

HDMI 8K Version Cable

Overview

The MicroConnect Ultra High Speed HDMI with Ethernet cable, supports the latest HDMI features according to specification 2.1. This cable complies with the latest standard "Ultra High Speed with Ethernet" and can transmit a bandwidth of 48Gbps, which is enough for resolutions up to UltraHD-2 / 4320p / 8K. It is of course backwards compatible with all older HDMI specifications.

MicroConnect 2.1 HDMI cables is a safe investment in future-proof digital cabling and is perfectly suited for professional and B2b applications thanks to several EMI shielding's and full 48Gbps bandwidth.

Features

- Tested on TotalPhase advance cable tester 2 before shipment
- Support up to 8K with 60Hz
- Gold plated connectors
- Triple shielded to reduce EMI
- Audio Return Channel (ARC)
- Ethernet Channel (HEAC)
- HDMI 2.1 Version
- Conductor: high purity copper
