

LANCOM SPSU-250

Hot-swappable power supply unit for the LANCOM XS-5116QF and XS-6128QF

This power supply unit is the ideal solution for maximum reliability when using the aggregation switch models LANCOM XS-5116QF or LANCOM XS-6128QF in business-critical network environments. The additional power supply unit has its own slot and offers the possibility of changing the power supply unit during operation, thus providing a highly available, redundant power supply for the switches.

- 250 Watt power supply unit
- Improved failover of the LANCOM XS-5116QF or the LANCOM 6128QF
- Hot-swappable - can be inserted during operation
- Input voltage: 110 VAC and 230 VAC
- Output voltage: 12 V @20 A
- Over current protection
- Over voltage protection
- Over temperature protection
- Operating temperature: 0°C to 50°C
- Not suitable for operation in ambient temperatures below -40°C and above 70°C
