernet cables.                                                                                                                                                                                                                                                                                                                                                                                |
| Dual Firmware Images                            | Dual firmware images for transparent firmware updates with minimum service interruption                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Firmware Updates from Cloud                     | Direct cloud-to-device firmware updates, initiated and/or scheduled using the Insight app, all from the palm of your hand, anytime, anywhere!                                                                                                                                                                                                                                                                                                                                                                               |

### Simply Activate NETGEAR Insight Cloud Management to manage your network. Anytime. Anywhere.

By activating the NETGEAR Insight Cloud management, the users will enable fundamental management features allowing businesses simpler configuration and deployment from anywhere using the NETGEAR Insight app from mobile devices or the Insight Cloud Portal from any device with a web browser.

Unique advanced management features of these Insight Managed devices include:

- Remote monitoring and management with performance dashboards and troubleshooting features including remote reboot, port and PoE advanced configuration including remote enable/disable/power-cycle, PoE scheduling, and firmware updates with auto-schedule mode
- Single pane-of-glass multi-device, multi-network, and multi-site remote monitoring and notifications with the NETGEAR Insight app
- Full-fledged local or remote access for configuration, management, and monitoring on a larger display using your tablet, laptop, or desktop computer through the NETGEAR Insight Cloud Portal
- Configurable in-app and email alerts and notifications
- Auto-join and configure (zero-touch provisioning) for additional Insight Managed devices added to the network
- Centralized network configuration (policies) across Insight Managed Switches, Access Points, and ReadyNAS storage for VLANs, ACLs, QoS, LAGs, etc.
- Cloud-based network administration, monitoring, and firmware management

For more information about NETGEAR Insight-manageable device settings, please see at: <https://www.netgear.com/support/product/Insight.aspx>

| L2 SERVICES - AVAILABILITY                                            |                                                                                                                    |                                                                       |
| Broadcast, multicast, unknown unicast storm control                   | Yes                                                                                                                |                                                                       |
| IEEE 802.3ad - LAGs (LACP)                                            | Yes                                                                                                                |                                                                       |
| IEEE 802.3x (full duplex and flow control)                            | Yes                                                                                                                |                                                                       |
| IEEE 802.1D Spanning Tree Protocol                                    | Yes                                                                                                                |                                                                       |

## 8-Port Gigabit Ethernet Smart Managed Pro Switches with Cloud Management Data Sheet

GS108Tv3, GS110TPv3

### Technical Specifications

| PRODUCT                                              | GS108Tv3                              | GS110TPv3 |
|------------------------------------------------------|---------------------------------------|-----------|
| IEEE 802.1w Rapid Spanning Tree Protocol             | Yes                                   |           |
| IEEE 802.1s Multiple Spanning Tree Protocol          | Yes                                   |           |
| L2 SERVICES - MULTICAST FILTERING                    |                                       |           |
| IGMP snooping (v1, v2 and v3)                        | Yes                                   |           |
| MLD snooping support (v1 and v2)                     | Yes                                   |           |
| IGMP snooping queries                                | Yes                                   |           |
| Block unknown multicast                              | Yes                                   |           |
| Multicast groups                                     | 256                                   |           |
| L3 SERVICES - DHCP                                   |                                       |           |
| DHCP client                                          | Yes                                   |           |
| DHCP snooping                                        | Yes                                   |           |
| Number of DHCP snooping bindings                     | 256                                   |           |
| L3 SERVICES - ROUTING                                |                                       |           |
| IPv4 static routes                                   | 32                                    |           |
| VLAN routing                                         | Yes                                   |           |
| Host ARP table / NDP cache (number of entries)       | 512 ARP                               |           |
| ICMP Router Discovery Protocol (IRDP)                | Yes                                   |           |
| LINK AGGREGATION                                     |                                       |           |
| IEEE 802.3ad - LAGs (LACP)                           | Yes                                   |           |
| Manual Static LAG                                    | Yes                                   |           |
| # of Static or LACP LAGs<br># of members in each LAG | 8 LAGs with max 8 members in each LAG |           |
| NETWORK MONITORING AND DISCOVERY SERVICES            |                                       |           |
| 802.1ab LLDP                                         | Yes                                   |           |
| LLDP-MED                                             | Yes                                   |           |
| SNMP                                                 | Yes                                   |           |
| RMON group 1,2,3,9                                   | Yes                                   |           |
| NETWORK SECURITY                                     |                                       |           |
| IEEE 802.1x                                          | Yes                                   |           |
| Guest VLAN                                           | Yes                                   |           |
| RADIUS-based VLAN assignment via .1x                 | Yes                                   |           |
| MAC-based .1x                                        | Yes                                   |           |
| RADIUS accounting                                    | Yes                                   |           |
| Access Control Lists (ACLs)                          | L2 / L3 / L4                          |           |
| IP-based ACLs (IPv4 and IPv6)                        | Yes                                   |           |
| MAC-based ACLs                                       | Yes                                   |           |
| TCP/UPD-based ACLs                                   | Yes                                   |           |

