Fan Set Argus RS-06 RGB – makes your world more colorful!

The three 4pin PWM 120mm RGB fans from Argus, in combination with the optionally available RGB LED strip, provide great lighting for your PC case and offer over 300 different effects and modes with the included wireless remote control and control unit. If that is not enough for you, you can also use the integrated 5V RGB header (addressable RGB LEDs) to manage and control all RGB LEDs synchronously via the mainboard.

The 8 integrated RGB LEDs per 120mm fan, which are located in the inner ring, guarantee extraordinary lighting effects. Rubberised pads underneath the mounting holes reliably prevent vibrations from being transmitted to the PC housing and ensure smooth operation at up to 1200rpm and 22 dBA.

The set can easily be expanded with up to five additional Argus RS-061 RGB fans and two additional Argus RS-042 RGB LED strips available as an option.

- ✓Radio remote control (about 10m range)
- ✓3pin RGB header connector for 5V RGB motherboard control
- ✓8 bright RGB LEDs per 120mm fan
