

USB Type-C™ – All-In-One Plug!

DIGITUS®

More and more manufacturers are relying on USB Type-C™ instead of the classical USB or micro USB interface. Whether on a laptop, smartphone, or tablet - the Type-C™ interface makes it possible to connect peripheral devices simply and conveniently, because the **plug is reversible**. Gone are the days when the user had to place him- or herself at eye level with the USB interface in order to make sure that the plug was being inserted in the correct orientation.

In the long term, it is to be expected that the Type-C™ will supersede the USB Type-A. Because the new plug offers many advantages: for example, its compact size. It measures a mere 8.4 x 2.6 mm. This makes it possible for manufacturers to accommodate more slots or develop even slimmer devices. Furthermore, the interface with the USB 3.1 standard offers increased data transfer rates.

Thus, image signals can also be transmitted and monitors connected. For an adequate power supply, up to 100 V / 5A can be made available via the USB Type-C™.

The current challenge: Whoever buys a new smartphone, tablet, or notebook nowadays, has to connect peripheral devices via the traditional USB Type-A connection. To do this, cables and adaptors are necessary. We offer you cables and adaptors for all established combinations in all price ranges.

*With the Type-C™ cables, pay attention to the **USB version**. The cables are available in USB 2.0, USB 3.1 Gen1 and USB 3.1 Gen2 versions, each of which has different features.

*see page 3.

Transfer rate

Up to 10 Gbit/s
20x faster than USB 2.0
2x faster than USB 3.0

Image quality

Ultra-HD 4K resolution for
USB-C capable screens
4x higher than Standard HD

Reversible plug

Simple and convenient. The
connection functions regard-
less of orientation.

Power delivery

Charge your devices via the
available connection.

Universal

Laptop, tablet, smartphone -
connect all your devices with
just one cable.