## 8-Port Gigabit Ethernet Smart Managed Pro Switches with Cloud Management Data Sheet

GS108Tv3, GS110TPv3

### Technical Specifications

| PRODUCT                                                                | GS108Tv3                                                                                                           | GS110TPv3 |
|------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------|-----------|
| MAC lockdown                                                           | Yes                                                                                                                |           |
| MAC lockdown by the number of MACs                                     | Yes                                                                                                                |           |
| Control MAC # Dynamic learned entries (per port)                       | 4096                                                                                                               |           |
| Control MAC # static entries (per port)                                | 48                                                                                                                 |           |
| IEEE 802.1x RADIUS port access authentication/type                     | Yes                                                                                                                |           |
| Port-based security by locked MAC addresses                            | Yes                                                                                                                |           |
| Broadcast, multicast, unknown unicast storm control                    | Yes                                                                                                                |           |
| DoS attacks prevention                                                 | Yes                                                                                                                |           |
| Protected ports                                                        | Yes                                                                                                                |           |
| QUALITY OF SERVICE (QOS)                                               |                                                                                                                    |           |
| Port-based rate limiting                                               | Yes, egress                                                                                                        |           |
| Port-based QoS                                                         | Yes                                                                                                                |           |
| Support for IPv6 fields                                                | Yes                                                                                                                |           |
| DiffServ QoS                                                           | Yes, ingress                                                                                                       |           |
| IEEE 802.1p COS                                                        | Yes                                                                                                                |           |
| Destination MAC and IP                                                 | Yes                                                                                                                |           |
| IPv4 and v6 DSCP                                                       | Yes                                                                                                                |           |
| IPv4 and IPv6 ToS                                                      | Yes                                                                                                                |           |
| TCP/UDP-based                                                          | Yes                                                                                                                |           |
| Weighted Round Robin (WRR)                                             | Yes                                                                                                                |           |
| Strict priority queue technology                                       | Yes                                                                                                                |           |
| Auto-VoIP VLAN / Auto-Voice VLAN                                       | Yes, based on OUI bytes (default database and user-based OUIs) in the phone source MAC address                     |           |
| Auto-VoIP                                                              | Yes, based on protocols (SIP, H.323 and SCCP). Prioritizes traffic to a higher queue.                              |           |
| Voice VLAN                                                             | Yes, based on either VLAN ID or 802.1p priority, packets are passed onto the connecting VoIP phone using LLDP-MED. |           |
| Auto-Video VLAN                                                        | Yes                                                                                                                |           |
| OTHER FEATURES                                                         |                                                                                                                    |           |
| Advanced per-port PoE controls (enable/disable/power limit)            | N/A                                                                                                                | Yes       |
| Advanced per-port PoE scheduling/timers                                | N/A                                                                                                                | Yes       |
| Loop detection & prevention                                            | Yes (both)                                                                                                         |           |
| DNS Client                                                             | Yes                                                                                                                |           |
| Option to enable/disable BPDU flooding when STP is disabled            | Yes                                                                                                                |           |
| Option to enable/disable the flooding of EAPOL when 802.1x is disabled | Yes                                                                                                                |           |

\*This product comes with a limited warranty that is valid only if purchased from a NETGEAR authorized reseller, and covers unmodified hardware, fans and internal power supplies – not software or external power supplies, and requires product registration at <https://www.netgear.com/business/registration> within 90 days of purchase; see <https://www.netgear.com/about/warranty> for details. Intended for indoor use only.

\*\* The NETGEAR OnCall 24x7 contract provides unlimited phone and email technical support for your networking product. For ProSAFE products purchased prior to 06/2014, also includes nextbusiness-day hardware replacement.

† NETGEAR #1 in US Market Share according to NPD data for Unmanaged and Web/Smart Switches, August 2018. NETGEAR #1 in Europe Market Share according to Context data for Unmanaged and Web/Smart Switches, June 2018.
